The Balance Sheet of the General Ledger, as of February 28, 1871, exhibits the following as the summing up of accounts:

Capital stock		$357,407 69
Funded debt		2,897,997 82
Bills payable		64,273 85
Land scrip		3,558 29
Gray and Kennedy mortgage		140 00
Preferred stock		96,664 87
Total		$3,420,042 52
Road and equipment	$3,036,643 88	
Bills receivable	32,293 78	
Special loan fund	116,692 85	
Extension to Mississippi river	131 00	
Sundries	14,707 81	
Profit and loss	219,573 20	
Total		$3,420,042 52

The funded debts of the V. and M. company, including interest to January 1, 1867, amounted to about $3,000,000 and have been or will be converted into 7 per cent. general mortgage bonds (four series), dated March 15, 1866, and due January 1, 1890. Interest on 1st, 2d, and 3d endorsed bonds is payable January and July, and on the 4th or unendorsed series in April and October. The debt as so far arranged will stand as follows:

1st series 7 per cent. (red)	$722,500
2d series 7 per cent. (blue)	850,000
3d series 7 per cent. (black)	154,000
4th series 7 per cent. (not endorsed)	1,273,500
	$3,000,000
Special loan 8 per cent. bonds	225,438

All interest on the endorsed and loan bonds, up to and including coupons due January, 1869, and on the non-endorsed bonds up to and including coupons due April 1, 1868, is to be converted with the consent of the bondholders into a 7 per cent. preferred stock, and after those dates such percentage as receipts of the road permit is to be paid in cash to the endorsed loan bondholders, any deficiency to be funded in said preferred stock. Each bondholder is entitled to one vote for each $100 held.

Managers.—Morris Emanual, Thomas Rigby, A. B. Reading, William Crutcher, Peter Anderson, Thomas M. Smedes, James R. McDowell, William E. Morris, J. C. Stanton and John A. Klien.

President.—Morris Emanuel.

Vice President.—Thomas Rigby.

Secretary and Treasurer.—N. G. Bryson.

General Superintendent.—E. F. Raworth.

Master of Transportation.—Geo. D. Lawrence.

Narrow Gauge Locomotives.

The narrow gauge locomotives, built by the Baldwin Locomotive Works for the Denver and Rio Grande Railway, have been set up and tried on the line of that road near Denver and are now in operation in the construction of the road. About three and a half miles of narrow gauge track (3 ft.) had been laid out of Denver at last account, and upon this the small engines have been thoroughly tested. Immediately upon leaving Denver the track is laid to a temporary grade of 140 ft. to the mile. Up this grade the freight locomotive pulled 20 of their four-wheeled flat cars loaded with railroad iron. The engine hauled this train without difficulty, stopping, and starting, readily with it on the grade. This engine has three pair of divers 36 inches in diameter, a "pony truck" in front, and weighs, in running order, 34,000 pounds.

The passenger engine "Montezuma" (with two pairs of drivers and "pony truck;" weight, 25,000 pounds) drew a train of six passenger cars at a speed of thirty miles an hour, making the time with ease. The engines ride well and steam freely. We are permitted to print the following letter from General Superintendent and Chief Engineer Greenwood, who has charge of the construction and operation of the line:

"Denver and Rio Grande Railway,
"Denver, Colorado, Aug. 14th, 1871.

"Messrs. M. Baird & Co.:

"Gentlemen—This is to certify that your Engineer has delivered to the D. and R. G. Railway, the three engines constructed for them by your company. The engines as far as they have been used have proved a perfect success, and I fully believe they will perform all the work they were guaranteed to perform. I have always had full faith in the success of the Narrow Gauge (three feet in this case) and the working of the engines as well as of the other rolling stock, which we now have on hand, fully demonstrate that we were justified in reducing the gauge on our road.

"Very truly yours,
(Sd.) "W. H. Greenwood,
"Gen'l Sup't and Gen'l Manager."

☞ The route of the New York West Shore and Chicago Railroad is from Jersey City to Catskill, from thence to Syracuse, and from thence to Buffalo. The new railroad claims to control a frontage of twenty-two miles along the bulkhead line of New York harbor. The estimates contemplate a double track railroad of four feet eight and a half inch gauge. Cost of the eastern division, $7,655,000; the middle division, $10,106,000; the western division, $8,452,500. Total, $26,213,500. The length of the proposed road is 420 miles.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, August 26, 1871.

Stock Exchange and Money Market.

The Money movement has been quite steady through the week as to rates, though against the city bank resources, which have been seriously reduced, in the specie line, by the customs drain; and in the legal tender form, by the outflow of funds to the interior for crop forwarding purposes. The demand from street borrowers for accommodation has not been urgent, and has been promptly met, at the ruling figures. The mercantile inquiry has been fairly active, chiefly in connection with the Fall trade. The current quotations for Money at the close were 2@5 mainly 3 per cent., on call and at 5@8½, per cent. per annum on very choice to fair business credits, with the bulk of the business in the latter reported in mercantile notes, grading strictly choice to prime, and rated at 5@7 per cent. per annum. The city banks, in their last weekly exhibit, show a loss of 2¼ millions of legal tender notes, nearly three millions of specie, and nearly four millions of deposits, with an increase of about 2½ millions in their loan and discount averages, and a reduction of $37,857 in their item of circulation. The U. S. Sub Treasury increased its currency balance $269,017, and its coin reserve, over two millions as the result of the week's business. The city bank exchanges, last week, averaged $75,923,511; and thus far, this week, 72 millions daily. The banks now hold $10,131,050 of specie and legal tender notes, in excess of the 25 per cent. of their liabilities required by the national banking Act. The receipts of the U. S. Sub-Treasury office were $5,054,426 in coin, and $3,826,642 in currency; payments, $2,983,975 in coin, and $3,557,625 in currency. The office received $1,406,000 in coin or its equivalent, from customs; and disbursed $491,512 of coin interest.

The specie reserve of the city banks according to the latest return is $9,408,805, against $20,733,346 same time last year. The city bank deposits are now $247,257,470 against $205,531,818 week ending August 29, 1870. The legal tender reserve amounts to $70,098,500 against $50,853,286 same time last year. The circulation now stands at $30,247,552, against $32,839 567 same time last year. The loans are now $304,537,429, against $275,772,982 at this date last year.

The U. S. Sub-Treasurer retired, last week, $8,996,375 of coin certificates, received for customs.

The U. S. Sub-Treasury, on Thursday morning of this week, held a balance of $9,548,974 in currency, and $64,293,526 in coin against a balance a week previous of $9,548,974 currency, and $64,293,526 coin.

Government revenues show a liberal yield in the line of customs. The excises yielded last week about 2¼ millions, and thus far since July 1, $21,816,561. The customs at the port of New York, last week were $4,309 375; and at the outports, equal to about 1½ millions more, all in coin, or coin certificates.

The features of the Gold movement, during the week, has been the speculative activity in Gold loans, which have been made at exceptionally high rates, as high on Tuesday as ½@1 per cent. a day, as against parties short of Gold for prompt delivery. When the speculative manipulators of the supply had worked the price for the immediate use of coin up to these oppressive figures, Government on having been apprised of the state of affairs, ordered the weekly sale of at least $2,000,000 to take place on Wednesday, in place of Thursday. The purchases of $1,000,000 U. S. 5-20s were made at the same time in regular course. Apart from this "corner in cash Gold," the business in the Gold Exchange was comparatively uninteresting. The main regular demand was for custom house purposes. The export call was light. The supply of Gold on Wednesday, after the Government sale, was more liberal, relieving the pressure in the loan market. At the close, 2@4 per cent. per annum was paid for carrying gold. The range of the price during the week, has been from 112¼@113¼, and the closing quotation on Wednesday was 112¼@112⅝ against 112⅜ the preceding Wednesday. The specie outflow, last week, was $647,340; on Tuesday of this week, $31,700; and on Wednesday, $128,000. The Gold Exchange Bank clearances have been as follows: August 17, $33,156,000; August 18, $53,878,000; August 19, $75,826,000; August 21, $47,750,000; August 22, $69,950,000; August 23, $84,082,000. On Wednesday Government marketed two millions of Gold at 112 17@112 38⅛. The proposal amounted to $6,036,000.

The customs at this port on Wednesday were $941,000.

Government disbursed through the U. S. Sub-

Treasury here, on account of the coin interest on the public debt from Jan. 1, to Aug. 19, 1871 $61,090,565, against $62,192,466 same time in 1870.

Of the September coin interest on the 10-40 Loan, under orders from Secretary Boutwell, the Sub-Treasury disbursed $950,000 on Tuesday (when the anticipatory payment was begun); and $670,000 on Wednesday of the current week.

The customs demand for Gold last week, averaged $734,396 a day; thus far, this week, it has averaged $587,500 a day, or equal to a weekly aggregate of $3,525,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $42,619, and since Jan. 1, 1871, $7,405,207 against $7,552,480 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $101,984,954 against $86,798,740 same time in 1870.

The export drain was $647,340 last week, against $2,284,637, same week preceding year The shipments since January 1, 1871, have been $52,877,856, against $42,990,445 same time in 1870.

Foreign Exchange has been depressed and unsettled, mainly by the speculative pinch in the Gold market. The demand has been limited. Bankers' sixty day bills on London closed on Wednesday decidedly firmer, however, with a better inquiry at 108⅜@109⅛; sight bills on London, 109¼@109⅝.

The produce exports from this port, week ending with Aug. 22, were to the currency value of $4,729,487.

The specie exports from San Francisco, from Jan. 1, to Aug. 3, were $10,703,399; against $22,-415,837 same time last year. The customs receipts at San Francisco were $4,347,603, against $4,892,304 same time in 1870.

Under the official programme for August, Government proposed to sell Gold, during the month, as follows: Thursday, August 31, $2,000,000. And buy in of Five Twenties, as follows: Wednesday, August 30, $1,000,000.

On Wednesday, Government bought in a million of Five-Twenties at 111 88@112 28, ex-interest. The amount of bonds offered was $3,374,350 at 111 88@112 48.

Government securities have been in very good request, and quoted firmer in price, influenced by the prompt success of the Five per cent. funding Loan in Europe, where the whole $80,000,000 assigned to the London syndicate was applied for on Wednesday, the first day of the opening of the books. It was deemed likely that the subscriptions would close on Wednesday in place of Thursday, as had been previously announced, and that the amounts applied for would have to be scaled. The American $50,000,000 is being rapidly applied for by the National Banks. This privilege will also be closed in a few days, if the whole amount is so soon applied for, as seems now more than probable. The rule is first come first served, without reference to amount, and six days, in place, of sixty days, may complete the negotiation. The home demand for the old Loans has been mainly for the bonds, which have the largest time to run, and on which the best prices have been made.

U. S. sixes of 1881 closed here on Wednesday of the current week at 118¾@119; U. S. Five-Twenties of 1862, 114@114⅜; U. S. Five-Twenties of 1864 at 114@114¼; U. S. Five-Twenties of 1865, 114@114¼; U. S. Five-Twenties of 1865 consolidated, 113⅛@113¼; U. S. Five-Twenties of 1867, 113⅛@113⅜; U. S. Five-Twenties of 1868, 114@114¼; U. S. Ten-forties at 114¼@114½; U. S. Six per cent. currency bonds, 116½@116⅝.

* Ex September coupon.

State bonds have been in quite moderate demand at irregular prices.

Railway bonds have been in good investment demand at stronger prices for the favorites of the older loans. The chief business has been through the commission houses. Central Pacific Sixes closed on Wednesday at 99¼@99½. The Chesapeake and Ohio Six per Cent. Bonds have been actively sought after, and considerable amounts of the Loan have been taken by investment buyers, directly by purchase, or through conversions of United States Bonds, at the ruling price of 92 per cent. and accrued interest.

Business in Railway and miscellaneous share property has been fairly active, with, however, considerable irregularity in values, closing on Wednesday.

We learn from Messrs. Tanner & Co., financial agents for the St. Joseph and Denver City eight per cent. gold bonds, that the total sales at the close of business on Wednesday were nearly 2½ millions. The total amount of this loan is $5,-500,000, and nearly half of this sum has been sold in the space of twenty days, the loan having been opened on August 1. The price of the bonds at present is 97½ and accrued interest in currency, with the probability that it will be advanced by order of the Company. The bonds are a first mortgage on 1,500,000 acres of the finest agricultural lands in the State, as well as on the railroad with all its franchises and properties. The Union Pacific Land Company's sales average $4 35 per acre for lands inferior to those of the St. Joseph and Denver City road. At this low valuation the St. Joseph and Denver City Company's lands will realize about $1,000,000 more than the whole of the company's first mortgage bonds. The bonds of the Eastern Division loan, which was closed some time ago, are now selling at a large premium.

General business has shown less activity. The Gold pinch has been against the export trade. Cotton, Flour, Corn, Pork and Lard closed firmer on Wednesday; Wheat, rather heavily. Middling upland cotton closed on Wednesday at 19⅛ cts. per lb. The receipts at all the ports, since Sept. 1, have been 3,972,125 bales, against 2 842,360 bales same time last year; exports 3,143,363 bales, against 2,194,348 bales same time last year; stock at the ports at latest dates 135,828 bales, against 85,714 bales same date 1870.

At the Live Stock Markets, Beeves have been in moderate request at from 8@12½ cts.; Veals at 4@10 cts.; Sheep at 4@6½ cts.; Lambs at 6@9 cts.; Swine, 5@5⅜ cts per lb., all live weight. The week's receipt were 7,856 Beeves, 1,949 Veal Calves, 30,708 Sheep and Lambs; and 16,397 Swine.

Foreign goods have been in moderate demand at fairly supported prices. The week's imports of foreign goods reached $7,168,065, including $3,-236,154 of dry goods.

Ocean freights have been less active, rates having been quoted firmer on a reduced supply of room.

INVESTMENT SECURITIES.

JAY COOKE & Co. are now selling, and recommend as a profitable and safe investment for all classes, the First Mortgage 7-30 Gold Bonds of the Northern Pacific Railroad Company. They have 30 years to run, bear Seven and Three-Tenths per cent. gold interest (more than 8 per cent. currency), and are secured by first and only mortgage on the ENTIRE ROAD AND ITS EQUIPMENTS, and also, as fast as the Road is completed, on 23,000 Acres of Land to every mile of track, or 500 acres for each $1,000 Bond. They are exempt from United States tax; principal and interest are payable in gold. Denominations; Coupons, $100 to $1,000; Registered, $100 to $10,000.

Northern Pacific 7-30s are at all times receivable, at TEN PER CENT. ABOVE PAR, in exchange for the Company's lands, at their lowest cash price.

The proceeds of all sales of lands are required to be devoted to the repurchase and cancellation of the First Mortgage Bonds of the Company. The Land Grant of the Road exceeds Fifty Million Acres in the most fertile portion of the Northwest, and the demand for the Company's lands for settlement already exceeds the ability of the Government to complete the surveys. This immense Sinking Fund will undoubtedly cancel the principal of the Company's bonded debt before it falls due.

Holders of U. S. Five-Twenties, who wish to convert them into a first-class railroad security, can do so at a present profit of about 12 per cent., while increasing their interest income nearly one-fourth, by exchanging them for Northern Pacific 7-30s.

All marketable stocks and bonds will be received in exchange at their highest current price. Full information, maps, pamphlets, etc., will be furnished on application to any agent for the loan, or to JAY COOKE & Co., New York, Philadelphia or Washington.

Barrow Hematite Steel Company.

Besides a general and continual increase in the capacity and efficiency of these works, the important addition of a twelfth blast furnace has been erected. The producing power of Barrow knows no limit. New markets open up and more efforts are made to produce the required supply. The great French iron manufacturer and statesman, Schneider, of Creusot celebrity, says of these works, "They are marvellous."—*Globe.*

☞ Chief Engineer W. Milner Roberts, in a published card, pays a warm tribute to the venerable Edwin F. Johnston, the original Chief Engineer and at present Consulting Engineer of the Northern Pacific Railroad, who as early as 1854 made a report upon the route, and has since labored unceasingly for the advancement of the road.

☞ The engineering and surveying party of the Catskill and Schoharie Valley Railroad commenced operations on the 14th inst.

BANKING AND FINANCIAL.

NEW YORK, Aug. 22, 1871.

☞ OFFICE OF FISK & HATCH,
BANKERS, No. 5 NASSAU ST.

Five-twenty Bonds are to day selling at.....114
Central Pacific Sixes at.....100
Chesapeake and Ohio Sixes at.....92 and interest

Holders of 5-20s, by conversion into Centrals, retain the same interest and increase their capital 14 *per cent.*, or into the Chesapeake and Ohios with an increase of 20 *per cent.*; or holders of Centrals can exchange for Chesapeake and Ohios, and increase their capital about 7 *per cent.* The popularity of the Centrals, their availability and quick market at all money centres in the world *so soon after the completion of the road*, are very gratifying to us, and must be also to all holders of the bonds; that the same popularity and availability will attach to the Chesapeake and Ohios, and that they will command equal price with the Centrals in due time, we have no doubt. The near approach of the time when the Secretary of the Treasury will call in a vast amount of Five-twenties and pay them in gold, behooves all holders to be looking for new investments; and to all such we recommend the *Six per cent. Gold Bonds, principal and interest, of the* CHESAPEAKE AND OHIO RAILROAD COMPANY.

Length of road, 427 miles.

Finished and running, 227 miles.

Additional to be completed by Oct. 1, ninety-five miles.

Leaving 105 miles, which will be completed Sept. 1, 1872.

Total amount of this loan, $15,000,000.

Total cost of road, depots, equipments, &c., $30,000,000.

The amount remaining unsold, about $7,000,000, will soon be absorbed. They are issued in denominations of $1,000, $500, and $100.

FISK & HATCH.

HARVEY FISK.
A. S. HATCH.

☞ The Harlan and Hollingsworth Company, of Wilmington, Del., are constructing an iron steamship, of 2,300 tons capacity, for the Old Dominion Steamship Company, of New York, to run between New York City and Richmond, Va., via City Point and Norfolk. The vessel is 265 feet long on deck; 41½ feet beam; 23½ feet hold; beam engine, cylinder, 75 inches in diameter, stroke, 11 feet.

☞ Messrs. C. C. & E. G. SMITH, J. H. Gardener and C. L. Chase, have closed a contract with the officers of the Jacksonville, Pensacola and Mobile Railroad Company, for constructing 250 miles of their road from Quincy, Florida, to Mobile, Alabama. This is a link in the great route between New Orleans and New York—185 miles between Jacksonville and Quincy being now in operation.

☞ The contract for the grading, masonry and bridging of the Emmittsburg railroad has been awarded to Mr. Donahugh, who has just completed his work on the Western Maryland railroad, near Monterey. Mr. J. S. Gitt, the engineer, is staking out the work preparatory to the commencement of the grading of the road, which is to commence on Monday next.

Journal of Railroad Law.

RAILROAD COMPANIES—NEGLIGENCE OF PERSONS INJURED NOT ALWAYS A BAR TO RECOVERY—RULE OF LAW AS TO CONTRIBUTIVE NEGLIGENCE.

The facts in the recent case of The Chicago, Burlington and Quincy Railroad Company *vs.* Thomas Payne, administrator, &c., (49 Ill., 499), are fully and clearly stated in the following opinion by

WALKER, J.—This was an action brought by appellee, as administrator of Albert Y. Payne, to recover compensation, under the act of 1853, for the alleged killing of Payne by the negligence of the employees of appellants. It appears from the evidence that the deceased was driving in a covered buggy upon the highway, and at a place where the road intersected with the railway of appellants, and came in contact with a passing train, and was instantly killed.

It is averred in the various counts of the declaration, that the railway company kept no warning board at the crossing, that no bell was rung or whistle sounded to give notice of the approach of the train, as required by law, and the engineer in charge of the train was drunk at the time the accident occurred. The company denied negligence on their part, and allege that there was a want of ordinary care on the part of deceased as he approached the railroad.

On the trial in the Court below, there was a large amount of evidence introduced by each party, but inasmuch as the case will have to be submitted to another jury, we deem it improper to discuss its weight or whether it supported the verdict. From a careful examination of the instructions given the jury, we are satisfied they do not announce the law to the jury so clearly and distinctly that we can see that they were not misled in arriving at their verdict. They seem to conflict, and to leave the jury a choice as to which class they should adopt. A party has the right to have the law applicable to his case fairly, clearly and distinctly stated in the instructions given to the jury. It is not sufficient to say the law in the case is correctly announced in a part of the instructions, if it is incorrectly stated in others.

This is the second of the plaintiff's instructions which the Court gave to the jury.

"If the jury believe, from the evidence, that the defendant was guilty of gross negligence, under all the facts before them, in running its train to and over the common highway crossing, and thereby the death of Albert Y. Payne was caused, then, even though the deceased did approach such crossing with some and a less degree of negligence, while traveling on the highway, such negligence of the deceased would not destroy the plaintiff's right to recover in this action."

The third instruction given for appellees is this:

"Even if the jury believe, from the evidence, that the deceased, Payne, did with some negligence, on a highway, approach the railroad crossing of the same, yet, if the defendant recklessly and with gross negligence, approached with its train to and crossed said highway, and thereby caused the death of the said Payne, as charged in the declaration, such negligence of deceased would not justify such gross negligence of the defendant."

Appellee's fifth instruction is this:

"It was the duty of the defendant to operate its train in coming to and crossing said highway with due care and precaution to avoid injury to persons passing on said highway, and if by sounding the whistle of the locomotive or ringing the bell thereof, in such manner as could have been reasonably done under the circumstances, injury to the deceased would have been prevented, and by wrongful failure so to do, the death of said Payne, resulted as alleged in plaintiff's declaration, then the jury should find the defendant guilty."

Appellee's sixth instruction is this:

"If the defendant had erected and maintained a post on its track, some 80 rods east from said highway crossing, at and from which its trains in approaching said crossing were accustomed, by whistle or ringing of a bell, to give notice of its approach to such crossing, and such whistle or ringing of bell would reasonably have prevented the accident in evidence, and on the occasion in evidence the defendant failed to ring a bell or sound a whistle, and that thereby, and the negligence of the defendant, the death of the deceased, Payne, was caused, as alleged in the declaration, then the jury should find defendant guilty."

It is the established doctrine of this Court that, although a plaintiff may be guilty of negligence, still the defendant will be held liable if his negligence is greater than that of the plaintiff. Where the negligence producing the injury is equal or nearly so, or that of plaintiff is greater, then he cannot recover. Although he may be guilty of negligence, yet if that of the defendant is greater, amounting to gross negligence, he would be liable. Negligence resulting in injury is comparative and it is not required that the plaintiff shall be free from all negligence, or that he shall exercise the highest possible degree of prudence and caution, to entitle him to recover, if the defendant is shown to be guilty of a higher degree of negligence.

In the case of the Galena and Chicago Union R. R. Co. *vs.* Dill, 22 Ill., 264, it was said that where the company have erected the proper signs and notices at the point of intersection, the highway traveler should, under ordinary circumstances, heed its warning, and use proper precaution to avoid a collision, and failing to do so, negligence more gross on the part of the company only will render them liable for injuries received. It was also held, in that case, that each party had the right to use their respective roads, but in doing so they were required to use all reasonable precautions to prevent injury to the other. That the traveler on the highway had the same but no greater right, to travel the highway over the track of the company than the latter had to pass over the highway, and that both should exercise prudence in the enjoyment of their several rights. But that the road was not required by statute to ring a bell or sound a whistle.

If an individual in crossing a railroad track, is guilty of negligence, that does not authorize the employees to wantonly kill such individual. His negligence may be a wrong to the company, but he does not thereby forfeit his life. If his negligence produces injury to the company, the Courts are open to them for redress. And it would be monstrous to hold that because a person is careless in regard to his safety, he thereby renders himself liable to destruction with impunity, by persons operating railroad trains. Such a doctrine can never be sanctioned in a court of justice. In such a case, the employees of the road should use every reasonable effort to prevent the destruction of the individual, although he is negligent. But at the same time, if the deceased so acted that it was not within the power of the engine-driver to prevent the collision by the employment of reasonable diligence and effort, then the company are not liable.

It will be observed that the instructions given for the plaintiff, and which we have quoted, do not recognize the rule here announced; and although they would probably not mislead members of the profession, still, to men not versed in the rules of law, they were calculated to, and may have misled the jury in this case.

It will be observed that these instructions do not state the rule of comparative negligence. The second only announces a rule that a less degree of negligence on the part of the deceased would leave the company liable. This instruction does not define the degrees of negligence with accuracy. If the deceased was guilty of negligence, then the negligence of the company should have been so much greater as to clearly preponderate, as was said in the case of Chicago, Burlington and Quincy R. R. Co. *vs.* Dewey, supra. But, taken alone and disconnected from the other instructions given for appellants, this instruction might not have been so far objectionable as to require a reversal.

The third is, however, more objectionable. It informs the jury that if deceased was guilty of some negligence, yet if appellants recklessly and with gross negligence crossed the highway and caused the injury, the company would be liable. The expression "some negligence" is indefinite, and embraces every degree of negligence except the highest and most gross. Even if deceased had been guilty of negligence approaching the most gross, the jury would have been warranted in finding for appellee, and that, too, although greater than the negligence of the employees of the company. Even though they are guilty of recklessness and gross negligence, the company would not be liable. And this instruction is liable to that construction.

The fifth instruction correctly defines the duty of the road, but entirely ignores the duty of the deceased. And as the defense was based on the theory of negligence of deceased, to the degree that would exonerate the company, this instruction should have been modified so as to announce the proper rule as to comparative negligence.

The sixth instruction fails to announce the rule as to comparative negligence.

Although the fourth instruction asked by appellants was incorrect and should not have been given, still it was not accurate as modified by the Court before it was given. As modified it ignored relative negligence of the parties, and failed to announce the proper rule and may have contributed to mislead the jury. While the instructions given for appellants laid down a different rule from that announced on appellee's instructions, still the jury were, by all the instructions before them, left to select and act upon either rule as it might strike them as being most proper. In this the instructions were wrong, and should, when taken together, have been consistent and have

presented the law of the case with accuracy and precision that the jury might have received aid thereby in arriving at a true verdict.

For the error in giving these instructions for appellee, and the giving of appellee's fourth instruction as modified, the judgment of the Court below must be reversed and the cause remanded.

Judgment reversed.

Atlantic and Great Western Railway.

With the release of the Atlantic and Great Western railway from the baleful influences to which it has been subjected, and the virtual control secured to its Proprietary through the sale to trustees acting as their agents, added to the complete success of the financial portion of the reorganisation scheme, the undertaking is placed in an entirely new position. Its transfer only awaits certain formalities, and under new directorial guidance and management, we shall learn for the first time the earning power of this fine property. Through the provision made for meeting all financial contingencies consequent on the action taken, litigation has been stopped, and the fractional portion of dissentients in the States, led on by parties whose interests were antagonistic to the welfare of the Proprietary, have been silenced by the payment of their coupons. The trustees representing bonds and debentures to the amount of $58,372,510, within a fraction of the total indebtednees of the Company, and fortified with the proceeds of the subscriptions to the 7 per cent. reorganisation stock, were in a position to defy all competitors. The sale in question, which we need scarcely say would not have been possible with a British railway, for this whatever its financial difficulties, must not be sold, sets aside, in accordance with New York, Pennsylvania and Ohio State laws, all pre-existing deeds; and the reorganisation having been sanctioned by the American courts on the basis of the official scheme the purchasers, thus unencumbered, will be free to deal with their property as they choose. The transaction as absolutely legal, bears an unchallengeable character. So much has been said of the conflicting jurisdiction and corruption of District Courts in the case of the Erie, that an impression has gained ground that any American railway is liable to be entangled hopelessly in their meshes. But we notice that the decrees by which the sale and foreclosure of the Atlantic and Great Western have been effected, in conformity to the laws of New York, Pennsylvania, and Ohio, are those of the State Courts, the judges of which, together with those of the Supreme Court, have always been free from the suspicion of degrading their functions to individual or partisan interests. Besides, there is no *locus standi* for any opposing party. Even Erie is conciliated, an important point in view of the conterminousness lines of the two Companies. The trustees whose business it will be to re transfer the line to the new Company, are General George B. McClellan, William Butler Duncan (Messrs. Duncan, Sherman and Co.), and the Hon. Allen G. Thurman, United States Senator, from Ohio. The success thus ensured, its one object being to rescue the property and put it under good and efficient management, whilst securing the returns to the rightful owners, is creditable to the energy and administrative skill of the President, Mr. James McHenry. The unanimity by the bond and Shareholders in the preliminary stages of the reorganisation scheme, will tell on after management. With the formation of the new Company, and the appointment of a Board of Directors, of whom it is arranged that General McClellan, known as an able administrator, shall be chairman, we shall look with interest for the report of the financial position and the resources of a line, the present revenue of which, there is good evidence to show, is already capable of giving a fair return on capital; we shall learn at the same time the full extent of Erie injustice and mis-management. Mr. James McHenry, who, as President, is thoroughly conversant with the line, after stating the amount required for coupons and bonds and preference shares at $3,500,000 per annum, adds "The net revenue, allowing 60 per cent. for working expenses, being estimated at over $4,000,000 per annum, leaves a large and increasing margin for dividends on the common stock." Further he remarks "It is incredible that a railway so located, traversing territory containing one-quarter of the population of the United States, through the best cultivated agricultural, the richest coal and iron, and the only petroleum districts in the country, under capable and honest management, should have any difficulty in meeting its engagements with the utmost regularity." The above estimate is confirmed by the earnings of lines connected with the Atlantic and Great Western as feeders, or running through the same States. The depreciatory State official figures supplied by the Erie, but never submitted to rectification, do not invite reliance when we find that the Cincinnati, Hamilton, and Dayton railroad a line of only sixty miles, but which connects at the further extremity the Atlantic and Great Western to Cincinnati, has a total net revenue of upwards of two-thirds of the amount set down to the latter. The total net revenue of the Pennsylvania Central, of 601 miles, is no less than $8 295 240, and that of the New York Central, of 842 miles, is nearly $8,295,240. At the same time we are prepared to believe that with such lessees, and with such management as the Erie has displayed, the line could never have been worked up to its full capacity, and that under a receiver for the lessees there could be but languid supervision. The gross earnings of the New York Central (842 miles) is $22,303,710; of the Baltimore and Ohio (588 miles) $9,000,317, with proportionate gains; whilst those of the Atlantic and Great Western are set down at less than half the last amount, and the working expenses are simply incredible. The official figures of the Company show that the augmentation of traffic has been at the rate of nearly a third of a million tons per annum. The holders of securities now look with confidence to the realisation of those expectations with which the enterprise was undertaken. Time has certainly worked in its favour, not merely through the increase of the population, wealth, trade, and industry of the United States generally, but particularly of the three States to which it pertains. There has been a large augmentation of the trade of the East and West, for which it forms a highway, connecting by aid of other conterminous lines the commercial emporium of New York with Lake Erie and St. Louis, and the whole surrounding net work of lines; local production on its route, in grain and coal, has advanced; the carrying trade for petroleum is an ever enlarging source of revenue, and the growth of the inland centres of consumption and distribution must make continuously fresh demands on the movement of produce and goods. Much importance is to be attached to the improvement of relations that will attend the new management, with connecting lines, the disturbance of which in the past has seriously operated to divert traffic.

The removal of the difficulties in the way of the realisation of the reorganisation scheme invests its features with additional interest. Neither the financial details nor the other provisions appear in any way complicated.

In this scheme, the financial operations of which have been carried on by Messrs. Bischoffsheim and Goldschmidt, it was arranged that the capital of the new Company should be $65,000,000 (£13,000,000). The new securities made exchangeable for divisional bonds and overdue coupons thereon, and also for 25 per cent. of the certificates of debenture of 1864, consist of first general mortgage bonds for $10,500,000; second general mortgage bonds for $7,000,000; third general mortgage bonds for $22,500,000 secured by corresponding mortgages on the whole road, rolling stock, &c., the bonds bearing 7 per cent. interest, payable in gold half-yearly, for a term of 30 years, 30 per cent. of the first two series having the power of foreclosure, in default of payment of two consecutive half-years' coupons, which renders the whole of the bond and interest due and payable. Of the capital of the new Company the holders of first and second old divisional bonds receive respectively the first and second mortgage bonds, whilst the holders of certificates of debenture of 1864 receive in exchange 25 per cent. in each of the series of mortgage bonds and ordinary shares, and are entitled to about 3½ per cent. this year in addition to 1¼ per cent. already paid on account of other securities deposited in trust for them. Consolidated bondholders receive the third mortgage bonds for the amount of the principal and 5 per cent. preference shares for the overdue coupons, and the holders of certificates of debenture of 1868 obtain 25 per cent. of the third mortgage bonds, 25 per cent. preference shares, and 50 per cent. ordinary shares. The scrip for the new securities, in exchange for the bankers' receipts, provides the means of identifying the old and new securities. Under capitalisation with interest, for each 100 dollars the owners of New York First Mortgage Bonds are entitled to $131 50; of Pennsylvania do. to $133.25; of Ohio to $133.25; of New York Second Mortgage Bonds to $133.25; of Pennsylvania and Ohio do. $131.50; of Third General Mortgage Bonds of the Consolidated Stock, $100; of Preference Shares, $24.20 5 6ths; of coupons due prior to January 17, 1867, $100; of debentures of 1864, $25; ordinary shares, $25; of debentures of 1868, $25; ordinary shares, $50.

The first issue of 7 per cent. reorganisation stock so successfully carried out, was for the payment of the overdue coupons of the Dutch holders, and making effective provision for the harmonious working with the Erie Company under changed conditions. Issued at £75 per £100 it is redeemable at par in three years, a choice being given to the holder of converting them into the first mortgage bonds of the reorganised Company at the price of £80 per £100; these bonds, as those of the other classes, representing arrears of interest.

The second and final issue of £400,000 7 per cent. reorganisation stock, and similiarly convertible into first general mortgage bonds, identical in form, has been made for the purpose of furnishing the means to conclude the reorganisation of the Company, the surplus beyond meeting claims being applicable to the purchase of rolling stock and other requirements. The issue price was £80 per £100, this sum including the £5 premium, and the premium being credited to the trustees, the complication of creating two classes of securities has been avoided.

The reorganisation scheme gives power to the trustees to aid and supervise the proposed conversion of securities, to appoint provisionally Managers and Directors, and hereafter to concern themselves with given general protection to the interests of the different classes of creditors. The Directors of the Company will be nine in number, and with a road possessing the earning powers indicated, with a route through the richest districts of the Union, whether regarded from an agricultural or mineral point of view and entitled to a large share in the through traffic between East and West,—a railroad moreover, not unduly weighted with liabilities, as compared with other and prosperous lines, must, when exempted from past misgovernment, under the guidance of an efficient executive, rendering the vast network of lines, north, south, east, and west tributary to its revenue, yield ample returns.—*Herapath.*

☞ The Wayesboro' (Pa.) *Record* has undoubted authority for the statement that the contract for the grading of the Miramar Railroad between Shippensburg and Bridgeport was given out on Monday, and that the work is to be pushed forward vigorously.

☞ Messrs. Wallace and Co., of St. Paul, Minn., have the contract for grading, tying and laying the iron on the branch line of the St. Paul and Pacific road from Sauk Rapids to Brainard.

Pennsylvania Company.

The Philadelphia *Ledger* says that the "Pennsylvania Railroad company" and the "Pennsylvania Company" are two distinct corporations, and then adds:

The former is the well known railroad that, by its original charter, connects Harrisburg with Pittsburgh, and by various leasing and control of other lines now connects Philadelphia with almost all points in the interior out to the western end of the Union Pacific Railroad. It is, as it stands to-day, the most extended and important railroad in the world. The "Pennsylvania Company" is a comparatively new corporation, having been created some two years ago, and though believed to be in the immediate interest of the Pennsylvania Railroad Company, it is nevertheless distinct and alone responsible for the liabilities created in its name, though it is really but a Bureau representing the Pennsylvania Railroad Company's interest west of Pittsburgh. It is this "Pennsylvania Company" that has just completed the negotiations for the lease of the Jeffersonville, Madison and Indianapolis Railroad, and has also secured a controlling interest in the Ohio River Bridge at Louisville. By this arrangement the "Pennsylvania Company" secures control of all lines crossing the Ohio river at Cincinnati and Louisville to the south and northwest. It is understood that liberal arrangements will be made with the Ohio and Mississippi Railroad for the use by the latter of the bridge at Louisville.

Pittsburgh and Connellsville Branch Roads.

The follow items of intelligence from the Cumberland (Md.) *News* of the 15th inst., show how rapidly as well as effectually the Pittsburgh and Connellsville railroad is building up the country along its route:

The branch railroad from Mineral Point, on the Connellsville railroad, to the town of Somerset in Somerset county, ten miles in length, has been graded and ballasted, and the work of laying the rails was begun yesterday, and will be completed by September 2d, if no unforeseen event occurs to interfere.

The branch road from Garrett Station to Berline, in Somerset county, distance eight miles, has been let, and is to be completed within ninety days.

A large part of the grading on the branch from Meyer's Mills, near Dale City, to Salisbury, has been completed, and work is progressing quite vigorously.

☞ The contracts for the construction of the first ten miles of the Pittsburg, Virginia and Charleston Railroad have been awarded to Messrs. F. Gwinner & Co., E. Howard, C. H. Love, Utzy, Scott & Wheeler, P. & T. Collins and D. W. Williams. The contract for the trestle work was awarded to G. W. Bitner.

☞ Engineers have commenced the survey of the route for the proposed Maryland Central railroad, commencing at Belair and running through Long Green and Dulaney's Valleys, in Baltimore county, to some point at the city limits. The work will be rapidly pushed.

☞ The postage to Germany is to be reduced October 1st, for prepaid letters, from 10 to 7 cents per half ounce. Postage on other matter remains unchanged.

☞ Geo. M. Miller has been elected President and John T. Bush treasurer of the Newport and Wickford Railroad and Steamboat Company.

☞ A formal celebration of the opening of the Connecticut Valley railroad was held at Saybrook Point on the 24th inst.

☞ Hon. C. P. HUNTINGTON, Vice-President of the Central Pacific Railroad Company, and President of the Chesapeake and Ohio Railroad Company, has just returned from California, after an absence of nearly three months. His trip to the Pacific had for its object the conclusion of arrangements for the consummation of several important railway projects, and important combinations on the Pacific slope. Mr. HUNTINGTON reports great progress made in the building of the Chesapeake and Ohio Railroad, and also in the new town of Huntington, the western terminus of the Ohio River of the Chesapeake and Ohio, as well as three other railroads. Mr. HUNTINGTON it is said, will place, without delay, before the directors of the Chesapeake and Ohio Railroad Company, applications from British capitalists and iron masters, who have bought tracts of iron and coal lands on the line of the road, with the view of expending at least a million dollars in the manufacture of iron. These gentlemen wish to have the rates of freight for iron and coal fixed on a permanent basis for a term of ten years, and it is believed that the Chesapeake and Ohio Railroad Company will act liberally in this matter, as their policy is to attract capital and settlers on the line of the road. The Company has received a proposition from one of the leading manufacturers of iron in Pennsylvania to erect iron-works and furnace at the town of Huntington, which is situated in the centre of one of the richest coal and iron districts of the country, and already gives promise of rapid growth into a manufacturing city of the first rank.

☞ The Parkersburg, Ripley and Charleston Railroad Company was organized at Charleston, W. Va., on the 14th inst., by the election of a board of directors with J. Brisbin as President; John J. Jackson, Vice President; and C. C. Lewis, Secretary and Treasurer. Stock to the amount of $50,200 was taken. Mr. A. J. Vosburgh has been appointed by the board of directors chief engineer of the road. The survey for the location of the road will be commenced immediately.

☞ The Somerset and Worcester Railroad Company are now levelling and finishing their road-bed, preparatory to contracting for the iron. This railroad commences at Newtown, on the Pocomoke river, twenty miles below Snow Hill, and is to connect with the Eastern Shore Railroad at King's creek, some four or five miles from Princes Anne.

☞ The Buffalo, New York and Philadelphia Railroad (formerly the Buffalo and Washington) has been mortgaged for $3 000,000 to Joseph Seligman of New York, and Henry Martin of Buffalo. The mortgage covers the entire line of railroad.

☞ A daily freight train is running regularly on the Frederick and Pennsylvania Line railroad between Taneytown and Littlestown. The formal opening of the road to Taneytown will take place in a short time.

☞ The earnings of the Chesapeake and Ohio Canal for the month of July were $47,132 79, and the expenses $16,699 64, leaving net revenue $30,433 15. The number of tons of coal transported during the month of July was 82,685.07.

St. Louis and Iron Mt. Railroad.

The distance from St. Louis to Little Rock, Arkansas, via the Iron Mountain railroad is 340 miles, of which 116 miles of continuous line south of St. Louis is in operation, to Des Arc, 30 miles below Pilot Knob, and of the 98 miles to the State line, 28 miles more is ready for the track, in Missouri; and in Arkansas 20 miles of track is laid, and 30 miles more is ready for the iron. Of the 340 miles necessary to connect St. Louis and Little Rock, about 136 miles are in operation, 70 miles ready for the iron, and 134 miles to be graded and finished. The whole work is under contract, to be completed, and the cars running from St. Louis to Little Rock, by the 1st July, 1872.

☞ The Portland correspondent of the Boston *Journal* says that an important railroad enterprise is in contemplation for the benefit of the coast towns of Maine. The project is for a railroad from Calais, passing through the towns of Robbinston, Pembroke, Dennysville, Edmunds, Whiting, East Machias, Machias, Whitneyville, Jonesboro', Columbia, Harrington, Cherryfield, Millbridge, Steuben, No. 7 Hannock Township Sullivan, Hancock to Ellsworth. There two lines for connection with the West are in view, one to Bangor through Dedham, Orrington and Brewer, about eighteen miles, or one to Castine through Surry, Bluehill and Brooksville, about twenty-five miles, to connect at Castine with the Portland steamers.

☞ Mr. Richard B. Roane, Chief Engineer, is now engaged in making the final survey of the proposed road to be built by the Radford Iron Company in Pulaski Co., Va., prior to letting out the contracts for different sections of the work. The starting point of Mr. Roane is on the Virginia and Tennessee railroad, about ten miles below Dublin. The road is strictly a private enterprise on the part of the iron company above mentioned. It will be a narrow gauge—2½ feet wide—and run through the iron regions of Pulaski—said to be the richest in the State—to the company's furnaces and beyond to Carroll county, a distance of 18 miles.

☞ The Chatham *Tribune* says that there are upwards of 600 hands at work on the Lynchburg and Danville railroad between the White Oak mountain and Staunton river, and about the same number between the river and Lynchburg, and that these forces will be rapidly increased. The company intend to have their trains running from Lynchburg to Staunton river by the first of June, 1872, to Pittsylvania Court House by the first of September, and to Danville by the first of November following. From present indications, and from the remarkable energy with which the work is being prosecuted, there is little doubt but that this will be done.

☞ The Waynesburg and New Holland Company has been projected, to build a road from Waynesburg westward to a connection with either the Pennsylvania Railroad or the Reading and Columbia. From Waynesburg to New Holland, about ten miles, the route has been located. The amount necessary to grade it is nearly subscribed, and it is expected that work will be commenced on it in a few months.

☞ The contract for building the Middletown and Delhi Railroad, a branch of the Rondout and Oswego Road, has been awarded to F. C. Crowley, of New York. The road will be 30 miles long, running entirely in Delaware County, and will be speedily completed.

☞ John Thomson, Esq., of East Boston, has been chosen Superintendent of the Eastern Railroad, to take the place of Jeremiah Prescott, Esq., resigned.

Notice to Contractors.

PROPOSALS for grading and masonry, or the materials for masonry, for about thirty-two miles of the extension of the Boston and Maine Railroad to Portland, will be received at this office, or at the office of HENRY BACON, the Engineer, at Saco, Me., until the evening of the 15th of September next.

Proposals may be made for grading one or more sections into which the work will be divided.

Profiles and specifications may be seen at the Office of the Engineer on and after September 8.

The Corporation reserves the right of rejecting any proposals. F. COGSWELL, President.

Boston, August 21, 1871.

FORTIETH DIVIDEND

WASHINGTON INSURANCE CO.,

No. 172 BROADWAY,

NEW YORK, July 28, 1871.

A DIVIDEND of FIVE PER CENT. has been declared, payable Aug. 1, free of tax.

WM. K. LOTHROP, Secretary.

CIVIL AND MECHANICAL ENGINEERING, at the Rensselaer Polytechnic Institute, Troy, N. Y. A higher and more practical Course of Instruction will be given here than has ever been attempted elsewhere in this country. Re-opens Sept. 13th. For the Annual Register, containing improved Course of Study, and full particulars, apply to PROF. CHARLES DROWNE, Director.

ENVELOPES.

SAMUEL RAYNOR & CO.,

115 & 117 William street,

New York.

Manufacture every style of envelope, from the smallest drug size to the largest official; and any size, pattern, shape, or quality wanted for railroad companies, express and insurance companies, banks, bankers and brokers. All well made and gummed. Samples given when requested.

HEYERDAHL, SCHONBERG & CO.,

TO CONTRACTORS.—Superior Steam Dredges, Steam Hoisting Derricks, Upland Excavators, Stationary and Marine Engines, and all kinds of Machinery made to order by the POUND MANUFACTURING CO., Lockport, N. Y.

NOTICE TO CONTRACTORS AND BRIDGE BUILDERS.

DEPARTMENT OF SURVEYS,
224 South Fifth Street, Philadelphia.

SEALED PROPOSALS will be received at the Department of Surveys until three o'clock P. M. of September 6, 1871, for the construction of a Bridge over the river Schuylkill, on the site of the Suspension Bridge at Fairmount, with approaches to Twenty fifth and Spring Garden streets, in the Fifteenth ward, and to a point about 144 feet westward of Thirtieth street, in the Twenty-fourth ward, as follows:

First. For the Bridge superstructure over the river, including all materials, workmanship, and erecting ready for use. It will be of wrought iron, 348 feet from centre to centre of end posts, and 34 8-10 feet from centre of lower to centre of top chord, and also two trusses for Thirtieth street, to be 84 feet from centre to centre of end posts, and 10 5-10 feet from centre of lower to centre of top chord, also of wrought iron. Detailed plans with complete strain sheets for these bridges, conforming to specifications, to accompany proposals, which on main Bridge shall give prices for both a two and three truss bridge.

Second. For all the iron work on *approaches* to be erected complete, as per plans and specifications.

Third. For the gradation and masonry, to include curbing and paving, as per specifications and plans.

Each bid must be made upon blanks prepared, otherwise they will not be accepted, and every bidder must submit the names of two persons of undoubted responsibility, who will be bound with them as security for the faithful completion of the contract. The City reserves the privilege of rejecting any and all bids that may not be satisfactory, and each proposal as herein divided will be considered separately and will be so allotted.

Payments will be made monthly in bonds of the City of Philadelphia, or in cash, at the discretion of the Mayor.

Each bid must be accompanied by a certificate from the Law Department that a proper bond for the sum of five hundred ($500) dollars has been filed there, in accordance with the ordinance approved May 25, 1860.

The contractor or contractors, in making their proposals, shall do so with the understanding that if their proposal shall be accepted, that every dispute or difference which may arise shall be decided by the Chief Engineer and Surveyor, from whose decision there shall be no appeal.

All bidders are invited to be present at the opening of proposals offered on said day, at 3½ o'clock

Plans may be seen and examined at the Department of Surveys, where specifications and blank proposals may be obtained, on and after the 22nd day of July, inst.

STRICKLAND KNEASS,
Chief Engineer and Surveyor.

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly. A contract has just been made with the pioneer Narrow Gauge Road—3 ft. Gauge—on this Continent—(The Denver and Rio Grande R. W.)—for 100 cars; also for a Georgia Road.

Comparative weights of Narrow and Full Gauge Cars sent by mail free of charge.

NEW YORK
State Railroad Bonds.

A First-Class Home Investment.

FIRST MORTGAGE
GOLD BONDS

OF THE

RONDOUT AND OSWEGO RAILROAD.

Principal and Interest payable in Gold.

SEVEN PER CENT. SEMI-ANNUALLY.

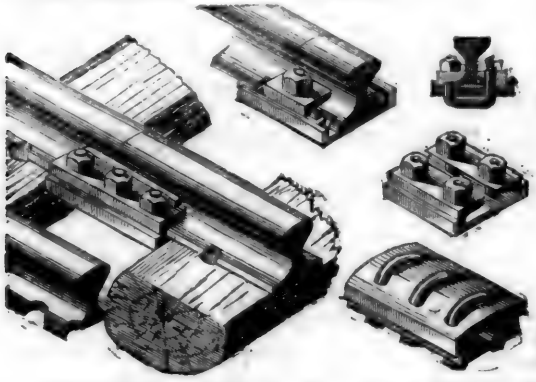
This Road covers 100 miles of the most direct possible line between the Great Lakes and deep water navigation on the Hudson River, the whole line of which will be completed and in operation on or before October 1, 1872, and give a new line of road to Lake Ontario and the West 25 miles shorter than any line that can be found.

It passes through the Cement, Flag-Stone, and Lumber regions of Ulster County, and the rich agricultural bottoms of Delaware and Greene Counties, all of which have not heretofore been reached by railroad facilities, and from which sections the formation of the country prevents the construction of a competing line.

The 36 miles of road operated for three months is already paying net earnings equivalent to 7 per cent. gold on its cost of construction and equipments. The issue of Bonds is limited to $20,000 per mile of COMPLETED ROAD, the coupons payable in gold in this city. Price of the Bonds 90 in currency.

Full particulars of the above may be had of, and the Bonds for sale by,

EDWD. HAIGHT & CO.,



9 Wall Street, New York City,

CAMP'S IMPROVED DUMPING CAR.

RIGHTS FOR SALE BY
A. W. RHOADS & CO.,
Wilkes-Barre, Pa.
A. W. RHOADS. N. H. CAMP.

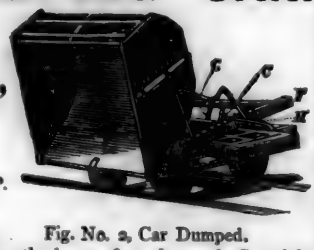

Fig. No. 1, Car Loaded & at Rest. **TO DUMP THE CAR.** Fig. No. 2, Car Dumped.

The Brakeman seizes the lever H, and raises it about a foot, thus releasing the hopper from the catch, C, and the tilting-frame, F, from the catch, C, when the hopper, K, yields to the force of gravity and rolls over to the position shown in Fig. 2.

To Replace the Hopper in Readiness for another Load.

The brakeman bears his weight on the up-end of the tilting-frame, F, forcing it down to its place, when the hopper rolls back to *its* place, where it is held by the catches, C and C.

Address, A. W. RHOADS & CO., Wilkes-Barre, Pa. Lock Box 131.

PACIFIC MAIL
Steamship Company's
LINE TO
California, Japan and China.

VIA PANAMA,
CARRYING MAILS, PASSENGERS AND FREIGHT TO
KINGSTON, JAMAICA, AND PACIFIC COAST OF MEXICO, CENTRAL AMERICA, PERU, AND CHILI.

Steamers leave 15th and 30th each month, except when those days fall on Sunday, then the day previous.

Aug. 30, steamer OCEAN QUEEN, Capt A. G. Jones, will leave Pier No. 42, North River, at 12 o'clock noon, for Aspinwall direct, connecting at Panama with steamer MONTANA, Capt. ——, touching at Punta Arenas, Acajutla and San Jose de Guatemala, and also connecting for all Central American and South Pacific ports.

Freight for last-named ports received until 4 P. M. of Aug. 28

Steamer JAPAN will leave San Francisco, Sept. 1, for Japan and China.

For rates of passage, freight and all further information, apply at the Company's office on the pier, foot of Canal street.

New York Saturday, September 2, 1871.

☞ THE NEW SHORT ROUTE BETWEEN THE ATLANTIC AND PACIFIC STATES.

It is scarcely one month since we placed on the market the FIRST MORTGAGE SINKING FUND LAND GRANT BONDS of the ST. JOSEPH AND DENVER CITY RAILROAD COMPANY, Western Division, and the rapidity with which investors have absorbed the Loan has fully justified our expectations.

The Loan, which was originally for $5,500,000, is already assuming small proportions, and bids fair to be closed out at an early day. We introduced this Loan to the public with our full and cordial indorsement, knowing that it possessed merits rarely found in a railway loan, and that it *combined a high rate of interest* with *perfect security* for both principal and interest, as well as a profit in the future by the enhancement of the market value of the Bonds after the entire Loan was absorbed. The United States Government, through Congress, realizing the importance of this Road, granted the Company a LIBERAL LAND GRANT, AMOUNTING IN THE AGGREGATE TO 1,500,000 ACRES.

The Company's lands are located in Kansas and Nebraska, where the soil is excellent for farming and all other purposes, and the section through which the St. Joseph and Denver City Railroad runs *is known as the Garden Spot of the New West.* The prairie of Nebraska is exceedingly valuable, as its rolling formation effects a natural drainage for the surface water. *All the lands of the Company, as well as the road and its equipments, are pledged for the security of these bonds.* At the present market value of the lands, the land grant would realize an amount considerably in excess of the entire bonded debt of the Company. By expressed stipulation, the lands cannot be sold for less than $4 per acre. The trustees for the mortgage are directed to retire the bonds of the Company with the proceeds of the land sales, when the same can be purchased at or under 115. The Chicago, Burlington and Quincy 8 per cent. bonds are selling at 112, and Michigan Central 8 per cent. bonds at 120, and there is every reason to believe that the ST. JOSEPH AND DENVER CITY RAILROAD COMPANY'S 8 per cent. Gold Bonds *will eventually sell as high.* The operations of a liberal sinking fund under the land sales will accelerate the advance in the market price of these Bonds in the future. In regard to the road itself, it is only necessary to remark that the distance from Fort Kearney on the Union Pacific to St. Joseph, by the St. Joseph and Denver City Road, is 80 miles shorter than *via* Omaha, while from Fort Kearney to New York *via* St. Louis, the saving is equal to 100 miles, and *via* Hannibal it is over 200 miles. It will be seen, therefore, that the St. Joseph and Denver City Road forms what may be called an air line between the Atlantic and Pacific States. It will form a great and important link in our railway system, and must divert to itself a very large portion of the traffic in freight and passengers between the Atlantic and Pacific. The line of the road is well populated, and in many parts densely so; an existing trade, therefore, awaits its completion. In the year 1860, Hon. Schuyler Colfax, the present Vice-President of the United States, recommended *St Joseph*, on the Missouri River, as *the terminus of the Union Pacific Railroad*, but the civil war prevented the building of that road on the very line now occupied by the St Joseph and Denver City Company. The Eastern Division of the road is completed, and in successful operation from St. Joseph to Marysville, a distance of 112 miles. The bonds of this division were closed out at 97½ by our firm, and have since advanced to 102, and at any time since the bonds were all sold the holders have always had a ready market for the same at an advance upon their cost price.

This early and remarkable success of a new railway loan is without a parallel, and we refer to it with the utmost satisfaction. We feel confident that the bonds of the Western Division will form no exception to those of the Eastern Division, but that when the loan is closed out all the bonds of the St. Joseph and Denver City Railroad Company will advance in price, and eventually stand as high as those of the Chicago, Burlington and Quincy and the Michigan Central—say 112 to 120. The Bonds, both principal and interest in Gold, are offered for the present at 97½ and accrued interest in currency, with the reserved right to advance the price without notice. Five-twenty bonds and all marketable securities will be received at their current market price, without commission, in payment for these bonds. In exchanging the five-twenty bonds for those of the St. Joseph and Denver City Railroad Company, the investor realizes 15 per cent. more on the principal and 3 per cent. gold in interest per annum more than by exchanging for the Government new 5 per cent. loan. Expressage relating to the Loan will be free.

TANNER & CO., Bankers,
No. 11 Wall-st.

Vineyard Sound Railroad.

The Boston *Journal* says that the project of constructing a railroad from Cohasset Narrows, east of Wareham, to Wood's Hole in Vineyard Sound, a distance of about eighteen miles, has finally resolved itself into the certainty of execution. The road is to be built by the Cape Cod Railroad Company, and branching from that line will run along the eastern shore of Buzzard's Bay, passing through the villages of Pocasset and South Pocasset, in the westerly part of the town of Sandwich, thence through North and West Falmouth and Falmouth village, and near Falmouth Heights, the seat of a new land enterprise, to the harbor of Wood's Hole, where it will connect with steamers for Martha's Vineyard. The road will pass through picturesque localities, eligible as sites for the erection of sea-side residences, and from

its directness and convenience of connection with the Vineyard, cannot fail to become the most popular route between Boston and the "great religious watering place." The line is now being located by S. L. Minot, Esq., civil engineer, of Boston, Mass.

Gauge of Canadian Railroads.

The existing railways of the Dominion are mostly on the 5-feet 6 inch gauge. We give the length and gauge of each of the lines of any consequence:

5 FEET 6 INCHES.

	Miles.
Grand Trunk	1,377
Northern	100
London and Port Stanley	25
Cobourg and Peterboro	26
European and North American	108
Western Extension	88
New Brunswick and Canada	138
Windsor and Annapolis	85
Brockville and Ottawa	90
Welland	25
Midland	79
Erie and Niagara	31
Nova Scotia	145
Canada Central	28
	2,345

4 FEET 8½ INCHES.

Great Western	355
St. Lawrence and Ottawa	54
Massawippi Valley	34
Quebec and Gosford	27
Montreal and Vermont Junction	26
Stanstead, Shefford and Chambly	42
Province Line	32
Wellington, Grey and Bruce	23
	593

3 FEET 6 INCHES.

Toronto, Grey and Bruce	72
Toronto and Nipissing	32
	104

In the western part of Ontario two important lines, the Canadian Air Line and the Canadian Southern are being built on the 4 feet 8½ inch gauge; the Wellington, Grey and Bruce is being extended on the same gauge; the Intercolonial, Toronto and Muskoka, North Grey, Canada Central, and probably other lines are being constructed on the Canadian standard—5 feet 6 inches. The London and Port Stanley is likely to be reduced to 4 feet 8½ inches, and it is said the Whitby and Port Perry will be of this width.—*Canadian Monetary Times.*

Lake Tahoe and Central Pacific Tunnel.

It is truly surprising that such a gigantic work as that of the Mount Cennis Tunnel, one which from its difficulty and novelty has attracted the attention of the civilized world for years past, should be so quickly followed in the far and newly populated Occident by the inauguration of a similarly difficult undertaking. It is but another illustration of the indomitable energy and determined onward progress of the American nation. Much has been said and written of late as to the Lake Tahoe project of Colonel Von Schimdt, as to its feasibility, its legality, and the prospect of the work, if carried out, being a success financially. The two former may be considered as settled and the last presents so favorable a prospect as to leave no doubt as to the speedy completion of the work. In order to bring the water from the Lake in the most convenient and desirable manner, it was found that a tunnel would have to be cut through the western summit of the Sierras. This tunnel would be of about five miles in length, and even if of small dimensions would have involved a very heavy outlay.

A happy community of interests has led to a contract between the Central Pacific Railroad Company and Col. Von Schmidt, by which it is arranged that this able and indefatigable engineer shall construct a tunnel of such dimensions as shall admit of the passage of trains, thus enabling the Central Pacific to shorten its road seven miles, lower the line of the railroad upwards of 1,000 feet, and dispense with twenty miles of snow sheds, which last are, from their expense and danger, the most objectionable feature of the line. These were advantages not be overlooked by the able management of the Central Pacific, who have thus availed themselves of Col. Von Schmidt's genius and administrative talent for their own benefit while assisting him in the carrying out of his own grand project. The precise points at which the tunnel will enter the mountains have not yet been precisely located, and for the purpose of deciding this, Col. Von Schmidt and Chief Engineer Montague, of the Central Pacific, have just proceeded to the spot. It will, however, enter the mountain on Cold steam, close to Truckee, on the eastern slope, and on the north fork of the American River on the western side. The entire length of the tunnel will be about, or a little less than, five miles. For one-third of this distance it will be ventilated by shafts sunk from the slope of the mountain, and this and other improvements which have been designed will obviate all those difficulties of imperfect ventilation which has been the cause of so much inconvenience and annoyance in the Mount Cennis Tunnel. Those who know Col. Von Schmidt's ability, know that with him there is no such thing as failure His plans, even to the minutest detail, being prearranged in the most perfect and systematic manner.

The stipulated size of the tunnel is 19 feet high by 21 feet in width, and is to be completed in five years; but Col. Von Schmidt fully believes he will complete it in three years, and he is proverbially correct in his estimates, both of time and cost. The cost will be $1,500,000. Carefully made examinations show that less than a mile of the boring will be through granite, which is very much less than was expected; the remainder is for the most part cement, easily removable by the pick without resorting to blasting. The boring will be performed by an instrument of Col. Von Schmidt's invention, consisting of diamond pointed drills operating upon a surface of eight feet in diameter, and worked by means of compressed air, which, penetrating the centre, leaves easy work for blasting the lateral portions on either side. Beneath the railroad track will be laid two pipes of six feet in diameter for the passage of water. This will give a supply of nearly 800,000,000 gallons of water per diem, or 1,333 gallons per day for each man woman and child in the State of California. Such an undertaking is in a new country wonderful, and that one of the main difficulties of its execution has been so greatly lessened by a coalition of the interests of the Railroad and Lake Tahoe Water Company is a matter of congratulation.—*San Francisco News Letter.*

Narrow Gauge Railroad.

The narrow gauge railroad recently put in operation to connect Alexander's iron banks with the Atlantic and Pacific Railroad is a complete success, with some slight improvement in the locomotive, which was the first of narrow gauge ever built in St. Louis. We have here a practical illustration of economy of the narrow gauge. The track is thirty-six inches wide. The cars are built entirely of iron; the sides of the bed being ¼ inch, and the bottom (doors) ⅜ inch iron. The cars are about 5 feet long and 3½ feet wide, and cost in St. Louis $155 each. One of these cars, weighing 1,440 pounds, carries 2½ gross tons of ore; four cars, weighing 5,760 pounds, will easily carry 10 gross tons, while a common railroad car, weighing 16,000 pounds, only carries 10 gross tons; hence there is three times the amount of dead weight in a large car to carry the same freight as one of narrow gauge. When the road way was planned, the company contemplated using horse power, and put down a light T rail—only 15 pounds to the yard—which is now used for steam narrow gauge, but proves too light, and rails 25 or 28 pounds to the yard will be substituted.—*St. Louis Jour. of Com.*

State-aid to Arkansas Railroads.

The following statement of the amount of State-aid bonds issued to different railroads in Arkansas is from the Little Rock *Gazette*:

M., O. AND R. R. ROAD.

October 21, 1870	$150,000
November 29, 1870	150,000
January 19, 1871	150,000
Total	$450,000

MEMPHIS AND LITTLE ROCK ROAD.

April 20, 1869	$250,000
July 13, 1869	150,000
July 25, 1870	500,000
August 12, 1870	100,000
September 5, 1870	50,000
March 7, 1871	100,000
April 5, 1871	50,000
Total	$1,200,000

ARKANSAS CENTRAL ROAD.

April 20, 1871	$150,000
July 19, 1871	150,000
Total	$300,000

L. R., P. B. AND N. O. ROAD.

April 25, 1860	$150,000
September 1, 1870	150,000
October 18, 1870	300,000
January 17, 1871	50,000
Total	$650,000

L. R. AND F. S. ROAD.

March 27, 1860	$200,000
May 3, 1870	160,000
May 13, 1870	140,000
September 6, 1870	300,000
January 21, 1871	100,000
Total	$900,000

Pittsburg and Connellsville Railroad.

The gross earnings for the two years ended October 31, 1869 and 1870, compare as follows:

	1869.	1870.
Passenger	$166,675 75	$178,357 49
Freight	430,016 88	467,288 53
Mail	3,650 00	3,600 00
Miscellaneous	8,576 06	6,490 09
Total	$608,918 69	$655,736 11

The operating expenses amounted to—

Transportation	$94,819 76	$101,030 69
Motive power	116,708 08	129,795 26
Cars	36 011 79	31,273 15
Roadway	137,165 36	137,819 02
General	16,860 08	19,969 48
Total	$401,564 97	$469,887 60
Net earnings	$207,353 72	$185,848 51

The gross earnings are apportioned to the different ports of the road as shown in the following abstract:

	1869.	1870.
Pittsburg & Port Perry, 10.6 miles	$142,985 63	$152,938 85
Port Perry & Connellsville, 47.8 miles	434,325 69	468,937 44
Fayette County branch, about 12 miles	31,607 37	33,859 82
Total, 70.4 miles	$608,918 69	$655,736 11

In addition to the 70.4 miles as above the company own 8.98 miles of sidings, and individuals 11.04 miles, making the total length of equivalent single track in use at the close of the fiscal year 90.42 miles.

At close of said year there were on the road 7 first class engines, 5 second class, 6 third class, and one switching—in all 19 engines. These engines were run—with passenger trains 174,619, with freight trains 347,425, and with ballast trains 20,659, or a total of 542,703 miles. Cost per mile (including engineers' and firemen's pay) 19.73 cents.

The car equipment was as follows—8 wheel cars: passenger 14, baggage 4, house freight 35, gondolas 72, and rack 2;—4-wheel cars: dumping 26; and one rigger's (8-wheel) car; or a total of 154 cars. Total wheels 1,128, equal to 141 eight-wheel cars. The acquisitions during the year were—one 1st class passenger car, 24 gondolas, 2 rack and 3 house freight cars. There were also constructed at the company's shops 7 road trucks and 10 hand cars. Maintenance of cars, 5.76 cents per mile run.

The total number of passengers carried and the number of tons of freight moved in the two last fiscal years compare as follows:

	1868 69.	1869-70.
Passengers carried	462,124	531,011
Average distance carried	10.6 m.	10.7 m.
Freight (tons) moved	515,879	580,070
Average distance moved	31.6 m.	31.8 m.

The increase in the number of passengers is shown to have been 68,881 and in passenger earnings $11,681 74. The increase was principally made upon the portion of the line nearest Pittsburg, where the average fares are lowest. The increase in tonnage amounts to 64,196 tons, and in charges $47,311 74, or about 12 per cent. in both tonnage and charges. Nearly all the staple products and manufactures of the region traversed by the road have continued from year to year to show an increase, consequent on the development rapidly going on. In coal and coke the increase last year was about 15 per cent.; in groceries and dry-goods about 25 per cent.; in whisky about 100 per cent.; in live stock over 17 per cent., and in manufactured iron about 50 per cent. In the meantime the road and equipment has been steadily improved, and a general preparation made for the influx of business expected upon the completion of the line—all which will account for the increase of expenditures shown in the table of operating expenses, said expenses having risen from 66 per cent. in 1869-69 to 72 per cent. in 1869-70.

The following is a statement of the business operations and results therefrom for 10 years:

	—Carried one mile— Passengers.	Tonnage.	Gross earnings.	Net earnings.
1860-61.	860,497	1,696,177	$70,105	$28 704
1861-62.	1,894,222	2,654,802	129,917	39,437
1862-63.	3,336,631	4,361,392	215,589	105,356
1863-64.	4,615 024	5,712,879	315,923	115,351
1864-65.	4,682,284	6,386.206	394,363	130,361
1865-66.	4,587,116	8,156,431	467,163	156,932
1866-67.	4,776,155	10,080,344	498,181	172.973
1867-68.	4,481,033	12,592,663	508,626	181.065
1868-69.	4,912,503	16,286,331	608,919	207,354
1869-70.	5,702,355	18,473,176	655,736	185,848

In the year 1860-61 only the main line 47.8 miles long was in operation, the extension to Pittsburg 10.6 miles was opened October 10, 1861, and the Fayette county Railroad came into the company's possession November 1, 1861.

The general account of the company dated October 31, 1870, shows their financial condition at date to have been as follows:

Capital stock		$1,795,253 05
Bonds for real estate.	$100,000 00	
Baltimore City Loan.	1,000,000 00	
First mortgage bonds	4,000,000 00	
Turtle Creek Div. b'ds	400,000 00	
		5,500,000 00
Bills payable		204,313 77
Transportation department		1,305,754 40
Sundry accounts payable, including labor, pay-rolls and vouchers for Oct. 10, 1870 ($138,222 42); also retained per centage from estimates and other amounts due upon the Cumberland extension ($1,235,924 94)		1,374,147 36
Total		$10,179,468 58
Preliminary surveys and organization expenses		8,965 47
Constr'ct'n—old road.	$1,083,906 47	
Construction—Cumberland extension.	2,145,678 20	
		3,229,584 67
Railway tracks—old road	$1,108,507 86	
Railway tr'ks—Cumberland extension	153,107 65	
		1,261,615 51
Depot grounds and build'gs—old road.	$126,098 26	
Depot grounds and build'gs—Cumberland extension	4,438 99	
		130,537 25
Rolling stock		409,250 51
Engineering—old road.	$128,531 40	
" —Cumberland extension	83,478 50	
		212,009 90
General exp.—old road	374,980 43	
" " —Cumberland extension	9,912 71	
		384,893 14
Profit and loss		698,336 79
Interest account		754,032 28
Securities on hand or hypothecated, viz:		
1st mortgage bonds.	$2,775,000 00	
Other bonds	53,900 00	
Bills receivable	804 18	
		2,829,704 18
Debts due company		260,538 88
Total		$10,179,468 58

The charges to construction and equipment (exclusive of general expenses, profit and loss and interest) amounted on August 31, 1870, to $5,268,720 72, of which $2,606,959 86 had been charged to the old line and $2,661,760 86 to the Cumberland Extension. The payments in the year then ended amount—on account of the old line, $144,984 58, and of the Extension, $1,869,093 54. The cost of the line to completion and its full equipment will be not less than $10,000,000.

The following table compiled from the Company's Reports to the State Auditor of Pennsylvania for the past 10 years shows the financial status of the company at the dates indicated:

Aug. 31.	Stock.	Bonds.	Debt.	Cost of road, &c.
1861..	$1,756,636	$1,500,000	$85,312	$1,973,029
1862..	1,763,122	1,500.000	110,417	2,154,349
1863..	1,767,873	1,500,000	82.530	2,197,786
1864..	1,770,414	1.500.000	69,233	2,272,100
1865..	1,774,623	1,500,000	64,207	2,328,489
1866..	1,776,129	1,500,000	73,108	2,432,068
1867..	1,776,129	1,500,000	74,862	2,518,067
1868..	1,793,926	1,891,000	75,584	2,590 070
1869..	1,794,576	1,891,000	294,917	2,595,257
1870..	1,794,576	5,500,000	818,538	5,030,988

It will be seen that the "bonds" are here stated without deduction for bonds on hand and hypothecated, and in so far differ from the statement in the general account as given above. The "floating debt," also differing from the general account statement, is given in its net form, *i. e.* with the deduction of credits applicable to its satisfaction.

In April, 1871, the line of the Pittsburg and Connellsville Railroad was completed to Cumberland, 149 miles from Pittsburg, and since then the whole road has been operated as a Division of the Baltimore and Ohio Railroad. This is the third branch belonging to that great thoroughfare reaching the Ohio River—the termini now being Pittsburg, Wheeling and Parkersburg, at each of which it has valuable connections reaching all commercial points north and west. The Pittsburg termini will, however, be the most valuable, as there it reaches the great lines terminating at Cleveland, Toledo, Chicago, &c., and the great arms stretching from those centres. From Pittsburg will also be constructed a great and independent line to Chicago, which will eventually give to Baltimore a more direct and a shorter connection with the north and west than possessed by any other Atlantic port. The surveys of this new line are already far advanced, and in a few years the line as projected will be in full operation.

In connection with the Pittsburg and Connellsville Railroad there are also several important branches being constructed or already in operation. The Belle Vernon Branch, which will be completed with the current year, leaves the main road at or near West Newton, and will probably be extended to Washington, Pa., and in connection with the Hempfield Railroad (recently purchased by the Baltimore and Ohio Company) form a new and favorable line to Wheeling, W. Va. The Mount Pleasant and Broad Ford Railroad was opened for business in April of this year and is now operated under lease by the Pittsburg and Connellsville Company. The Fayette County railroad is to be extended to the West Virginia line and immediately to the Fair-Chance Iron Works. The Somerset and Mineral Point Railroad, also to be operated under lease, is in course of construction; and the Bedford Branch (Bedford to Bridgeport 22 miles) is rapidly progressing to completion and will probably be opened before winter. Each of these new lines, all of which will be controlled by the Pittsburg and Connellsville Company, will undoubtedly bring a valuable traffic to the whole line between Pittsburg and Baltimore.

The company have also under contract a "cut-off," leaving their road at Nine-Mile Run, and joining the Allegheny Valley Railroad, *via* Negley's Run, a distance of only six miles. This short cut will save a detour of 12 miles in travel and transportation over the route *via* Pittsburg.

President.—William Oden Hughart, Pittsburg.

Directors elected on the first Monday of Dec., 1870—William Oden Hughart, William Phillips, William Baldwin, William S. Bissell, and G. L. B. Fetterman, of Pittsburg; Cyrus Myers, of Somerset; C. P. Markle, of West Newton; and Hugh Sisson, Johns Hopkins, Hazeltine G. Vickery, William H. Perkins, and Israel Cohen, of Baltimore.

Secretary and Treasurer.—John H. Page, Jr., Pittsburg.

Chief Engineer.—Benjamin H. Latrobe, Baltimore.

General Agent.—Wm. B. Stout, Connellsville.

Solicitor.—George Shiras, Jr., Pittsburg.

Engineer and Master of Road.—F. W. Smith, Pittsburg.

American Railroad Journal.

Saturday, September 2, 1871.

Stock Exchange and Money Market.

The Money market shows increasing animation, but with a very free offering of funds to the principal borrowers, there is but little difference noticeable in rates, though toward the close, the tendency is toward more firmness. The current quotations for Money at the close were 2@5 mainly 3@4 per cent. on call, and at 5@8½ per cent. per annum on very choice to fair business credits The speculative inquiry is somewhat brisker, and the mercantile demand is also rather more urgent, chiefly for the Fall trade purposes. The city banks make a more favorable exhibit, in their last weekly return; and the U. S. Treasury office here reports a gain in its currency reserve. The Treasury Department programme for September has been eagerly looked for, now that the new $200,000,000 Five per cent. Funding Loan has been officially announced as having been all successfully marketed, through the agencies of the European and American syndicates, quite recently organized. The city banks, in their last weekly exhibit, show a loss of $609,000 of legal tender notes, with a gain of $1,313,245 of specie, and $1,452,330 of deposits; also an increase of $510,252 in their loan and discount averages, and a reduction of $48,732 in their item of circulation. The U. S. Sub Treasury increased its currency balance $319,641, and reduced its coin reserve $396,798, as the result of the week's business. The city bank exchanges, last week, averaged $77,336,367; and thus far, this week, 77 millions daily. The banks now hold $10,484,395 of specie and legal tender notes, in excess of the 25 per cent. of their liabilities required by the national banking Act. The receipts of the U. S. Sub-Treasury office were $4,716,747 in coin, and $3,957,435 in currency; payments, $5,113,540 in coin, and $3,687,795 in currency. The office received $4,024,000 in coin or its equivalent, from customs; and disbursed $402,305 of coin interest, on the regular account, and $1,875,000 of the September interest on the 10.40 Loan, which was to have been charged off on Friday the 1st inst.

The specie reserve of the city banks according to the latest return is $10,722,050, against $19,639,384 same time last year. The city bank deposits are now $248,709,800 against $201,966,700 week ending August 27, 1870. The legal tender reserve amounts to $69,489,500 against $48,959,713 same time last year. The circulation now stands at $30,198,820, against $32,904,906 same time last year. The loans are now $305,047,680, against $273,986,974 at this date last year.

The U. S. Sub-Treasurer retired, last week, $3,719,324 of coin certificates, received for customs.

The U. S. Sub-Treasury, on Thursday morning of this week, held a balance of $9,017,098 in currency, and $65,289,556 in coin against a balance a week previous of $9,548,974 currency, and $64,293,526 coin.

Government revenues have been yielding encouragingly, since our last, the customs keeping remarkably well up, in productiveness. The excises yielded last week about 2½ millions, and thus far since July 1, about 23½ millions. The customs at the port of New York, last week were $3,917,324; and at the outports, equal to about 1½ millions more, all in coin, or coin certificates.

Gold, though strong and inclined to buoyancy in price, has not been active, during the week. The speculative demand has been moderate, and the export inquiry very light. The customs call has been up to a liberal aggregate, and has been the chief drain on the supply in the open market. The market closed on Wednesday with indications of a renewal of speculative activity. The range of the price during the week, has been from 112¼ @112⅝, and the closing quotation on Wednesday was 112¾ against 112⅝ the preceding Wednesday. The specie outflow, last week, was $431,478; on Tuesday of this week, $37,000; and on Wednesday, $146,000. The Gold Exchange Bank clearances have been as follows: August 24, $45,370,000; August 25, 36,628,000; August 26, $27,629,000; August 28, $16,328,000; August 29, $20,469,000; August 30, $36,355,000.

The customs at this port on Wednesday were $557,000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Aug. 26, 1871, $61,522,870, against $62,459,368 same time in 1870.

Of the September coin interest on the 10-40 Loan, under orders from Secretary Boutwell, the Sub-Treasury disbursed last week, $1,875,000.

The customs demand for Gold last week, ave-

raged $670 667 a day; thus far, this week, it has averaged $685,000 a day, or equal to a weekly aggregate of $4,110,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $38,683, and since Jan. 1, 1871, $7,561,163 against $7,522,732 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $104,011,797 against $90,313,690 same time in 1870.

The coin reserve of the Treasury Department on Tuesday was $90,466,000, including $18,054,,000 represented by outstanding coin certificates of deposit.

The export drain was $431,478 last week, against $1,197,162, same week preceding year The shipments since January 1, 1871, have been $53,309,334, against $42,187,607 same time in 1870

Foreign Exchange has shown less activity and less buoyancy, closing dull. Bankers' sixty day bills on London closed on Wednesday at 108¾@109⅛; sight bills on London, 109⅛@109⅛

The produce exports from this port, week ending with Aug. 29, were to the currency value of $3,955,742.

Government securities of the older issues have been offered very sparingly all through the week, and have been quoted strong in price, especially on the long date bonds, with a moderate demand noted. On Tuesday, the announcement was made that the new Five per cent. funding Loan of $200,000,000 had all been successfully disposed of, and the books closed.

On Wednesday, Government bought in a million of Five-Twenties at 112 41@112 62, ex-interest. The amount of bonds offered was $2,991,400 at 112 41@112 89.

U. S. sixes of 1881 closed here on Wednesday of the current week at 118⅝@119; U. S. Five-Twenties of 1862, 114⅛@114⅞; U. S. Five-Twenties of 1864 at 114⅛@114⅛; U. S. Five-Twenties of 1865, 113⅛@113⅝; U. S. Five-Twenties of 1865 consolidated, 113⅛@113⅝; U. S. Five-Twenties of 1867, 113⅝@113¾; U. S. Five-Twenties of 1868, 114@114¼; U. S. Ten-forties at 114⅛@114¾; U. S. Six per cent. currency bonds, 115⅞@116.

The latest quotations at the London Stock Exchange compare as follows with former returns:

* Ex September coupon.

State bonds have been in fairly active demand at about steady prices.

Railway bonds have met with a good investment inquiry at generally firmer prices for the more substantial of the old loans. Central Pacific Sixes have been quite readily purchased, closing firmly at 100¾@101. Very few of these bonds have been offered of late in the open market. The prevailing active call for the Chesapeake and Ohio Six per cent. Bonds has led to an advance in the price to 93 per cent. and accrued interest. Bonds to the amount of nearly two millions of this Loan have been marketed within the current month of August. The sales having largely exceeded the money wants of the Company, the President of the road, Mr. C. P. Huntington, on behalf of the Board of Directors, has addressed a note to the financial agent of the Company, Messrs. Fisk & Hatch, ordering the price of the Bonds to be advanced to the present figures, and adding that "the Western Division from the Ohio River to the Falls of Kanawha (ninety-five miles) will be completed in October, and the work on the remainder of the road is now so far advanced that there is no doubt of the completion of the whole line in the summer of 1872, when all these securities should readily bring par."

Further considerable progress has been made in the work of marketing the St. Joseph and Denver City eight per cent. gold bonds, that the total sales at the close of business on Wednesday exceeded half the amount of the Loan, the total of which is $5,500,000. The loan was opened on August 1. The price of the bonds at present is 97½ and accrued interest in currency. The bonds of the Eastern Division loan, which was closed some time ago, now command a liberal premium. The Loan, after careful investigation, is recommended by the financial agents of the Company, Messrs. Tanner & Co., as a first class investment.

Business in Railway and miscellaneous share property has been devoid of remarkable activity, yet values have been well supported, and the present promise is of a brisk and buoyant Fall market.

General business has been less active and values in most instances, have been less firm. Bread stuffs and Provisions closed heavily. Middling upland cotton closed on Wednesday at 19⅜ cts. per lb. The receipts at all the ports, since Sept. 1, have been 3,979,578 bales, against 2 847,708 bales same time last year; exports 3,157,376 bales, against 2,197,105 bales same time last year; stock at the ports at latest dates, 123,197 bales, against 75,949 bales same date 1870.

At the regular monthly sale of Scranton Coal on Wednesday, 140,000 tons were disposed of at generally steady prices, ranging from $4 to $5.60, as against $4.25@$5.55 at the July sale.

At the Live Stock Markets, Beeves continue in moderate request at from 7@12½ cts.; Veals at 4@10 cts.½; Sheep at 4@6½ cts.; Lambs at 6 @9 cts.; Swine, 5¼@5½ cts per lb., all live weight. The week's receipts were 7,537 Beeves, 3,019 Veal Calves, 35,771 Sheep and Lambs; and 23,930 Swine.

Foreign goods have been in fair demand at generally steady prices. The week's imports of foreign goods reached $10,883,922, including $5,-285,140 of dry goods.

Ocean freights have been fairly active and rates have been quoted firmer on a limited supply of room, particularly for grain.

Baxter Steam Street Car.

The Baxter Steam Street Car was brought from the factory of Messrs. Bolen & Crane last evening, and after a successful trip up and down Broad street, went up Market street to the depot of the Springfield avenue line, where it will be placed upon duty to carry passengers from the depot to Irvington.

The trip can be made in four or five minutes each way, and thus do away with the necessity of horse cars upon that end of the route. It is the intention of the Company to run steam cars at least as far as the Court House on Market street, if permission is obtained from the Common Council. Much interest was felt last evening to see how the car would get up the hill by the Court House, and great satisfaction expressed at the ease with which the ascent was made, although but forty pounds of steam was used, while the usual running power will be about one hundred and fifty pounds. Mr. Baxter, the patentee, and Mr. Paul Buchanan, President of the Springfield avenue line, accompanied the car upon the very successful trips last night.—*Newark N. J.) Register.*

Steam on the Canals.

The Buffalo *Courier*, of 23d ult., gives the following account of the new steam canal boat which is entered as pioneer competitor for the prize of $100,000 offered by the State of New York for the best canal motor:

The new canal steamer George Barnard, about which so much has been said in the journals of the State, arrived here yesterday, and attracted considerable attention. Her running time from New York to Albany was 47 hours, and from Albany to this city eight days of 24 hours each. Sundays not included. She brought with her 180 tons of lump coal, minus 30 tons unloaded at Syracuse on account of the shallow water west. She is commanded by Captain Thomas Main, and is owned by Messrs. Main and McMillan. An ordinary screw propeller is arranged in an opening situated in the bow of the boat. The opening is tapering in shape, and terminates about twenty feet from the bow. The propeller is driven by a simple upright engine, 12 inches in diameter, with 12 inch stroke, which is supplied by steam from an upright boiler four feet in diameter by ten feet high, the boiler being fed by an upright steam pump; the whole being very compact, and occupying a space on the floor of the boat only ten by four feet, and, including water in the boiler, weighs only five tons. The opening of the screw reduces the displacement only five tons, so that the application of steam power reduces the carrying capacity only ten tons. The consumption of fuel is about one ton of coal in twenty-four hours. The boat can be managed by three hands, or four if running all night, and her ability to get through the locks gracefully may be inferred when we say that she came through the five locks at Lockport in twenty-five minutes. The machinery used on the Barnard, it is claimed, can be applied to any canal boat at a cost of about $600 for altering the boat in addition to the price of machinery, giving to it twice the speed of the present loaded boats towed with horses.

Elizabethtown and Paducah Railroad.

The contractors are actively at work on the Elizabethtown and Paducah road this side of the Tennessee river. James Benson, as we have before stated, took the contract from Paducah to Clark's river, and has commenced work with a good force out near the Paducah and Gulf railroad depot. Mr. Bearden is at work on the trestling on this end. A. S. Jones has a force of over three hundred hands in the hills beyond Clark's river, which he will increase to five hundred at an early day. Garrett Johns is pushing his contract for the trestle work this side of the Tennessee river. The work on the Tennessee and Cumberland river bridges is being pushed with all the force that can be employed. There is not much doubt that the road will be completed by the first of July, 1872.—*Paducah Kentuckian.*

☞ A company is to be formed for the purpose of constructing a railroad from Eagle Bridge to Rome, N. Y., that being the only link necessary to complete the chain of roads from Boston to the Lakes. Over $100,000 has already been subscribed.

☞ A meeting to organize the Prescott River Falls and Northern Railroad Company, will be held at River Falls, Wis., on the 6th of September.

☞ The contract has been let for grading the Chicago, Dubuque and Minnesota railroad from Lansing, Iowa, on the Minnesota State line. Cars will soon be running as far up as Guttenburg.

☞ The Governor has accepted the offer of W. D. O'Brien to build the Prince Edward Island Railroad for £4,355 per mile.

Railroads of Arkansas.

The Agent of the State of Arkansas has recently written a letter giving information in reference to the bonds authorized to be issued by the authorities of Arkansas in aid of certain railroads. From this letter it appears that the total amount of bonds which may be issued is $11,400,000, of which only $3,450,000 have been received by the railroads and thrown on the market. The particulars of these transactions are as follows;

The Memphis and Little Rock Railroad, one hundred and thirty miles long, is completed and has received $1,200,000, the full amount to which it is entitled. The Little Rock and Fort Smith Railroad, one hundred and fifty miles long, has eighty miles in running order, and has fifty miles graded and ready for the track, and has received $900,000, being entitled, when completed, to $1,500,000. The Little Rock, Pine Bluff and New Orleans Railroad one hundred and sixty miles long, has twenty miles finished and has sixty-two miles graded and ready for the track, and has received $750,000, being entitled, when completed, to $2,400,000. The Mississippi, Ouachita and Red River Railroad, one hundred and seventy miles long, has twenty miles finished, and twenty-two miles graded and ready for the track, and sixty-eight miles graded, and has received $450,000, being entitled when completed, to $2,550,000. The Arkansas Central, one hundred and fifty miles long, has received $150,000, and is entitled to $2,250,000. The Kansas City and Fort Smith Railroad, one hundred miles long, is entitled to $1,500,000, but has received no bonds. The Cairo and Fulton Railroad has twenty miles in running operation, and twenty miles graded and ready for the track, but has declined the $3,000,000 awarded to it by the State. By the terms of the law the State bonds can be issued to the railroad companies only as sections of ten miles of road are graded and prepared for the rails, and upon each application for bonds a rigid showing is required of the uses to which the bonds previously given have been applied.

Port Royal Railroad.

Work has been commenced on this road in the vicinity of Yemassee, and as we are informed by Mr. Gage, the engineer, fifty men are already preparing the road for use. Three hundred tons of rails have been purchased in New York and will shortly be *en route* for Battery Point. The chairs have been ordered from Richmond, and will shortly arrive. Seven hundred tons of rails, contracted for by the old *regime*, were to have sailed from Europe by the 21st of June, direct to Charleston, but as yet no tidings have been heard of the vessel. Upon her arrival at the latter port, she will be ordered to discharge her cargo at Whale Branch, midway between Yemassee and Beaufort. —*Beaufort Republican.*

☞ It has been already stated that the Pennsylvania divisions of the Bachman Valley road are under contract, and will be completed from Klinefeltersville across the Hanover branch and to the State line by Christmas this year. It is now said that that part of the road extending from the Pennsylvania line to Chestnut Hill ore mines, in Carroll county, will shortly be put under contract and the work pushed rapidly forward to completion.

☞ The St. Louis *Times* says that over two thousand men will be put to work on the Cairo and Fulton railroad early in September, and the entire half from the State line to Little Rock will be completed next summer.

☞ The Hudson River railroad company have now a continuous double track of the best stee from Albany to New York.

Journal of Railroad Law.

RAILROAD COMPANIES—WHAT CONSTITUTES NEGLIGENCE—FAILURE TO RING BELL OR SOUND WHISTLE AT PUBLIC CROSSINGS—PRESUMPTIVE EVIDENCE.

The recent case of The St. Louis, Jacksonville and Chicago Railroad Company *vs.* Terhune (50 Ill., 151,) was an action on the case brought by Terhune against the St. Louis, Jacksonville and Chicago Railroad Company, to recover for damages resulting from an alleged violation of the statute, imposing upon the railroad companies the duty to ring the bell or sound the whistle upon the engine at the crossing of public highways, as therein provided. The plaintiff alleged that by reason of the failure of the defendant to comply with the statute in that regard, two cows, property of the plaintiff, of the value of $300, were run over and killed. On the trial the jury returned a verdict for the plaintiff, and assessed his damages at $150. A motion for a new trial was overruled, and final judgment rendered upon the verdict. The defendants bring the cause to this Court on appeal, and assign various errors upon which they rely for reversal.

The following is the opinion of the Court delivered by

WALKER, J.—The question of the weight of evidence was for the jury, and they having determined it, we will not disturb their finding, unless it is not supported by the proof. It is their province to weigh and reconcile where it may be done, and if not, then to give it such effect as it is entitled to receive, rejecting such portions as may be unworthy of belief, and giving due weight to such as they may believe to be true. In this case there was a conflict of evidence as to whether a bell was rung or a whistle sounded for the distance required by law before reaching the road crossing where the cattle were killed. The jury having found there was not, we are not prepared to hold their finding is not supported by the evidence.

Appellants insist that the Court below erred in giving appellee's third instruction. It informed the jury that the omission to ring a bell or sound a whistle at the road crossing as required by the statute, was *prima facie* evidence of negligence. In the case of the Galena and Chicago Union R. R. Co. *vs.* Dill, 22 Ill., 271, it was held that it was a question of fact, to be determined by the jury, whether such an omission is negligence. In that case, the statute imposing that duty on railroad companies had been repealed as to that road, and hence it was a question arising under the common law, whether such an omission was negligence. That case is not therefore an authority in this, as the question presented by this instruction is whether the omission of a duty imposed by the statute constitutes *prima facie* negligence, or whether in such a case the plaintiff is bound to prove other omissions of duty which constitute negligence. In the case of The Great Western R. R. Co. *vs.* Geddis, 33 Ill., 304, which was similar in its facts to this, it was held that the failure to ring a bell or sound a whistle at a road crossing was negligence that should render the company liable for injuries growing out of the omission, that might be occasioned by their engines, to persons or property; that the omission to perform an act imposed by the statute was negligence. In that case the cases of the Illinois Central R. R. Co. *vs.* Phelps, 29 Ill., 447, and The Illinois Central R. R. Co. *vs.* Goodwin, 30 Ill., 117, were referred to and distinguished from Geddis' case. It was said of those cases, that the animals were killed at a place where the statute did not require the signal to be given, whilst in Geddis' case the injury to the animal was at a highway crossing where the signal was required.

That case was in point and must govern this. The Court below did not err in giving this instruction. No error being perceived in this record the judgment of the Court below must be affirmed.

Judgment affirmed.

The Bonded Car System.

PRACTICAL WORKING OF THE NEW LAW.

Under the provisions of the tariff and internal tax act of July 14, 1870, Congress voted to certain interior cities and cities on the coast that are either not furnished with facilities for the proper transaction of trade with foreign countries or desire a more direct communication overland, the privilege of importing goods in bond direct through other ports, without delay for examination and appraisement at the original landing. Those cities are as follows:

New York, Boston, Providence, Philadelphia, Baltimore, Norfolk, Charleston, Savannah, New Orleans, Portland (Me.), Portland (Oregon), Buffalo, Chicago, Cincinnati, St. Louis, Evansville, Milwaukee, Louisville, Cleveland, Memphis, Mobile, San Francisco, to and from Europe and Asia, and the islands adjacent thereto via the United States.

In framing the part of the law relating to this subject, Congress seemed at the time to be actuated solely by a desire to accommodate the cities of the West, and went blindly forward without a well-considered method of operation. The new legislation is an experiment, and while the law contains many incongruities, impracticabilities and blunders, it is also characterized by a number of omissions which are now quite noticeable.

With the law for a basis, the Secretary of the Treasury, to whom the power was delegated, directed his experts to prepare a series of regulations for the government of the new system. After they had prepared them, the Secretary and Assistant Secretary revised and corrected them until they believed they had done the best they could to make it successful as a system, convenient and useful to the merchants, and safe for the government. But the whole thing is new. No expert has confidence in results, and in fact every one of them has predicted that the law would prove a failure. The main point to be covered was in the distinction between the old and new systems. Under the old plan goods could be sent in bond to points within a collection district, but the entire vessel or car freight was placed under government supervision. The new plan was intended to exert a supervision only over a space necessary to carry the amount of bonded goods to be transported, a part of a vessel or a part of a car, where a full load of goods were not bonded.

The safeguards for the protection of the government were to originate with the Secretary of the Treasury, and his regulations were to be clothed with full force and effect of law. His imaginative mind conceived the idea of appointing an army of inspectors, with generous salaries, to be paid by the railroad companies. Special iron cars were to be made for the purpose, and a lock was to be placed wherever there was room to nail a hasp. A patriotic band of brothers were to supply the great "American seal lock" for each crack where a robber could peep through, at a liberally remunerative cost, to be paid by the railroad companies. Intricate machinery for vigilant inspection at each way station, and expenses and drawbacks to success marked the body and seemed the pith of each paragraph in the regulations. Bonds that were stronger than the cars themselves were to be given for the performance of the contract by the fortunate parties who were to become "common carriers" within the spirit of the law and the distinct terms of the Secretary's regulations.

The caution with which transportation companies approached the scheme and the rapidity with which they went away reminded one of fish nibbling at a hook. The first bait did not answer. Some three important railroad companies came forward and the Secretary thought they would bite, but nine months elapsed and not a single transportation company in the United States agreed to comply with the terms. It was then discovered that the conditions were too stringent. The Secretary trimmed the regulations, allowed railroad companies to use ordinary box cars, and reduced the number of locks required to two for each car. He also reduced the number of inspectors, gaugers and other officers to a limit where necessity placed it. Where in crossing a river it becomes necessary to transfer the cars or goods to a steamboat, a more liberal system of transfer is now addressed to that particular emergency. Measures for facilitating the delivery of goods from ocean steamer to common carrier have been taken, and the details are being arranged to make the whole experiment successful in accomplishing its object, so far as the meagre and incoherent provisions of law will permit.

Since these amendments to the regulations have gone into effect two railroad companies—the Camden and Amboy and the Merchants' Dispatch Transportation Company—have accepted the conditions, executed their bonds, and are now carrying goods under the system. The Camden and Amboy company operates only between New York and Philadelphia, but has been carrying bonded goods several weeks. The Merchants' Dispatch Transportation Company operates from New York to Boston, Providence, Portland (Me.), Portland (Oregon), Buffalo, Chicago, Cincinnati, St. Louis, Evansville, Milwaukee, Louisville, Cleveland, San Francisco, Memphis, Mobile, and from and to Europe and Asia and the islands adjacent thereto, taking through invoices across the continent. By their mode of operations they take goods off the steamer and send them part way to destination the same day they arrive from a foreign port. They are exempt from warehousing, cartage charges, examination and appraisement, weighing and measuring gauging, and general order. The Merchants' Dispatch line has just received 1,000 new cars, specially constructed for this business. It is said that they are as fine and substantial a set of box cars as have ever been built anywhere. This company believe the bonded transportation system will be a perfect success, and the fact of their having bought at once so many cars, looks very much like abiding faith in the enterprise. It might be remarked that J. C. Fargo, Augustus Schell, Wm. H. Vanderbilt, Horace F. Clark, Jared Chittenden and others of the New York Central Railroad Company are the corporators of the new company, and it is believed that the Central folks are really the new concern.

It is probable that the Pennsylvania railroad will bond. That will depend greatly upon the success or failure of the other line to make it pay. If the present efforts are successful the competition between the Pennsylvania and New York Central will be quite lively. The Erie Railway cannot bond with profit, for the reason that at each change of gauge the goods must be changed from car to car under the supervision of government inspectors, who are to be paid by the Company. Thus, in shipping a through carload to Chicago, it would go on a broad gauge road to Buffalo, then strike a narrow gauge road, and at Cleveland would again meet the broad gauge. It would probably require the continuous services of eight industrious government employees at those two breaks at an average salary of $2,000

each, aggregating $16,000 per annum, which would cut deeply into the profits. But the Erie road is not at all anxious to go into the business at present.

THE TEA TRADE WITH CHINA AND JAPAN.

Mr. Webb and Mr. Holladay expect great things to come from the new through European-Asiatic trans-continental traffic. Arrangements have been made whereby tea will be put down in San Francisco from China and Japan by the shortest sea route that can be found. Experiments have shown that tea does not absorbed enough extra moisture to injure it on the twenty-two days trip to San Francisco, and that in its passage east over the Pacific roads the rarefied atmosphere of the plains effects a change that restores it to the perfect condition in which it left China. If it is a fact and not a theory of imagination that these greatly desired results are reached in the passage, it will be a decided benefit to the Pacific Mail steamers and our trans continental trunk roads. A new aid will be furnished to the central trans continental route, and competition created between that and the Southern Pacific, which will tend to reduce through freights, while benefitting not only the roads themselves, but also the localities through which they pass. It may be interesting to know that the Pacific Mail steamships are now driving a brisk trade, both in freight and passengers. An Austrian nobleman, a tourist who passed through, from Japan to Austria by the American steamers and railroads to New York, says emphatically that the route furnishes better facilities and more comforts to the passenger, besides the grand sights seen on the trip, than any route in the world, and that no route between Europe and Asia can compare with it in respect of quickness, comfort, convenience, or enjoyment to the passenger. He told President Grant he would publish the fact throughout his country and all parts of the world he may hereafter visit. When foreigners become enthusiastic over our travel system, we have great reason to be proud of our achievements, and to believe that the Asiatic trade, for which we have contended so long, will soon be transferred to our merchants and carriers.

THE SEAL LOCK BUSINESS.

The Merchants' Dispatch Company complain that the Secretary of the Treasury has ordered them to put two "American seal locks," at a cost of $16.30 on each of their 1,000 new cars. The first train for the West went off some days ago locked as ordered. The Company do not like the locks, and think that if the Secretary of the Treasury admires them so much the government ought to pay for them, and not force the companies to do it, to pay a bounty to the "lock ring." As another instance of this injustice, petroleum exports furnish a startling exhibit. Petroleum costs about $50 a car load at the oil wells and the freight to the seaboard costs about the same ($50). Thus it will be seen that half the value of petroleum in New York is made by freight charges. A great deal of it is carried in bond through the border of Canada and back into the United States by rail to New York. Secretary Boutwell has ordered that each petroleum car be locked with the American seal lock at a cost of $22 per car. In view of the fact that all the companies have any quantity of the old shackle seal locks that have never yet been picked (except by collusion among the government officials), which never wear out, and were furnished at a cost of 50 cents each, this imposition on the petroleum exporters is a very suggestive fact. The exporter of petroleum finally pays for the locks in increased freight charges, and the natural effect of a few more such impositions would be to divert trade in petroleum through Canada to Europe, instead of through New York. The lock exaction itself will send many a cargo down the St. Lawrence river, to the unnecessary injury of New York.

In establishing safeguards for the protection of the government there are three considerations to be taken into account:

First—Character of transportation companies. Thefts on the part of a transportation company would result in their own loss. They are obliged to pay the owner the value of the goods and to pay the government the amount of duty. While the government has an average interest of 35 per cent. in the goods being transported in bond, the transportation company, have an interest of 135 per cent. in the same goods, besides the reputation of the company, which is always at stake. No transportation company in this country have ever been known to steal bonded goods. The care of the government then must be exercised to prevent the possibility of exchange of packages. If a system or single act of exchanging, for example, *facsimile* package of toys or straw, for a package of silks or velvets were undertaken by the company, the act would require collusion of the owner with every officer of the company, from the president to the brakeman. The conclusion then is, that transportation companies are necessarily, and in fact, honest, so for as smuggling is concerned.

Second—Safeguards against robbers. Every officer and employee of the transportation company is a watchman against robbers. So should the government officials be. But when a robber comes along he quickly jerks the hasp out with a "jimmy" and the lock drops down intact, leaving a free entrance to the car through the door. He would not even stop to unlock a common padlock requiring an ordinary key, or that could easily be opened with a nail. Therefore no car lock is a safeguard against robbers.

Third—Collusion among government officials. The only manner in which the present government locks have been picked within the many years of their past use has been through collusion between government officials. The seals have been put on and taken off and goods removed and replaced by similar looking packages, and the seals on the locks restamped. Therefore the danger in the case is from the men sent by the government to guard its interests. No lock in the world could prevent collusion among the men who hold the keys to it.

PROBABLE EFFECT OF THE NEW SYSTEM HERE.

Opinions differ about the probable effect of the new system of bonding goods without appraisement, from seaport to seaport or to the interior. Many merchants of the interior say they will not make use of the privilege, for the reason that they are obliged in any event, to patronize New York in buying gold for payment of duties, and the cost of transporting gold is about equivalent to the broker's fee; while the only advantage gained is in avoiding delays here in Custom House business that is done more quickly in cities where there is less of that business transacted. The special government agents on this forwarding business, paid by transportation companies, take an entry at once and watch the goods from steamer to depot, thus getting them off to final destination the same day they arrive. They avoid the three or four days delay here, and the same work is done in one, two or three days at the port of final delivery.

This forwarding will take from New York some business of Custom House brokers, appraisers, inspectors, weighers, gauges, warehousemen, draymen, general order stores, and others. And some of our merchants contend that it will encourage direct purchases between the West and Europe, thus injuring their trade in some degree. The friends of the scheme say the advantages to New York to be gained by opening an Asiatic-European trade across our Continent will more than make up for the possible losses in other ways. They contend that every shipment must benefit in greater or less degree the cities of New York and San Francisco, and that considerable handling will be necessary at both those points. They further argue that New York will be certain to receive the freights destined to ports along the Mississippi river whose foreign supplies have heretofore reached them, from New Orleans. The landing of the vessels and emigrants is much to a city in a commercial point of view. Whether thes predictions, or any of them, will prove true is a matter of conjecture. A few weeks will probably determine the success or failure of the enterprise.—*N. Y. Journal of Commerce.*

Augusta and Hartwell Railroad.

We publish in our advertising columns this morning an advertisement from the contractors of the Augusta and Hartwell Railroad. They are prepared to let contracts for grubbing, etc. This looks like business. We have been informed that if no difficulty is experienced in obtaining the right of way through this city and vicinity that ground will be broken by the first of September, in a little less than two weeks time. We earnestly hope the road will be commenced and pushed to an early completion. It is a line which, when finished, will benefit Augusta more than any other Railroad that could be constructed. It will give us the shortest route to Cincinnati and the granaries of the West that can be found, and will give to us also the trade of counties in our own State, which has hitherto found its way to other markets. We hope that when the first day of September arrives work will begin, and not stop until the iron horse enters Clayton.—*Augusta Chronicle, Aug.* 28.

☞ Mr. Cyrus Diller, of Hanover, Pa., has received the contract for the grading and masonry of the Pennsylvania division of the Bachman Valley railroad, commencing at the Hanover Branch railroad, near Leib's mill, thence following a branch of Codorus creek, to Klinefeltersville, and thence on to the State line. The work of grading was commenced on Tuesday. Mr. Gitt is now completing the location from the State line to the Chesnut Hill ore banks, which is shortly to be let, and the entire work of grading is to go on and be pushed forward as rapidly as possible.

☞ It is stated that the Texas Pacific Railroad Company have resolved to establish the Eastern manufacturing and machine shop of the road at Shreveport, provided the city will give the needed grounds (25 acres) and loan to the company the twenty years' bonds of the city to the amount of $100,000. It has also been resolved to begin the construction of the Texas Pacific Road at Shreveport, and the building of the road toward Vicksburg will be be run at the same time, and continued *pari passu* with the road to the West.

☞ The Boonsboro' (Md.) *Odd-Fellow* learns that the eastern section of the Miramar railroad, from the Susquehanna river, forty miles, is to be finished ready for rolling stock by September, 1872. As heretofore explain d, an additional section of forty-five miles, passing through the towns of Waynesboro' and Boonsboro', will reach to the Potomac.

☞ The Russian Government has appointed a special commission, which has already commenced its labors, to inquire into and report upon the expediency of adopting the narrow gauge for all the railways in the empire.

☞ The Framingham and Lowell Railroad was formally opened for travel on the 22d inst. The road is 26 miles long, and has been built in nine months.

☞ The laying of the ties and rails on the Cumberland Valley Railroad Extension between Hagerstown and Williamsport has been commenced.

Commerce of New York.

The foreign imports at New York for the month of July, 1870 and 1871, are officially stated as follows:

	1870.	1871.
Entered for consumpt'n.	$13,579,723	$16,410,318
Do. for warehousing	10,042,048	12,468,220
Free goods	988,444	1,985,993
Specie and bullion	194,990	176,640

Do. exclusive of specie.	105,008,687	132,931,600

☞ The Manchester and McMinnville railroad was sold at Manchester, Tenn., on the 17th ult. The Memphis and Charleston Railroad Company was the purchaser. Favorable terms were obtained by the stockholders of the former company. The purchasers have agreed to extend the road to Sparta, Tenn., and to have it in running order to that point within eighteen months, and to extend it south from Manchester or Tullahoma to Huntsville, Ala.

☞ The rails of the Knox and Lincoln Railroad have been laid beyond Waldoborough, and the work of ballasting between Waldoborough and Damariscotta is going on, and passenger trains will commence to run from Waldoborough to Bath this week.

☞ Grading is nearly completed on the new Holyoke and Westfield (Mass.) Railroad, and the laying of the rails will be begun by the first of September, and it is expected the road will be ready for business by the first of October.

☞ The whole of the Western Railroad, from Montgomery to West Point and Columbus, is being relaid with new fishbar rails. About thirty miles are already completed.

Census of the United States.

The aggregate Population of the States and Territories—and as White, Colored, Chinese, Indians, etc.—as shown by the Ninth Census, is as follows:

The returns for Chinese, from California, includes 33 Japanese. Massachusetts reports 10, New Jersey 10, Michigan 1, and Pennsylvania 1.

"Indians not taxed" are not included in the basis of representation, and are consequently not embraced in the above enumeration. Our entire Indian population was stated in the last report of the Indian Commissioner to be 305,319.

Steam on the Canals.

The prize of $100,000, offered by the State of New York for the best motor for canal navigation, while it has attracted very general attention throughout the country, has been misapprehended as to some of the conditions attached. It is supposed that any plan, to receive the approval of the commission, must wholly avoid the washing of the canal banks. The commissioners ignore this condition. They seek a plan for navigating the canals, with the present depth of water and size of locks, which will be economical and certain, and as speedy as possible—which will successfully meet the rivalry of the railroads. Thus far no motor power, other than animal power, has been successfully applied to the navigation of the canals. All the plans which propose the introduction of steam or other motors for this purpose have been either inoperative, too slow, or too expensive, or both of them combined. The question of wash, we suppose, will be considered as an item under the head of economy, as the safety of the embankment will certainly be a consideration.

☞ The Toledo *Blade* learns that the survey for the Baltimore, Pittsburg and Chicago railroad is completed from Pittsburg to Havana, a small station on the Lake Erie division of the Baltimore and Ohio railroad, eighty miles south of Monroeville, Ohio. Thence, it is expected, according to the programme now being pursued, the line will run to Defiance, on the Toledo, Wabash and Western railroad, crossing on its way the Dayton and Michigan railroad at a point now called Ellsworth. From Defiance it is expected that the engineers will work their way along to Bryan and through Lagrange and Steuben counties to Laporte, Indiana.

☞ The Newark *Daily Advertiser* says a dispatch was received from the Chancellor on Thursday evening stating that the argument on the rule to show cause why an injunction should not be granted to prevent the United Railroad Companies of New Jersey from leasing their works to the Pennsylvania Railroad Company would be heard on the 12th day of September.

☞ The Hempfield railroad now runs from Wheeling, West Virginia, to the county seat of Washington county, Pa. It has been proposed to extend it to a point on the Pittsburg and Connellsville railroad. The Washington *Review* says that a committee which waited upon President Hughart a few days since was assured by him that a corps of engineers would be upon the line in a short time, and that the road would certainly be built very soon.

☞ At a recent meeting of the corporation of St. George's Valley Railroad Company, at Union, Me., Mr. W. H. Hunt of Liberty was chosen President.

☞ The ten per cent. interest law, enacted by the last Legislature of Kentucky, will go into effect on the first of September.

Intercolonial Railway.

THE Commissioners appointed to construct the Intercolonial Railway, hereby give public notice that they are prepared to receive Tenders for Track laying and ballasting on 75½ miles of line, being sections 4, 7, and 12, in the province of Nova Scotia. Tenders may be for the whole distance or for separate Sections.

Specification and forms of tender can be obtained at the Commissioners' Office, Ottawa, and at the Offices of the Engineers at Truro and Amherst.

Sealed Tenders marked "Tenders," and addressed to the Commissioners, will be received at their Office in Ottawa up to 12 o'clock noon, on Monday, the 25th day of September, 1871.

Tenders will also be received at the same time and place for 800 tons of Spikes according to samples, to be seen at the above named Offices.

Tenders to state price per ton of 2,240 lbs., delivered in equal quantities at Truro and Amherst Railway Stations. 50 Tons to be delivered at Amherst by the 16th of October, and 50 Tons by the 1st November next. Balance of delivery by 1st July, 1872.

A. WALSH,
ED. B CHANDLER,
C. J. BRYDGES,
A. W. McLEAN,
Commissioners.

INTERCOLONIAL RAILWAY,
Commissioners' Office,
Ottawa, 14th August, 1871.

Notice to Contractors.

PROPOSALS for grading and masonry, or the materials for masonry, for about thirty-two miles of the extension of the Boston and Maine Railroad to Portland, will be received at this office, or at the office of HENRY BACON, the Engineer, at Saco, Me., until the evening of the 15th of September next.

Proposals may be made for grading one or more sections into which the work will be divided.

Profiles and specifications may be seen at the Office of the Engineer on and after September 8.

The Corporation reserves the right of rejecting any proposals. F. COGSWELL, President.

Boston, August 21, 1871.

Notice to Contractors.

PROPOSALS will be received by the undersigned for Grading, Bridging and Superstructure, (including rails and cross-ties,) for the Lancaster Railroad, until September 30, 1871. Profiles and specifications can be seen at the office of the Engineer, C. C. F. BENT, Lancaster, Mass.

GEO. A. PARKER, Pres't.

A CIVIL ENGINEER wants a situation on the construction of a new road or making preliminary surveys. Address F. E., Office of the Railroad Journal. 2t35*

FORTIETH DIVIDEND

WASHINGTON INSURANCE CO.,

No. 172 BROADWAY,

NEW YORK, July 28, 1871.

A DIVIDEND of FIVE PER CENT. has been declared, payable Aug. 1, free of tax.

WM. K. LOTHROP, Secretary.

CIVIL AND MECHANICAL ENGINEERING, at the Rensselaer Polytechnic Institute, Troy, N. Y. A higher and more practical Course of Instruction will be given here than has ever been attempted elsewhere in this country. Re-opens Sept. 13th. For the Annual Register, containing improved Course of Study, and full particulars, apply to PROF. CHARLES DROWNE, Director.

ENVELOPES.

SAMUEL RAYNOR & CO.,

115 & 117 William street,

New York.

Manufacture every style of envelope, from the smallest drug size to the largest official; and any size, pattern, shape, or quality wanted for railroad companies, express and insurance companies, banks, bankers and brokers. All well made and gummed. Samples given when requested.

TO CONTRACTORS.—Superior Steam Dredges, Steam Hoisting Derricks, Upland Excavators, Stationary and Marine Engines, and all kinds of Machinery made to order by the POUND MANUFACTURING CO., Lockport, N. Y.

NOTICE TO CONTRACTORS AND BRIDGE BUILDERS.

DEPARTMENT OF SURVEYS,
224 South Fifth Street, Philadelphia.

SEALED PROPOSALS will be received at the Department of Surveys until three o'clock P. M. of September 6, 1871, for the construction of a Bridge over the river Schuylkill, on the site of the Suspension Bridge at Fairmount, with approaches to Twenty fifth and Spring Garden streets, in the Fifteenth ward, and to a point about 144 feet westward of Thirtieth street, in the Twenty-fourth ward, as follows:

First. For the Bridge superstructure over the river, including all materials, workmanship, and erecting ready for use. It will be of wrought iron, 348 feet from centre to centre of end posts, and 34 8-10 feet from centre of lower to centre of top chord, and also two trusses for Thirtieth street, to be 84 feet from centre to centre of end posts, and 10 5-10 feet from centre of lower to centre of top chord, also of wrought iron. Detailed plans with complete strain sheets for these bridges, conforming to specifications, to accompany proposals, which on main Bridge shall give prices for both a two and three truss bridge.

Second. For all the iron work on *approaches* to be erected complete, as per plans and specifications.

Third. For the gradation and masonry, to include curbing and paving, as per specifications and plans.

Each bid must be made upon blanks prepared, otherwise they will not be accepted, and every bidder must submit the names of two persons of undoubted responsibility, who will be bound with them as security for the faithful completion of the contract. The City reserves the privilege of rejecting any and all bids that may not be satisfactory, and each proposal as herein divided will be considered separately and will be so allotted.

Payments will be made monthly in bonds of the City of Philadelphia, or in cash, at the discretion of the Mayor.

Each bid must be accompanied by a certificate from the Law Department that a proper bond for the sum of five hundred ($500) dollars has been filed there, in accordance with the ordinance approved May 25, 1860.

The contractor or contractors, in making their proposals, shall do so with the understanding that if their proposal shall be accepted, that every dispute or difference which may arise shall be decided by the Chief Engineer and Surveyor, from whose decision there shall be no appeal.

All bidders are invited to be present at the opening of proposals offered on said day, at 3½ o'clock

Plans may be seen and examined at the Department of Surveys, where specifications and blank proposals may be obtained, on and after the 22nd day of July, inst.

STRICKLAND KNEASS,
Chief Engineer and Surveyor.

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly. A contract has just been made with the pioneer Narrow Gauge Road—3 ft. Gauge—on this Continent—(The Denver and Rio Grande R. W.)—for 100 cars; also for a Georgia Road.

Comparative weights of Narrow and Full Gauge Cars sent by mail free of charge.

NEW YORK
State Railroad Bonds.

A First-Class Home Investment.

FIRST MORTGAGE
GOLD BONDS

OF THE

RONDOUT AND OSWEGO RAILROAD.

Principal and Interest payable in Gold.

SEVEN PER CENT. SEMI-ANNUALLY.

This Road covers 100 miles of the most direct possible line between the Great Lakes and deep water navigation on the Hudson River, the whole line of which will be completed and in operation on or before October 1, 1872, and give a new line of road to Lake Ontario and the West 25 miles shorter than any line that can be found.

It passes through the Cement, Flag-Stone, and Lumber regions of Ulster County, and the rich agricultural bottoms of Delaware and Greene Counties, all of which have not heretofore been reached by railroad facilities, and from which sections the formation of the country prevents the construction of a competing line.

The 36 miles of road operated for three months is already paying net earnings equivalent to 7 per cent. gold on its cost of construction and equipments. The issue of Bonds is limited to $20,000 per mile of COMPLETED ROAD, the coupons payable in gold in this city. Price of the Bonds 90 in currency.

Full particulars of the above may be had of, and the Bonds for sale by,

EDWD. HAIGHT & CO.,

9 Wall Street, New York City,

Financial Agents of the R. & O. Company.

☞ FIRST MORTGAGE SINKING FUND LAND GRANT BONDS OF THE ST. JOSEPH AND DENVER CITY RAILROAD COMPANY.

IN DENOMINATIONS OF $1,000 $500, AND $100, can now be had from the undersigned or through the principal banks and bankers of the United States. The attention of investors is invited to the merits of these bonds, secured by a first and only mortgage on the road, equipments, franchise, and property of a trunk line of railroad which will shorten the distance between New York and San Francisco some 280 miles, and in addition the mortgage to secure the bonds covers a land-grant of 1,500,000 acres of the most fertile land in the West, which is prohibited from being sold at less than four ($4) dollars per acre by the terms of the mortgage deed, and according to the present market price of the Illinois Central Company's lands is worth $18,750,000. This loan was originally for $5,500,000, but has been largely reduced by subscriptions of actual investors. The remaining balance of the loan is offered at 97½ and accrued interest, but the right is reserved to advance the price at any time, without notice.

The bonds have thirty years to run; bear 8 per cent. interest, payable in New York, London or Frankfort-on-the-Main, at the option of the holder, without notice, free of taxes. BOTH PRINCIPAL AND INTEREST ARE PAYABLE IN GOLD. They are Coupon Bonds, but can be registered with the coupons on, or can be registered with the coupons off, and interest paid to registered owner. Interest payable Aug. 15 and Feb. 15. A liberal sinking fund, formed from the entire land sales, in payment for which the bonds will be received at par and accrued interest, provides for the early extinguishment of this loan.

Trustees—Farmers' Loan and Trust Company.

These bonds offer favorable inducements to parties desiring to fund their Five-Twenties, or other high-priced securities.

In converting Five-Twenties the investors realize 17 per cent. profit on the principal; 2 per cent. per annum excess of interest; and at the same time get a perfect security.

Maps, circulars, documents, and full information furnished on application.

Though acting as agents for the sale of this loan, our firm buy and sell in their regular business the bonds of the St. Joseph and Denver City Railroad Company, those of the Eastern Division being now quoted at 102 and accrued interest. These were originally placed by us at 97½.

TANNER & CO., Bankers,
No. 11 Wall-st.

☞ The new branch railway now building by the Central Railway Company of New Jersey from Newark to Elizabeth, will be completed in about three months. Two miles of the road commencing at Brill's farm have been finished.

Steinard Steam Brake.

A trial test of the Steinard Steam Brake was made on Tuesday, the 5th inst., on the Flushing and North Side Railroad, in the presence of a large number of railway officials, engineers, etc. The train, consisting of an engine, tender and six cars, left Hunter's Point about 11 O'clock, A. M., and when a speed of 20 miles per hour was attained the engineer applied the steam brake. There was no shock or bumping of the cars, but a gradual diminution of speed to 6 miles per hour, when the brake was released and the speed increased. This was repeated several times, until the train passed Flushing, and a long stretch of straight track was reached. The passengers then left the cars and stood at the side of the track. The train was then moved backward to the top of an up grade, distant about one-quarter of a mile. The train then moved forward and attained a speed of 45 miles per hour, when, at a signal from the track side, steam was shut off and the brake applied; the train stopped without a jar in 700 feet. The test was repeated once, with the same success. The passengers then entered the cars, the train ran back, and the test was again made with the same result.

The principle of the Steinard brake is the same as that of the Loughridge steam brake. A cylinder and piston beneath the engineer's cab on the locomotive, take steam by a pipe from the boiler. A short chain traveling over guide wheels, connects the outer end of the piston with iron rods so arranged beneath the cars, that when steam enters the cylinder and the piston is forced back, the short chain acts directly on the rods beneath the cars, closing the brake shoes against the wheels and checking the speed. The rods are connected between the cars by compensating bars, thus dispensing with the hook and chain formerly used. There is, therefore no slack chain to be taken up when the brake is applied before an effect is produced. Another feature is that the pressure is the same on the wheels of the rear car as on the leading ones. The entire command over the speed of the train is thus placed completely in the hands of the engineer on the engine. He can increase or diminish the pressure on the wheels at will, thus avoiding the unintentional passage of stations and the application of two great and irregular power.

All who witnessed the tests seemed unanimous in their approval of the brake and its operation. The brake on each car being independent of the one behind it, if a car becomes detached, those ahead of it can be perfectly controlled. The brake has been placed on all the engines and cars

of the Flushing and North Side road, where it has been in successful operation since last April.

Redemption of Five-Twenties of 1862.

The following three months' notice of the redemption of $100,000,000 of Five Twenty Bonds of 1862, was issued by the Treasury Department on the 1st inst:

TREASURY DEPARTMENT, September 1, 1871.

By virtue of the authority given by an act of Congress approved July 14, 1870, entitled "An act to authorize the refunding of the national debt," I hereby give notice that the principal and accrued interest of the bonds herein below designated, known as five-twenty bonds will be paid at the treasury of the United States in the city of Washington, on or after the first day of December next, and that the interest on said bonds will cease on that day—that is to say:

Coupon bonds known as the first series, act of February 25, 1862, dated May 1, 1862, numbered as follows; 1 to 30,699 inclusive, of 50 dollars each; 1 to 43,572 inclusive, of 100 dollars each; 1 to 40,011 inclusive, of 500 dollars each; 1 to 74, 104 inclusive, of 1,000 dollars each.

And registered bonds of the same act: 1 to 595 inclusive, of 50 dollars each; 1 to 4,103 inclusive, of 100 dollars each; 1 to 1,899 inclusive, of 500 dollars each; 1 to 8,906 inclusive, of 1,000 dollars each; 1 to 2,665 inclusive, of 5,000 dollars each; 1 to 2 906 inclusive, of 10,000 dollars each.

The amount outstanding embraced in the numbers as above is one hundred million dollars.

The coupons of the act of February 25, 1862, were issued in four distinct series. The bonds of the first series, embracing those described above, do not bear the series designation upon them, while those of the second, third and fourth series are distinctly marked on the face of the bonds. United States securities forwarded for redemption should be addressed to the Loan Division, Secretary's office.

(Signed), J. F. HARTLEY, Acting Secretary.

Richmond, Fredericksburg and Potomac Railroad.

The gross earnings of this company from operations in the two years ending September 30, 1869 and 1870, respectively, compare as shown in the following statement—

	1869.	1870.
Passengers—through	$204,045 03	$186,658 86
" local	45,659 93	52,188 06
U. S. mail	13,100 00	13,100 00
U. S. transportation	6,679 17	2,125 15
Express	16,504 29	25,932 49
Freight—through	1,811 90	8,398 05
" local	43,105 97	38,122 11
Rents of real estate	1,119 13	1,608 99
Total earnings	$332,025 42	$328,128 71
The expenses of operating, repairs, &c., were—		
Ordinary	$176,422 47	$188,443 11
Extraordinary	23,111 30	71,440 84
Total expenses	$199,533 77	$259,883 95
Net earnings	$132,491 65	$68,244 76
From which residues after expenses were paid:		
Interest	$41,081 75	$37,583 75
Div. on guaranteed stock	21,932 83	26,926 90
Total int. and divedind.	$63,014 58	$64,460 65
Leaving a net profit of	$69,477 07	$3,784 11

The falling off in receipts is remarkable, in the face of a large increase in the business of the road. The expenses in the meanwhile have largely increased, there being charged to this account all the improvements of a permanent nature on the line of the road and also the cost of new engines and cars. These causes leave the net earnings at only one half the amount as shown in the previous year and the absolute profits at scarcely 20 per cent., as compared with said previous year.

The business of the road however demanded this sacrifice of income, in order to bring it up to a safe and economical working condition.

The business of the road for the same two years compares as follows:

	1869.	1870.
Miles run by passenger trains.	130,667	141,801
" " by freight trains	50,885	31 200
" " by all trains	181,552	173 001
Passengers carried	82,370	140,980
" " one mile	4,044,544	4,787,532
Freight moved	28,053	39,866
" " one mile	658,882	904,930

The average amount received per passenger per mile was 5.04 cents, and the average cost 4.22 cents. The average amount received per ton per mile was 22.70 cents and the average cost 6.62 cents. Train expenses—freight 192.00 cents, and passenger 141.00 cents; mean cost per mile of all trains, 150.21.

The following table shows the earnings, expenses and net revenue for the five years since the close of the war:

	Receipts.	Operating.	Net rev.
1865–66	$403,723	$330,136	$73 597
1866–67	301,077	212,006	89,071
1867–68	296,726	193,984	102,742
1868–99	332,025	199,534	132,491
1869–70	328,129	259,884	68,245

The Richmond, Fredericksburg and Potomac Railroad is a link in the seaboard line, and has a present length of 75½ miles, terminating on the north at Acquia Creek, where connection is made with the Potomac Steamboat Company's steamers to and from Washington, D. C. The company are now constructing a branch which, leaving the main line at Brooke's Station, will extend to Quantico, a distance of 11.41 miles, and form a connection with the projected Alexandria and Fredericksburg Railroad, which is designed to fill up the existing gap in the railroads of the north and south and give an all-railroad line between the two sections of the union. By this line the distance between Washington and Richmond will be reduced to 116 miles, and between Baltimore and Richmond to 154 miles. The time between New York and Richmond will be reduced to fourteen hours. The cost of the branch now being constructed will be about $275,000.

The company own twelve locomotives, of which two were purchased during the last year. They own also a dummy engine.

The car equipment at the close of 1868–69 and of 1869–70 was as follows:

	1868–69.	1869–70.
Through train passenger cars	12	15
" " mail-baggage cars.	8	10
Company passenger cars	4	6
" baggage cars	1	2
Freight cars (8-wheel)	12	23
" " (4-wheel)	40	39
Wood cars (4-wheel)	51	46
Flat cars (8-wheel)	15	15
Coal cars (4-wheel)	7	7
Company cars (8 wheel)	2	2

The cost of new rolling stock during the last year was $57,301 14, which amount is included in operating expenses. The through train cars are owned conjointly with the Richmond and Petersburg and the Petersburg and Weldon Companies, this company owning 47 per cent. of the whole stock.

The financial condition of the company on the 30th September, 1870, as shown in general account, was as follows:

Capital stock, old	$700,000 00
" " new	300,000 00
" " issued for dividends	82,128 60
Guaranteed 7 p. c. stock	412,600 00
" 6 p. c. stock	19,400 00
	$1,464,128 60
Funded debt ($466,694 57) viz:

Total	$2,523,589 79

The State of Virginia owns 2,752 shares, or $275,200 of the Common (old) Stock of the company.

President.—PETER V. DANIEL, Jr.

Directors on part of Stockholders—R. W. HAXALL and C. S. MILLS, of Richmond; Elihu Chauncey, of Philadelphia; and John M. Robinson, of Richmond.

Director on part of State.—Andrew Johnson, of Richmond.

Secretary and Treasurer.—J. B. WINSTON.

Chief Engineer and Sup't.—E. T. D. MYERS.

Auditor.—J. B. GENTRY.

Purchasing Agent.—T. L. COURTNEY.

Atlantic and Great Western Railroad.

At noon of Friday, September 1, the Atlantic and Great Western Railway, with all the property connected with that organization, was formally transferred by the receiver to the trustees under the reorganization of the company. The transfer took place at Akron, and on its completion the three trustees, General McClellan, Judge Thurman, of Ohio, and Mr. Duncan of New York, took possession of the railroad and all its appurtenances in behalf of the newly organized Atlantic and Great Western Railroad Company.

The new organization comprises all the various classes of bondholders, with the exception of a portion of the bonds held in Holland, and so many of the stockholders as signed the agreement and consented to the scaling down of their stock. It is believed that by far the greater portion of the stockholders have come into the arrangement. There is no opposition to the scheme on the bart of the bond and stockholders who have not come into the arrangement, they merely preferring to take their chances outside of the arrangement. The Dutch bondholders have been paid their overdue interest, and are now working in harmony with the new organization. The stockholders who stand out to do so because they think the investment is good, and that after the bonds have all been provided for there will be more value left in the common stock than is allowed for it now in scaling down for the new organization.

The trustees who now have temporary control of the property, during the berfectment of the reorganization, will probably surrender their trust within thirty days to the company, when General McClellan will become its president.

All arrangements with the Erie Railroad Company ceased at noon on Friday, and the two lines are now merely connecting roads. This, however, will work no inconvenience to the traveling or business public, who will have the same facilities as before, to say the least. Important changes are in contemplation, and will be commenced at once,

the object of which is to make the Atlantic and Great Western independent of the Erie, while maintaining friendly relations with it.—*Cleveland Herald, September 2.*

Great Western Railway of Canada.

It is gratifying to find the large measure of prosperity that is now setting in for this Canadian line, but it must be remembered that over and above Canadian or local traffic the line enjoys a great through traffic with America, and in fact competes against the American Lake Shore line, whose business is so enormous that it is said the line actually pays, or has paid, on its capital cost as much as 35 per cent. per annum dividend, a dividend that is still high on its "watered" stock. Nor is the future of the Great Western of Canada less promising on this account. By means of the Air Line they are constructing, their splendid permanent way and rolling stock equipments, the tunnel under the River at Detroit, the Buffalo Bridge, and the shortening of the line of their ally, the Michigan Central, henceforth the Great Western of Canada will be in a position to compete with increased force for a share of the vast through traffic between Chicago and New York and Boston. The geographical position of the Great Western of Canada for taking a large share of the traffic from the "Great West" to New York and Boston is peculiarly favorable, while the adoption of the narrow or national gauge of America, and the excellence of the Great Western of Canada permanent way and rolling stock, together with the power of their allies, are calculated to make the most of their superior route.—*Herapath.*

Northern (N. H.) Railroad.

The earnings of this road for the years ending March 31, 1870 and 1871, were as follows:

	1870.	1871.
From passengers	$201,755 87	$352 150 01

Net earnings	$256,271 92	$292,206 77
Add balance of income per last report		258,972 02
Add balance of interest account		5,525 31
Total income		$556,704 10
Paid Concord road on settlement under contract	$111,958 90	
Dividend Dec. 1, 1870, $4 per share	119,924 00	
Dividend June 1, 1871, $4 per share, and U. S. tax	121,789 03	
U. S tax on earnings of previous year	1,193 59	
		354,865 52
Balance of income account		$201,338 58

The above statement includes the joint operation of the Northern and the Concord roads, under the contract of April 29, 1870, from that date to September 12, 1870. The subsequent decision of the Court being adverse to that contract, no further joint operation of the roads was had under it; and all accounts between the parties arising therefrom have been fully adjusted and settled.

There have been purchased and cancelled during the past year, $9,800 of the Bonds of the company, leaving outstanding, March 31, 1871, only $105,200 payable April 1, 1874.

The contingent fund is increased to $88,175 07, and remains invested as heretofore.

The amount of travel and freight over the Northern road, during the past year, has been greater than in former years; but there has not been a corresponding increase of receipts. The causes of this result are, the reductions which have been made in our local tariffs, and, more importantly, the very low rates on Western business, which competition by other lines has rendered necessary on this line in order to retain that business. We hope that more favorable rates, hereafter, will in some degree obviate this difficulty.

The gross receipts on the Northern road, during the year, exceed those of the preceding year. But the net income of this year is $76,024 05 less than that of last year. The great increase of expenditures during the past year, which has produced this resul, will appear from the following items:

New bridge at West Lebanon	$21,642 03
Purchase of land and improvements at same place	14,640 88
Excess of new rails and sleepers in track, over last year	40,708 15
Increase of fuel expense	17,716 97
Repairs of damages to locomotives from accident near Canaan	6,400 00
	$101,108 03

The new bridge over the Connecticut river, at West Lebanon, has been completed, and in a superior manner. No further expenditure, of considerable amount, will therefore be required on that account, for several years to come.

Proper accommodations for the business of the road, at the same place, have required the purchase of additional land and the making of permanent improvements there. And they have been done at the cost above stated.

During the year 1,355 tons of new rails (including 100 tons of steel) and 55,367 sleepers, have been placed in the track; and 2,900 tons of rails have been taken up, repaired and relaid. These make 670 tons of new rails, and 37,012 new sleepers, more than were used during the preceding year; and place the road in a correspondingly improved condition.

We have built one new passenger locomotive, thirteen merchandise cars, and twenty-one gravel cars, which are an addition to the equipment of the road. We have also built one mail and smoking car and twenty-two merchandise cars to replace old ones; and the road and furniture in other respects have been kept in good order.

But for the extra expenditures above mentioned, the net income of the year would have been sufficient to pay dividends during the year to the usual amount of eight per cent.; and under the circumstances, the directors have thought proper to declare dividends to that amount—the necessary addition to net income, for that purpose, being taken from the reserved funds of former years.

The grading and masonry of the Sugar River Railroad, in which this road is largely interested, are far advanced; and the laying of the track has been commenced. It will be ready for operation to Newport this fall, and perhaps to Claremont village within the present year. The completion of that road will be advantageous to the interests this road.

The equipment of the road March 31, 1871, was as follows: 11 passenger and 14 freight locomotives, 406 long and 107 short merchandise cars, 15 passenger, 5 baggage and 30 gravel cars. Number of miles run by passenger trains, 174,430; by freight trains, 294,658; by other trains, 6,555—total, 475,643. Number of passengers carried 171,082; do., carried one mile, 6,754,169. Tons of merchandise carried, 393,946; do., carried one mile, 24,707,234.

Trial Balance, March 31, 1871.

Lake Tahoe Tunnel.

Col. Von Schmidt has just returned to town from his camp on the Truckee, and reports progress in his herculean task of introducing the waters of the lofty mountain lake to the valley of the Sacramento and the cities of the Pacific slope. The entrance to, and mouth of the tunnel being fixed upon, arrangements for the immediate commencement of the work are now completed. In a day or two gangs of one hundred each will begin operations at either end of the tunnel, and the number increased as the work progresses. By spring there will be some four hundred laborers employed under the superintendence of competent and efficient foremen. Depots for provisions and stores are established on both sides of the summit.—*Alta California, August 26.*

The Overland Tea Movement.

The facilities offered by the Pacific Railroad for the quick shipment of teas to this market has had the effect of stimulating the tea trade beyond the expectations of the most sanguine importers. The steamers "Alaska," which arrived at San Francisco Saturday, brought 54,665 packages of teas, the largest quantity ever landed by any one vessel in an American port. Of this large cargo, 33,747 packages are destined for New York overland. The British steamer "Cleato" has been chartered at Shanghai, and is now on her way to San Francisco with 1,200 tons of teas, all of which are intended for this market. Other vessels in addition to the regular line of steamers are being chartered for the same destination.

☞ Engineers are now engaged in surveying the route of the new railroad which is to be built from Williamstown, in Gloucester county, N. J., to Atco, on the Camden and Atlantic Railroad. The grading was to have been commenced on the 1st inst. at Atco, by the contractor, and it is asserted that the whole road from Atco to Glassboro' will be completed by February 1, 1872.

American Railroad Journal

Saturday, September 9, 1871.

Stock Exchange and Money Market.

The demand for Money has been somewhat brisker, on both speculative and mercantile account, and more steadiness has been noted in rates, though, at the ruling figures, the available supply has been quite liberal, and lenders have been prompt in responding to the calls of all responsible borrowers, on the basis of 3@5 mainly 3@4 per cent. in a temporary form, and at 5@8½ per cent. per annum on very choice to fair business credits. The inquiry for funds from the interior has been rather more urgent, and both the city banks and the U. S. Sub-Treasury report a material falling off in their legal tender and currency balances. The Treasury programme for September contemplates the purchase of One Million of Bonds on each of the four Wednesdays, and the sale of Two Millions of Gold on each of the four Thursdays of the month. This programme, if strictly carried out, will take out of the Banks some $4,500,000 Currency, and will furnish about half the Gold required for customs. The city banks, in their last weekly exhibit, show a loss of $1,105,000 of legal tender notes, with a gain of $1,576,500 of specie, and $1,064,500 of deposits; also an increase of $1,998,920 in their loan and discount averages, and a reduction of $40,238 in their item of circulation. The U. S. Sub-Treasury reduced its currency balance $1,600,938, and increased its coin reserve $656,486, as the result of the week's business. The city bank exchanges, last week, averaged $79,545,955; and thus far, this week, 101½ millions daily. The banks now hold $10,699,828 of specie and legal tender notes, in excess of the 25 per cent. of their liabilities required by the national banking Act. The receipts of the U. S. Sub-Treasury office were $5,326,306 in coin, and $3,328,922 in currency; payments, $4,669,820 in coin, and $4,929,859 in currency. The office received $4,127,000 in coin or its equivalent, from customs; and disbursed $2,477,000 of coin interest.

The specie reserve of the city banks according to the latest return is $12,298,550, against $18,285,629 same time last year. The city bank deposits are now $249,774,300 against $200,691,553 week ending Sept. 3, 1870. The legal tender reserve amounts to $68,384,500 against $49,730,772 same time last year. The circulation now stands at $30,158,587, against $32,736,625 same time last year. The loans are now $307,046,600, against $271,914,145 at this date last year.

The U. S. Sub-Treasurer retired, last week, $3,520,817 of coin certificates, received for customs.

The U. S. Sub-Treasury, on Thursday morning of this week, held a balance of $7,901,862 in currency, and $66,409,522 in coin, against a balance a week previous of $9,017,098 currency, and $65,239,556 coin.

Government revenues yielded liberally during the week. The excises yielded last week about three millions, and thus far since July 1, about $26,700,256. The customs at the port of New York, last week were $3,754,827; and at the outports, equal to about 1¼ millions more, all in coin, or coin certificates.

The receipts of the U. S. Treasury in August were $48,700,069, including $17,545,240 in coin from customs; payments, $40,920,936 including $2,044,250 of coin interest.

The amount of United States currency outstanding at this date, as telegraphed from Washington is $395,460,749.

The amount drawn from the Treasury Department during August on warrants in favor of the several departments was $19,789,674, as follows: War Department, $5,890,109; Navy Department, $3,149,991; Interior, Pensions and Indians, $5,637,056; Civil and miscellaneous, $5,112,518.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $364,153,000; and as security for deposits of public money, United States bonds for $5,691,500. The amount of National bank notes in actual circulation at this date is $321,750,225.

Under the September programme of the Treasury Department, Government will buy in four millions of U. S, Five-Twenties as follows: Wednesday, September 6—One Million; Wednesday, September 13—One Million; Wednesday, September 20—One Million; Wednesday, September 27—One Million. And will sell eight millions of Gold as follows, Thursday, September 7—Two Millions; Thursday, September 14—Two Millions; Thursday, September 21—Two Millions; Thursday, September 28—Two Millions. Proposals for the sale of bonds must not include any of the Coupon or Registered Bonds of the Act of Feb-

ruary 25, 1862, as numbered and described in the Department notice of redemption of $100,000,000 5-20 Bonds, dated September 1, 1871, as they will not be accepted upon any award that may be made.

The specie shipments from San Francisco from Jan. 1, to Aug. 24, were $11,187,447, against $22,217,159 same time last year.

There has been a more confident speculative movement in Gold, stimulated, in part, by the Treasury programme for September, which provides for the sale of only $8,000,000 Gold by the Department during the month, as against $20,000,000 to $22,000,000 likely to be received for Customs. The customs drain has been quite liberal through the week. The export call has been light. The course of the market has been upward. The range of the price during the week, has been from 112⅝@113⅜, and the closing quotation on Wednesday was 113⅜ against 112¾ the preceding Wednesday. The specie outflow, last week, was $564,762; on Tuesday of this week, $71,300; and on Wednesday, $92,576. The Gold Exchange Bank clearances have been as follows: August 31, $43,072,000; September 1, 29,872,000; September 2, $27,554,000; September 4, $42,923,000; September 5, $52,742,000; September 6, $45,451,000.

The customs at this port on Wednesday were $798,000.

Government disbursed through the U. S. Sub Treasury here, on account of the coin interest on the public debt from Jan. 1, to Sept. 2, 1871, $63,739,378, against $65,269,021 same time in 1870.

The customs demand for Gold last week, averaged $686,834 a day; thus far, this week, it has averaged $604,000 a day, or equal to a weekly aggregate of $3,624,000. The arrivals of specie from Europe, Havana and other foreign ports last week were $24,638, and since Jan. 1, 1871, $7,585,801 against $7,682,033 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $107,962,168 against $94,073,748 same time in 1870.

The export drain was $564,762 last week, against $1,021,603, same week preceding year The shipments since January 1, 1871, have been $53,874,096, against $45,226,452 same time in 1870.

There has been a more liberal supply of foreign exchange available and rates have been lower, without leading to free purchases. Bankers' sixty day bills on London closed on Wednesday at 108⅝@108¾; sight bills on London, 109@109¼.

The produce exports from this port, week ending with Sept. 5, were to the currency value of $4,894,046.

Government securities have been in light supply and quoted higher, with a fair inquiry, largely from investment buyers.

The Treasury Department has made the formal announcement that $100,000,000 of the original 5-20s, of 1862, bearing 6 per cent. will cease to bear interest after first of December next, on or after which date they will be redeemed at par and accrued interest, in Gold, at the Department.

The U. S. Assistant Treasurer has given notice in connection with the weekly purchases of United States 5-20s for the Sinking Fund, that no tenders of the Bonds or Registered Stock of 1862 advertised to be redeemed on 1st of December will be considered. The Bonds thus advertised embraced the whole of the original or first series of the Coupon Bonds of 1862, the series not being stamped, as in the case of the subsequently-issued Series No. 2, No. 3, and No. 4, on the face of the bonds. The Registered Certificates advertised to be redeemed are at follows: No. 1 to 595, $50 each; No. 1 to 4,103, $100 each; No. 1 to 1,899, $500 each; No. 1 to 890 $1,000 each; No. 1 to 2,665, $5,000 each; No. 1 to 2,906, $10,000 each.

On Wednesday, Government bought in a million of Five-Twenties at 112 65@112 95, ex-interest. The amount of bonds offered was $4,020,550 at 112 65@113 28.

U. S. sixes of 1881 closed here on Wednesday of the current week at 119@119¼; U. S. Five-Twenties of 1862, 115@115¼; U. S. Five-Twenties of 1864 at 115@115¼; U. S. Five-Twenties of 1865, 115@115¼; U. S. Five-Twenties of 1865 consolidated, 114@114¼; U. S. Five-Twenties of 1867, 114⅛@114¼; U. S. Five-Twenties of 1868, 114⅛@114¾; U. S. Ten-forties at 111¾@112; U. S. Six per cent. currency bonds, 116@116¼.

The last exhibit of the Public Debt shows a further liquidation of $9,206,280 in August.

The latest quotations at the London Stock Exchange compare as follows with former returns:

State bonds have been moderately sought after at firm prices.

Railway bonds have been in good request, chiefly on investment account, at generally stronger prices for the more substantial of the old loans. Central Pacific Sixes have been actively sought after and have advanced sharply, closing firmly at 103¼@103½. For the Chesapeake and Ohio Sixes there has been an animated call from home investment buyers, with quite liberal sales reported on the basis of 93 per cent. and accrued interest. Of this loan less than one-third of the aggregate amount of the bonds remains to be disposed of, which at the present rate of sale, will all be marketed in a very short time. The road has progressed so far that no doubt is now entertained of its completion in the summer of the ensuing year. The formal opening of the line, through from the James to the Ohio River, will be promptly met by a large and lucrative traffic that must greatly enhance the credit of the company.

More than half the aggregate issue of the St. Joseph and Denver City eight per cent. gold bonds had been marketed prior to Wednesday. The total of the Loan is $5,500,000. The loan was opened on August 1, and fully 50 per cent. of it was disposed of within the month. The price of the bonds at present is 97½ and accrued interest in currency. The bonds are confidently recommended as a first class, secure, and lucrative investment, by the financial agents, Messrs. TANNER & Co., who, some time since, successfully marketed the bonds of the Eastern Division loan, which now command a handsome premium.

Business in Railway and miscellaneous share property has been more active and generally much firmer in price, the speculative inquiry having been more confident. The market closed with a buoyant look, though with some irregularity as to values.

General business has been fairly active in the leading lines. Breadstuffs have been freely dealt in, closing more firmly. Cotton has met with a ready sale. Provisions have been rather more sought after. Middling upland cotton closed on Wednesday at 20⅝ cts. per lb. The receipts at all the ports, year ending Sept. 1, were 8,987,457 bales, against 2 854,427 bales the preceding year; exports 8,169,009 bales, against 2,204,889 bales in the previous year; stock at the ports at latest dates, 118,966 bales, against 59,768 bales same date 1870.

At the Live Stock Markets, Beeves have been in more request at from 7½@13 cts.; Veals at 4½@10½ cts.; Sheep at 4@6½ cts.; Lambs at 6 @9 cts.; Swine, 5¼@5½ cts per lb., all live weight. The week's receipts were 7,937 Beeves, 2,706 Veal Calves, 27,729 Sheep and Lambs; and 24,272 Swine.

Foreign goods have been in more general demand at steadier prices. The week's imports of foreign goods reached $8,771,076, including $3,915,677 of dry goods.

Ocean freights have been moderately active chiefly in the line of grain shipments, and rates have been quoted higher on a scant supply of room.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Virginia 6s, consol., 45½; North Carolina 6s, special tax, 19½; Fund Act, 1866, 84¾; South Carolina 6s, old, 74½; do., new, Jan. and July, 58; do. Apl. and Oct., 61½; New York State 7s, B. INVESTMENT SECURITIES.

JAY COOKE & Co. are now selling, and recommend as a profitable and safe investment for all classes, the First Mortgage 7-30 Gold Bonds of the Northern Pacific Railroad Company. They have 30 years to run, bear Seven and Three-Tenths per cent. gold interest (more than 8 per cent. currency), and are secured by first and only mortgage on the ENTIRE ROAD AND ITS EQUIPMENTS, and also, as fast as the Road is completed, on 23,000 Acres of Land to every mile of track, or 500 acres for each $1,000 Bond. They are exempt from United States tax; principal and interest are payable in gold. Denominations; Coupons, $100 to $1,000; Registered, $100 to $10,000.

Northern Pacific 7-30s are at all times receivable, at TEN PER CENT. ABOVE PAR, in exchange for the Company's lands, at their lowest cash price.

The proceeds of all sales of lands are required to be devoted to the repurchase and cancellation of the First Mortgage Bonds of the Company. The Land Grant of the Road exceeds Fifty Million Acres in the most fertile portion of the Northwest, and the demand for the Company's lands for settlement already exceeds the ability of the Government to complete the surveys. This immense Sinking Fund will undoubtedly cancel the principal of the Company's bonded debt before it falls due.

Holders of U. S. Five-Twenties, who wish to convert them into a first-class railroad security, can do so at a present profit of about 12 per cent., while increasing their interest income nearly one-fourth, by exchanging them for Northern Pacific 7-30s.

All marketable stocks and bonds will be received in exchange at their highest current price. Full information, maps, pamphlets, etc., will be furnished on application to any agent for the loan, or to JAY COOKE & Co., New York, Philadelphia or Washington.

☞ FUNDING FIVE-TWENTY BONDS.

OFFICE OF FISK & HATCH,
No. 5 NASSAU ST.,
NEW YORK, Sept. 6, 1871.

The Government have notified the holders of ONE HUNDRED MILLIONS OF FIVE-TWENTY BONDS that they will be paid in gold, and after Dec. 1 the interest will cease. All holders of the issues of 1862, '64, '65, and new '65s, should at once decide whether they will hold and take the gold when called on, or convert into new Government 5s, 4½s and 4s, or *exchange for other securities.* As it is possible the premium on gold may soon be much less on account of these heavy payments, it clearly becomes the duty of all holders of Five-Twenties to take the matter into serious consideration.

We are strongly recommending in exchange the six per cent. gold bonds (principal and interest) of the Chesapeake and Ohio Railroad Company, now selling at 93 and interest, of which we have only some $5,000,000 still unsold. The total amount of the loan is $15,000,000. The Chesapeake and Ohio Bonds are issued in denominations of $1,000, $500 and $100, coupon and registered, interest six per cent., May and November; principal and interest payable in New York City, in U. S. gold coin.

We also furnish the Western Pacific sixes at the market price, now about 95. The Western Pacific Bonds are all Coupon Bonds of $1,000, interest six per cent., January and July; principal and interest payable in New York City, in U. S. gold coin.

Also, the Central Pacific Sixes, at the market price, now about 102½. The Central Pacific Bonds are all Coupon Bonds of $1,000, interest Six per Cent., January and July; principal and interest payable in New York City, in U. S. gold coin.

The Central Pacifics, amounting to $25,885,000, are in sharp demand for the home and German markets, and any amount can be sold as readily as so many Five-Twenty Bonds; they are freely dealt in at all the prominent Stock Exchanges in the world, and will soon advance to a large premium; that the same result will follow with the Chesapeake and Ohio bonds, on the completion of the road, we have no doubt.

Holders of 5-20s, by conversion into Centrals, retain the same interest and increase their capital about 18 per cent. By converting into the Westerns the increase will be about 19 per cent.; into the Chesapeake and Ohios, the increase will be about 20 per cent.

Holders of Centrals can exchange for Westerns or Chesapeake and Ohios, and increase their capital from 6 to 7 per cent., and in either case have a bond just as sure to be paid, principal and interest, as a Five-Twenty bond.

As the amount of Chesapeake and Ohios remaining unsold is so small, and the demand very great, they will soon be absorbed. There are very few Centrals and Westerns on the market, and they will soon largely advance in price.

Accounts of Banks, Bankers, and others received, on which we allow four per cent. interest.

Certificates of Deposit issued and Collections made in all parts of the Union.

FISK & HATCH.

Journal of Railroad Law.

RAILROAD COMPANIES RESPONSIBLE FOR WANT OF SKILL AND PRUDENTIAL FORESIGHT IN SELECTION OF MACHINERY AND GENERAL MANAGEMENT OF THEIR FRANCHISES—EXPLOSION OF STEAM ENGINE PRESUMPTIVE EVIDENCE OF NEGLIGENCE.

The facts in the late case of The Illinois Central Railroad Company *vs.* Phillips (49 Ill., 234) are clearly and fully stated in the following opinion by

WALKER, J.—This was an action on the case, brought in the Court below, by appellee, against appellants, to recover damages for injuries alleged to have been sustained by him in consequence of the explosion of the boiler of one of appellants' engines, in the Union Depot at Chicago. The declaration contains two counts, in both of which it is averred that the explosion was occasioned by reason that the engine and boiler were "old, weak, worn out, insecure, and wholly unfit for use," and that the company did not, by their servants, employ due and proper care in its management and use. In both counts, appellee is stated to have been a bystander, accidentally in the vicinity when the injury occurred.

It appears that the engine was one usually employed in the freight service on the road of the company. In October, 1867, it was withdrawn from the service, in consequence of an injury to its machinery,—but it does not appear that it was to the boiler,—and was placed in the shops of the company, and was repaired. Witnesses testify, that before leaving the shop, on the 19th of October, 1867, it was tested under a pressure of 140 pounds of steam to the square inch, without detecting any defect. It was employed from that time until the day the boiler exploded, in the freight business about the city. On that day it was put in the place of another engine, and was run to Hyde Park and back. After its return, and while standing on the track in the depot, after the passengers were discharged, and while waiting till the track could become clear, so that it could be backed out, it seems, without any warning the boiler exploded, rending it in many fragments, some thrown to a considerable distance. It appears that appellee was at the time walking along the platform inside of the depot, and within a few feet of the engine. He was thrown down by the explosion, receiving a bruise on his head, was drenched with dirty water, and was confused by the concussion. It is claimed that symptoms of paralysis have resulted from the injury thus received. The jury rendered a verdict for $7,000 against appellants, on the trial. A motion for a new trial was entered, but was overruled by the Court, and judgment rendered on the verdict, and this appeal is prosecuted for its reversal.

The Court below was asked, but refused, to give for appellants their twelfth instruction in the series. It is this:

"If the jury believe, from the evidence, that within a reasonable time before the explosion of the boiler in question, the defendants made a careful and thorough examination of the engine and boiler, by skillful and qualified mechanics in that branch of business, and that the same was then in sound and good condition, and so continued up to the time of explosion, so far as could be discovered; that there was at the time of the explosion, a proper quantity of water in the boiler, and only an ordinary amount of steam, and that said engine was under the management of a careful and skillful engineer, and that the explosion was from causes which could not have been ascertained by any known and recognized means, then the injury, if any, to the plaintiff, must be borne by him, as one of that class of injuries for which the law affords no redress, and the jury should find for the defendants."

This instruction presents the question of extent of care and diligence the law requires of railroad companies, in exercising their franchises, for the safety of the community at large, not under their control as passengers. When their charters were granted and they accepted them, they assume the performance of a variety of duties to the public, among which was one undertaking to use their franchises in such a manner as not to endanger the security of persons, so far as the employment of human sagacity and foresight could reasonably anticipate and prevent. They are required to employ experienced, efficient, skillful and prudent agents, servants and artizans. They must provide and use properly constructed machinery, well constructed, by competent and skillful workmen, when manufactured by the company, and from good materials. They must employ competent, skillful, prudent and sober men to use such machinery, and in doing so, they must be careful and vigilant in its examination, to see that it is in proper repair and in a safe condition.

On the other hand, they cannot be held to answer for latent defects in the materials employed in the construction of their machinery, which the usual and well recognized tests of science and art afford for the purpose but failed to detect. Nor are they liable for accidents occurring by which injury ensues, when skill and experience are not able to foresee and avoid them; nor for the acts of persons not in their employment, and over whom they have no control, or where they have exercised judgment and skill in selecting the materials, manufacturing their machinery, and in its use upon the roads, or in selecting machinery manufactured by others.

But when they are employing so dangerous an element as steam for their gain and profit, a proper regard for human life and safety does require that a high degree of care and skill should be employed. From the very nature of its use, large numbers of persons are necessarily exposed to the danger, whether upon their trains or going to or from their depots, either as passengers, on business with the company, with persons at those places, or are taken there to meet friends or otherwise. By the exercise of their franchises, they invite large concourses of people to the depots, which, on the arrival and departure of trains, are open and free to the public. And to permit negligence or a want of skill, the use of illy constructed, worn-out, or defective machinery, to the danger of persons thus brought together, would be a failure of duty, and a reckless disregard for the safety of the community.

While, however, this degree of diligence and care is required, these bodies are not, nor does the law require that they should be, responsible for the safety of persons thus in and about their depots, at all hazards. When they have so far as this employment of reasonable skill and experience enables them, employed experienced, skillful and prudent servants in the use of their machinery, have selected good and safe machinery, so far as known and well recognized tests can determine, constructed of proper material, free from defects, so far as like tests will disclose, neither reason nor justice requires that they should be held liable for injuries that may result from using their franchises.

It may be that as high a degree of diligence may not be required of them to secure the safety of persons not passengers or having business with the company as for those who are, but, if not, it would be difficult to define the line of separation. It follows, from the rule that we have here announced, that the twelfth of appellants' instructions should have been given. It announces these principles, in a clear, concise and very distinct manner, and by its refusal, the jury were not in possession of all the law governing the case. They may have been, and probably were, misled, in finding their verdict, by its refusal, and in this the Court erred.

It is urged, that the Court below erred in refusing to give appellants' fifth instruction, which is this:

"The mere fact that the boiler of the engine in question exploded, causing injury to the plaintiff, is not, in this case, and under the relations existing at that time, between the plaintiff and the defendants, as set forth in the declaration, even *prima facie* evidence of negligence, or want of due and proper care on the part of the defendants either in respect to the condition or management of said engine; and the jury are not authorized to find the existence of such negligence, or want of due and proper care, from the mere fact of such explosion and injury."

Circumstantial evidence depends almost alone upon human observation and experience for its value. It is, in fact, the knowledge of the relation of things and acts to each other or the knowledge of the motives which prompt acts, and the consequences of acts and causes. When, from observation, we have seen uniform results follow peculiar acts, we infer that such acts are the cause, and the results are their consequences. Observation teaches, that certain passions, emotions or feelings, usually lead to the performance of peculiar acts, among all men, and hence, we conclude that, if the passion existed and was excited to a particular degree, a certain act was the result, unless restrained by superior and controling circumstances. So with the natural laws governing inanimate matter. We know it has certain properties, and we also know that these laws are overcome by counter laws or forces. We know that it is a law of matter to cohere and remain united, in various degrees of compactness, depending upon the extent of its cohering power, be that what it may. The particles of iron cohere one with another, in different degrees, depending upon its freedom from impurities, its firmness and other properties. Scientific tests have determined the quality that is best adapted to the several branches of manufacture. Selections are made from the different varieties, for various uses, because of their different properties.

Experience in the manufacture and use of iron, for the various useful purposes, has taught that one variety is well suited to one purpose, while another variety is to another. Hence, iron of peculiar qualities has been found best adapted to

resist the force of steam. And the skillful and experienced manufacturer selects plates made from iron possessing those qualities, for that reason, when he constructs a steam boiler, if he desires safety and durability. He selects that quality in which there is the greatest tenacity of the particles, and hence, the greatest power of resistance to the force of steam. Some iron possesses this quality in a high degree, while other in a less degree, and some have it greatly improved by the mixture of the ores of different qualities. This being understood by the manufacturer of steam boilers and those engaged in repairing them, they usually select the peculiar quality suited to the purpose, which is known by the place of its manufacture.

Again, the manufacturer has tests, which are recognized by the scientific world as well as the practicable manufacturer, by which to detect latent defects, if they exist, thus securing safety and durability. And every day's experience teaches that, where the proper quality of iron has been selected under the usual tests, with reasonable care by skillful and experienced persons, they are safe in their use for practicable purposes. Knowing this, when an explosion has occurred, it is natural to conclude that there has been negligence in selecting, testing, or putting the materials together, when constructed into a boiler, or that it has been negligently used, by subjecting it to too high a degree of pressure by steam. It would, therefore, be improper to say that an explosion is not *prima facie* evidence of negligence. But when it is shown that the iron used in the construction of such a boiler is the kind usually employed, has been subjected to and stood the usual tests, and has been used by experienced persons with prudence and skill, this *prima facie* evidence is overcome, and the inference must be drawn that the explosion occurred from some latent defect, not detected by the usual and proper tests. And of all of these questions the jury must be the judges. It then follows, that the Court did not err in refusing to give this instruction. But for the error in refusing the twelfth instruction the judgment must be reversed and the cause remanded.

Judgment reversed.

Richmond and Danville Railroad.

The Board of Public Works, after being in session for two days, on yesterday evening concluded the business of transferring the State's interest in the Richmond and Danville railroad according to the terms of sale as fixed by the act of the General Assembly. The entire interest of the State was purchased by the stockholders of the company, and the functions of the State directors, Judge Hunter H. Marshall, W. T. Sutherlin and W. L. Owen, thereupon ceasing, they were re-elected as directors of the Richmond and Danville Company. —*Richmond Whig, September* 1.

Lehigh and Eastern Railroad.

The project of building a railroad from the Luzerne coal regions to the Hudson river, to connect with eastern roads, is now assuming a tangible form. A company has been formed known as the Lehigh and Eastern Railroad Company, and a board of officers and directors elected. The President is S. P. Kase, of Danville, Pa., and among the Directors are Homer Ramsdell, of Newburgh, the Hon. C. Burnett, of Stroudsburg, Pa., and the Hon. Harry White, of Indiana, Pa. The line of the road will be from Hazelton to Wilkesbarre, and thence an air line to Port Jervis, N. Y., through Ulster county to Fishkill. This will bring Boston in direct connection with the coal regions.—*N. Y. Tribune.*

Census of the United States.

The following table exhibits the totals of the population of the States and Territories, classified as native and foreign; the totals of classification into white, colored, Indian and Chinese, having already been published:—

	Total.	Native.	Foreign.
Alabama	996,992	987,030	9,962
Arkansas	484,471	479,445	5,026
California	560,247	356,416	209,831
Connecticut	537,454	423,815	113,639
Delaware	125,015	115,879	9,136
Florida	187,748	182,781	4,587
Georgia	1,184,109	1,172,982	11,127
Illinois	2,539,891	2,024,693	515,198
Indiana	1,680,637	1,539,163	141,474
Iowa	1,191,792	987,735	204,057
Kansas	364,399	316,207	48,392
Kentucky	1,321,011	1,257,613	63,398
Louisiana	726,915	665,088	61,827
Maine	626,915	578,034	48,881
Maryland	780,894	697,482	83,412

Total Territories	442,730	348,530	94,200

SUMMARY.

Total population of the United States..38,555,983

Composed of—

Natives	32,989,437
Foreigners	5,566,446

For purposes of comparison, summarizing the tables already published, the total population of the United States may also be made to appear under the following classification:

White	33,586,989
Colored	4,880,009
Indian	25,731
Chinese	63,254
	38,555,983

Of the Indian and Chinese the Territories contain 4,303 of the former and 7,075 of the latter.

Note—The Indian Territory and Alaska are not included or mentioned in any of the census tables above epitomized.

State Debts and Liabilities.

We have not seen anywhere a tabular exhibit of State indebtedness, and have therefore been at considerable pains to make an accurate and reliable compilation, giving the aggregate debt of each State, at the date of its last official publication, as follows:

State.	Date.	Total.
Alabama	October 1, 1870	$16,958,010 75
Arkansas	April 27, 1871	6,150,000 00
California	May 1, 1871	8,506,000 00
Connecticut	April 1, 1871	6,775,900 00
Delaware	May 1, 1871	1,402,000 00
Florida	January 1, 1871	1,288,697 76
Georgia	January 1, 1871	7,514,500 00
Illinois	March 1, 1871	3,893,496 00
Indiana	October 31, 1870	4,167,507 94
Iowa	January 1, 1871	800,000 00
Kansas	December 31, 1870	1,341,675 00
Kentucky	October 10, 1870	3,072,677 00
Louisiana	January 1, 1870	22,560,238 00
Maine	January 1, 1871	8,067,900 00
Maryland*	September 30, 1870	13,317,475 78
Massachusetts*	January 1, 1871	16,682,068 00
Michigan	March 27, 1871	2,876,262 78
Minnesota	May 1, 1871	350,000 00
Missouri	January 1, 1871	17,866,000 00
Nevada	May 1, 1871	660,000 00
New Hampshire	January 1, 1870	2,752,200 00
New Jersey	November 1, 1870	2,896,200 00
New York*	October 1, 1870	32,409,144 42
North Carolina	October 1, 1870	29,960,045 00
Ohio	November 5, 1870	9,675,343 78
Oregon	September 5, 1870	106,633 00
Pennsylvania	December 1, 1870	31,107,186 85
Rhode Island†	April 1, 1871	2,774,000 00
South Carolina	October 31, 1870	7,665,908 98
Tennessee	January 1, 1871	38,945,852 00
Texas	January 1, 1871	930,000 00
Vermont	January 1, 1871	1,227,000 00
Virginia	December 31, 1870	47,390,839 96
Sum total		$344,090,787 90

* Less sinking fund.

† Since April 1, 1870, reduced by $142,000.

Mississippi, in 1838, created a debt to the amount of $7,000,000 for the establishment of banks. The State soon ceased to pay interest on these bonds, and has long since wholly repudiated them.

Nebraska has so far incurred no debt.

West Virginia has no State debt, except such portion of the debt of Virginia as might equitably fall to her share. West Virginia may assume such portion of that debt.

Wisconsin has no debts, except such as are invested in trust funds, created for the support of schools, benevolent institutions, etc., etc.

The above exhibit shows that the Western States, considering area, population and resources, are least in debt, and that local taxation, for many years to come, is likely to be much lighter in our section than in any other. Here, too, the number of inhabitants and the development of material advantages are augmenting at a ratio not paralleled in any other part of the country, making the burden of State debt easier and easier to be borne with every passing year. Indeed, it is altogether probable that all the Western States, with the exception of Ohio and Missouri, perhaps, will be completely out of debt before the close of the present decade.

State debts in New England, outside of Massachusetts, are generally confined to war loans, and are in process of extinguishment.

The large indebtedness of the Southern States has been created principally since the close of the war, by a reckless system of almost indiscriminate aid of railroads. Tennessee and North Carolina in particular have been brought to the verge of bankruptcy by this course of loaning their credit. Few of the roads so aided are paying the interest on the bonds issued to them, and some have literally swindled the State.—*Chicago Mercantile Journal.*

New Atmospheric Brake.

The Pittsburg and Connellsville Railroad Company have been trying a new air brake. It is called the Smith's patent, and is claimed to be a better one than any now in use. A description of this aparatus, which, it is asserted, can stop in a few seconds a train of cars at full speed, is as follows:

On the right hand side of the locomotive, fastened to the running board, and under the inspection of the engineers, is an upright direct air pump which is operated by steam supplied from the boiler, and pumps air into a reservoir hanging under the cab of the locomotive. This pump is entirely self-acting, and whenever there is a deficiency of pressure in the air reservoir it commences working until the equilibrium is restored. Under each car of the train is a cylinder firmly bolted in such a position that its piston acts directly on the lever used for the ordinary hand brake; but does not at all interfere with its use by hand.

The pressure of the air is conducted to these cylinders from the reservoir under the locomotive by a line of gas pipe, three-quarters of an inch in diameter, running the entire length of the train, and the connection with each cylinder is made from the main line with an elbow one quarter of an inch in diameter. From each end of the car the pipes are extended by three-ply rubber hose, which are connected when the cars are coupled together. Should a car become detached, the valves of the coupling immediately close, the brake continues applied, and the car is prevented from running back on a grade. An air gauge placed immediately above the steam gauge, indicates to the engineer the quantity of pressure in the reservoir, and the management of the train is placed in the engineer's hands by means of a three-way cock.

At a recent trial of this brake on the Missouri Pacific Railroad, a train three hundred feet long, traveling at a speed of thirty four miles an hour, was stopped in twenty seconds at a distance of one thousand feet from the point where the brake was applied. The train traveling at the same rate was subsequently stopped by brakemen with a hand-brake; but forty-five seconds were required, and the cars continued in motion for 1,750 feet.

A Fine Railway Region.

Mr. Bayard Taylor, in a letter from the Red River Country to the New York *Tribune*, says that the territory west of the Mississippi River is one of the most fertile in the world; and then adds:

The probabilities are that there lies, from St. Louis, northward far into the regions of Manitoba, and stretching westward to the base of the Rocky Mountains, the richest country in the world. All the railways in this region are succeeding beyond expectation, and surpass all precedent.

Iowa has especial claims to consideration, here the Chicago, Burlington and Quincy railroad; the Burlington Cedar Rapids and Minnesota, which is a continuation of the same, and other railways feeding these are among the most worthy of mention.

Jas. F. Joy, who is perhaps one of the safest railway men in the country, has selected this region wherein to make a demonstration of success. He invests almost daily in bonds of the Burlington, Cedar Rapids and Minnesota Railway by appropriating for that purpose, fifty per cent of the gross earnings of the Chicago, Burlington and Quincy Railroad, derived from the former. There can be no doubt that this region is among the best in the world for railways.

☞ The Iowa Central railroad is, by terms of contract, to be completed from Mason City to Northwood, Worth county, by the 10th of October.

☞ Lewis B. Parsons has been elected President of the North Missouri Railroad Company, *vice* Barton Bates.

The Public Debt Statement.

The following is a recapitulation of the public debt statement August 31, 1871:

DEBT BEARING COIN INTEREST.	
Five per cent. bonds	$276,706,850 00
Six per cent. bonds	1,604 862,050 00
Total	$1,881,568,900 00
Accrued interest	34,106,488 56
DEBT BEARING INTEREST IN LAWFUL MONEY.	
Three per cent. certificates	$28,840,000 00
Navy Pension fund 3 per cent	14,000,000 00
Certificates at 4 per cent	678,000 00
Total	$43,518,000 00
Interest	310,407 79
Debt on which interest has ceased since maturity	$1,852,612 26
Interest	306,989 51
DEBT BEARING NO INTEREST.	
Demand and legal tender notes	$356,095,456 25

Balance of interest paid by United States	9,553,368 59	

☞ The Baltimore *American* says the Pennsylvania Railroad Company have acquired half the capital stock and have guaranteed the payment of the interest on the first mortgage bonds of the Pennsylvania and Delaware railroad. Martin Landenberger, Esq., has been appointed trustee or assignee of the old corporation, and all its assets, are to be placed in his hands. Under this arrangement the construction of the road will be rapidly pushed forward, and it is expected to have it completed by the first of February. The Pennsylvania Company will then operate the road, paying over to the Pennsylvania and Delaware Company all the excess over actual expenses.

Wooden Railroads.

On invitation of Major Ph. Lee Anthony, and in company with that gentleman, Judge English, Colonel Gordon N. Peay and Colonel Arnold Syberg, we paid a visit to Brown's mill, situated just over Fourche mountain, about six miles from the city, for the purpose of taking a look at his wooden railroad. It is over a mile in length, and has been in use about two years. Some of the rails, which are generally of white oak, twenty feet long, and two and a half by four inches in size, are well worn, but are still remarkably well preserved. The gauge of the road is three and a half feet. The cost of construction per mile is about $750. Mr. Brown uses a small flat car, drawn by a mule, with which he hauls timber from the swamp to his mill. The road is in every respect a success. And the question might very well be asked if one mile is a success, why wouldn't fifty miles be a success also?—*Arkansas Gazette.*

Railway Progress In India.

Two railway projects are reported upon by this mail. The preliminary surveys of the proposed railway from Nagpore, via Kamptee, through the Bundara district to Raepore, have been laid out and sanctioned; and the designs and estimates for the Wurdah and Wurrora Coalfield Railway have received the preliminary sanction of the Government of India. The formal sanction of the Secretary of State was expected to arrive shortly. Mr. Molesworth has been gazetted Consulting Engineer for State Railways in India.—*Homeward Mail.*

☞ The Springfield and Athol railroad, chartered by the last Massachusetts Legislature, will complete a new and direct route between Springfield and Concord, N. H., by supplying a link between Chicopee Falls and Barrett's Station (Belchertown), 18 miles. It will follow up the Chicopee river from Chicopee Falls through Indian Orchard and Jenksville to Ludlow Centre and Barrett's Station, to connect with the Athol and Enfield Railroad, now nearly completed and partly in operation, running northerly through Enfield and North Dana to Athol, where it connects with Winchendon, Peterboro, Hillsboro, and Concord, N. H.

☞ We invite attention to the Advertisement in another column, of Messrs. Atherton & Coles, stationers and printers, No. 16 Maiden Lane, this city, who keep constantly on hand Railroad and Banking Stationery, of the best quality. Lithographing and Printing done at reasonable rates. Those who wish any articles in their line, will do well to call and examine before purchasing elsewhere, as we feel confident they will not go away disappointed.

☞ The Columbia (S. C.) *Phœnix* says that the Pennsylvania Railroad Company has consummated another transaction in the Southwest, in the purchase of 1,200 shares in the Charlotte, Columbia and Augusta railroad, raising the interest of the Pennsylvania company, according to the same authority to 10,000 shares, or nearly a controlling interest in the company.

☞ Subscriptions are now being solicited for the purpose of extending the proposed Lancaster and Reading narrow gauge road to Lancaster. The proposed route is to cross the Conestoga, near Graeff's Landing, thence down the bank of that and other streams to Beaver Creek Valley.

☞ The first instalment of $15,000 of the Delaware City town bonds have been issued and paid to the President of the Delaware and Pennsylvania Railroad Co.

☞ W. G. Lapham, Assistant Superintendent of the New York Central and Hudson River rail road, has been appointed Consulting Engineer of the Cayuga Lake railroad connecting Cayuga with Ithaca. The appointment makes him substantially the arbitrator on any points of difference which may arise between the company and the contractors.

☞ It is reported from Little Rock, Ark., that a contract has been closed for the iron and equipments for the entire line of the Helena and Little Rock or Central Narrow Gauge railroad, including branches from Aberdeen to Clarendon.

☞ The Tuckerton road, which is to extend from Whiting's Junction to Barnegat and Tuckerton, will be completed this month.

THE WHARTON

Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R.R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

Intercolonial Railway.

THE Commissioners appointed to construct the Intercolonial Railway, hereby give public notice that they are prepared to receive Tenders for Track laying and ballasting on 75½ miles of the line, being sections 4, 7, and 12, in the Province of Nova Scotia. Tenders may be for the whole distance or for separate Sections.

Specification and forms of tender can be obtained at the Commissioners' Office, Ottawa, and at the Offices of the Engineers at Truro and Amherst.

Sealed Tenders marked "Tenders," and addressed to the Commisssioners, will be received at their Office in Ottawa up to 12 o'clock noon, on Monday, the 25th day of September, 1871.

Tenders will also be received at the same time and place for 300 tons of Spikes according to samples, to be seen at the above named Offices.

Tenders to state price per ton of 2,240 lbs., delivered in equal quantities at Truro and Amherst Railway Stations. 50 Tons to be delivered at Amherst by the 16th October, and 50 Tons by the 1st November next. Balance of delivery by 1st July, 1872.

A. WALSH,
ED. B CHANDLER,
C. J. BRYDGES,
A. W. McLELAN,
Commissioners.

Notice to Contractors.

PROPOSALS for grading and masonry, or the materials for masonry, for about thirty-two miles of the extension of the Boston and Maine Railroad to Portland, will be received at this office, or at the office of HENRY BACON, the Engineer, at Saco, Me., until the evening of the 15th of September next.

Proposals may be made for grading one or more sections into which the work will be divided.

Profiles and specifications may be seen at the Office of the Engineer on and after September 8.

The Corporation reserves the right of rejecting any proposals. F. COGSWELL, President.

Boston, August 21, 1871.

Notice to Contractors.

PROPOSALS will be received by the undersigned for Grading, Bridging and Superstructure, (including rails and cross-ties,) for the Lancaster Railroad, until September 30, 1871. Profiles and specifications can be seen at the office of the Engineer, C. C. F. BENT, Lancaster, Mass.

NEW YORK State Railroad Bonds.

A First-Class Home Investment.

FIRST MORTGAGE
GOLD BONDS
OF THE
RONDOUT AND OSWEGO RAILROAD.

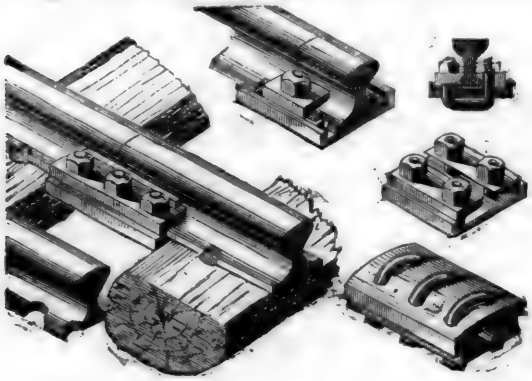
Principal and Interest payable in Gold.

SEVEN PER CENT. SEMI-ANNUALLY.

This Road covers 100 miles of the most direct possible line between the Great Lakes and deep water navigation on the Hudson River, the whole line of which will be completed and in operation on or before October 1, 1872, and give a new line of road to Lake Ontario and the West 25 miles shorter than any line that can be found.

It passes through the Cement, Flag-Stone, and Lumber regions of Ulster County, and the rich agricultural bottoms of Delaware and Greene Counties, all of which have not heretofore been reached by railroad facilities, and from which sections the formation of the country prevents the construction of a competing line.

The 36 miles of road operated for three months is already paying net earnings equivalent to 7 per cent. gold on its cost of construction and equipments. The issue of Bonds is limited to $20,000 per mile of COMPLETED ROAD, the coupons payable in gold in this city. Price of the Bonds 90 in currency.



Full particulars of the above may be had of, and the Bonds for sale by,

EDWD. HAIGHT & CO.,
9 Wall Street, New York City,
Financial Agents of the R. & O. Company.

Contract for BUILDING and OPERATING at any point required.

☞ FIRST MORTGAGE SINKING FUND LAND GRANT BONDS OF THE ST. JOSEPH AND DENVER CITY RAILROAD COMPANY.

IN DENOMINATIONS OF $1,000 $500, AND $100, can now be had from the undersigned or through the principal banks and bankers of the United States. The attention of investors is invited to the merits of these bonds, secured by a first and only mortgage on the road, equipments, franchise, and property of a trunk line of railroad which will shorten the distance between New York and San Francisco some 220 miles, and in addition the mortgage to secure the bonds covers a land-grant of 1,500,000 acres of the most fertile land in the West, which is prohibited from being sold at less than four ($4) dollars per acre by the terms of the mortgage deed, and according to the present market price of the Illinois Central Company's lands is worth $18,750,000. This loan was originally for $5,500,000, but has been largely reduced by subscriptions of actual investors. The remaining balance of the loan is offered at 97½ and accrued interest, but the right is reserved to advance the price at any time, without notice.

The bonds have thirty years to run; bear 8 per cent. interest, payable in New York, London or Frankfort-on-the-Main, at the option of the holder, without notice, free of taxes. BOTH PRINCIPAL AND INTEREST ARE PAYABLE IN GOLD. They are Coupon Bonds, but can be registered with the coupons ON, or can be registered with the coupons OFF, and interest paid to registered owner. Interest payable Aug. 15 and Feb. 15. A liberal sinking fund, formed from the entire land sales, in payment for which the bonds will be received at par and accrued interest, provides for the early extinguishment of this loan.

Trustees—Farmers' Loan and Trust Company.

These bonds offer favorable inducements to parties desiring to fund their Five-Twenties, or other high-priced securities.

In converting Five-Twenties the investors realize 17 per cent. profit on the principal; 2 per cent. per annum excess of interest; and at the same time get a perfect security.

Maps, circulars, documents, and full information furnished on application.

Though acting as agents for the sale of this loan, our firm buy and sell in their regular business the bonds of the St. Joseph and Denver City Railroad Company, those of the Eastern Division being now quoted at 102 *and accrued interest. These were originally placed by us at* 97½.

TANNER & CO., Bankers,
No. 11 Wall-st.

☞ The Chicago and Southwestern railroad was finished on the 31st ult. It is leased to and will be operated by the Chicago, Rock Island and Pacific Railroad. It forms a through line from Chicago to Atchison and Leavenworth.

Denver and Rio Grande Railroad.

The published description of the country through which this important narrow-gauge road will pass states that the elevation of Denver City above tide is 5200 feet, that of Santa Fe 7100 feet, that of Chihuahua, 4368 feet, and that of the City of Mexico, 7990 feet. It is a mountain land of pine forests, broken by inclosed plains called parks, and extensive valleys of great beauty and fertility. Coal-beds crop along the eastern foot of the mountain range. The mountains themselves are rich in iron, gold, silver, lead, copper, zinc, limestone, granite, and clays. The road is intended to run from Denver City southward, along the outcrop of the coal, 100 miles past Colorado City; then enter and ascend the valley of the Arkansas River, southward, to Canon City, and westward, 40 miles, to Poncho Pass. Here it resumes its southerly course; crosses the mountain divide, and gets upon the extreme head-waters of the Rio Grande in Homan's Park. This part of the line is 30 miles long. The rest of its way the road follows the Rio Grande south, for 140 miles, crossing four considerable rivers, which enter the great river from the east; the last two of these branches being the Callora and the Aroyo Honda. The course of the road now becomes S. 30 deg. W., and still along the east bank of the great river; past San Juan, 60 miles, where it has Santa Fe to the east of it, distant 15 miles, Santa Felipe, Bernalillo, Atrisco, and Pajarito, where it crosses to the west bank of the river. This point is 250 miles south of the Arkansas River. Here the line crosses at right angles the proposed line of the Atlantic and Pacific Railroad, (coming up the Canadian Fork, and the headwaters of the Rio Pecos, by Fort Butler and Anton Chico, through the Canon Blanco, by Albuquerque.) The railway will be completed and in running order from Denver City to Colorado City, 80 miles, this month, securing the trade of the Platte canon, and of the mines and forests of the South Park. This secures also the Lake Pass, the only practicable crossing of the divide between the Platte and Arkansas rivers. Grading has been commenced in the Arkansas canon, 50 miles from Colorado City, the most important entrance into the park country, and into the southern and western mining districts of Colorado. The passenger and freight traffic of the Rio Grande will be at once diverted to this new route.

☞ The extension of the Bedford and Bridgeport railroad to the Maryland line, where it is to connect with a branch of the Cumberland and Pennsylvania railroad, was let last week. The length of the road is about nine miles, and the cost of construction is estimated at $150,000.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of August, were:

☞ It is said that using part of the Annapolis and Elkridge route, the distance from Annapolis to Baltimore by the Drum Point railroad will be twenty-three miles. The Potomac road will not make it in less than twenty-six miles, whilst at present the distance by rail to Baltimore is thirty-eight. It will tap the Annapolis and Elkridge railroad at Crounsville, about seven miles from Annapolis, and will cross the Severn at Indian Landing.

The Tea Trade in a New Channel.

The San Francisco *Bulletin* of the 25th ult. gives the following interesting statement with regard to the tea trade, showing that the Pacific Road has got the lead of the Suez Canal in this trade:

For some months there has been a warm discussion in the commercial papers of the Atlantic and Western States concerning the tendency of the tea business to find new channels for transportation. New York claimed her old supremacy in this respect. Chicago hotly contested it. St. Louis made even a more emphatic denial. In the meantime cargo after cargo was being landed in this city, and dispatched across the continent by rail. It is said that eight hundred tons took this direction last week, and that in a few days twelve hundred tons will follow. These may be overestimates; but, reducing the figures to facts, they show what is the present drift of the tea trade. The exports by way of the Suez Canal have not been satisfactory to New York importers. Importation in sailing vessels by way of Cape Horn are nearly at an end. There is now a bonded transportation line which will probably connect with all the chief cities of the country. The complaints at the New York Custom House in the delay of goods, &c., charges in getting goods through with dispatch, which, it is said, amounted to five per cent. on the value of invoices, have all operated in favor of sending tea across the country by rail. While Eastern papers are busily engaged in writing the project down it ripens to an accomplished fact. Hereafter tea trains will be so frequent as hardly to attract attention. Merchants in New York receive invoices of tea from forty to sixty days sooner than in the old way. The great inland cities are not vexed with extra Custom House charges; time and money are saved, and these being the controlling considerations, the new drift cannot be turned aside. The great receiving depot hereafter for tea will be San Francisco.

Petersburg Railroad.

The earnings of this road in the years ending December 31, 1869 and 1870 compare as shown in the following exhibit:

	1869.	1870.
Passenger	$95,926 02	$94,255 69
Freight	128,843 01	148,411 55
Mail	9,750 00	9,750 00
Southern express.....	7,407 13	7,101 31
Miscellaneous	4,107 81	549 57
Total.....	$245,033 97	$260,113 12
Operating expenses....	147,659 21	142,215 32
Net earnings.....	$97,974 76	$117,897 80

These results are encouraging, showing as they do an improvement in net earnings in the year of 20 per cent. The expenditures are also reduced in a material degree, showing that the road is in a better condition than formerly.

This road extends south from Petersburg to Weldon, 61 miles, with a branch from Hicksford (4 miles south from Petersburg) to Gaston, 21.3 miles, connecting the railroad systems of Virginia and North Carolina, making a total length of 82.3 miles, or with its sidings, turnouts, &c., an equivalent track length of 88.62 miles. The rail is a light 50 lbs. iron.

The company own 11 locomotive engines, and cars as follows—passenger 8, baggage and express 3, box freight 64 and flats 32, or a total of 112 cars. Their proportion of cars in use as through trains between Fredericksburg and Weldon comprises 11 passenger, 4 baggage, and 6 mail and express. The company have also 12 small flat material cars.

Trains were run 164,357 miles. Passengers were carried—north 21,070, and south 19,589—total 40,399. Freight moved—north 28,328 and south 14,912—total 43,240 tons. In 1869 the total passengers numbered 40,343. Freight same year, 30,776 tons. This tonnage shows an increase of nearly 30 per cent.

The financial condition of the company as per Balance Sheet at commencement of 1871 was as follows:

Capital stock.....	$1,000,000 00
Preferred Stock	324,200 00
Funded debt.....	295,094 50
Bills payable.....	48,522 00
Interest and dividend on preferred stock due Jan. 1, 1871.....	16.852 50
Due other companies.....	7,288 20
Due Southern express.....	4,325 27

Vice President.—A. G. MCILWAINE, Petersburg, Va.

Directors.—A. G. McIlwaine, J. P. Branch, D. B. Tennant, R. A. Martin, and T. T. Broocks.

Treasurer.—DAVID G. POTTS.

Auditor.—DAVID R. DUNN.

General Superintendent.—R. B. PEGRAM.

Sorel and Drummondville Railway.

A wooden railway on the 4. ft. 8½ in. gauge is being constructed from the town of Sorel, at the confluence of the Richelieu River with the St. Lawrence, through Drummondville, to Arthabaska, P. Q., by Mr. L. A. Senecal, contractor. The Montreal *Herald* gives a long account of a recent trip on the line. Upwards of 2,000 men were at work, and the rails are laid on a large portion of the road. An experimental trip was made, the train going at the rate of 25 miles per hour, and running with remarkable smoothness. The journal quoted furnishes the following interesting particulars:

The ties, which are of hemlock and tamarac, are now brought down on trucks from the woods through which the railway runs; they are put on a rollway, run up to most ingenious circular saws, so gauged that at one operation they are morticed the proper depth and distance, not the difference of a hair breadth being found between one and another. As fast as they are cut, and the operation is very fast indeed, the prepared ties are rolled over to a different siding from that on which they are received, an ordinary circular saw sides them, and they are loaded up to be run out to the place where they are wanted. The wedges for keying up the rails are also prepared here. The rails are of maple, four by seven inches, and fourteen feet long, the gauge of the line being four feet eight and a half inches. The cost of the line, in which cost are included stations, (nine in number), car and locomotive depot, engine and repairing shops, engine and tender, two passenger cars, eight grain cars, and twenty-five wood cars, is $5,000 a mile, in full for all but the Yamaska Bridge which cost

$35,000. It should be mentioned that land damages, fences, &c., are included also in this amount. In payment it was agreed Municipal and Government debentures should be taken at par, and nothing was to be paid except as work to the extent of $10,000 was finished.

Atlantic and Great Western Railroad.

The Cleveland *Herald* says that the first step, to be taken immediately, by the newly re-organized Atlantic and Great Western Railroad Company is the laying of a double track (narrow gauge), with steel rails, on the Cleveland branch (Cleveland and Mahoning). The rails taken up from the Cleveland branch will be used toward laying a third rail from Leavittsburg eastward, so that narrow gauge cars can pass over the main line east of Leavittsburg. Arrangements have already been perfected with the Philadelphia and Erie Railroad, by which narrow gauge traffic between Cleveland and the Atlantic cities can pass over the Atlantic and Great Western to Corry, and thence over the Philadelphia and Erie and its connecting lines. Connections will be made with the New York Central also, either over the Buffalo division of the Atlantic and Great Western, which in that case will be completed without delay, or over another line in course of construction. With these arrangements completed the Atlantic and Great Western will form part of a narrow gauge line by way of Corry, Harrisburg and Philadelphia, another narrow gauge line by way of Buffalo and the New York Central, and a broad gauge line by way of the Erie. The building of a short link, twelve or thirteen miles, from the Mahoning line to the Baltimore and Ohio extension, will open a new and mort route between Cleveland, Baltimore and Washington. Other projects are contemplated, by Which, without expenditure of capital, new outwets and feeders will be secured to the line and its value enhanced.

Delaware Railroad.

The earnings of this road for the fiscal years ended December 31, 1869 and 1870, compare as shown in the following exhibit:

	1869.	1870.
Passenger	$149,886 22	$127,448 02
Freight	197,314 32	248,125 40
Miscellaneous	7,569 51	8,394 15
Total gross earnings.	$354,270 05	$383,862 60
Operat'g exp., taxes, &c	292,328 41	323,188 27
Earnings less expenses.	$61,941 64	$60,674 33
Interest and dividends.	102,567 09	101,617 36
Loss to lessees	$40,625 45	$40,943 03

This road is operated under a contract of lease by the Philadelphia, Wilmington and Baltimore Company. Formerly the lessees operated the road at cost, and paid to the Delaware company 6 per cent. (tax free) on their stocks and bonds. For the last 9 months of 1870 the road was operated by the lessees under a modified contract which gave them 75 per cent. of the gross earnings as an equivalent for working expenses.

The Delaware road leaves the Philadelphia, Wilmington and Baltimore line at Delaware Junction through the Wilmington and Frenchtown branches; and extends thence to Delmar, the station on the south border of the State of Delaware, distant 84.5 miles, and there connects with the Eastern Shore R. R., also leased to the P., W. and B. Company, and forming in connection with a line of steamboats, the shortest commercial road to Norfolk, &c. A number of branches diverge from the Delaware Railroad into Eastern Maryland on the west and south, and to the sea on the east. A new road across the peninsula is also being constructed so as to continue the Vineland R. R. of New Jersey directly to Chesapeake Bay. These several improvements will give to Delaware and Maryland great advantages and rib the whole peninsula. The reports of the doings in travel and transportation are not as complete as is desirable, no statement of train mileage, passengers or tonnage being given in connection with the statements of earnings and expenses.

The following is an exhibit of the condition of the company as of January 1, 1870 and 1871:

	1870.	1871.
Capital stock	$891,206 17	$1,230,941 25
State donation	63,250 00	63,250 00
Funded debt	870,000 00	882,500 00
Sundries	79,781 75	136,476 17
Total	$1,894,237 92	$2,313,167 40
Cost of road, &c	$1,826,217 80	$2,141,299 88
Sundry accounts	33,834 07	137,515 02
Cash on hand	34,186 05	34,352 50
Total	$1,894,237 93	$2,313,167 40

The company's funded debt is described as follows:

1st mortgage 6 p. c. bonds, due 1875	$500,000
State loan 6 p. c. bonds, due 1876	170,000
Guaranteed 6 p. c. bonds, due 1875	100,000
1st mortgage extension 6 p. c. bonds	100,000
Loan of Dec. 18, 1856, 6 p. c.—balance	12,500
Total, as above	$882,500

On January 1, 1870, there was a sinking fund applicable to the State Loan, amounting to $105,508 08.

President.—S. M. Felton, Philadelphia.

Directors (elected Jan. 12, 1871).—S. M. Felton, Philadelphia; Isaac Hinckley, Wilmington; A. C. Gray, New Castle; Charles Warner, Joseph Bringhurst and Jesse Sharp, Wilmington; Isaac Jamp and M. Hayes, Dover; H. B. Fiddeman, Milford; Alex. Johnson, Farmington; Wm. H. Ross, Seaford; Albert Avory, Greenwood; and J. Turpin Moore, Laurel, Del.

Treasurer and Secretary.—M. Hays, Dover, Del.

General Sup't.—H. F. Kenney, Philadelphia.

Cumberland Valley Railroad.

The Hagerstown *Mail* has the following with regard to the work on the Cumberland Valley Road between Hagerstown and Williamsport:

The work of laying the rails upon the extension of the Franklin (a continuation of the Cumberland Valley) Railroad from Hagerstown, to Powell's Bend, on the Potomac river, is being vigorously executed under the direction of the Chief Engineer of the Company, Major Edward Watts. The graduation of the road, under the supervision of Major Watts, was executed by Mr. James March, a thorough railroad man, and is said to be a model piece of workmanship. Mr. March is now engaged on the filling and excavation of that portion of the same line which extends into Virginia, known as the Martinsburg and Potomac Railroad, and the Chief Engineer is, we understand, arranging his plans for the construction of the bridge across the Potomac river. We anticipate that a very few months will be permitted to pass before this road, or a portion of it, at least, will be open to the public. When completed it will be one of the most substantially constructed railways in the United States.

☞ The Portland and Oxford Central Railroad Company has decided to change the gauge of that road from five feet six inches to three feet, as early as new locomotives and cars can be substituted. It it said that the change insures the extension of the road from Canton to Dixfield, Peru and Rumford Falls. This is the first adoption of the three-foot gauge in New England.

Stinard's Steam Railway-Brake.

A writer in the Whitestone, N. J., *Herald* thus refers to this brake:

The engineer is the first person to see danger, and he is the proper person to have the control of stopping the train, which he can do very quickly if he has the Stinard brake applied to his engine and cars. Underneath the foot-board of the engine is a steam cylinder about eighteen inches long. There is a lever connected in the centre with the piston, one end made stationary, and the other end connected with a rod running under the car to a sway-bar; one end of the sway-bar has a rod running to and connecting with the Miller buffer, by means of an equalizing lever. The centre of the sway-bar being connected with a slide-bar that the hand-brake is connected to, the motion of the car is conveyed from the buffer to the sway-bar giving an opposite motion to the main rod, so that when the train spreads in starting, the rod, moving in an opposite direction, keeps a taut rod under all the cars, while the slide-bar stands perfectly still where the hand-brake is connected. Each car is provided with the same apparatus. Thus the whole device, when the power is applied, adjusts itself so that every brake is put on with the same power at the same instant. Having no chain connections, the steam throws off the brake as easily as it puts it on. The rods running under each car are connected together when the cars are coupled by means of a simple pin; thus making a continuous rod from the engine to the rear car of the train.

Hamilton and Loveland Railroad.

The Hamilton and Loveland Railroad Company, which has been incorporated some months, will employ Phineas Pomeroy, formely of Middletown, to survey their proposed route, as soon as he completes the survey of the Cincinnati, Twin Valley and Greenville Railroad, upon which he is now engaged. The Hamilton and Loveland Railroad is intended to accomplish two very important objects. One is to give a second and competing road to Cincinnati, and the other is to furnish a link to the Baltimore and Ohio route to the West and Northwest. It will intersect the Short Line, now building, at a point in the neighborhood of Sharon or West Chester, and thus enable the people of Hamilton to run trains to Cincinnati, over that road, making the distance but little greater, if any, than by the Cincinnati, Hamilton and Dayton Railroad. The connection at Loveland with the Baltimore and Ohio makes a direct line from Baltimore and the seaboard to St. Louis, Chicago and the great West. It is a much shorter line west than via Cincinnati, and saves reshipment, time and expense. The new road will run in a pretty direct line from Hamilton to Loveland, passing through a rich, fertile and thickly settled country.—*Lebanon, O., Patriot.*

☞ Articles of association of the Auburn and Deposit Railroad Company have been filled in the office of the Secretary at State of Albany. This road is to be constructed from Deposit, Delaware County, to Homer, Cortland County, a distance of 69 miles, through the countries of Delaware, Broome, Chenango, and Cortland. The capital stock is $1,000,000, divided into 10,000 shares. The road is to be begun at once, and to be completed as soon as possible.

☞ The preliminary survey of the Spirit Lake and Sioux Valley (Iowa) Railroad is now being made. The proposed line leaves the Lower Falls and Sioux City road near Storm Lake, in Buena Vista county, passing northward through Sioux Rapids, Spencer in Clay county, Milford and Spirit Lake, in Dickinson county, thence to Jackson, Minn., there to connect with the Jackson branch road, tapping the St. Paul and Sioux City road at Windom.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, September 16, 1871.

Stock Exchange and Money Market.

The money movement has been on an enlarged scale, with a more active inquiry for accommodation from both speculative and mercantile borrowers, and a somewhat less liberal offering of funds to other than the most prominent of the street firms. The ruling rates have been from 3@5 per cent. in a temporary form, and at 6@8½ per cent. per annum on choice to fair business credits. Under the outflow of currency to the interior, the city bank reserves show a general falling off. The Government office, however, reports its coin and currency balances augmented by the week's business. The city banks, in their last weekly exhibit, show a loss of $1,438,800 of legal tender notes, $1,535,750 of specie, and $695,700 of deposits; also an increase of $4,159,700 in their loan and discount averages, and a reduction of $14,387 in their item of circulation. The U. S Sub-Treasury enlarged its currency balance $808,297 and its coin reserve $302,962, as the result of the week's business. The city bank exchanges, last week, averaged $101,911,985; and thus far, this week, 113 millions daily. The banks now hold $7,711,800 of specie and legal tender notes, in excess of the 25 per cent. of their liabilities required by the national banking Act. The receipts of the U. S. Sub-Treasury office were $5,553,234 in coin, and $4,407,184 in currency; payments, $5,250,272 in coin, and $3,598,887 in currency. The office received $4,084,000 in coin or its equivalent, from customs; and disbursed $657,319 of coin interest.

The specie reserve of the city banks according to the latest return is $10,762,800, against $18,718,309 same time last year. The city bank deposits are now $249,078,600 against $196,852,430 week ending Sept. 10, 1870. The legal tender reserve amounts to $66,945,700 against $48,072,195 same time last year. The circulation now stands at $30,144,200, against $32,897,168 same time last year. The loans are now $311,206,300, against $271,796,731 at this date last year.

The U. S. Sub-Treasurer retired, last week, $8,612,025 of coin certificates, received for customs.

The U. S. Sub-Treasury, on Thursday morning of this week, held a balance of $8,558,413 in currency, and $66,798,846 in coin, against a balance a week previous of $7,901,862 currency, and $66,409,522 coin.

Government revenues have been yielding quite liberally, during the week. The excises yielded last week nearly three millions, and thus far since July 1, about $29,478,768. The customs at the port of New York, last week were $3,870,025; and at the outports, equal to about 1⅜ millions more, all in coin, or coin certificates.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $364,529,700; and as security for deposits of public money, United States bonds for $15,569,500. The amount of National bank notes in actual circulation at this date is $322,068,085.

Under the September programme of the Treasury Department, Government will buy in U. S. Five-Twenties as follows: Wednesday, September 20—One Million; Wednesday, September 27—One Million. And will sell Gold as follows: Thursday, September 21—Two Millions; Thursday, September 28—Two Millions.

There has been unusual activity in the Gold dealings, since our last, with a decided development of the speculative spirit, which has had the effect of strengthening the price materially, under a reduced offering of coin for prompt delivery. The customs call has been quite brisk, while the export drain has been light. The range of the price during the week, has been from 113¼@114¼, and the closing quotation on Wednesday was 113⅞ against 114 the preceding Wednesday. The specie outflow, last week, was $422,105; on Tuesday of this week, ———; and on Wednesday, $155,000. The Gold Exchange Bank clearances have been as follows: September 7, $30,030,000; September 8, $56,489,,000; September 9, $73,079,000; September 11, $66,791,000; September 12, $51,739,000; September 13, $51,603,000.

The customs at this port on Wednesday were $535,000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Sept. 9, 1871, $64,396,697, against $65,804,006 same time in 1870.

The customs demand for Gold last week, averaged $680 667 a day; thus far, this week, it has averaged $670,000 a day, or equal to a weekly aggregate of $4,020,000. The arrivals of

specie from Europe, Havana and other foreign ports since Jan. 1, 871, have been $7,585,801 against $7,682,033 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $111,924,297 against $98,243,808 same time in 1870.

The export drain was $422,105 last week, against $1,381,487, same week preceding year The shipments since January 1, 1871, have been $54,296,201, against $46,608,939 same time in 1870.

Foreign exchange has been offered more freely and quoted cheaper and quite irregular, on a limited call for even prime bills. Bankers' sixty day bills on London closed on Wednesday at 107¾@108¼; sight bills on London, 108⅜@108¾.

The produce exports from this port, week ending with Sept. 12, were to the currency value of $4,403,807.

On Wednesday, Government bought in a million of Five-Twenties at 112 58, ex-interest, all from Messrs. Jay Cooke & Co. The amount of bonds offered was $5,608,100 at 112 58@113 59.

U. S. sixes of 1881 closed here on Wednesday of the current week at 118¾@119; U. S. Five-Twenties of 1862, 115@115⅛; U. S. Five-Twenties of 1864 at 115@115⅛; U. S. Five-Twenties of 1865, 115@115⅛; U. S. Five-Twenties of 1865 consolidated, 113⅞@114; U. S. Five-Twenties of 1867, 114@114⅛; U. S. Five-Twenties of 1868, 114⅜@114⅝; U. S. Ten-forties at 111⅝@111⅞; U. S. Six per cent. currency bonds, 115⅜@115⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Aug. 30.	Sept. 6.	Sept. 13.
Consols	93½	93⅜	93½
U.S. 5-20's of 1862	92⅛	93⅝	93⅝
U. S. 5-20s, 1865	92¾	93½	93⅜
" 1867	92⅛	92¾	92¾
" 10-40s	90¾	90⅞	90⅛
Erie	24½	27½	26½

State bonds have been in fair request at generally firm prices.

Railway bonds have been in moderately active demand, chiefly on investment account, at strong prices for the more popular issues. Central Pacific Sixes have been readily taken as offered at 102⅜@102½. Chesapeake and Ohio Sixes have been in good request, for home investment on the basis of 93 per cent. and accrued interest. Less than a third of the aggregate issues of the bonds of this loan now remains to be disposed of.

The St. Joseph and Denver City eight per cent. gold bonds have been selling quite freely. The loan (the aggregate of which was $5,500,000) was opened on August 1, and nearly 50 per cent. of it has been already disposed of. The price of the bonds at present is 97½ and accrued interest in currency.

Business in Railway and miscellaneous share property has been fairly active, but prices have been more than usually variable, under free realizations on speculative account. The later dealings showed a rather more confident temper.

General business has been moderately active in the principal lines. Breadstuffs and Provisions have shown more firmness. Middling upland cotton closed on Wednesday at 21⅛ cts. per lb. The receipts at all the ports, since Sept. 1, have been 15,693 bales, against 21,101 bales same time in the preceding year; exports 8,826 bales, against 4,048 bales in the previous year; stock at the ports at latest dates, 99,337 bales, against 55,701 bales same date 1870.

At the Live Stock Markets, Beeves have been in active request at from 7@13 cts.; Veals quiet at 4@10½ cts.; Sheep at 4@6½ cts.; Lambs at 6@8½ cts.; Swine, 4¾@5⅛ cts per lb., all live weight. The week's receipts were 9,856 Beeves, 2,827 Veal Calves, 32,373 Sheep and Lambs; and 30,610 Swine.

Foreign goods have been in generally fair demand at well maintained prices. The week's imports of foreign goods reached $8,133,736, including $3,915,677 of dry goods.

Ocean freights have been quite active, chiefly in the line of grain shipments, at higher rates. Room scarce.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Georgia 7s, gold, 98¼; North Carolina 6s, special tax, 19½; do. Fund Act, 1866, 34¾; do. 1868, 30; South Carolina 6s, old, 77; do., new, Jan. and July, 57½; do. Apl. and Oct., 60¾; Louisiana 8s, 1910, 92½; Virginia 6s, consol., 65½; do. Deferred Certificates, 80; New York State 7s, B. L., reg., 109; do. 6s, 1874, 109; Pacific 7s, guar. by Mo., 101; Arkansas 7s, (L. R. and F. S. R. R.,) 56; New Jersey R. R. 125½; Atlantic Mail S. S. Co., 21; Gt. Western 1st mort. 1888, 93; Long Dock bonds, 94; Albany and Susq. R.R., 93½; do. 2d mort., 95¼; Quincy, and Toledo 1st mort., 89; Central of New Jersey new bonds, 103; St Louis and Iron Mt. R. R., 59; do. 1st mort., 92½; Toledo, Wabash and Western consol. bonds, 90½; Ohio and Miss. consol. bonds, 94; Am. Dock and Imp. 7s, 98¼; Cleveland, Painsville and Ashtabula new bonds, 98¼; do. old bonds, 100; Mil. and St. Paul 1st mort., Iowa Div., 90; Cedar Falls and Minn. 1st mort., 86½; Hannibal and Naples 1st mort. 89, Brooklyn 6s, W. L., 96½; Consol. Coal, of Md., 42; Cumberland Coal and Iron, 45; Spring Mt. Coal, 80½; Maryland Coal, 33; Western Union Tel., 67¼; do. 7s, 97; Quicksilver pref., 24; Adams Exp., 87½; Am. Mer. Union Exp., 58½; Wells-Fargo Exp., 55; U. S. Exp., 57.

FUNDING FIVE-TWENTY BONDS.

OFFICE OF FISK & HATCH,
No. 5 Nassau street,
NEW YORK, September 9, 1871.

Holders of FIVE-TWENTY BONDS of all issues, except 1867s and 1868s, are liable to be called on at any time to surrender them to the government, and to receive payment therefor. Large amounts are being exchanged through us daily for

CHESAPEAKE AND OHIO BONDS,
WESTERN PACIFIC BONDS, and
CENTRAL PACIFIC BONDS,

all of which pay the same rate of interest as the FIVE-TWENTIES, the interest and principal of which are just as sure to be paid at maturity in coin. By the exchange an addition of from 12 to 20 per cent. is made to the capital. The demand continuing so heavy these Bonds must all largely advance in price, and soon become scarce.

We are paying to-day for Five-Twenty Bonds 114 to 115.

And are selling

CHESAPEAKE AND OHIO SIXES at 93 and accrued interest.

WESTERN PACIFIC SIXES at 95,

CENTRAL PACIFIC SIXES at 103.

FISK & HATCH.

☞ The American Diamond Drill Company have acquired by purchase the Diamond Drill Patents, and the exclusive right of use to manufacture and sale of the machines. In connection with the former style of Drill the Company propose to furnish several new and improved patterns for shafting, tunnelling, quarrying, &c., not hitherto presented to the public. The Company will also give additional attention to contracts for all classes of Rock excavations. Prospecting of mineral lands.

☞ Gen. WM. H. SEWARD, Jr., has resigned his position as Treasurer and Director of the Southern Central Railroad Company, in consequence of ill health. Gen. SEWARD leaves the Company in a sound financial condition and with funds adequate to put down the last rail on the northern terminus, a result largely due to his cautious and skillful management.

Another Route to the East.

The rapidity with which the Louisville, New Albany and St. Louis railroad is being pushed towards completion is not the least significant of the movements now being made in the interest of St. Louis commerce. The line is important, less in its connections at Louisville with roads extending South than as forming, in connection with the Chesapeake and Ohio railroad, a new rail route to the Atlantic seaboard, independent of and competing with the three great roads operated in the interest of New York. We have heretofore expressed the belief that miles are by no means the controlling feature in the establishment of rail rates, and still adhere to that opinion, despite the fact that at present the greater distance is urged as a reason for maintaining a higher tariff from this point to New York than is charged from Chicago. It is true there has been some competition opened against this policy by the Baltimore and Ohio road through the recent extension of its line to this city, but like the barge line competition on the river, it is only carried to a point sufficient to secure freight—not far enough to be of considerable benefit either to shippers or to the trade of St. Louis or Baltimore. St. Louis is as near the Atlantic seaboard as Chicago, and with a competition between two short lines would secure as low a freight rate, even to New York, as the roads leading to the latter city, though carrying their freight through Chicago, would be compelled to measure competition against miles in adjusting their tariffs. Beyond this another advantage is to accrue to St. Louis from the completion of the eastern link of this new road. It will enable our shippers to more fairly compete with the lake and rail route from Chicago. St. Louis has as sharp advantage in distance and as to time in which shipments can be made, if the Ohio river can be utilized. At present there is no inducement offered by either the Pennsylvania Central or Baltimore and Ohio road to secure a barge line on the Ohio and the carrying of grain and flour by water to Parkersburg and Pittsburg, (although the first named road solicits shipments from Lake Erie,) for the simple reason that each road controls or owns western roads, and together are certain of all the east bound traffic from this city which would pass over their roads, and of all that may originate on or pass over the Ohio river, because there is no competing line to withdraw it from their control. With another road commencing upon the Ohio river, competition will give control of the traffic to that road which can carry the cheapest and, as is the case at Chicago, the cheaper cost at which freights can be moved the largest part of the distance by water will materially modify the all-rail rates; and with lines of barges discharging grain into elevators at Parkersburg, Pittsburg and some other point on the Ohio, St. Louis shippers will be on a parity with Chicago shippers who can avail themselves of water transportation to Erie, Buffalo or Oswego.

Of the Chesapeake and Ohio railroad our eastern exchanges state that the western division of the road from the Ohio river to the Kanawa falls, ninety-five miles, will be completed in October, and the work on the remainder of the road is so far advanced that there is no reason to doubt that the whole will be completed during the summer of 1872. This road is destined to become one of the most important and immediately profitable trunk lines in the United States, constituting as it will a new through route between the West and the seaboard, opening new and extensive coal and iron fields, and developing a most important section of country to contribute to its way traffic.—*St. Louis Republican.*

☞ The Augusta *Chronicle* says that the Wilmington and Manchester Railroad is rapidly nearing Columbia, from whence it will be prosecuted with all dispatch to Augusta; and that there is some talk of tapping the Air Line Railroad between Greenville and Laurens Court House, and running another air line railway to Augusta *via* Laurens Court House, Ninety-Six and the Pine House.

International Railroad.

The engineer, Mr. Ramsay, and his assistants, are now exploring the route from Bury to Lake Megantic, and the Boundary Line. We understand the Directors have decided to adopt the route recently surveyed from Lennoxville to Bury, by way of Johnville, Birchton, and "Slab City," distance about 27 miles. The G. T. R. Company having removed (or decided to remove) their machine and engine repair works to Richmond, it is said that the large engine house and the brick repair shop has been offered to the Passumpsic R. R. Co., and that the Massawippi railway will be extended to Sherbrooke by means of a third rail on the G. T. track.—*Sherbrooke Gazette.*

☞ The St. Louis and St. Joseph Railroad, running from the Missouri river, opposite Lexington, to St. Joseph, seventy-two miles, was sold at public auction at St. Louis on the 13th inst., for $138,000. The sale was made under the order of the United States District Court. The liabilities of the road are $1,000,000 of first mortgage bonds; one year's unpaid interest, about $70,000; a floating debt of some $200,000, and $400,000 owing to the North Missouri Railroad. Daniel H. Armstrong, of St. Louis, was the purchaser.

☞ The Baltimore *Sun* says that Col. S. R. Johnson, with a corps of engineers, is engaged in surveying the route for a new railroad between Baltimore and Philadelphia, under the auspices of the Baltimore and Ohio Railroad Company. This proposed new route is designed to make the connection between Baltimore and the East more direct, and it is presumed will strike the river as nearly as possible opposite Locust Point.

☞ The Pittsburg *Chronicle* says it is expected that the Pittsburgh, Virginia and Charlestown Railroad will be in running order by Christmas, from South Pittsburgh to Dravosburg, opposite McKeesport. There are some six sections now let to reliable contractors, who have an aggregate of about five hundred men employed, and will put on larger forces should it be necessary to the completion of that portion of the work within the time specified.

☞ A three-foot gauge road is building between Phœnicia and Hunter, in Ulster County. The cars for this road are to be 35 feet in length, 7 feet in width, and 10½ feet in hight. They will weigh 15,000 pounds, and will accommodate 35 passengers each. The main sills of the cars will be only 27 inches above the rail, while those of six-foot gauge cars are 75 inches above.

☞ The engineers, General Craighill, of Baltimore, and Strickland Kneass, Esq., of Philadelphia, appointed to examine plans for the improvement of Jones' Falls, are busily engaged in their duties, and will report before the final adjournment of the present City Council.

☞ A. DEGRAFF & Co., railroad contractors, have removed their forces from the main line of the St. P. & P. R. R., and transferred them to the vicinity of Sauk Rapids, preparatory to commencing the grading of the Sauk Valley Branch of the Northern Pacific Railroad.

☞ The Morris Canal and Banking Company have declared a dividend of $3 25 per share on the preferred stock, and $1 30 per share on the consolidated stock, free of tax.

Journal of Railroad Law.

RAILROAD COMPANIES—CAN A PERSON WITH HIS ARM OUT A CAR WINDOW WHO IS INJURED BY A PASSING TRAIN, RECOVER?—PRINCIPLE OF CONTRIBUTORY NEGLIGENCE.

The facts in the rec ase of The Chicago and Alton Railroad Company *vs.* Pondrum (51 Ill., 333) are fully and clearly stated in the following opinion by

WALKER, J.—It appears that appellee was a passenger on appellants' road on the afternoon of the 17th of September, 1867, from Bloomington to Chicago. He had purchased a ticket for a first class car, and left Bloomington at noon, and arrived at Chicago at 9 o'clock in the evening on the same day. On approaching Twelfth street, it appears that the train stopped as usual, and appellee swears he saw a long freight train on the right hand side of the car in which he was sitting. He seems to have been by a window on that side. He seems to have remained in his seat and had his arm resting on the window sill, while the window was open, and he swears that as the train was approaching Twelfth street, his right arm was seized by some sharp pointed instrument and was drawn out of the window, and forced back against the rear window frame and was broken just above the elbow joint.

Another witness swears that he was at the time looking at appellee, and that his arm was resting on the window sill and his hand hanging down on the inside of the car. Neither witness saw what it was that came in contact with appellee's arm. An inspection of the sleeve of the coat worn by appellee at the time, submitted to us by agreement of counsel for our examination, shows, that on the under side of the sleeve, near the lower end, the cloth was considerably broken and torn. The theory of appellee's counsel is, that some iron instrument, protruding from the rear end of the freight train, entered the car window and came in contact with appellee's arm near the wrist, and pulled or forced it backward until it was fractured above the elbow, the face or side of the window forming the fulcrum. Appellants' counsel contend that his arm was outside of the window and came in contact with some stationary body, by which t was forced backward against the window frame and thus broken.

We are unable to conceive how an instrument could be contrived or formed, attached to the corner of a freight car, that could pass into a window and seize a man's arm near the wris', hanging down several inches below the base of the window, and not only so, but seize it on the under side of the arm, and hold it firmly and force the arm back, as this seems to have been done. If not impossible, we suppose it is extremely improbable. We can find no solution to the occurrence in that mode, yet this seems to have been the theory of both appellee and the other passenger. If an iron instrument of sufficient length to enter the car far enough to accomplish this purpose, had protruded from the rear end of a freight car standing near the track when this train passed, it certainly would have come in violent contact with the front part of the coach in which appellee was riding, and the friction would certainly have been so violent as to have attracted the attention of all persons in the car. Again, the wrist, when the force was applied from the description of its situation given by appellee and the passenger must have been at least four or five inches in from the outer surface of the car, and it may be asked, how it could have passed the forward part of the train and this car without being broken off or bent so that it would not have passed so far into the car window as to produce the results that it is insisted were thus accomplished.

Nor do we see that it is in the least probable that such an instrument could have been thrust into the window by the backing of the freight train. It is true, that if a spike or bar of iron had protruded backward from the rear of the freight car, and it had been backing at the time, it is not impossible that the iron rod could have entered the window, but it is impossible that it could, after entering the window some four inches above the wrist, have instantly by its own gravity, curved downward so as to come in contact with the under side of the wrist; and the same may be said if the freight car was stationary. We are for these reasons, satisfied that the injury was not inflicted in that mode, although appellee and the other passenger no doubt honestly believed that it was. Neither of them saw the instrument that produced the injury, it was sudden, startling and unexpected; they were most probably not observant of all the surroundings and their relations to each other. Not having expected the occurrence, perhaps neither of them was noticing the actual position of appellee's arm at the time of the contact.

While at most, we may, with the facts we have before us, be able to do no more than arrive at a reasonable conclusion, still it appears to us that the most natural and probable theory is, that appellee had his elbow resting on the window sill, with his arm extending outward and upward, and in passing the rear end of the freight train, it was so near the passenger car that his wrist came in contact with the corner of the rear car, and if the speed was sufficiently rapid, the force would be so great that the arm would not be readily withdrawn, and as the pressure increased it would not only force the arm back until it was broken, but it would render the slipping of the arm so difficult, that as it dragged past, it would most likely produce rents in the sleeve, at the place and of the shape found to have been made in the coat sleeve. This, we think, was the manner in which the injury most probably occurred. This, to us, seems reasonable and satisfactory.

The question then arises, whether having the arm casually outside of the car in that manner, was negligence, and if so, was there greater negligence in the company in permitting its freight cars to stand so near the track as to produce the injury in the manner we suppose it occurred; and if both parties were guilty of negligence, was that of appellee relatively slight when compared with that of appellants? For a passenger to allow his arm to rest on the window sill and slightly project beyond the outside surface of the car, may be, in some degree, negligence, but observation teaches that to do so is not uncommon with passengers. It is frequently done through inadvertance, and when done intentionally, it is upon the supposition that all railway companies have their track free from obstructions, and that they permit nothing to remain so near to the track as would render it dangerous to permit the hand to pass a few inches beyond the outside of a car window.

We have been referred to a number of cases in other Courts, and the earlier cases decided in this Court, as announcing the rule, that when there is contributory negligence, the plaintiff cannot recover. The established doctrine of this Court is, that where the negligence of the plaintiff is slight as compared with that of defendant, a recovery may nevertheless be had. We are fully aware this is apparently opposed to the decisions of some Courts, but it is more apparent than real, as recoveries are permitted in those Courts where acts of the plaintiff should be regarded as slightly negligent, not equal to ordinary care; and by requiring the greatest possible precaution on the part of the carrier.

In the case of Spencer *vs.* The Milwaukee and Prairie Du Chien R. R. Co., 17 Wis., 487, a case very similar in all of its material facts to the case at bar, the Court say:

"When we consider the manner in which railroad cars are usually constructed—with windows so that they can be opened, and arranged at a sufficient height from the seat, so that passengers will almost unconsciously place their arms upon the sill for support—there being no bars or slats before the window to prevent their doing so—then to say if a passenger's arm extends in the slightest degree beyond the outside surface, he is wanting in proper care and attention, and if an injury happens he cannot recover, because his conduct must have necessarily contributed to the result appears to us to be laying down a very arbitrary and unreasonable rule of law."

"It is probably the habit of every person, while riding in the cars, to rest the arm upon the base of the window. If the window is open, it is liable to extend slightly outside. This we suppose is common habit."

"There is always more or less space between the outside of the car and any structure erected by the side of the track, and must necessarily be so, to accommodate the motion of the car."

"Passengers know this, and regulate their conduct accordingly; they do not suppose that the agents and managers of the road suffer obstacles to be so placed as to barely miss the car while passing. And it seems to us almost absurd to hold that in every case, and under all circumstances if the party injured had his arm the smallest fraction of an inch beyond the outside sarface, he was wanting in ordinary care and prudence."

In the case of Laing *vs.* Colder *et al* 8 Penn. State R., 479, it was held, that a person traveling on a railroad car, who permitted his hand to extend outside of the window, and thereby had his arm broken in passing a bridge, could not recover if the agents of the company had given timely notice of the danger which the plaintiff might have avoided. It will be observed, that this case turns upon the fact that notice had been given to the passenger not to put his hand outside of the window. Had the notice not been given, we may infer, the Court would have held the company liable.

In the case of the New Jersey Railway Co. *vs.* Quinard, 9 Harris, 203, the same Court say, that "a carrier of either goods or passengers is bound to provide a carriage or vehicle, perfect in all its

parts; in default of which he becomes liable for any loss or injury that may be suffered, provided, it happened without negligence or misconduct on the part of the party injured. A carrier of passengers is bound to omit no precaution that may conduce to their safety. He is bound to guard against every apparent danger that may beset them. The dangers incident to traveling in railway cars are few in comparison with those incident to other modes of traveling; but the most prominent of them is risk of injury to limbs stuck out of windows, where the cars are not so constructed as to prevent it. Any one who has traveled by railway must have observed that even the most careful passengers forget the risk, and unconsciously suffer their elbows to slip out beyond the window sill. What can a carrier do to prevent it? no more is required than a few metalic rods set in the windows perpendicularly or horizontally, or a netting of wire work, or even wooded slats. None of these would materially impede the circulation of the air, or abridge the comfort of the passengers, while it would make their safety sure. A car without any of these appliances, is, to coin a phrase, not road worthy, and a carrier is responsible for any loss that may happen from that cause alone. Risking his passengers in an unsafe car, it behooves him to use every means in his power to guard against danger from it at dangerous places, by audibly proclaiming in the car the necessity of keeping arms and heads inside. Should any one disregard such warning, he would incur the charge of willful neglect of his own safety, and where there is negligence on both sides, neither party is answerable for any injury from it."

We are aware that this last case has been overruled by the case of The Pittsburg and Connellsville Railroad Company *vs.* McClurg (Law Register for March, 1868). But we think the former case the better considered of the two, and to be based on sounder reasons and more in harmony with the analogies of the law, and entitled to more weight.

But even if it were to be conceded that it was negligence on the part of the appellee to have had his arm outside of the car window, should he be precluded from a recovery? Was it negligence on the part of the railway company to permit cars or other heavy or permanent bodies to stand so near their track, that cars in motion must pass within a few inches of such bodies? we suppose it to be a clear and undeniable duty of a railway company to keep its track clear of such obstructions; and a failure to do so, is gross negligence. With such objects so nearly in contact with cars running at a high rate of speed, life must necessarily be endangered; and when such negligence as appellee may have been guilty of, is compared with the negligence of permitting a freight train to stand so near the track of a passenger train as to produce the injury which did occur, the former is slight and the latter is gross. And it has long been the settled law of this Court, in such cases to compare the negligence of both parties, and even if the plaintiff is guilty of negligence, which is slight, as compared with that of the defendant, he may recover. St. Louis and Alton R. R. Co. *vs.* Todd, 36 Ill., 409. This case, besides a large number of others in our Court, announce the rule, and notwithstanding other Courts have adopted and acted upon a different rule, we regard it as firmly established in this State.

But even under the contrary rule there are authorities of weight which would justify us in holding that the protrusion of appellee's hand through the car window was not negligence, and that permitting freight cars to stand so near the track for the passenger cars was gross negligence. In the case of Spencer *vs.* The Milwaukee and Prairie du Chien R. R. Co., 17 Wis., 490, it was held, where a passenger, while the train was passing over a bridge, had his arm outside of the car window, and it came in contact with a brace in the bridge which had become loosened and dropped downward, and the hand was injured, there was not negligence on the part of the plaintiff, while there was on the part of the company.

An examination of the instructions given in this case, shows that the rules announced and applied by this Court in reference to negligence, were fairly stated to the jury, and could not have misled them; and the evidence sustains the verdict.

The verdict found and returned by the jury was, no doubt, excessive, but the Court below required appellee to remit all but $2,500, or he would grant a new trial. The appellee did, and the Court rendered judgment for that sum. While the verdict, after the *remittitur* was entered, was still large, we are not prepared to say, that it is so far excessive as to require the judgment to be reversed. It is not so large as to strike us that it could only be the result of passion, prejudice, or mistake.

The judgment of the Court below is affirmed.

Judgment affirmed.

Illinois Central Railroad.

The statement of this Company for the month of August, 1871, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	3,534.90 for	$35,610 50
Acres Int. Fund Lands sold		
Acres Free Lands sold	120.00 for	2,591 60
Total sales during month of August, 1871	3,654.90 for	$38,202 10
To which add Town Lot Sales		95 00
Total of all	3,654.90 for	$38,297 10
Cash collected in August, 1871		$127,722 03

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois 707 Miles.	In Iowa 402 Miles.	Total. 1109 Miles.
Freight	$497,139 00	$82,420 00	$579,559 00
Passengers	124,262 38	39,112 35	163,374 73
Mails	6,375 00	3,059 33	9,434 33
Other sources	79,000 00	2 940 67	81,940 67
Tot. Aug., '71.	$796,776 38	$127,532 35	$834,308 73
Tot. act'l earn'gs, Aug., '70	$753,566 94	$145,484 54	$899,051 48

☞ A circular has been addressed to the creditors of the Connecticut Air Line Railroad, urging them to agree to a settlement of their claims for one-half second mortgage bonds guaranteed by the towns, and one-half unguaranteed; otherwise, the road will shortly pass into the hands of the first mortgage bondholders, every dollar of the unsecured claims will prove a total loss, and the completion of the road will be indefinitely postponed.

Washington and East Alexandria Railroad.

A certificate of incorporation under the act of Congress of May 5, 1870, has been filed and recorded in the office of the Recorder of Deeds for the Washington and East Alexandria Railroad Company, for the purpose of constructing a railroad between the cities of Washington, in the District of Columbia and Alexandria, in the State of Virginia. The certificate recites that $50,000 worth of stock has been subscribed for and ten per cent. paid in, and that the purpose of the Company is to locate and construct and operate a railroad for freight, passengers and the United States mails between the cities named. The capital stock is to be $100,000, in shares of $100 each, and the number of Directors is fixed at seven, as follows: Isaac Miller, Brooklyn; Gideon S. Walker, Jersey City; George S. Wilcox, Brooklyn; Henry Randall, New York city; Edwin L. Brady, Jersey City; J. W. Lamson, Brooklyn—each one hundred shares; John N. Stoddard, New York, ten shares.

Chicago, Danville and Vincennes Railroad.

The Chicago, Danville and Vincennes Railroad is complete to within eighteen miles of Danville, about ten miles south of the Vermillion county line. By the first of October it is expected to have the rails laid to Danville, where it will be met by the Evansville, Terre Haute and Chicago Road, which is now in operation from Terre Haute northward, in Indiana, to Perryville, within twelve miles of Danville. Besides this Indiana line there are two other southern connections of the Chicago, Danville and Vincennes Road in contemplation. A road is projected to run from Danville—or possibly from Rossville, about eighteen miles north of Danville—southwardly through Charleston to Flora, the intersection of the Ohio and Mississippi and the Springfield and Southeastern Roads. Here, by harmonious arrangements with the Springfield and Illinois Southeastern Company, a very direct north and south route will be formed between Chicago and Shawneetown: and it is proposed to extend the line from Shawneetown to Paducah, and thus secure more advantageous southern connections. From Charleston northward a subscription of about $5,000 a mile has already been secured.

Pittsburgh and Connellsville Railroad.

The Cumberland (Md.) *News* of 6th inst., states that on Monday trains passed safely through Brooke tunnel on the line of the Pittsburgh and Connellsville railroad. The *News* adds:

The connection is now complete, by easy grade, over the entire length of road, Brooke tunnel being the last piece of work unfinished at the time of the formal opening. This tunnel has been christened "Shoo Fly" by the hands at work there, and the passenger on a train of cars going over the summit of the hill was pretty sure to retain a vivid impression of the flight, and although the "Shoo Fly" crossing is now no more, a remembrance of its perilous looking trestlings, short curves and fearful precipices will live in the memory of every person traveling over its summit. The passage through the tunnel is but about sixteen hundred feet, and is made in about one minute. The completion of the tunnel greatly facilitates travel and trade over the road, as all the trouble and delay occasioned in crossing is at last removed.

☞ At an election of directors of the Monticello and Port Jervis Railroad company, in Port Jervis last week the Erie managers, who had purchased a controlling amount of stock, elected seven of their number to the Board of Directors, namely: James Fisk, jr., Jay Gould, Justin D. White, L. D. Rucker, Geo. S. Hall, Geo. S. Redington, H. N. Otis. The road has been run as a branch of the Erie during the past year.

Buffalo and Lake Huron Railway.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JUNE 30, 1871.

The Directors have now the pleasure to lay before the Shareholders, a statement of accounts for the half-year ending June 30. It will be seen that the revenue account shows a more favorable aspect this half year, the charges having been reduced as was anticipated. The credit balance applicable to dividend is £5,460. Out of this sum the Directors recommend a distribution of 1s. 6d. per share, free of income-tax, which will absorb £4,037, and leave £1,423 to be carried forward to the current half-year. Many of the old preference and other shares still remain unconverted, and should be sent into the Company's office forewith. The loans, which in the last report stood at £55,000, were reduced to £45,000 on June 30, and now stand at £35,000. The aggregate bonded debt of the Company remains unaltered. The last report intimated that the secretary had been under the necessity, at great personal inconvenience, of again proceeding to Canada, for the purpose of furnishing evidence in Chancery in the suit of Allchin v. the Buffalo Company. After considerable labor he succeeded in bringing matters to such a position, that a most eminent counsel advises the board no further serious difficulty need be apprehended. The long vacation intervening before he could obtain the final decree of the Vice Chancellor to the Company's appeal, it remains for our counsel in the case to procure this decision in November next. The claims in respect to right of way, and the sale of the surplus lands, were also arranged during the secretary's stay in Canada. A resolution will be submitted by the board to the meeting, recommending some substantial recognition of his laborious and successful efforts on behalf of the Company's interests. The Directors of the Company retire at this meeting, but are eligible for re-election.

The bond capital amounted to £763,558 and the share capital to £525,135, and £54,950 in the hands of the Company; total, £1,343,643. The Grand Trunk rent for the half year ending June 30 last, amounted to £25,000, from which was deducted £20,998 for interest coupons. £895 for expenses, leaving a balance of £3,107, to which was added £2,352 balances and transfer fees, making available for dividend £5,459.

Cotton Crop of the United States.

For several years past the actual yield of cotton in the United States has been larger than most of the previous estimates. In connection with the annual statement, we have published for more than a score of years our summary of the prospects, carefully compiled from our large correspondence, which extends over every portion of the cotton fields, and this has proved to be far nearer the actual total, when the crop was gathered, than the average public estimates. Last year at this date we said: "The stand is good for nearly four million bales, if it can all mature and be picked. All that the yield falls below the even millions will be due to causes still to operate upon the growing and picking of the crop." We looked for early frost and feared that this might shorten the picking season but it was evident that a very large yield would be gathered if no such interruption occurred. We received from a great variety of sources, many severe rebukes for our "extravagance" in suggesting so large a crop. We gave most of the writers due credit for their sincerity. It does not follow as a matter of course that a planter who predicts but half a crop is necessarily dishonest. His own fields have suffered, and he therefore reasons from the less to the greater, and estimates the whole area planted by that which falls under his eye. If every planter would do this, an average of the reports would present the exact truth; but we all know that only the sufferer complains, while those who have a fine prospect are apt to keep it to themselves. For this reason, unless we heard many serious complaints from different parts of the country, we should know that the growth was enormous; and after examining and crediting such as we receive, we still find a large margin for hopefulness. The crop just reported by the New York *Shipping List*, in whose hands this duty has been placed for many years, and to which we are indebted for an advance copy, is 4,347,006 bales.

Prices have fluctuated within narrower limits than during the preceding year, when from the opening at 35 cents it ran down toward the close to about half that figure. The opening in September, 1870, for low middling was 18¼; it advanced before 7th to 19¼, then by a series of declines fell to 16 on the 30th; during October the market showed a slight gain; on the 1st, 15¾ was quoted; on the 14th, 15; on the 24th, 17, and on the 31st, 16¾, during November the changes were less marked than in the previous months, opening at 16¾, touching 16¾ on the 4th, declining to 15¾ on the 10th, and closing at 15¾; December brought a weak market, starting at 15¾, the highest price, and closing at 14¼, the lowest figure being 14¾ on the 15th; the range in January was a trifle lower, running from 14¾ on the 4th to 14¾ on the 6th, 15¼ on the 26th, and closing at 15; February prices were again lower, ranging from 14¼ to 14¾. March and April exhibited no more than the variations caused by the daily increase and decrease of demand. May opened at 14, and the market steadily advanced till the close of June, at which time 19¼ was the quoted rate. July and August prices were influenced largely by the rates of contracts and the manipulations of speculators. On the 8th of July, 20¾ was reached, and on the 15th of August, 17¼, these being the extreme rates.

The following will show the yield in different sections as nearly as these can be divided:

COMPARATIVE PRODUCT OF COTTON.

	1868–9.	1869–70.	1870–1.
Louisiana	794,205	1,142,097	1,446,490
Alabama	280,826	305,956	404,673
Texas	147,817	246,284	314,484
Florida	13,392	23,194	16,688
Georgia	357,253	485,374	725,528
South Carolina	198,943	246,593	350,692
North Carolina	85,912	58,884	77,223
Virginia	160 418	203,981	339,175
Tennessee, &c	321,891	322,386	580,813
Manuf. at South	.....	79,843	91,240
Total bales	2,260,557	3,114,592	4,347,006

The exports, of course, show a large increase divided in destination as follows:

EXPORTS OF COTTON TO FOREIGN PORTS.

	1868–9.	1869–70.	1870–1.
To Gt. Britain	989,500	1,475,444	2,345,998
To France	224,527	346,706	138,869
To N. Europe	177,182	255,315	496,377
To other ports	56,434	96,094	152,928
Total bales	1,447,643	2,173,559	3,134,172

The total consumed in the United States, including all burned at the ports, can never be given with perfect accuracy, and there is much dispute on this point. The following are the figures given in our quoted authority.

HOME CONSUMPTION OF COTTON.

	North of Virginia.	Elsewhere.	Total.
1856–7, bales	665,718	154,218	819,936
1857–8, "	452,185	143,376	595,562
1858–9, "	760,218	167,433	927,651
1859–60, "	686,521	185,522	972,043
1860–1, "	650,357	193,383	843,740
1865–6, "	594,000	72,000	666,000
1866–7, "	690,000	80,000	770,000
1867–8, "	884,281	81,385	965,666
1868–9, "	846,756	79,498	926 254
1869–70, "	777,341	85,265	862,606
1870–1, "	1,072,426	94,542	1,166,968

We now present our usual comparison of the total crop of each year since 1820. The total given as the crop of 1865–6 includes a large amount grown in preceding years, but not sent forward until the ports were opened; the period of the war has been filled up with accepted estimates:

COMPARATIVE CROP STATEMENT.

	Bales.		Bales.
1820-1	430,000	1846-7	1,778,651
1821-2	455,000	1847-8	2,347,634
1822-3	490,000	1848-9	2,728,596
1823-4	509,158	1849-50	2,096,706
1824-5	569,249	1850-1	2,355,257
1825 6	720,027	1851-2	3,015,029
1826-7	957,281	1852-3	3,262,882
1827 8	727,593	1853-4	2,930,027
1828-9	870,415	1854 5	2,847,339
1829 30	976,845	1855-6	3,527,845
1830 1	1,038,848	1856 7	3,939,519
1831-2	987,477	1857 8	3,113,962
1832-3	1,070,438	1858-9	3,851,481
1833 4	1,205,324	1859 60	4,669,770
1834-5	1,254,328	1860-1	3,656,086
1835-6	1,360,725	1861-2. (est.)	4,800,000
1836-7	1,422,930	1862 3. (est.)	1,500,000
1837-8	1,801,497	1863-4. (est.)	500,000
1838-9	1,360,532	1864 5. (est.)	800,000
1839-40	2,177,835	1865 6	2,154,476
1840-1	1,634,945	1866-7	1,951,988
1841-2	1,683,574	1867-8	2,430,893
1842-3	2,378,875	1868-9	2,260,557
1843-4	2,030,409	1869-70	3,114,592
1844-5	2,394,503	1870-1	4,347,006
1845 6	2,100,537		

The Sea Island crop included in the last-mentioned total amounted to 20,818 bales. The highest heretofore given was 47,592 bales in 1858-9; the smallest was 18,054, and this was the total for the year 1868-9.

There is still much difference of opinion in regard to the growing crop. In some sections less was actually planted this year than last. In Louisiana and Mississippi the early rains were quite damaging, and the grass seemed for awhile to get the better of the plant. In Texas a great area was planted, but the heavy rains at first and subsequent drouth cut down the very large estimates for that State. On the seaboard, all these and other damaging causes have been reported in various localities. At one time, so much outcry was made that the range of estimates was mostly at or below three and a quarter million bales; this has gradually increased under more favorable indications, so that now the range is usually from three and a half to three and three quarters millions, three and a half being the fair average of reasonable expectations, although if nothing untoward occur we do not think the larger quantity a very extravagant estimate.—*Journal of Commerce.*

☞ At the annual meeting of the stockholders of the Southern Central Railroad Company at Auburn, on the 6th inst., the following gentlemen were elected directors for the ensuing year: Homer N. Lockwood, Wm. H. Seward, Jr., Adam Miller, Charles G. Briggs, A. H. Gloss, D. M. Osborne, John J. Taylor, Thomas C. Platt, C. I. Rich, J. W. Dwight, H. K. Clark, George I. Post, Charles F. Welles. John J. Taylor, was elected President; George I. Post, vice-President, Wm. H. Seward, Jr., treasurer, and Homer N. Lockwood secretary.

☞ The managers of the Waynesburg Branch Railroad from Downington to Waynesburg, (Pa.) are now surveying the route twelve miles beyond, on which, when completed, cars will be run to New Holland, and will connect with the railroad from Columbia to Reading. This will open the greatest coal route in the State.

☞ The Vineland (N. J.) Railroad is now completed to Bridgeton, and regular passenger trains are running. Passengers can now go from that city to New York direct, and connect at all points on the Camden and Atlantic Road.

☞ The La Clede and Fort Scott Railroad Company have closed a contract with John Fallon, G. S. Fitch, and Orville Grant for the construction of a railroad from Fort Scott, Kansas, to Centralia or Odin, to be completed in two years. The road will cross the Mississippi River at St. Genevieve, Mo., and traverse some of the richest mineral districts of Missouri and the extensive coal-beds of Illinois.

☞ The Bangor *Whig* says Messrs. Sawyer, Berry & Co., contractors on the Bangor and Piscataquis Railroad extension, are pushing the work vigorously, especially on the Dover end of the line. Three hundred and fifty men are employed in grading, and three miles of the road will be ready for the iron in less than two weeks.

☞ The Worcester and Somerset Railroad Company have contracted with the National Iron Company for the iron for their entire line from Newtown to its junction with the existing Peninsula railroad system in Somerset county, Md.

☞ The Portsmouth, Great Falls and Conway Company have just extended their White Mountain line as far as Ossipee, and now they are proposing to reach Wolfeborough by a branch.

Notice to Railroad Companies.

A THOROUGH PRACTICAL RAILROAD MAN, that has great experience in building Locomotive, City and Tram Railways, would like the building of Mountain or Country Tramways, or Wooden Railroads, by contract, or the superintendence of any new Railroad. The highest of references given from several of the leading engineers of the United States. Would go to the New Dominion, if wanted. Address T. O. C., American Railroad Journal, No. 9 Spruce St., N. Y.

To Contractors.

PROPOSALS WILL BE RECEIVED AT THIS Office until the 20th day of September instant, for the Grubbing, Clearing, Grading and Masonry and for furnishing Timber for trestle work and Cross Ties for the Augusta and Hartwell Railroad of Georgia. All necessary information will be furnished on application at this office.

E. HANFORD, Contractor,
20 Nassau st., New York.

Notice to Contractors.

PROPOSALS will be received by the undersigned for Grading, Bridging and Superstructure, (including rails and cross-ties,) for the Lancaster Railroad, until September 30, 1871. Profiles and specifications can be seen at the office of the Engineer, C. C. F. BENT, Lancaster, Mass.

NEW YORK State Railroad Bonds.

A First-Class Home Investment.

FIRST MORTGAGE GOLD BONDS

OF THE

RONDOUT AND OSWEGO RAILROAD.

Principal and Interest payable in Gold.

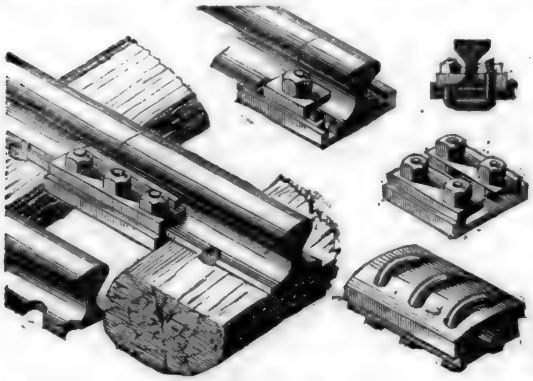
SEVEN PER CENT. SEMI-ANNUALLY.

This Road covers 100 miles of the most direct possible line between the Great Lakes and deep water navigation on the Hudson River, the whole line of which will be completed and in operation on or before October 1, 1872, and give a new line of road to Lake Ontario and the West 25 miles shorter than any line that can be found.

It passes through the Cement, Flag-Stone, and Lumber regions of Ulster County, and the rich agricultural bottoms of Delaware and Greene Counties, all of which have not heretofore been reached by railroad facilities, and from which sections the formation of the country prevents the construction of a competing line.

The 36 miles of road operated for three months is already paying net earnings equivalent to 7 per cent. gold on its cost of construction and equipments. The issue of Bonds is limited to $20,000 per mile of COMPLETED ROAD, the coupons payable in gold in this city. Price of the Bonds 90 in currency.

Full particulars of the above may be had of, and the Bonds for sale by,



EDWD. HAIGHT & CO.,

9 Wall Street, New York City,
Financial Agents of the R. & O. Company.

Contract for BUILDING and OPERATING at any point required.

MACHINERY and APPLIANCES for RIVER, HARBOR and BANK IMPROVEMENTS, constantly on hand, and furnished on short notice.

CAMP'S IMPROVED DUMPING CAR.

RIGHTS FOR SALE BY
A. W. RHOADS & CO.,
Wilkes-Barre, Pa.
A. W. RHOADS. N. H. CAMP.

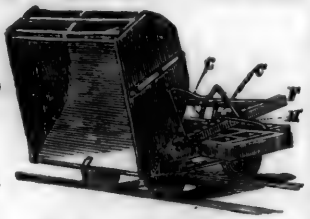

Fig. No. 1, Car Loaded & at Rest. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it about a foot, thus releasing the hopper from the catch, C, and the tilting-frame, F, from the catch, C, when the hopper, K, yields to the force of gravity and rolls over to the position shown in Fig. 2.

To Replace the Hopper in Readiness for another Load.

The brakeman bears his weight on the up-end of the tilting-frame, F, forcing it down to its place, when the hopper rolls back to *its* place, where it is held by the catches, C and C.

Address, A. W. RHOADS & CO., Wilkes-Barre, Pa. Lock Box 181.

PACIFIC MAIL
Steamship Company's
LINE TO
California, Japan and China.

VIA PANAMA,
CARRYING MAILS, PASSENGERS AND FREIGHT TO
KINGSTON, JAMAICA, AND PACIFIC COAST OF MEXICO, CENTRAL AMERICA, PERU, AND CHILI.

Steamers leave 15th and 30th each month, except when those days fall on Sunday, then the day previous.

Sept. 15, steamer RISING STAR, Capt. H. P. Connee, will leave Pier No. 42, North River, at 12 o'clock noon, for Aspinwall via Kingston, connecting at Panama with steamer COLORADO, Capt. ——, touching at Acapulco, Manzanillo and Mazatlan, and also connecting for all Central American and South Pacific ports.

Freight for last-named ports received until 4 P. M. of Sept. 13

Steamer CHINA will leave San Francisco, Sept. 30, for Japan and China.

For rates of passage, freight and all further information, apply at the Company's office on the pier, foot of Canal street.

☞ FIRST MORTGAGE SINKING FUND LAND GRANT BONDS OF THE ST. JOSEPH AND DENVER CITY RAILROAD COMPANY.

IN DENOMINATIONS OF $1,000 $500, AND $100, can now be had from the undersigned or through the principal banks and bankers of the United States. The attention of investors is invited to the merits of these bonds, secured by a first and only mortgage on the road, equipments, franchise, and property of a trunk line of railroad which will shorten the distance between New York and San Francisco some 220 miles, and in addition the mortgage to secure the bonds covers a land-grant of 1,500,000 acres of the most fertile land in the West, which is prohibited from being sold at less than four ($4) dollars per acre by the terms of the mortgage deed, and according to the present market price of the Illinois Central Company's lands is worth $18,750,000. This loan was originally for $5,500,000, but has been largely reduced by subscriptions of actual investors. The remaining balance of the loan is offered at 97½ and accrued interest, but the right is reserved to advance the price at any time, without notice.

The bonds have thirty years to run; bear 8 per cent. interest, payable in New York, London or Frankfort-on-the-Main, at the option of the holder, without notice, free of taxes. BOTH PRINCIPAL AND INTEREST ARE PAYABLE IN GOLD. They are Coupon Bonds, but can be registered with the coupons ON, or can be registered with the coupons OFF, and interest paid to registered owner. Interest payable Aug. 15 and Feb. 15. A liberal sinking fund, formed from the entire land sales, in payment for which the bonds will be received at par and accrued interest, provides for the early extinguishment of this loan.

Trustees—Farmers' Loan and Trust Company.

These bonds offer favorable inducements to parties desiring to fund their Five-Twenties, or other high-priced securities.

In converting Five-Twenties the investors realize 17 per cent. profit on the principal; 2 per cent. per annum excess of interest; and at the same time get a perfect security.

Maps, circulars, documents, and full information furnished on application.

Though acting as agents for the sale of this loan, our firm buy and sell in their regular business the bonds of the St. Joseph and Denver City Railroad Company, those of the Eastern Division being now quoted at 102 *and accrued interest. These were originally placed by us at* 97½.

TANNER & CO., Bankers,
No. 11 Wall-st.

☞ The town of Bucksport (Me.) has voted to subscribe $65,000 dollars to the stock of the Penobscot and Union River railroad. This added to private subscriptions made in that town of $83,000, makes a total of $184,000 from the town of Bucksport alone.

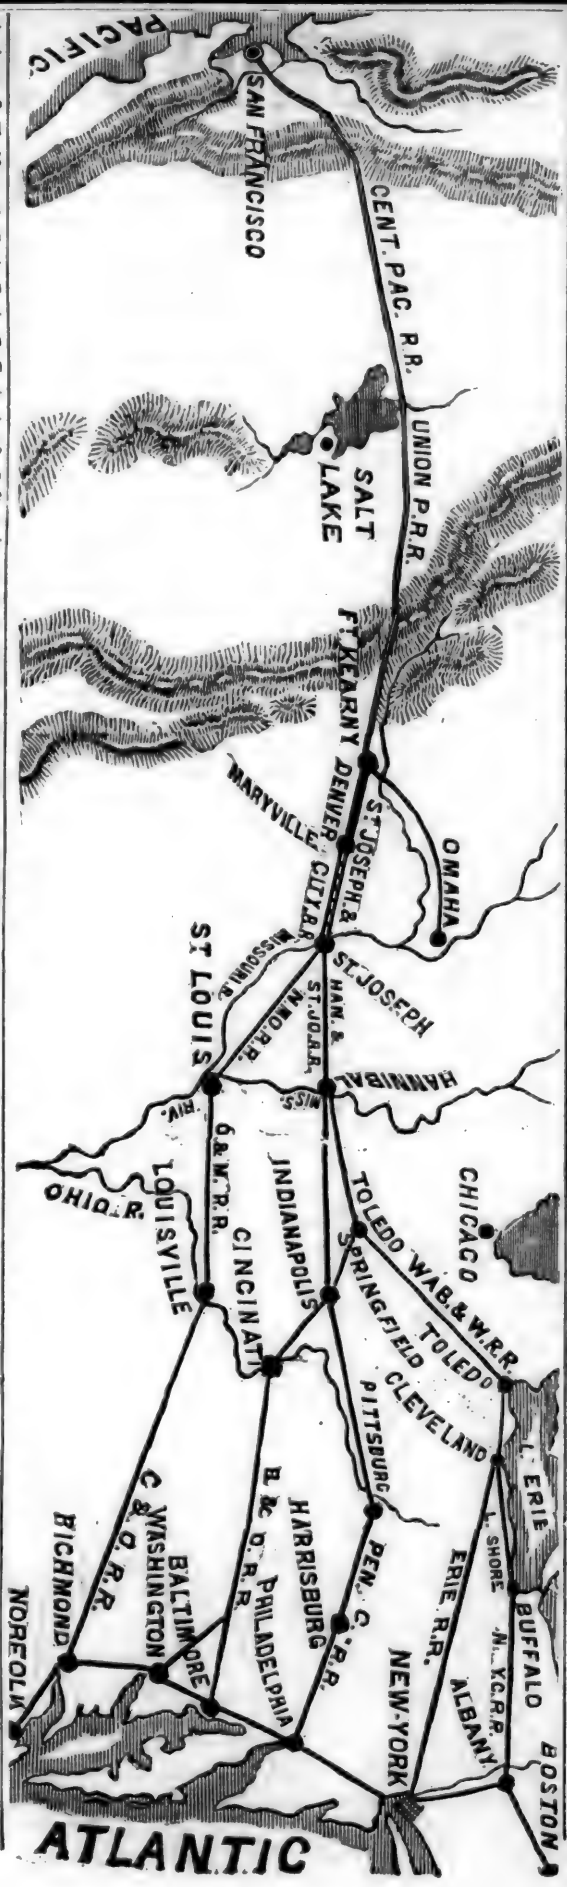
A Short Road to the Pacific.

In the middle ages of our history, that is in the fifth decade of this century, the city of St. Joe—rising town and important centre that it now is—was a very unimportant place indeed. In 1843 its houses numbered one store, its inhabitants were the storekeeper and a single red Indian. It was unimportant in everything but position. It was right on the Indian trail, the shortest route to the Pacific. When the immigrants poured across the plains they followed this track, the natural route to the West, and the City of St. Joseph rose above the fertile prairie. It rapidly grew in importance; "those things that it had done being but an earnest of what it was to do." It became the starting-point in the far West for all sorts of transport, except those propelled by steam, to the all but unknown and apparently inaccessible regions of the West and North, the Southwest and the Pacific coast. The route which the Indian had adopted by instinct and knowledge was followed approvingly by the teamster and the immigrant, who found it to be the easiest and most direct route across the Continent.

This route is to-day perhaps the shortest across the continent. Those making the journey from the West to the Eastern cities, or from this coast to the Pacific, save 200 miles by travelling over the St. Joseph and Fort Kearney road. A glance at the map will show how much shorter it is to go by this route than by Omaha. In fact it is a question of saving nearly ten hours. It is one of the shortest routes to the West, whither immigration is to-day hurrying like the waters of a rapid river. At the present moment 112 miles of this road, from St. Joseph to Fort Kearney, is in actual working condition, and 170 miles is in a state of construction rapidly approaching completion. When it is built St. Joseph will then be connected with the main line to San Francisco.

A great many people who, fortunately for themselves, never read "What I Know About Farming," have yet incontinently followed Mr. Greeley's advice to "go West," and have greatly benefited thereby. From recently published and trustworthy statistics with regard to progress and prosperity in the Middle States tier, Kansas seems, at present, to be the most promising of the Western

States. Several fortuitous circumstances have induced a large immigration in this State. Missouri is filling up; no more government land subsidies are to be had in that State; there are now no lands for preemption; and emigrants are forced to "go West" farther for farming and grazing lands.



Kansas is the nearest and best State beyond the Missouri border. The climate is mild and agreeable; the winters are short, and snow seldom falls to any considerable depth; the soil is adapted to the cereals and all the fruits and vegetables of the Eastern States; hemp and sorghum are common crops, and cotton has been raised in South Kansas. Eastern Kansas presents a succession of rich prairies, fertile valleys, grass-covered hills, with an abundance of yellow oak, black walnut, elm, hickory, sycamore, basswood, and other timber along the streams. The middle is more thinly wooded, but the west has many extensive tracts of forest and the best requisites of the finest grazing country. The more important mineral products are granite, gypsum, and coal. The entire area is 57,600,000 acres or enough to make eleven States of the size of Massachusetts.

How the advantages offered by Kansas are appreciated is exhibited in the real estate transactions in that State for a single year. At Junction City, from which place the land office was removed to Salina in April last, the real estate business in 1870 was as follows:

	Acres.
Sold for cash	186,985
Entered as homesteads	666,593
Entered with Agricultural College scrip.	35,200
Entered with land warrants	38,760
Total	927,538
At Humboldt land office:	
Sold for cash	274,931
Entered with land warrants and Agricultural College scrip	19,571
Entered as Homesteads	62,257
Final certificates to homesteads	8,753
Total	365,512

The government sales at the Topeka office in 1870 were 84,182 acres; but land firms sold in the same year 276,750 acres for the sum of $1,433,644, and this is exclusive of large sales by private parties on their own account. Thus in three towns in Kansas were sold or taken up last year a total of about two million acres, or more than two-fifths of the entire area of Massachusetts.

More rapid development will follow the completion of the railroads now constructing in the State. Of the 1,393 miles of track now laid down in the State, nearly the whole has been constructed within the past two years. These roads have been built partly by the aid of government: but it is estimated that at least three-fourths of the entire length have been called into existence by the actual demands of commerce and immigration, and have been aided only by land grants and local subsidies. Among the important railway connections in Kansas is the St. Joseph and Denver City Railroad, the eastern division of which, from St. Joseph, Mo., 112 miles to Marysville, Kan., has been built and equipped and is in successful operation; while the western division from Marysville, 170 miles to a junction with the Union Pacific Railroad at Fort Kearney station, is now

actively constructing. A nearly completed bridge is now building across the Missouri at St. Joseph, and the new road not only runs through a well-watered and rich agricultural and grazing region, but it makes the distance from the Atlantic to the Pacific shorter by 200 miles than by any other route.

Fortunately for Kansas the State lies in the direct pathway of the competing Chicago and St. Louis lines. The Chicago lines come to the State through Southern Iowa and Northern Missouri, and the St. Louis lines through Central and Southern Missouri. They do not concentrate, but cross each other, and establish points of competition in different sections of the State—some running directly West and securing the trade of Colorado beyond; others tending southwest towards New Mexico, Arizona, and Mexico, and others still pushing due south for Texas and the gulf, and opening a way for the great cattle trade of that region. The enormous flow of immigration induced the building of lines to the border; the rapid development of the State will continue the work, and railroad building has but just begun in Kansas.

Jonesboro and St. Francis River Railroad.

We are informed of the organization of a new railroad company of great importance to eastern Arkansas and southeast Missouri. This road is to connect with an important new railroad recently organized by Gen. Blair, Col. Daniel Able and other prominent citizen sof St. Louis, from Commerce, via St. Luke, through southeastern Missouri, through Dunklin county, via Kennet, to the Arkansas state line; and from thence the Arkansas Company, termed "The Jonesboro and St. Francis river railroad company," propose to connect and extend said road south through Craighead county, via "Old Town," on the St. Francis river, and from thence west to Jonesboro, to intersect with the Helena and Iron Mountain railroad; and from thence westward or southwest, to connect with the Cairo and Fulton railroad, in Jackson county—perhaps near Jacksonport.

Col. James M. Burke, of Jonesboro, is president, and Major James M. Murphy, of Little Rock, is one of the commissioners and general agent for the company.

Arrangements have been made to commence the construction of the eastern portion of this road soon, with a large force, and will be graded to the Missouri line by January, 1872. This important road passes through large bodies of first-class cotton lands, and will be the means of bringing immense wealth into eastern Arkansas and develop a portion of Arkansas heretofore almost inaccessible.—*Arkansas Gazette.*

Vera Cruz and Mexico Railway.

All interested in the welfare of this company will be gratified at hearing that the railway from the capital to Vera Cruz is progressing satisfactorily, and that the traffic upon the sections already opened continues to yield improving returns. The works now in progress are being vigorously prosecuted, while in England everything is being done that is required to facilitate the operations. Large quantities of material are constantly being sent out, and the royal mail steamer of August 2nd carried three competent assistant engineers and six experienced plate layers. The completion of the whole line, from the capital to the sea, is now assured within the stipulated time. Meanwhile 5,000 tons of rails and fastenings, contracted for in July, have been partly delivered, and the delivery of the whole will have been made in October. One engine, upon the Fairlie system, built at the Avonside works at Bristol, was shipped by steamer in August, along with rails and

wagons; and the Yorkshire Engine Company has contracted to deliver five more locomotives, also upon the Fairlie principle, in the present year. In addition, contracts have been made for the supply of 100 more wagons, the delivery of which will be completed in the course of the current month of September, while Messrs. Henley, of North Woolwich, have engaged to supply 30 miles of double telegraph wire for the use of the line. It may be added that, according to the last advices, all classes were using the parts of the line already opened, and that the advantages of rapid communication were being widely appreciated by the people.

Detroit and Milwaukee Railroad.

The D. and M. Railroad extends from Detroit to Grand Haven, 189 miles, and is operated under perpetual lease by the Great Western Railway Company of Canada. Including sidings, turnouts, &c, it has an equivalent single track of 209.7 miles.

The locomotive engines in use on the road at the close of 1870 numbered 34, of which 14 were passenger, 16 freight and 4 shunting engines.

The car equipment consisted of 30 passenger, 21 post-office and baggage, 9 emigrant, 330 box freight and cattle, 187 flats and 1 auxiliary—or a total of 578 revenue cars. Also 3 service or road cars.

The trains run in 1870 690,924 miles, viz: passenger 282,274, freight 286,537, and other 122,113 miles. Cars run 6,227,621 miles, viz: passenger 1,071,538, freight 4,584,214 and mail, baggage and way 671,869 miles.

The number of passengers carried in same year was 459,808, and the number of tons of freight moved was 315,994. The reports do not give the mileage of either passengers or tonnage, which fact renders the other statements contained in the company's statistical returns of much inferior value.

The gross earnings for 1869 and 1870 compare as follows:

	1869.	1870.
Passengers	$694,251 49	$638,905 71
Freight and live-stock	871,281 80	734,874 27
Mails and sundries	46,934 89	41,962 18
Rents	3,150 09	5,380 47
Total	$1,615,618 27	$1,421,122 63
The working expenses were:		
Way	$325,684 67	$320,841 89
Locomotive power	193,041 81	194,473 31
Cars	89,104 73	84,159 55
Traffic—passenger	84,522 96	85,022 44
Traffic—freight	155 075 65	141,949 32
General charges	44,538 46	39,130 63
Taxes and insurance	57,382 98	52,322 33
Total	$946,351 26	$917,899 47
Earnings less exp	$666,267 01	$503,223 16
From which were paid—		
Int. on funded debt	$383,632 57	$398,128 24
Sundry interests & discounts	490 20	5,234 80
Bonds retired	20,000 00	
Dividends on preferred stock	146,650 00	
Interest (3 half-years to Jan. 1, 1870, on bonds of June 30, 1866, issued in 1870)	115,840 84	14,421 98
	$666,613 61	$417,785 02
Deficit	$346 60	
Excess		$85,438 14

The following tabulation shows the operations, gross and net earnings on the road for the last passed ten years:

	Train miles.	Pass. carried.	Tons moved.	Earnings—Gross.	Earnings—Net.
				$	$
1861.		161,189	135,787	738,863	318,924
1862.		187,727	167,454	866,726	385,547
1863.		296,868	167,878	1,026,059	405 025
1864.		403,901	165,361	1,323,403	438,644
1865.	515,420	439,961	189,427	1,691,735	690,985
1866.	514 737	439,453	218 819	1,659 218	635,062
1867.	588,382	468,004	258,409	1,761,308	768,789
1868.	600 913	438,394	278,729	1,718,094	704,458
1869.	614,243	447 041	283 580	1,615,618	666,267
1870.	690,924	459,808	315,994	1,421,123	503,223

The company was reorganized Oct. 24, 1860, and from that date to Dec. 31, 1860, the gross earnings were $218,558 53, and the net earnings $109,666 30, or 50.18 per cent. In the ten succeeding full years the net earnings were 43.07 44.52, 39.48, 33.16, 40.85, 38.28, 43.65, 41.01, 41.24, and 35.42 per cent.

It will be seen that the traffic of the road, both passenger and freight, has been constantly on the increase; and in the meanwhile earnings have been decreased on account of reductions in rates; and yet the ratio of expenditures show that an increasing economy has been the rule.

In the years prior to 1868 the earnings included the Lake Michigan Steam Ferry proportion of business. The establishment alluded to has been purchased and is now operated by a distinct company, in connection with the railroad.

In the years since the re-organization no dividends have been paid on the common stock. The preference shares received 3½ per cent. in 1868 and 7 per cent. in 1869. Nothing was paid on the latter in 1870. There is, however, reason to believe that with an increasing traffic, improved economy and excellent business management, under present auspices that the time is not far distant when both classes of stock will receive a proper distribution of net earnings.

The following statement shows the financial condition of the company as of January 1, 1871:

Capital stock	$452,350 00
Pref. stock, secured by mortgage	2,095,000 00
Bonded debt	7,530,047 75
Total	$10,077,397 75
Cost of road and equipment	$10,043,212 47
Balance carried to general account	34,185 28
Total	$10,077,397 75

The actual cost of the road and rolling stock was on June 1, 1871, $11,648,094 45, the difference between the capital and actual cost having been taken from revenue used in construction since the re-organization of October 24, 1860.

The following shows the elements of the capital account at the close of the years indicated:

Dec. 31,	Stock.	Bonds.	Debt.	Road, &c.
1861.	$1,952,350	$4,942.046	$357,917	$7,102,514
1862.	1,952,350	4,942,046	293,407	6 948 898
1863.	1,952,350	5,333,768	188,710	7,286,118
1864.	1,952,350	5 333,768	335,686	7 286,118
1865.	1,952 350	5,313,408	225,455	2,265,752
1866.	1,952,350	5,313,408	3 2,614	7,265 658
1867.	2.547,350	7,151.198	251,150	9,698,548
1868.	2.547,350	6,925,048	177,315	9,472,298
1869.	2,547,350	6 825,048	387.041	11,467,220
1870.	2,547,350	7,530,048	236,813	11,648,094

The increase in stock and bonds in 1867 was the result of the adjustment of old debts of the late D. and M. Railway Company. The funded debt of the company was reduced in 1868-'69 and '70 by the operation of an annual sinking fund. The actual cost of road and equipment was increased in 1869 and 1870 by adding amounts spent out of revenue since 1860 on capital account.

The outstanding funded debt is described as follows:

Oakland and Ottawa sterling 6s, 1873	$150,866 75
Oakland and Ottawa dollar 7s, 1873	51,000 00
Detroit and Pontiac 7s, 1878	250,000 00
Detroit and Pontiac 8s, 1886	250,000 00
Detroit and Milwaukee 1st mortgage 7s, 1875	2,500,000 00
Detroit and Milwaukee 2d mortgage 8s, 1875	1,000,000 00
Detroit and Milwaukee 1st coupon 7s, 1875	628,525 00
Detroit and Milwaukee 2d coupon 7s, 1875	377,115 00
Detroit River Front mortgage 10s	55,901 67
Mechanical shops 10s, 1871	50,000 00
Detroit and Milwaukee Railroad 6s, of June 30, 1866, due 1886	1,916,639 33
Detroit and Milwaukee Railroad 6s, of Sept. 1, 1866, due 1886	300 000 00

The majority of the bonds of June 30, 1866 ($1 238,000), are in the hands of the Merchant's Bank of Canada, and are redeemable at the rate of $100,000 per annum. To date $350,000 have been thus redeemed and are held by the company, although still retained in full on the balance sheet. The company also hold of this series $36,349; of the bonds of Sept. 1, 1866, $190,000, and of funded coupons $3,983, the said bonds not having been used. Deducting these redeemed and non-issued securities the net debt of the company amounts only to $6,986,065.

Directors.—Charles C. Trowbridge, Detroit, Mich.; Joseph Price, Hamilton, Can.; Henry N. Walker, Edmund A. Brush and Christian A. Buhl, Detroit, Mich.; Donald McInnes and Æmilius Irving, Hamilton, Can.; Hugh Allan, Montreal, Can.; William K. Muir, Hamilton, Can.

General Superintendent.—Thomas Bell, Detroit, Mich.

Secretary.—James H. Muir, Detroit, Mich.

Agents.—M. K. Jesup, 12 Pine St., New York. Brackstone Baker, 126 Gresham House, Old Broad St., London, E. C.

Bankers.—Second National Bank of Detroit, Mich.

☞ The Directors of the Air Line Railway Company held a meeting at Hartford, Ct., last Saturday, and voted to accept the resignation of Gen. Serrell as engineer-in-chief, and appointed a Mr. Bottsford in his place.

☞ The Mont Cenis Tunnel was formally inaugurated on the 17th inst., by the French and Italian Ministers and the local authorities of both countries.

☞ The traffic receipts of the European and North American railway for the month of August, 1871, were $30,627 19, against $21,060 45 in August, 1870, and $16,872 59 in August, 1869.

☞ A line of street railroad has just been opened to public use in the City of Batavia, on the Island of Java.

☞ The surveyors of the Southern Pacific Railroad have reached Petropolis, a point distant thirty miles from Los Angelos.

☞ The rails on the Portsmouth, Great Falls and Conway railroad have been laid to within 13 miles of Conway.

RAILROAD AND CANAL DIVIDEND STATEMENT.

Showing the amount of Stock Outstanding, the Dividend Periods and the date of last Dividend.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, September 23, 1871.

Stock Exchange and Money Market.

Money has been in more active request, with more firmness noted as to rates. The speculative call has been on an enlarged scale, with a good demand from mercantile borrowers. The current rates have been from 3@6 generally 4@6 per cent. in a temporary form, and at 6@9 per cent. per annum on choice to fair business credits. The city banks, in their latest return, made an exhibit unfavorable to an easy movement, the legal tender and specie averages, as well as the deposits, having been reduced materially, while a further addition of nearly a million and a half was made to the item of loans and discounts. The Sub-Treasury, by its receipt for the extra two millions of Gold, sold on Government account, last week, was the gainer to a considerable extent, of the legal tender and currency, which the banks lost. The city banks, in their last weekly exhibit, show a loss of $3,124,000 of legal tender notes, $534,400 of specie, and $2,181,900 of deposits; also an increase of $1,461,700 in their loan and discount averages, and a reduction of $14,500 in their item of circulation. The city bank exchanges, last week, averaged $104,161,000; and thus far, this week, 121 millions daily. The banks now hold only $5,003,500 of specie and legal tender notes, in excess of the 25 per cent. of their liabilities required by the national banking Act.

The specie reserve of the city banks according to the latest return is $10,228,400, against $16,517,151 same time last year. The city bank deposits are now $246,896,700 against $193,479,916 week ending Sept. 17, 1870. The legal tender reserve amounts to $63,821,700 against $49,062,532 same time last year. The circulation now stands at $30,129,700, against $32,750 726 same time last year. The loans are now $312,668,000, against $268,408,700 at this date last year.

Government revenues have been yielding quite satisfactorily, particularly in the customs form during the week. The excises yielded last week about 2¼ millions, and thus far since July 1, about $31,640,736. The customs at the port of New York, last week were $3,998,203; and at the outports, equal to about 1⅓ millions more, all in coin, or coin certificates.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $365,067,450; and as security for deposits of public money, United States bonds for $15,401,500.

Under the September programme of the Treasury Department, Government will buy in U. S. Five-Twenties as follows: Wednesday, September 27—One Million. And will sell Gold as follows: Thursday, September 28—Two Millions.

The Gold speculation, under clique manipulations, has been decidedly buoyant, and the price has been advanced sharply, on an enlarged volume of dealings. The supply of "cash gold" has been moderate, and comparatively well under control. The customs call has been active, though the export drain has been light. Last week, Government accepted bids for four millions of Gold, instead of the two millions advertised for. On Wednesday, the dealings indicated a less confident and quite feverish movement, under various reports relative to the probable action of the Secretary of the Treasury. The rate on Gold loans was up on Wednesday to ⅝ths of one per cent. per day. The range of the price during the week, has been from 113⅝@115, and the closing quotation on Wednesday was 114 against 113⅞ the preceding Wednesday. The specie outflow, last week, was $521,701; on Tuesday of this week, $33,478; and on Wednesday, $92,000. The Gold Exchange Bank clearances have been as follows: September 14, $87,994,000; September 15, $50,937,000; September 16, $45,853,000; September 18, $45,186,000; September 19, $76,727,000; September 20, $86,755,000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Sept. 16, 1871, $64,844,648, against $66,183,427 same time in 1870.

The export drain was $521,701 last week, against $810,465, same week preceding year The shipments since January 1, 1871, have been $56,643,508, against $47,192 231 same time in 1870.

The customs demand for Gold last week, averaged $664 700 a day; thus far, this week, it has averaged $700,000 a day, or equal to a weekly aggregate of $4,200,000. The arrivals of specie from Europe, Havana and other foreign ports last week, were $125,693, and since Jan. 1,

1871, $7,682,509 against $7,900,432 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $115,912,500 against $101,643,588 same time in 1870.

Foreign exchange which opened stronger, on an improved inquiry, closed dull and weak. Bankers' sixty day bills on London closed on Wednesday at 108⅛@108⅜; sight bills on London, 108⅝@108⅞.

The produce exports from this port, week ending with Sept. 19, were to the currency value of $4,228,364.

Government securities have held their own well as to price, though the dealings have been comparatively moderate, as have likewise been the offerings of most issues.

On Wednesday, Government bought in three millions of Five-Twenties at equal to full market rates, the range having been from 112 40@112 69. The amount of bonds offered was $6,904,550.

U. S. sixes of 1881 closed here on Wednesday of the current week at 118¼@118½; U. S. Five-Twenties of 1862, 115¼@115½; U.S. Five-Twenties of 1864 at 114⅞@115; U. S. Five-Twenties of 1865, 115¼@115½; U. S. Five-Twenties of 1865 consolidated, 113¾@114; U. S. Five-Twenties of 1867, 113⅞@114; U. S. Five-Twenties of 1868, 114¼@114⅜; U. S. Ten-forties at 111⅜@111⅝; U. S. Six per cent. currency bonds, 115¼@115½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 6.	Sept. 13.	Sept. 20.
Consols	93⅜	93⅛	93 3/16
U.S. 5-20's of 1862	93⅝	93 5/16	93⅜
U. S. 5-20s, 1865	93½	93¾	——
" 1867	92¾	92¾	92½
" 10-40s	90⅞	90 11/16	90⅜
Erie	27½	26½	25½

State bonds have been in moderate request at less buoyant prices.

Railway bonds have been moderately sought after, as a rule, chiefly for investment purposes at fairly supported prices. Central Pacific Sixes have been in demand at 102@102¼. Chesapeake and Ohio Sixes have been taken to a fair extent, for home investment on the basis of 93 per cent. and accrued interest.

The new Hall of the Stock Exchange was formally opened on Monday. The desk and tables at the head of the room were filled with flowers and trailing vines, presenting a very handsome appearance. Appropriate speeches were made and resolutions adopted.

The St. Joseph and Denver City eight per cent. gold bonds continue to meet with a fair sale at the established price of 97½ and accrued interest. The loan (the aggregate of which was $5,500,000) was opened on August 1, and more than 50 per cent. of it has been already disposed of.

Railway and miscellaneous share property has been less active, and quite depressed in value, though the later dealings showed a steadier movement.

General business has been moderately active. Domestic produce has been less firm in price, as a rule. Middling upland cotton closed on Wednesday at 20½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 21,860 bales, against 33,882 bales same time in the preceding year; exports 30,430 bales, against 10,903 bales in the previous year; stock at the ports at latest dates 85,228 bales, against 55,253 bales same date 1870.

At the Live Stock Markets, Beeves have been in active request at from 7@13 cts.; Veals quiet at 4@10½ cts.; Sheep at 4@6½ cts.; Lambs at 6@8½ cts.; Swine, 4¾@5⅛ cts per lb., all live weight. The week's receipts were 9,690 Beeves, 1,351 Veal Calves, 36,153 Sheep and Lambs; and 25,496 Swine.

Foreign merchandise has been in fair demand, without material alteration in values. The week's imports of foreign goods reached $7,566,089, including $3,467,827 of dry goods.

Ocean freights have been less active, at easier rates.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Georgia 7s, gold, 98⅝; North Carolina 6s, special tax, 17¾; South Carolina 6s, new, Jan. and July, 56; do. Apl. and Oct., 59; Louisiana 8s, 1910, 92¼; Arkansas 7s, (M. O. and R. R. ☞ CHESAPEAKE AND OHIO RAILROAD SIX PER CENT. BONDS.

HARVEY FISK. A. S. HATCH.

OFFICE OF FISK & HATCH, BANKERS AND DEALERS IN GOVERNMENT SECURITIES, No. 5 NASSAU-ST., NEW YORK, Sept. 15, 1871.

The amount of these bonds remaining unsold is now so small, and the demand continues so great, that we expect soon to close out the remainder of the loan. They are issued in sums of $1,000, $500 and $100 each, either coupon or registered; interest payable May and November, interest and principal payable in coin in New York City.

Holders of United States Sixes of 1881, Ten-Forties, and especially of Five-Twenties, can largely increase their capital (17 to 25 per cent.) and income by exchanging for these bonds. Price to-day, 93 and accrued interest. We recommend them with the same entire confidence that we did the Central Pacific Railroad Bonds, now selling at a premium, and we believe they will, in time, command the same favorable estimation and price. FISK & HATCH.

North Carolina Railroad.

The Richmond (Va.) *State Journal* of the 12th inst., says;

The lease for thirty years of the entire road of the North Carolina Company, 223 miles from Charlotte, North Carolina to Goldsboro, North Carolina, by the Richmond and Danville Railroad Company, was consummated yesterday. The Richmond and Danville Railroad Company is to pay $260,000 per annum for the use of the North Carolina Company's road. Possession was fully delivered this morning, and it is now operated under the control of Col. A. S. Buford, president of the Richmond and Danville railroad, thus completing his plan of continuous line from Richmond and Chesapeake to Atlanta, Ga., and the central South.

☞ The certificate of incorporation of the Columbus, Ferrara, and Mineral Railway Company has been filed in the office of Secretary of State of Ohio. The terminal points of the road are the city of Columbus and the village of Ferrara, Perry county. Capital, $500,000. The intention is to build a railroad from Columbus to Millersport or Pleasantville in Fairfield county, and thence to follow the Atlantic and Lake Erie to Ferrara.

☞ The completion of the Connecticut Western railroad from Winsted to its connection with the Dutchess and Columbia railroad was celebrated in Norfolk, Ct., on the 12th inst.

Steel Rails and Block Signals.

The half-yearly meetings of the several railway Companies, which may be said to have concluded with the present week, have disclosed two most interesting features in which railway economy and expenditure are concerned on the one hand, and the public safety on the other. The special features referred to are the gradual substitution of steel for iron rails, and the adoption of the block system of signals. From the proceedings of the London and North Western Company at their recent half-yearly meeting we are informed that they have already 150 miles of their railway worked by the block system of signals, and 400 miles on their own warning system, but that in deference to public feeling 500 miles more are about to be worked on the block system. The Brighton Company report that a considerable expenditure has been incurred at the expense of revenue by the further extension of the block system, and by the introduction of steel rails instead of iron. The Great Western Company show an increase of expenditure of £37,365 as compared with the corresponding half-year of 1870, but they state that they have received the full value of the increase in the form of new steel rails, which have been laid down to the amount of £12,000. The Great Northern Company report that during the half-year £8,000 has been spent in replacing iron with steel rails, and that the block system of signals, so far as it as been carried out upon this line, has been a great success, and that owing to it the Company have enjoyed a perfect immunity from accidents during the half-year. The Midland Company state that £89,561 more than the corresponding period of last year has been spent on revenue account, which was attributed to the substitution of heavy steel rails for iron, and by the expense of introducing the block system of signals. The Lancashire and Yorkshire Company report an increase of expenditure for the half-year, as compared with last year, of £5,147, caused by the introducing of steel rails instead of iron; whilst the South Eastern Company, after stating that the block system of signals has been to a great extent adopted up on their line during the half-year, make the satisfactory announcement that they have carried 8,100,000 passengers on their line during the half-year without a single accident or injury to any one. The above are only the results so far as most of the leading great Companies are concerned, but it may fairly be assumed that they apply in a great measure to the several other Companies in different parts of the country.—*Herapath, Sept.* 9.

☞ The route of about thirty miles of the Danville, Paris and Vincennes Road, from Danville south to Paris has been located, and a contract for its construction by the 1st of January, 1872, has been made with Mr. Thomas King, who was formerly chief engineer of the Indianapolis, Bloomington and Western Railway. South of Paris the location is not definitely fixed. There is talk of continuing to a connection, somewhere near Vincennes, with the projected road of the Cairo and Vincennes Company.

☞ The Dillsburg and Mechanicsburg Railroad company (a branch road connecting with the Cumberland Valley railroad at Mechanicsburg) was organized on the 2d inst. by the election of a board of directors with Hon. Frederick Watts as President, and Gen'l E. M. Biddle as Secretary and Treasurer. The capital stock of the new company is $350,000, in shares of $50 each. The contracts for grading were to have been given out on the 16th inst.

☞ Two surveys for the Catskill and Schoharie Valley railroad are being made, one by way of Rensselaerville, and the other by way of Livingstonville.

Vera Cruz and Mexico Railway.

A further portion of the line of the Mexican, between Apixaco and Vera Cruz, has been opened for traffic; and Mr. Mills, the general manager, has just reported to the London directors that the company is now carrying all the goods forwarded from Vera Cruz in the direction of the capital, Mexico. Between Vera Cruz and Paso del Macho, the distance is 47 miles; the carters, who formerly carried by the ordinary route, now use the line exclusively, and it is found that the same is the case with every additional mile that is opened. The line is gradually obtaining the entire traffic, both goods and passengers, of the country. It will shortly be opened to Cordova, and then the receipts from the passenger traffic will considerably increase, as the merchants and principal inhabitants of Vera Cruz will remove their families up the country in that direction during the hot season. Meanwhile, the receipts of the Vera Cruz section, during the first four months of the year, amounted to $98,723, against $67,687 in the corresponding period of 1870.

☞ The report of the Pittsburg, Cincinnati and St. Louis Railway Company (Pan-Handle) shows: Miles of road operated 978½; amount of stock $5,424,350; funded debt $10,017,440 24; floating debt $2 560,633 09; total cost of road $17,665,162 93; earnings from all sources $8,944,907 01; total operating expenses $6,328,274 11; net earnings $2,616,632 90. In addition to operating exponses there has been paid out for leases and additional equipment $3,860,799 40.

☞ The gross earnings of the Wicomico and Pocomoke railroad for the fiscal year ending April 30, 1871, were $28,059 61; expenses of operating the road, $14,203 92; net earnings, $8,847 77. There was shipped during that time 40,326 bushels of grain, 5,213,435 feet of lumber, 854,000 lbs. of live stock, 50,658 lbs. of poultry, 121,629 lbs. of berries, 79,475 dozen eggs, 2,000,757 lbs. miscellaneous, 1,000,100 shingles, 40,000 bushels oysters.

☞ The Lewisburg Centre and Tyrone Narrow Gauge road, which is extended from Lewisburg, on the Susquehanna, west by south, nearly parallel with the Middle Creek Railroad, is to be completed from Lewisburg to Mifflinsburg, nine miles, in all the present month of September.

☞ The Eastern (Mass.) Railroad Company are surveying north and south of Smith's Pond, in Wolfborough, N. H., with a view to the building of a branch connecting that place with their road at Sanborn's Mills in Wakefield.

☞ The Connecticut Western railroad is so nearly completed that the managers expect to be able to run through trains the entire length of the road, to and from Hartford, by the end of November.

☞ The last rail on the European and North American Railway between Bangor and St. John, uniting by rail the United States and the maritime provinces of Canada, was laid on the 20th inst.

☞ The Worcester (Md.) railroad is nearly completed to Newark, half way to Berlin from Snow Hill.

☞ The Toronto and Nipissing railway was formally opened to Uxbridge on the 14th Sept.

Statistics of Commerce and Navigation.

The monthly report from the Bureau of Statistics at Washington for the month ended June 30, 1871, and for the fiscal year ended the same, compared with the corresponding periods of 1870, has appeared. From the official synopsis we learn that the imports of the twelve months ended June 30, 1871, amounted to $541,493,774; domestic exports (specie values) for the same period, $513,044,273; foreign exports, $28,459,897. For the twelve months ended June 30, 1870, the imports amounted to $462,377,587; domestic exports, $420,535,258; foreign exports, $30,427,159. In 1871 the imports consisted of $519,593,750 worth of merchandise and $21,900,024 in specie and bullion; the domestic exports for the same period were, merchandise, $428,539,017; specie, $84,505,256; foreign exports—merchandise, $14,401,270; specie, $14,038,629. In 1870, the imports were: Merchandise, $435,977,501; specie, $26,400,086; domestic exports—merchandise, $376,651,156; specie, $43,884,102; foreign exports—merchandise, $16,155,295; specie, $14,271,764.

Of the total trade for the fiscal year ended June 30, 1871, it will be seen that the exports exceeded the imports by $10,398, while for the fiscal year ended June 30, 1870, the imports exceeded the exports to the amount of $11,415,170.

The comparative amounts of the total trade for the fiscal year ended June 30, 1871, carried in American and foreign vessels, respectively, were as follows:

Vessels.	Imports.	Domestic exports (mixed values).	Foreign exports.
American.	$163,285,710	$180,624 658	$9,753.804
Foreign ..	363,020,710	376,476,609	16,325,826
Land vehicles	15,187,354	5,417,384	2,380,772

Fiscal year ended June 30, 1870:

Vessels.	Imports.	Domestic exports (mixed values).	Foreign exports.
American.	$153,237.077	$186,240 048	$13,492,276
Foreign ..	309,140,510	312,852,095	16,934,883

The value of foreign commodities remaining in the warehouses of the United States June 30, 1871, was $68,324,855, against $56,930,841 June 30, 1870.

The following are the values of the principal commodities imported during the fiscal year ended June 30, 1871:

Free of Duty—Chemicals, drugs, dyes and medicines, $1,201,071; cochineal, $1,184,255; fur skins, undressed, $1,024,826; gold and silver coin, $19,986,801; gold and silver bullion, $1,283,223; guano, $3,322,328; India rubber and gutta percha, $2,307,238; indigo, $2,052,222; rags, $8,748,984; raw silk, $5,739,592.

Dutiable—Animals, living, $5,845,926; breadstuffs, $7,786,211; coffee, $30,992,869; cotton, manufacturers of, $29,876,640; chemicals, drugs, medicines and dyes $6,479,414; earthen, stone and chinaware, $4,681,376; flax, raw, $694,832; manufactures of flax, $18,051,095; fruits, $9,602,630; hides and skins, $14,892,987; railroad bars or rails, $17,560,297; India rubber and gutta percha, $3,004,617; manufactures of silk, $82,341,001; sugar, brown, $61,249,621; molasses, $10,192,384; tea, $17,254,617; tin, and manufactures of, $12,757,215; wool, raw and fleece, $9,780,443; wool, manufactures of, $43,839,839.

The principal domestic articles exported during the year were:

Breadstuffs, $79,379,187; cotton, raw, $218,327,109; cotton, manufactures of, $2,501,535; furs and fur skins, $1,590,193; gold and silver coin, $58,027,484; gold and silver bullion, $26,375,875; muskets, pistols, &c., $18,463,916; naval stores, $1,694,435; oil cake, $4,160,021; refined petroleum, $34,188,736; crude petroleum, $1,820,803; bacon and hams, $8,126,683; cheese, $8,752,990; lard, $10,563,020; pork, $4.302,320; beef, $3,825,666; leaf tobacco, $19,908,797; wood, and manufactures of, $12,916,542.

The principal foreign commodities exported were:

Gold coin, $2,104,530; silver coin, $11,934,099; fixed oils, $843,196; opium, $709,825; provisions, $571,470; tea, $1,929,830.

Journal of Railroad Law.

RAILROAD COMPANIES MUST "USE THEIR OWN SO AS NOT TO INJURE ANOTHER"—CATTLE PENS ON SIDE OF ROAD TO BE KEPT CLEANLY AND FREE OF NOXIOUS GASES—MEASURE OF DAMAGES.

The facts in the recent case of The Illinois Central Railroad Company *vs.* Grabill, (50 Ill., 241,) are fully and clearly stated in the following opinion by

BREESE, CH. J.—This was an action on the case, brought to the Champaign Circuit Court, by Cathrine Grabill, against the Illinois Central Railroad Company, to recover damages for the disturbance of her enjoyment of certain premises owned and occupied by her in the City of Urbana, caused by the negligent, careless and improper manner in which the defendants kept and maintained a certain cattle pen, which they had erected near his premises—they permitting dead carcasses of cattle and hogs to remain in it until they had become rotten and putrid, and suffering filth to accumulate in it and remain an unnecessary length of time, by which noxious and poisonous smells and stenches were generated, to her discomfort, and inconvenience, and rendering her premises unwholesome and uninhabitable; and further by suffering pools of foul and stinking water to stand in and about the pen, producing noxious vapors, spreading to her premises, and greatly injuring her in the enjoyment of them.

The venue in the case was changed to the County of Ford, where a trial was had by jury, resulting in a verdict for plaintiff of $650 in damages. A motion for a new trial was made by defendants and overruled, and judgment rendered on the verdict.

To reverse this judgment, the defendants appeal to this Court.

Appellants make two principal points, the first being, that the judgment cannot stand upon any evidence contained in the record, for the reason that appellants, in the use of this cattle pen, were following their legitimate and lawful business, and that the annoyances and injuries of which complaint is made, are only such as individuals are frequently obliged to suffer, without redress, being as they are, of minor importance compared to the general good which springs from the cause of which the plaintiff complains.

There is no complaint in the declaration, of annoyance by the running of engines, the escape of steam, or otherwise near her premises. Such consequences of the construction and use of railroads must be borne by all living near them, without complaint and without hope of redress, for they are inseparable from the purposes and objects of such structures. But that a recovery can and should be had for such damages as arise out of the careless or negligent acts of a railroad company in regard to any usual and necessary appurtenance to their road, cannot be denied. Like an individual, such companies are responsible in damages for specific acts of wrong. The maxim, "use your own property so as not to injure another," is quite as applicable to corporations of this character as to individuals, except so far as the law creating them may have granted to them immunity.

Appellants, it must be conceded, had no immunity by their charter, or any particular privilege to do and permit the acts complained of in the declaration. In regard to them, they being acts of carelessness and negligence, in a matter respecting which the law would bind individuals to great care and prudence a railroad corporation would be equally bound. We take no note of the charge in the declaration of annoyances caused by the shouting and noises made by those having charge of the stock as were placed in the pen, for they were not in a position to be controlled by the company or their agents. Should they as they doubtless did, by their vociferous and rough conduct, outrage the decencies and proprieties of life, the company could not be held responsible, not having this control. It is the misfortune of the plaintiff's particular locality, that she is exposed to such annoyances, but they must be borne, the company by its agents, not being supposed to encourage them.

On the point of negligence in conducting this pen, the testimony is quite conflicting. There is evidence to show it was cleaned out from three to five times a week, and no dead and decaying animals were permitted to remain in and about it unburied, exposed to the action of the atmosphere, and by decomposition, producing noxious effluvia. Several witnesses testify there were such instances of neglect; and that bad smells were produced, greatly to the annoyance of the plaintiff, the testimony tends strongly to establish. The plaintiff's dwelling house was erected three years prior to the erection of the cattle pen, and it would appear, in a somewhat populous portion of the city.

The maxim before quoted, ought to have admonished appellants, knowing, as they must be presumed to have known, it might become a nuisance to the immediate neighborhood, that should such be the result, they would be liable to repeated actions by parties injured, so long as it continued, and as the pen would, perhaps, be in the care of incompetent or negligent agents, such result was to be anticipated. The right of appellants to erect this pen in the very heart of the city, may, perhaps, not be denied, but it is equally undeniable, they would be responsible for all results occasioned by the negligent management of it, and by its becoming a nuisance. To avoid harrassing litigation, growing out of this condition of things, prudence would seem to point to the erection of such indispensable structures, so far removed from populous neighborhoods, as to free them from the hazard of results, and if erected there or elsewhere, they should exercise such a supervision over them, as would insure there clean-

liness, so that they would not become generators of noxious and unwholesome gases, depriving residents in their vicinity of the comfortable use and enjoyment of their property. Use your own property and privileges so that you injure no one else, is a maxim sanctioned by time, and by the acquiescence of the civilized world, since, without its reasonably strict observance, there could be no peace in communities.

The next point made by appellants is, as to the measure of damages.

On this point it is very difficult, if not impossible, to lay down any definite rule. That the jury have no right to give vindictive damages, under the evidence in this case, cannot be denied, for the evidence of care in the management of the pen was quite strong, and we do not understand appellee as claiming such damages.

In the case cited by appellee, from which she informs us the instructions in her behalf was drawn (Ottawa Gas light Co. *vs.* Graham, 28 Ill., 73), which was an action for injury to the well and premises, occasioned by the flowage of noxious matter therein, from the works of the defendant, and rendering the air insalubrious and injurious by their works, the Court said after stating one means of arriving at the damages: "Another means would be to ascertain the depreciation of the value of the property by reason of the erection of the gas works; to ascertain for how much less the property would sell in consequence of the erection; and in ascertaining that fact, all the circumstances which might show a depreciation in value, should be considered. If the property would sell for the same amount as before the erection of the gas works, independent of a rise in similar property, there would be no loss, but if it would not, then the difference would be the damages sustained."

But beyond the injury to the pecuniary value of the premises, are the injury and annoyance to the plaintiff while occupying them, and which cannot be gauged by any definite rule.

As to the value of the premises, there is no evidence in the record. For aught we can know, it may not exceed the amount of the verdict. The attention of the Court and jury does not appear to have been called, by the defendants, to any rule by which the damages should be estimated. The only instruction asked by the defendants, was one as to what would be a reasonable time in which to remove dead carcasses from the pen. Not a particle of testimony was offered, going to show to what extent the property had been depreciated by the erection and management of the pen, or what was the value of the property. We, therefore, cannot say, there was any error in finding the verdict, nor can we say the damages are excessive, for they may have been the result of the best judgment of the jury on the facts of annoyance by noxious smells and rendering the atmosphere surrounding the premises filthy and unwholesome. If the damages recovered were for deterioration in the value of the plaintiff's property, such recovery would be a bar to any further prosecution for the same cause, but if they were for annoyance merely, and for rendering the air unwholesome, then a similar recovery might be had at every turn of the Court, and in this shape the plaintiff might recover ten-fold the value of the property. Such is the state of the record, that we have no means of determining on which of these grounds the jury found their verdict, and it must stand.

The instructions given for defendants were all they could reasonably ask, and refusing the first was proper for the reason that dead carcasses in such a pen, should be removed instantly, even in the winter season, for if they do not then give out offensive effluvia, they are offensive to the eye, and should be buried out of sight.

The instructions given for the plaintiff, on the evidence before the jury, were in accordance with the views expressed by this Court in Graham's case, *supra*.

Great injustice may be done appellants, by this finding, but from the state of the record, we are powerless to remedy it, there being no error on which we can base a reversal, and the judgment must be affirmed.

Judgment affirmed.

Locomotives for Special Service.

The economy of steam over animal power is now almost universally recognized. Only those mine-operators whose large profits make strict economy no necessity, or whose long habit of doing work in one way shuts out the idea of doing it in any other, are now contented with animal power for mining their coal, transporting their ores, handling their stone in the quarries, moving their lumber from forest to mill, and shifting their supplies about mills and furnaces. Even those who for such reasons are indifferent for a time, are soon driven by sharp competition to consider carefully the points of saving that make all the difference between a large success and absolute loss. Their indifference soon yields when they learn that a locomotive can be run and kept at the same cost as three mules, and do ten times their work. A prime element in effecting economy is machinery, not only to save animal labor, but also to reduce the force of men—a kind of labor that in our country, and especially in its newer portions, must always be high-priced. It is a pleasure to note progress in this direction.

The narrow gauge railroad has, in just such mining service as is here pointed out, for years past proved its efficiency; and to the economy in operating such roads is due in large measure the present general interest in the narrow gauge. For a long time, however, these roads were worked only by horses and mules. The peculiar demands of different roads and their special requirements made it seem impracticable to build suitable locomotives. But the demand in this case, as always, needed only to be really felt to insure the supply. An interesting circular has been issued by Porter, Bell & Co. of Pittsburg, Penn., showing how perfectly adapted to all such work the locomotive may be made. The coal drifts of Pennsylvania can be entered by powerful little engines, down whose smoke-stacks a man of medium hight can look, while he stands on a level with the rail. The sharpest curves are easily passed, and gradients that a few years ago would have been considered utterly impracticable are now surmounted with excellent results.

But this class of engines is, perhaps, to no one of greater service than to the contractors, who carry out our great public works. In the Hoosac Tunnel, one of these engines is removing the rock as fast as it is blasted, working underground day and night. On the Mississippi, the grand improvement at the Keokuk Rapids is being effected by the same kind of machinery, three of these engines being in operation there; and now four of these are used in moving the construction trains of the great Northern road to the Pacific. Within a short time, one of the best of these engines, made from new and improved designs, has been sent to the Montclair Railway Company at Newark, where it is daily at work, and can be readily seen and examined by our New York contractors. The value of a specialty of manufacture is well shown in the wide market that is here only partly indicated. A large demand must certainly arise throughout the lumber regions of the South as well as in all the mining districts of the land. All our great public works must use the same serviceable agents, and the narrow-gauge railroads, no longer merely projected in fertile brains but actually in course of construction will give work of this kind to thousands of skilled hands. Thus has a comparatively new industry quietly won its way to prominence amid the busy trades of the Smoky City, which is now attracting, as never before, all such specialties, and seems destined to maintain a position as one of the great workshops of our country.—*N. Y. Tribune.*

Toronto and Nipissing Railway.

The Directors' report shows that steady progress is being made with this undertaking. Up to the 31st August, the total expenditure was $952,298, or close upon one million of dollars, and the receipts $696,057, the difference in these amounts being represented by outstanding liabilities. For these liabilities ample provision exists, as shown in the statement. By the close of the year, a distance of 64 miles from Toronto to Woodville, at the junction with the Midland Railway, will have been completed and opened for traffic. It is now a matter of certainty that we shall soon see at least one Canadian railway with a really substantial and excellent permament way, amply equipped and in full operation at a total cost of $15,000 per mile. This is an achievement not long ago thought to be beyond the bounds of possibility; and now that the fact is practically demonstrated, it must operate as a powerful stimulus to railway enterprise in this country. We notice the election of Mr. Wm. Gooderham, jr., to the position of Vice-President.—*Monetary Times.*

White River Valley and Texas Railroad.

We learn from reliable sources that there is now a full corps of engineers on the line of the White River Valley and Texas Railroad, making the survey preparatory to the commencement of work. The contract for doing the earth work between Des Arc and Jacksonport has been let to parties lately constructing the M., K. and Texas Railroad, who are now on their way from that point to Des Arc.

When completed this road will prove one of the most valuable in the state. In addition to protecting a large quantity of excellent bottom lands from overflow which are as fertile as any in the state, and will be made valuable by this road, it will pass through a country than the lands of which there are no better anywhere. At Jacksonport the road connects with the Cairo and Fulton, thus furnishing communication to the people of Camden, Pine Bluff, and other points along the line, with St. Louis and the east.—*Ark. Gazette.*

☞ The contract to construct and equip the Lake Shore and Tuscarawas Valley Railroad, from Elyria, Ohio, to its connection with the Pan Handle Road, ninety-two miles from Elyria, has been let to Selah Chamberlain, a banker of Cleveland, for $3,350,000 $1,000,000 in stock, $2,000,000 in bonds, $350,000 cash. He agrees to complete the job on or before the first day of July, 1873, and furnish $200,000 in cars and engines. He is to receive $34,413 per mile. He is to have the road complete from Grafton to Medina by the first of next month.

☞ Work on the Wellington, Grey and Bruce railway is progressing rapidly. Merchandise has been carried to Drayton; the grading is finished beyond Huston, and it is said that the road will soon be opened to Harristown.

India--Narrow Gauge.

Mr. Juland Danvers gives the following account of proceedings previous to the decision of the Government to adopt 3ft. 3⅜in. as the gauge for light and narrow gauge railways in India;—

The important question of gauge has occupied much attention during the past year. The present width of 5ft. 6in. was fixed upon by the home authorities when Indian railways were first commenced, in the year 1859. Lord Dalhousie was in favour of 6ft., but after much consideration 5ft. 6in. was decided upon as preferable. Since that time the introduction of a lighter system of railways into India has more than once been proposed. Colonel H. Yule, R.E., C.B, strongly advocated it some years ago, and the Indian Branch constructed two short lines of this description, both on the broad and narrow gauge, Mr. Wilson being their engineer. The recommendation that a much narrower gauge than 5ft. 6in. should at once be applied to future lines of railway in India was made by the present Viceroy last year. The chief ground upon which Lord Mayo came to this conclusion was economy. He and the members of his Council considered that the railway system of India was really in its infancy; that its extension to any great length upon the existing mode of construction would be greatly retarded by the necessary outlay; that saving of cost in every direction was imperatively called for, and that such saving could be most satisfactorily secured by adopting a narrow gauge. The Government of India regarded 3ft. 6in. as the maximum that should be used, but begged that this point should be determined in England.

A committee, consisting of Colonel R. Strachey, R.E., C.S.I., Colonel C. H. Dickens, R.A, C.S.I., Mr. John Fowler, C.E., and Mr. A. M. Rendel, consulting engineer to the East Indian, was accordingly appointed "to consider the precise gauge and general character for an average narrow gauge line of railway in India." The result of their investigations and deliberations was given in two reports, one containing the conclusions at which all the members of the committee, excepting Mr. Fowler, had arrived, the other expressing that gentleman's opinion alone. All, including Mr. Fowler, were in favour, on the ground of economy, of introducing a narrower gauge into India than the present standard of 5ft. 6in. in districts where a break of gauge would not be productive of serious inconvenience, but they differed as to what that gauge should be. Colonel Strachey, Colonel Dickens, and Mr. Rendel recommended 2ft. 9in.; Mr. Fowler 3ft. 6in. The opinions of the former were founded upon the conviction "that to obtain the greatest economy in construction, and, consequently, the greatest possible extension of railways in India, the gauge selected should be not only narrow, but the narrowest which would combine convenience of transport for various kinds of goods and passengers with reasonable speed, and with economy and safety in working;" and they were persuaded that these conditions would be fulfilled by a 2ft. 9in. gauge. Mr. Fowler on the other hand, was of opinion that a width of 3ft. 6in. should be adopted, "on the clear ground that it was not greater in first cost of works and rolling stock than a gauge of 2ft. 9in., and was greatly superior in carrying capacity, convenience, and economical working." The other members of the committee considered that the cost of a railway was in proportion to its gauge; he did not. He felt that to secure the greatest simplicity and economy of construction and working in a locomotive a gauge of 3ft. 6in. was required. They thought that engines of sufficient power might be put on a 2ft. 9in. gauge to draw at a sufficient speed the largest traffic which the lines for which a narrow gauge is suitable are likely to carry. The same differences of opinion on similar grounds are expressed in regard to the rolling stock of the respective gauges. Opinions were also given on the subject by Mr. John Hawkshaw, as consulting engineer to the Madras and the Eastern Bengal, and by Mr. G. P. Bidder, as consulting engineer to the Scinde, Punjaub and Delhi. They are both opposed to the application of any other than the existing gauge to future lines, which may be required as branches to or extensions of the systems of railway with which they are connected. They attach great importance to the evils and inconveniences of a break of gauge, and contend that the very small saving, if any, which might be secured by the adoption of a narrow gauge would be more than counterbalanced by those disadvantages. Mr. Hawkshaw, however, admits, in the early part of his report, that if "it were a well ascertained fact that there are districts in India, where, having regard to financial reasons a railway on a narrower gauge could be made, but where a railway on the existing gauge could not and ought not to be made, then that would be a case in which a narrow gauge might be considered as an absolute necessity." He calculates upon certain assumptions that the difference in the first cost of a heavy railway on the 5ft. 6in. and a light railway on the 3ft. 6. gauge would be 1,810*l.* per mile, and that the saving in maintenance and renewals of permanent way would be 50*l.* per mile per annum, or, if capitalised at twenty year's purchase, 1,000*l.* He considers, however, that the object of economy would be best attained by constructing a lighter system of railway on the existing gauge, and calculates that by this means 1,250*l.* per mile might be saved iin the first cost, and 40*l.* per annum in maintenance, or 800*l.* capitalised. Thus, under the least favourable view of the case, a saving of abont 800*l.* per mile is admitted. The case above described in Mr. Hawkshaw's words would probably be regarded as the rule, instead of the exception, for future lines in India. If 10,000 miles are to be laid out, economy must be observed in the construction of every mile, and a saving of 800,000*l.* in every 1,000 miles, or of 8,000,000*l.* in 10,000 miles, becomes a matter of importance.

A much greater saving, however, is expected by the advocates of the narrow gauge. I may mention, in passing, that the estimates for the Carnatic, on the broad and narrow gauge systems, made by Mr. C. Douglas Fox, the consulting engineer to that company, show a saving of 1,760*l.* per mile in favour of the latter. The same capital would thus make 112 miles of the 5ft. 6in., or 151 miles of the 3ft. 3in. I am informed also that in America 80 miles of a line which is to be 850 miles in length has been laid on a 3ft. gauge, at a cost of 2,500*l.* per mile, including rolling stock, the rail being 30lb. to the yard, joined by fish plates, the sleepers pine wood, 5ft. long set 2ft. 6in. apart.

The existence of another gauge in a country necessarily complicates the question of introducing the narrow one; and in some places and situations the inconveniences of a break of gauge may be so great, or the value of a line of communication for strategical purposes may be so impaired by it, as to make it worth while to pay the difference in cost; but, under ordinary circumstances, these kinds of difficulties may be greatly reduced by improved mechanical appliances and good traffic arrangements. The condition of things, moreover, in this country, where, within short distances, and with an immense traffic, a break of gauge has been found to be most burdensome and objectionable, is very different from that of India.

All the opinions above mentioned were on 26th October last transmitted to the Government of India with a dispatch to his Excellency the Governor-General in Council, in which were weighed the advantages and disadvantages, on political and economic grounds, of the application of a narrow gauge to future railways, especially to the cases of the Punjaub Northern and the Indus Valley lines, and after commending to his investigation certain points of a local and technical character which would bear upon the question, the decision was left in the hands of the Government of India. That Government has since decided that the future narrow gauge for Indian railways shall be a metre of 3ft. 3⅜in., this being in its opinion the most convenient as respects the width of vehicle which can be run on it, and one which, while equal to the present requirements of the traffic with light rails and rolling stock, may be readily adapted in case of an important increase of traffic for larger vehicles and heavier engines.

Tide-Water Receipts.

The quantity of flour, wheat, corn and barley left at tide water from the commencement of navigation to the 31st of August inclusive, during the years 1870 and 1871, was as follows:

	Flour, bbls.	Wheat, bu.	Corn, bu.	Barley, bu.
1870..	225,600	8,113,500	2,635,500	94,300
1871..	114,900	8,143,600	13,292,400	71,500
Dec ..	82,700	*30,100	*10,656,900	22,800

* Increase.

By reducing the wheat to flour the quantity of the latter left at tide water this year, compared with the corresponding period last year, shows a decrease of 76,680 bbls. of flour.

The following comparative table shows the quantity of some of the principal articles of produce left at tide-water from the commencement of navigation to and including the 31st of August, in the years indicated:

	1869.	1870.	1871.
Canal opened—	May 6.	May 10.	April 24.
Flour, bbls.	270,200	225,600	142,900
Wheat, bushels..	9,112,300	8,113,500	8,143,600
Corn, bushels...	3,173,500	2,635,500	14,292,400
Barley, bushels.	12,000	94,300	71,500
Oats, bushels...	1,938,000	2,035,200	1,637,800
Rye, bushels....	227,100	303,600	183,200
Malt, bushels...	159,400	395,400	726,000
Feed, lbs.....	6,550,500	6,890,300	4,231,600

Brazilian Railways.

THE LOAN AND PURCHASE ACT.

The bill which has passed the Brazilian Legislature is as follows: Art. 1. A credit of $20,000 is opened to the Government for the completion of the 4th section of the Don Pedro II. railway, and for the prolongation of the same road to Lagoa Dourada, in the province of Minas Geraes. Art. 2. The Government is also authorized: Sec. 1. To contract with the Recife and Sao Francisco, Bahia and Joazeiro, and Sao Paulo railway the redemption of the said roads with bonds of the public debt, provided the annual outlay, with the respective interest and amortisation, does not exceed the amount of the guarantee given to each of the companies. Sec. 2. To prolong, by sections, the railways mentioned in the preceding paragraph, following the trace judged most suitable from studies that shall be proceded to at once, and having power to expend the sum of $3,000 annually on each of them. Sec. 3. To order the verification and completion of the studies made for a railway to join the navigable parts of the Upper and Lower Sao Francisco; and to order the study of a complete system of viaton, and the making of an itinerary chart of the Empire; applying to these purposes up to $200 in the first year. Art. 3. The Government is authorized to deduct from the product of the loan contracted lately in London, the sum of $20,000 for the expenditure treated of in Art. 1; and to effect any operation of credit for the expenditure treated of in Art. 2, should the appropriations made in the laws of estimates be insufficient. Art 4. All contrary provisions are revoked.

☞ The Camden and Red River railroad company is now fully organized, and at once propose to go to work and see what means can be raised to build the road. Col. Tyra Hill is President, Hon. Jno. T. Bearden, Vice President, and Mr. C. H. Stone Secretary, the board of directors being the corporators of the company.

☞ The Western Maryland railroad track is laid to within half a mile of the Monterey summit.

☞ The Savannah *Advertiser* says that the Pennsylvania Railroad Company has succeeded in getting a controlling interest in the Wilmington and Manchester, North Carolina, Charlotte, Columbia and Augusta, and by recent purchase of stock the Air Line railroad also from Charlotte to Atlanta, and are now negotiating for the control of the West Point railroad.

☞ The Baltimore papers, of 19th inst., publish in full the report of Messrs, Craighill and Kneass, the engineers appointed to examine the plans for the improvement of Jones' Falls. It will be seen that they recommend a widening of the stream to 140 feet, and some slight straightening of the line, with other improvements, the cost of which they estimate at $2,750,000.

☞ The construction of the Woods' Hole (Mass.) Railroad was commenced last week by grading parties both at Cohasset Narrows and Woods' Hole.

☞ Col. D. C. Cross has been elected President, Q. K. Underwood Treasurer, and J. C. Macabe Secretary of the Iron Mountain and Helena (Ark.) Railroad company.

NEW YORK State Railroad Bonds.

A First-Class Home Investment.

FIRST MORTGAGE GOLD BONDS

OF THE

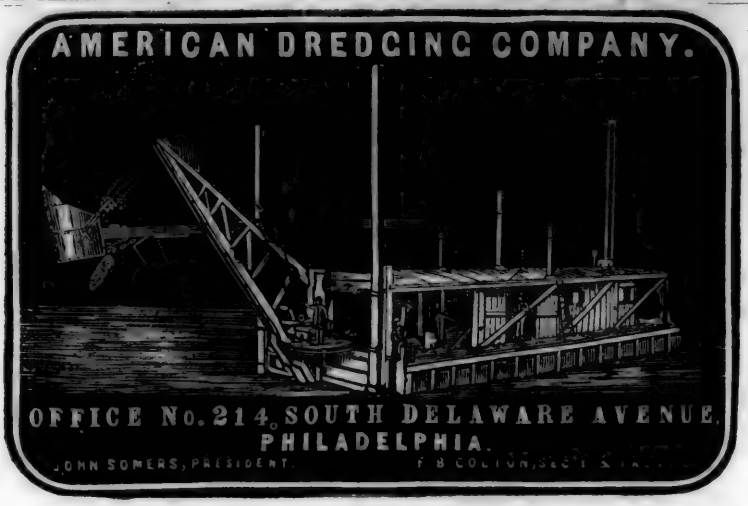
RONDOUT AND OSWEGO RAILROAD.

Principal and Interest payable in Gold.

SEVEN PER CENT. SEMI-ANNUALLY.

This Road covers 100 miles of the most direct possible line between the Great Lakes and deep water navigation on the Hudson River, the whole line of which will be completed and in operation on or before October 1, 1872, and give a new line of road to Lake Ontario and the West 25 miles shorter than any line that can be found.

It passes through the Cement, Flag-Stone, and Lumber regions of Ulster County, and the rich agricultural bottoms of Delaware and Greene Counties, all of which have not heretofore been reached by railroad facilities, and from which sections the formation of the country prevents the construction of a competing line.



The 36 miles of road operated for three months is already paying net earnings equivalent to 7 per cent. gold on its cost of construction and equipments. The issue of Bonds is limited to $20,000 per mile of COMPLETED ROAD, the coupons payable in gold in this city. Price of the Bonds 90 in currency.

Full particulars of the above may be had of, and the Bonds for sale by,

EDWD. HAIGHT & CO.,

☞ FIRST MORTGAGE SINKING FUND LAND GRANT BONDS OF THE ST. JOSEPH AND DENVER CITY RAILROAD COMPANY.

IN DENOMINATIONS OF $1,000 $500, AND $100, can now be had from the undersigned or through the principal banks and bankers of the United States. The attention of investors is invited to the merits of these bonds, secured by a first and only mortgage on the road, equipments, franchise, and property of a trunk line of railroad which will shorten the distance between New York and San Francisco some 230 miles, and in addition the mortgage to secure the bonds covers a land-grant of 1,500,000 acres of the most fertile land in the West, which is prohibited from being sold at less than four ($4) dollars per acre by the terms of the mortgage deed, and according to the present market price of the Illinois Central Company's lands is worth $18,750,000. This loan was originally for $5,500,000, but has been largely reduced by subscriptions of actual investors. The remaining balance of the loan is offered at 97½ and accrued interest, but the right is reserved to advance the price at any time, without notice.

The bonds have thirty years to run; bear 8 per cent. interest, payable in New York, London or Frankfort-on-the-Main, at the option of the holder, without notice, free of taxes. BOTH PRINCIPAL AND INTEREST ARE PAYABLE IN GOLD. They are Coupon Bonds, but can be registered with the coupons ON, or can be registered with the coupons OFF, and interest paid to registered owner. Interest payable Aug. 15 and Feb. 15. A liberal sinking fund, formed from the entire land sales, in payment for which the bonds will be received at par and accrued interest, provides for the early extinguishment of this loan.

Trustees—Farmers' Loan and Trust Company.

These bonds offer favorable inducements to parties desiring to fund their Five-Twenties, or other high-priced securities.

In converting Five-Twenties the investors realize 17 per cent. profit on the principal; 2 per cent. per annum excess of interest; and at the same time get a perfect security.

Maps, circulars, documents, and full information furnished on application.

Though acting as agents for the sale of this loan, our firm buy and sell in their regular business the bonds of the St. Joseph and Denver City Railroad Company, those of the Eastern Division being now quoted at 102 *and accrued interest. These were originally placed by us at* 97½.

TANNER & CO., Bankers,
No. 11 Wall-st.

☞ The Tredegar Iron Works, of Richmond, Va., now employ over 1,200 hands, mostly on railway material and equipment, filling orders for the Dutchess and Columbia (N. Y.) railroad, the Chesapeake and Ohio railroad, and numbers of roads in the South and Southwest.

Lake Shore and Michigan Southern Railway.

The Lake Shore and Michigan Southern Railway company offers to the holders of the common stock of the company $14,000,000 of the capital stock of the company issued in pursuance of the vote of the stockholders of the company, taken under the provisions of its charter, at a meeting of the stockholders held at the City of Cleveland, Ohio, on the 27th day of July, 1871.

Each shareholder of the common stock will be entitled to forty per cent. of the par of the stock held by him, upon the payment of thirty-three and one-third per cent. of the par thereof, in the manner following, viz.: Ten per cent. of the par thereof, on the first day of November next, the further sum of ten per cent. of the par thereof on the first day of December next, and the residue of said thirty-three and one-third per cent. at such time as the same may be called.

Notice of the calls for installment, payable subsequent to the 1st day of December next, will be given to the stockholders, by publication in a newspaper published in the City of Cleveland, Ohio, and also in a newspaper published in the City of New York, at least thirty days before the day on which payment is required.

The whole of said residue will be called for on or before the 1st day of August, 1872.

If payment shall not be made in accordance with any calls which may be made, all rights to such stock shall cease, and the stock will be disposed of for the account and benefit of the company.

Scrip certificates will be issued on the payment of the first installment (called for Nov. 1). Payments of subsequent calls will, as the same are from time to time made, be stamped upon the scrip certificate.

The scrip certificates will be transferable on the books of the company.

On payment of the thirty-three and one-third per cent. certificates for full-paid stock will be issued upon the surrender for cancelment of the scrip certificates.

Dividends, upon the sum of the installments actually paid in, will be declared, payable at the same rate and time as upon common stock.

Payments of the calls are to be made at the office of the Union Trust Company of New York, and a presentation of the stock certificates will be required, to the end that the issue of the scrip certificates may be stamped thereon.

The transfer books which were opened on the 25th inst., will be closed on the 7th of October.

Metropolitan Branch Railroad.

The Washington *Patriot*, of Sept. 11th, gives the following concerning the construction, progress, etc., of what is known as the Metropolitan Branch of the Baltimore and Ohio railroad, extending from Washington to "Point of Rocks" on the Main Stem—the purpose of which is to establish more direct connection between Washington and the West:

At present the connection is made by the Washington Branch of the Baltimore and Ohio Railroad at the Relay House. Thus traffic from Washington has first to come east to the Relay House and then go back northwest to the Potomac and so on to the West. The Metropolitan Branch leaves Washington in a direct course (west of north) for the point of junction with the Potomac.

The road is being built under the original act of 1865, passed by the Legislature of Maryland, to which a supplemental act was passed in 1870, requiring the company to complete the road by March 21, 1873. In 1866 Congress granted a charter, under which that portion of the road within the District of Columbia is being constructed.

The whole distance is 42 miles, divided into sections of one mile each, commencing to number at Point of Rocks and ending in this city.

The average cost per mile of the road, exclusive of rails, will amount to about $60,000; after adding to this $10,000 per mile for track and cross ties, and such unforeseen accidents as may occur, the entire expense will foot up $3,600,000. The laborers employed receive their pay monthly upon estimates furnished the chief engineer by the contractors. There have been constantly employed at least 1,200 men, and during many portions of the year, 1,600 laborers have been engaged on the work.

The track will be laid in October, beginning at both ends of the route, over such portions as may be ready to receive the rails. It is expected soon afterward to place construction trains on the line to ballast the road. In December or January passenger trains will run between Washington and Rockville. The company assert that the road will be ready for through travel on the first of March.

The highest grade is fifty-two feet to the mile, and the highest summit Parr's Ridge, four hundred and fifty feet above tide-water. The line runs 4½ miles through the limits of the District of Columbia, 30 miles through Montgomery county, and 7½ miles through Frederick county, Maryland.

Pittsburg, Cincinnati and St. Louis R. R.

The Pittsburg *Chronicle* gives the following synopsis of the annual report of this company for the year ending June 30, 1871:

The total amount of capital stock is $5,424,350, all of which is paid in. The total of the funded debt is $10,017,440.24. The floating debt (applying to entire line) is $2,560,633.08.

The total cost of road and equipment of main line up to June 30, 1871, was $17,665,162 93.

The equipment of the road is 280 locomotives, 123 passenger cars, 67 baggage cars, 3,911 freight, and 106 other cars.

The earnings from transportation of passengers was $2,553,535 35; from freight, $5,731,660 35; from mail, $146,917,44; from express, $204,685-90; from all other sources, including rents, &c., $308,107 97. Total for the year, $8,944,907 01.

The expenses for maintenance of way and structures was $1,304,587 76; for maintenance of cars, $510,625 43; for motive power, $1,951,225 75; for conducting transportation, $2,311,358 68; general expenses (including taxes paid in Ohio amounting to $79,973 18) $250,476 49.

Total operating expenses, $6,328,274 11; net earnings, $2,616,632 90.

In addition to operating expenses proper, the Pittsburg, Cincinnati and St. Louis Railroad Company has made the following payments: Interest on bonds, $668,915; lease of Little Miami Railroad, $676,179 51; lease of Columbus, Chicago and Indiana Central Railway, $1,183,544 88; construction of new works, $339,851 62; additional equipment, $942,824 90; additional real estate, $50,384 08 making a total of $3,860,790 44.

The excess of these additional payments over net earnings was derived in part from the Pennsylvania Railroad Company, and the remainder from increase of floating debt.

The report, except as to stock, debts, and cost of road and equipment, covers the line from Columbus to Pittsburg, Columbus to Cincinnati, and Columbus to Chicago, and branches, in all nine hundred and seventy-eight and one-half miles.

Mobile and Ohio Railroad.

The earnings of this road for the years ending December 31, 1869 and 1870, were as follows:

	1869.	1870.
From passengers....	$612,764 72	$695,224 16
" freight.....	1,384,402 21	1,760,072 29
" mails.....	47,970 00	49,294 47
" express.....	70,150 00	54,750 00
	$2,115,286 93	$2,559,340 92
Expenses, viz:		
Repairs of roadway..	$338,770 27	$535,502 32
" machinery.	312,534 44	449,326 10
Conducting transp...	669,408 22	909,623 56
Taxes.....	34,815 69	15,556 67
	$1,355,528 62	$1,910,008 65
Net revenue..	$759,758 31	$649,332 27

Compared with the previous year the gross earnings of 1870 show an increase of $444,053 99; with an increase in expenses of $554,480 03—making a decrease in the net revenue of $110,426 04. The President in his report to the stockholders says:

The Directors meet you with congratulations. Assured by the steady increase of revenue during the year, that our interest liabilities were fully provided for, we determined to take a step in advance and provide also for the future. The improvement and extension of the road and the increase of its rolling stock, with a view to future business, was the question most immediately demanding the attention of your Board during the past year; and after consultation with the officers of the road, we determined to expend about five hundred thousand dollars in such improvements.

The gross earnings for the year 1870, were.....	$2,559,340 92
The expenses, ordinary and extraordinary, were.....	1,910,008 65
Leaving a net revenue of..	$649,332 27

Though this is less than the amount required to pay the interest on our bonds, we have not only been able to pay that interest, but also to add ten engines and two hundred cars to our equipment—to build new shops and meet all demands promptly, with only the moderate increase of our current liabilities of say three hundred and fifty thousand dollars, and that too without interest—being for pay rolls and individual balances which can be paid on presentation.

An arrangement has been made with the Pullman Car Co., by which their elegant drawing room and sleeping cars are run on your line—while an agreement has been made and is now being carried into effect with the Western Union Telegraph Co. for the placing of an independent wire upon their line for the exclusive use of your company; this latter arrangement will, it is believed, reduce the cost of operating the road, by adding to the facility and consequent economy in the movement of trains.

Your wharf facilities were found insufficient to meet the increasing traffic in West India and South American produce, and has necessitated the extension of additional piers, which will be completed in next sixty days, thereby doubling the present wharf capacity. These, with the increase of new cars and locomotives, and the thorough repairs of old ones, will enable you to commence the next fall business with better prospects than in any former season. New station houses have been built—old ones repaired—platforms increased and extended—thus adding to the facilities for doing an increasing business.

The number of immigrants coming to your line the past year, has not been as great as in the previous year, but the reports from the different stations, show a steady increase in population as well as production.

The demand for small tracts continues, and reasonable sales are being made. The greatest hindrance to immigration and sale of lands, arises from the apprehension in the mind of the stranger, so industriously circulated by politicians and those who have landed interest in the Western States, that our region is unsafe as a place of residence. This cannot long be the case.

With all connecting roads our relations are of the most friendly character. Since your last meeting the New Orleans, Mobile and Chattanooga Road has been completed between New Orleans and Mobile, and the connection through the city at your depot enables us to transfer freight and passengers without change of car, thus giving an all rail connection between the great cities of the West and New Orleans, *via* Mobile.

The Mobile and Montgomery Road is being completed into the city of Mobile, and will, in a few months, form an unbroken rail connection between the eastern and western cities, *via* Mobile.

The Alabama and Chattanooga Road is rapidly approaching completion, some 4 or 5 miles only being required to open the entire line, and in the next 30 days running connections with them may be expected. This, with the New Orleans connection, makes the road of this company a part of the shortest line from New Orleans to New York, and must add to your passenger traffic.

The Selma and Montgomery road is completed, forming a rail connection between the West and the capital of Alabama and the Eastern States.

The St. Louis and Iron Mountain Road has formed a connection at Columbus, Ky., by which freights are now taken without change of bulk, between Mobile and St. Louis—the advantage offered passengers to reach St. Louis without change of cars, will have the effect of increasing the travel.

Work on the Cairo and Vincennes road, which had been suspended, has been resumed at Cairo, and now bids fair to be pushed to rapid completion.

Thus a network of railroads all around us is being formed, which must tend to the increase of your earning power. The judicious location of your great trunk line is such, that you can look without apprehension upon almost any road that may be projected.

The Mississippi, Gainesville and Tuscaloosa Road, commencing at Gainesville Junction on your line, and running to the town of Gainesville, on the Tombigbee River, was originally aided by this company, and secured by the bonds of that company. The disasters of the war so prostrated them as to forbid the prosecution of their enterprise, and they were compelled to succumb. The entire road, 21 miles, with all its property and franchises, was sold on the 20th of October last, and has been purchased by this company and incorporated into your line as the Gainesville Branch.

The importance of this purchase will be appreciated when it is remembered that by it you not only control a line running to the river, but that by an extension to the town of Eutaw, a distance of only sixteen miles, through a country peculiarly favorable for the construction of a cheap road, a junction is formed with the Alabama and Chattanooga road, as also with the Selma, Marion and Memphis road, and giving us the shortest line from the West to Selma, Montgomery and Western Georgia by thirty-five miles.

The steady increase in your receipts since 1868, showing in 1869 an excess over 1868 of $264,685 34, and in 1870 an excess over 1869 of $444,058

99, and larger by $110,054 83, than in any former year, while the first three months of the present year shows an excess over the corresponding months in 1870, of $180,427 09, is convincing proof of the steady improvement of the country tributary to your line. While the cotton crop of 1870 was much larger than that of the preceding year, the tables will show that your increased receipts are not alone due to the traffic derived from that staple.

The constant increase of mechanical enterprises are adding to the volume and diversity of your business, and to this extent changing the charac ter of your traffic. One peculiarity of southern roads is that the larger portion of their earnings must be derived from freights, and as cotton forms the great bulk of that freight, a larger amount of rolling stock is wanted for the cotton season than can be advantageously employed the balance of the year.

The reports made by station agents show that the industry of our people is being more diversi fied, the effect of which will be favorable to your interest.

During the past year there have been established along the line—of business houses, 151; saw and grist mills, 49; mechanical establishments of all kinds, 106.

Another new element of strength, and one of great importance to you, is the opening of the West India and South American trade with the great West, through the Gulf ports. This busi ness has increased largely the past year, through the energy of Mobile merchants, and has so favorably attracted the attention of St. Louis dealers that they, too, are now importing coffee through Mobile. During the past year the shipments of coffee over this road show an increase of 18,000 bags over the previous year, and are being still further increased in the year upon which we have entered. This freight is of peculiar importance to your road, as it is all north bound, and aids largely in equalizing the tonnage as between the North and South—the great preponderance hitherto having been south bound. The confidence of the public is constantly increasing in the strength of your enterprise, as is shown by the enhanced market value of your securities.

The total number of tons transported over the road from January 1, to December 31, 1870, was 258,409; total number of tons carried one mile, 36,086,770. The number of passengers carried during the same time was 406,293; total number of passengers carried one mile, 15,166,758. The Chief Engineer in his report dated April 11, 1871, says:

Two thousand tons of new rails, weighing sixty pounds per yard, were ordered from England on the 16th day of July, but they were received after the close of the year, and about one-half of them are laid down at the date of this Report. The old rails which were taken up have been re-rolled as fast as they could be sent to the rolling mill.

The two thousand additional tons recently ordered, together with those which will be re-rolled during the year, will more than compensate for depreciation, and place the track in better condition for next winter's business.

The roadway is now better drained, and the track and rolling stock are in better condition than at any time since the war. The majority of accidents to freight trains during the winter have resulted from the rigid trucks on cars belonging to foreign roads, and fully confirm the experience during the war, and the opinions expressed in previous reports. This company has the right to say what kind of cars shall run upon its road, and if other companies forget, from false ideas of economy, the moral and legal obligations to construct their cars upon the plainest principles of safety, and fail to comply to promises repeatedly made to build other cars for exchange with this road, they should not complain if their business is subjected to the cost and delay of transhipment at the point of connection.

The rigid specifications for the manufacture of axles, and the severe tests to which all axles have been subjected, as stated in the last Annual Report, have produced the desired results, and there have been but four broken during the year and these were old ones, not branded, and names of the makers unknown.

The financial condition of the company Decem ber 31, 1870, is exhibited in the annexed

CONDENSED BALANCE SHEET.

Construction to April 22, 1861		$13,294,979 21

President.—ABRAHAM MURDOCK.

Vice President.—C. E. RUSHING.

Second Vice President.—JOHN J. WALKER.

Directors.—Abraham Murdock, Charles E. Rushing, A. S. Humphries, of Mississippi; Thomas Brown, of Kentucky; A. W. Campbell, of Tennessee; Robert W. Smith, James Crawford, Francis B. Clark, W. D. Dunn, John J. Walker, Charles Walsh, John Reid, Jr., of Alabama; Wm. Butler Duncan, of New York.

Secretary and Treasurer.—A. L. WILLOUGHBY.

Chief Engineer.—L. J. FLEMING.

Sup't Transportation.—G. W. N. CUSTIS.

Chippewa Valley and Lake Superior R. R.

A meeting of the corporators of the Chippewa Valley and Lake Superior Railroad was held on the 11th inst. Upwards of twenty millions of capital from New York alone was represented at the meeting, and the most flattering prospects of a speedy commencement of the building of the road were made apparent by the determined interest manifested on the part of the capitalists present. The action of the meeting resulted in electing as President of the board J. M. Dwight, of Dryden, N. Y., and as directors, J. H. Knight, of Bayfield; T. C. Pound, L. C. Stanley, Chippewa Falls; J. G. Thorp, H. C. Putnam, Eau Claire; S. S. Kepler, Wabasha; H. E. Houghton, Durand; Ezra Cornell, Jno. McGraw, Ithaca, N. Y.; J. M. Dwight, Dryden, N. Y.; Thos. McGraw, Dean Sage, Albany; H. W. Sage, W. H. Sage, A. B. Cornell, New York.

The general belief here is that the road will be built between Eau Claire and Chippewa Falls the present fall, and supplied with rolling stock. The only barrier to the speedy commencement of the grading between here and the Falls will be the inability or indisposition of the people of the latter place to take stock to the amount of thirty thousand dollars in the enterprise, which, we understand, they have indirectly signified a willingness to do. At any rate with such men as Ezra Cornell, W. H. Sage, John McGraw, J W. Dwight, Dean Sage, and other heavy capitalists, who were present at the meeting from New York, nothing but the most favorable results can be looked for as the occasion of the initiatory steps taken for the construction of the Chippewa Valley and Lake Superior Railroad.—*Eau Claire (Wis). Free Press.*

Delaware Railroad.

In our issue of September 16th, page 1019, in in an abstract prepared for us in our absence, of what purported to be the Reports of the Delaware Railroad Company for 1869 and 1870, several errors occur. These originated chiefly in comparing the returns of 1868 and 1870, instead of using the report for 1869. Otherwise we have simply transferred to our columns the figures of said reports. We stated, however, that the Eastern Shore Railroad was operated by the Philadelphia, Wilmington and Baltimore Railroad Company, which appears not to be the case; and by some error of type we dated the Sinking Fund as of January 1, 1870, whereas it ought to have been January 1, 1871. The amount at that date was $105,508 08. We may as well add in this connection that in 1869, instead of a loss to Lessees of over $40,000, as stated in the abstract, there was a gain to the Lessees of some $34,000. The Delaware R. R. leaves the N. C. and F. R. R. and T. Co. at Delaware Junction. The N. C. and F. R. R. leaves the N. C. and W. R. R. at New Castle. And the N. and W. R. R. leaves the P., W. and B. R. R. at New Castle Junction.

☞ The Montreal *Gazette* says that the survey of the Montreal and Ottawa City Junction railway has been completed. The total distance by this road will be from Montreal to Ottawa 113 miles, only 60 of which have to be built; by the proposed Coteau road, 119 miles, 95 of which have to be built; by the St. Lawrence and Ottawa railway, now in existence, 166 miles. The estimated cost of the Montreal and Ottawa is $960,000, and of the Coteau road $1,254,000.

☞ Of the $1,000,000 of bonds of the Connecticut Valley railroad, for which proposals were invited, offers were made for $703,000, of which $343,000 were accepted at 90 and accrued interest.

American Railroad Journal.

Saturday, September 30, 1871.

Stock Exchange and Money Market.

Money has been in quite active request, since our last, and with lighter offerings on both bank and private account; the advantage as to rates has been decidedly against borrowers, who, as a rule, have been in more urgent need of accommodation, particularly for speculatvie purposes, and consequently have had to conform their bids for aid, to advancing range from day to day. The inquiry was particularly brisk on Friday and Saturday of last week, when extreme rates prevailed. On Monday and Tuesday of this week, there was less pressure for help, and the market worked more comfortably for the borrowing interest. On Monday, the Government Office, here, under orders from the Treasury Department, bought in an extra sum of $3,000,000 of United States 5-20s out of $5,812,900 offered, and was prepared to pay for the Bonds at once, but no part of the purchase was delivered on that day, and the deliveries, as well as the consequent disbursements, were made on Tuesday. The payments by the Office on this account served to relieve the Money movement in the open market. The current rates have been from 5@7 generally 6@7 per cent. in a temporary form, and at 7@9½ per cent. per annum on choice to fair business credits. The city banks, in their latest return, made another unfavorable exhibit, showing a farther loss of $5,393,400 of legal tender notes, $656,300 of specie, and $9,769,300 of deposits; also a reduction of $3,503,300 in their loan and discount averages, and an increase of $71,500 in their item of circulation. The city bank exchanges, last week, averaged $119,397,000: and thus far, this week, 117 millions daily. The banks now hold only $1,168,250 of specie and legal tender notes, in excess of the 25 per cent. of their liabilities required by the national banking Act.

The specie reserve of the city banks according to the latest return is $9,572,100, against $14,670,724 same time last year. The city bank deposits are now $237,127,400 against $191,066,202 week ending Sept. 24, 1870. The legal tender reserve amounts to $58,428,300 against $49,417,936 same time last year. The circulation now stands at $30,201,200, against $32,733,046 same time last year. The loans are now $309,164,700, against $267,087,617 at this date last year.

Government revenues have been yielding fairly since our last. The excises yielded last week about two millions, and thus far since July 1, about $33,624,036. The customs at the port of New York, last week were $3,371,667; and at the outports, equal to about 1⅛ millions more, all in coin, or coin certificates.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $365,389,900; and as security for deposits of public money, United States bonds for $15,519,400. The aggregate of the outstanding circulation of the National Banks of the country is $323,056,375.

The U. S. Sub-Treasury, on Thursday morning of this week, held a balance of $12,053,459 in currency, and $64,852,125 in coin.

The customs at this port on Wednesday were $795,000.

The Gold movement has shown less spirit since the heavy sales of Thursday of last week on Government account, as reported in our last. The speculative inquiry has been less confident, and the export drain light. The customs call has been up to a full average. The supply in the open market has been more liberal. The range of the price during the week, has been from 113⅞@115⅜, and the closing quotation on Wednesday was 114¾ against 114 the preceding Wednesday. The specie outflow, last week, was $400,599; on Tuesday of this week, $52,300; and on Wednesday, $268,251. The Gold Exchange Bank clearances have been as follows: Sept. 21, $63,695,000; Sept. 22, $75,071,000; Sept. 23, $86,686,000; Sept. 25, $67,415,000; Sept. 26, $43,208,000; Sept. 27, $52,831,000.

Government disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt from Jan. 1, to Sept. 28, 1871, $65,184,021, against $66,440,347 same time in 1870.

The export drain was $400,599 last week, against $1,345,408, same week preceding year The shipments since January 1, 1871, have been $57,044,102, against $48,587,639 same time in 1870.

The customs demand for Gold last week, averaged $561,944 a day; thus far, this week, it has averaged $619,800 a day, or equal to a weekly aggregate of $3,718,800. The arrivals of

specie from Europe, Havana and other foreign ports last week, were $55,745, and since Jan. 1, 1871, $7,688,254 against $8,057,430 same time in 1870. The total customs revenue of the Government, in coin, at this port, since January 1, 1871, has been $119,284,167 against $104,735,220 same time in 1870.

Foreign exchange has been in better supply and weaker as to rates toward the close, on a moderate inquiry. Bankers' sixty day bills on London closed on Wednesday at 108¼@108½; sight bills on London, 108¾@109⅛.

The produce exports from this port, week ending with Sept. 26, were to the currency value of $5,232,676.

Government securities have been offered sparingly and have been in moderate request at very well supported prices.

On Monday, Government bought in, through the local office, an extra sum of $3,000,000 of U. S. Five Twenties at from 112 90@113 30.

On Wednesday, Government bought in two millions of Five-Twenties at 112 97@113 17. The amount of bonds offered was $4,780,850 at from 112 97@114.

U. S. sixes of 1881 closed here on Wednesday of the current week at 118¼@118⅛; U. S. Five-Twenties of 1862, 115⅝@115⅞; U.S. Five-Twenties of 1864 at 115⅝@115⅞; U. S. Five-Twenties of 1865, 115⅝@115⅞; U. S. Five-Twenties of 1865 consolidated, 113½@114¾; U. S. Five Twenties of 1867, 114⅝@114¾; U. S. Five-Twenties of 1868, 114¾@115; U. S. Ten-forties at 111¾@111⅞; U. S. Six per cent. currency bonds, 114⅜@114½.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 13.	Sept. 20.	Sept. 27.
Consols	93⅛	93 3/16	92⅝
U.S. 5-20's of 1862	93 5/16	93⅝	92⅝
U. S. 5-20s, 1855	93¾		92⅞
" 1867	92¾	92⅛	92
" 10-40s	90 11/16	90⅜	89¾
Erie	26½	25½	25

State bonds have been in fair request at about steady prices.

Railway bonds have been in equally fair demand, chiefly for investment purposes at comparatively firm prices. Central Pacific Sixes have been at 101⅞@102⅛. Chesapeake and Ohio Sixes have been more sought after for home investment on the basis of 93 per cent. and accrued interest. Less than 4 millions (out of the determined aggregate of 15 millions) of this popular gold bearing loan remain to be marketed, and the present promise is that the whole amount of the Loan will be placed at an early day.

The demand from investment buyers for the St. Joseph and Denver City eight per cent gold bonds has been quite active at the established price of 97½ and accrued interest, leaving of the loan (the aggregate of which was $5,500,000) opened on August 1, considerably less than 50 per cent. of it yet to be disposed of.

Railway and miscellaneous share property has been moderately active, but unsettled in value. The later dealings indicated a more confident temper, influenced to some extent by the more liberal offering of money.

On Wednesday, 130,000 tons Scranton Coal were disposed of at from 4.15@6.15, as against $4@5.60 in August.

General business has been less active. Breadstuffs and Naval Stores closed more firmly. Provisions, irregularly. Petroleum weak. Middling upland cotton closed on Wednesday at 19¾ cts. per lb. The receipts at all the ports, since Sept. 1, have been 61,048 bales, against 94,156 bales same time in the preceding year; exports 28,561 bales, against 14,375 bales in the previous year; stock at the ports at latest dates, 89,565 bales, against 70,325 bales same date 1870.

At the Live Stock Markets, Beeves have been in less request at from 6@12½ cts.; Veals quiet at 4@10½ cts.; Sheep at 4@6½ cts.; Lambs at 6@8½ cts.; Swine, 5¼@5⅞ cts per lb., all live weight. The week's receipt were 8,075 Beeves, 2,382 Veal Calves, 28,709 Sheep and Lambs; and 30,323 Swine.

Foreign goods have been in fair request and generally steady as to price. The week's imports of foreign goods reached $8,509,299, including $3,477,944 of dry goods.

Ocean freights have been moderately active, but rates have been variable, closing with some indications of steadiness.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ CHESAPEAKE AND OHIOS—FIVE-TWENTIES—CENTRAL PACIFICS.

BANKING OFFICE OF
FISK & HATCH,

No. 5 NASSAU-ST., NEW YORK, Sept. 25, 1871.

Of the FIFTEEN MILLION CHESAPEAKE and OHIO SIX PER CENT. LOAN, but about $4,500,000 remain unsold, and this remainder will be taken up rapidly.

The five years' option having expired on all series of FIVE TWENTY BONDS, except 1867s and 1868s, they are liable to be called in for payment. The redemption of 100 millions FIVE-TWENTIES in coin, and the purchases by the Government during the ensuing four months, with the premium thereon, will release about 150 millions of invested capital, independently of dividend and interest payments, the greater part of which must seek reinvestment.

THE CHESAPEAKE AND OHIO SIXES

have absolutely 30 years to run; are especially desirable for steady investments, and can now be bought.

17 per cent. less than TEN-FORTIES,
20 per cent. less than FIVE-TWENTIES,
25 per cent. less than SIXES OF 1881,

and are equally sure to be paid principal and interest in gold coin. Their amount is limited by the Trust Deed to $15,000,000. Price (at present) 93 and accrued interest, that is, with coupon attached, payable Nov. 1.

$1,000 Chesapeake and Ohio Bond costs to-day $954 16.

$500 Chesapeake and Ohio Bond costs to-day $472 08.

$100 Chesapeake and Ohio Bond costs to-day $95 42.

Only a small amount of the latter denominations remains, and no more can be made. Bonds are in coupon or registered form, same as Five-twenties.

The CENTRAL PACIFIC SIX PER CENT. BONDS are as safe for investment as Government bonds. Their amount, fixed by act of Congress at $15,885,000, is secured by property worth four times their value; they can only be bought in the open market, and are becoming scarcer in consequence of their gradual absorption by investors here and in Europe; they have a ready market in all the principal money centres, and have still twenty-four years to run; the earnings of the road are steadily increasing, and will probably reach $10,000,000 for the current year, affording a handsome surplus after payment of expenses and interest. Present price, 101¾ to 102.

When the Chesapeake and Ohio Railroad is completed, in 1872, and the Bonds are dealt in at the Stock Exchanges of the world, we have no doubt they will be equally popular with the Central Pacifics. Both principal and interest of the CENTRAL PACIFIC and CHESAPEAKE AND OHIO BONDS, are specifically payable in gold coin in New York; the interest on the former being paid January and July, and of the latter, May and November, corresponding with the two classes of Five-twenties.

We recommend either of them to our friends and customers with the same confidence as we did the Five-twenty bonds, when we were selling millions of them for the United States Government.

We buy and sell FIVE-TWENTIES, TEN-FORTIES, EIGHTY-ONES, and CENTRAL or WESTERN PACIFICS, or receive them in payment for CHESAPEAKE AND OHIO BONDS at their current market price.

P. S.—Accounts of Banks, Bankers and others received, on which we allow Four per cent. interest.

Certificates of deposit issued and collections made in all parts of the Union.

FISK & HATCH.

HARVEY FISK.
A. S. HATCH.

☞ THE WEST WISCONSIN RAILWAY is now very nearly finished, and trains will be running through from Tomah to St. Paul by November 1. The earnings of the Road from local traffic on the completed portion constitute already a profitable business; and arrangements and connections are about perfected which will make it the Great Air-Line Route from Chicago to the North-West, effecting a saving of more than 100 miles over the present route. The Bonds are a First Mortgage on the road itself and on a valuable Land Grant of 1,000,000 acres. They bear interest in gold at the rate of 7 per cent per annum, and are sold now at 90 and accrued interest in currency by WHITE, MORRIS & Co., 18 Wall-st., and GWYNNE, JOHNSON & DAY, 16 Wall-st., where pamphlets and further information may be obtained.

☞ The attention of Railway Companies, Car Builders and Purchasing Agents, is called to the advertisement of Messrs. BRINCKERHOFF, TURNER & POLHEMUS, on our second page. This well known firm are Manufacturers of and Dealers in all descriptions of Cotton Duck for Car Covering and Car Seats. Office and Warehouse No. 13 and 15 Lispenard Street, New York.

☞ The double track on the Pittsburg and Connellsville road has been completed to within a short distance of Hazlewood. A large force of laborers is employed from Connellsville westwardly, and the most favorable progress in the laying of the double track at the Pittsburg end is being made.

☞ The contract for grading, tieing and ironing the extension of the Mendota and Prophetstown Branch of the Chicago, Burlington and Quincy railroad, from Prophetstown to Clinton—about 20 miles—has been let to Messrs. Grinnel, Wolf & Carpenter, to be completed by the 1st of January next,

Elizabethtown and Paducah Railroad.

Six thousand tons of extra English rails have been purchased for the Elizabethtown and Paducah (Kentucky) Railroad, and will be delivered in March next. This purchase of rails is sufficient to finish the main track and sidings to Paducah, and, it is thought, will secure the opening of the road its entire length by the last of June next.

Forty of the ninety-two miles of road bed from Greenville to Paducah are graded and ready for the iron, and upon the remaining fifty-two miles a very large amount of work has been done, with full force upon every section, and so vigorously has the work advanced in the last ninety days as to justify the statement that on the first day of January next there will not be fifteen miles of incomplete road-bed.

Track-laying has been resumed at Greenville, and is being pushed rapidly westward to the crossing of the Evansville, Henderson and Nashville Road. To facilitate the opening of the road to this important crossing, a large amount of rails are being delivered there, and track-laying will be pressed eastward from that point until it meets the track from Greenville.

Burlington, Cedar Rapids and Minnesota Railway.

The earnings derived from the 170 miles of the Burlington, Cedar Rapids and Minnesota Railway open to traffic, are as follows:

For the week ending August 7.....	$12 272 36
For the week ending August 14.....	14,206 54
For the week ending August 21.....	15,657 43
For the balance of the month.....	25,108 49
Total for August.....	$67,244 82
For the first week in September.....	$19,817 00
For second week in September.....	27,502 00

The average earnings of the road are about $6,000 per mile annually—the interest requirements only $1,400. The agents of the company, Messrs. HENRY CLEWS & Co., state that the extension of the road toward Mason City, which will be completed within a short time, will add 20 per cent. immediately to present earnings. They have for sale about $700,000 of the First Mortgage Bonds at 90 and interest.

☞ The Sacramento (Cal.) Reporter of 18th inst. says: "Twenty-two car loads of tea were sent East yesterday. A great and growing traffic in this commodity has sprung up between the eastern cities and this coast—the great door through which passes the commerce of the Orient to all the Atlantic side of our country. Within the past week 109 car loads have gone East, and there are yet some twenty more awaiting shipment in the same direction—all of it being the last invoice of tea from China and Japan."

☞ The contract for building the White Mountain Railroad extension from Lancaster to Northumberland, ten miles in distance, there to connect with the Grand Trunk line, has been awarded to S. S. Thompson of Vermont and John Lindsey of Lancaster. The road is to be completed by the first of July next.

☞ The Oneonta *Herald* says that ground will soon be broken on the Oneonta and Earlville road and the Rondout and Oswego road eastwardly at the same time, both being parts of a substantial whole, though for the present in charge of separate corporations.

Journal of Railroad Law.

RAILROAD COMPANIES—OBSTRUCTING THE OVERFLOW OF A WATER COURSE—RULE OF LAW.

The case of the Toledo, Wabash and Western Railroad Company *vs.* Hunter, *et al* (50 Ill., 325), was an action on the case by Hunter and McNeil against the Toledo, Wabash and Western Railway Company to recover damages arising from injury to a lot of cattle, caused by the waters of the Sangamon River overflowing the ground occupied by the plaintiffs, in a time of flood, such overflowing being the result, as is alleged, of the filling up by the railroad company of an open trestle work in an embankment of their road across the bottom land bordering upon the river.

The general issue was pleaded, and upon the trial much testimony was taken which it is not necessary to consider. The jury returned a verdict in favor of the plaintiff, assessing his damages at $6,500, and judgment was rendered thereon. The defendants thereupon took this appeal.

The following is the opinion of the Court delivered by

BREESE, CH. J.—There can be no doubt that filling up by the railroad company what was at one time an open trestle work in the embankment of their road over the bottom, retarded or obstructed in some degree the flow of the water in the time of a flood. At such time the river, not confined to its natural channel, spreads over a large surface, and must have vent somewhere. By filling up this open trestle work that vent was closed, and the water forced to the channel of the river under the railroad bridge and to the opening near it at the west end. Such portions of the water as could not escape by these passages accumulated above them, and this interfered with the cattle sheds built, as they were, upon low land a short distance above the bridge. That the plaintiffs were injured thereby to some extent is established by the proof, but it does not follow they have a right of action against the appellants for such injury.

It appears P. L. Howlett built and owned these cattle pens, and according to his testimony the opening in the embankment was filled up by the railroad company before appellees had any rights in the pens, and all the right they had was under the contract with him; he says: "My contract was to feed the cattle by the month, furnish all the slop they could eat and stable them at three dollars per month for each."

It is evident from this testimony that the pens were in the possession of Howlett, and to which appellees had not the shadow of a right. Their cattle were there under a contract with the owner to feed and shelter them by the month, at a certain price per head.

The parties to this contract knew when it was made that the river on which the pens were situated was liable to annual overflow, and appellees consented their cattle should be placed in them exposed to this annually recurring danger.

The case might be different had the culvert been filled up after appellees' cattle were put in the pens. As it is they acted with their eyes open and with full knowledge of the situation of the feeding place, and appellants have done nothing since appellees' rights accrued, whatever they may be, to injure them. Illinois Central R. R. Co. *vs.* Allen, 39 Ill., 205.

The embankment in which the culvert was placed and filled up by appellants was erected by the State in the prosecution of its system of internal improvements, as early as 1839, and it is in proof by several witnesses that the river in time of freshets in several years overflowed the ground where these pens were afterwards erected, three feet in depth, so that it is manifest filling the culvert contributed but little if any to the injury to the pens. Besides, from the plat introduced into the record, it appears that just above the railroad bridge and pens there are several large bends in the river which must effect materially the flow of the water in time of freshets, retarding it, and causing it to accumulate in volume at particular points.

The proofs in the case show an unfortunate location of the pens, and fail to show any act of the appellants causing an injury to appellees, for which they should be responsible to appellees. If there be a liability to any person, it would appear to be to Howlett, and not to appellee for the reasons we have given.

No right of action having been established against appellants, the judgment must be reversed and the cause remanded.

Judgment reversed.

Bridge over the Schuylkill River at Fairmount.

Owing to a difficulty in the former letting of the contract for the construction of this bridge, new proposals were advertised for, and lately opened. As a guide for other work of the same character, the tenders are given as follows:

Kellogg Bridge Company, Buffalo—Wrought iron, 7 cents per pound; cast iron, 5 cents per pound. Superstructure—two or three trusses, over a street, including lateral braces, $111 per foot.

Keystone Bridge Company, Philadelphia—Wrought iron, 8½ cents per pound; cast iron, 5¾ cents; cast iron balustrade, $9.50 per foot; cast iron railing pedestals, $35 each; do. column pedestals, $65 each; lamps and stands $90 each. Superstructure—two trusses, $750; road trusses, $100 per foot.

J. H. Coffrode & Co., Philadelphia—Wrought iron, 8¼ cents; cast iron, 5¼ cents; balustrade, $9; wrought iron railing, $6; pedestals, $35 each; column do., $85. Superstructure—two trusses, $900 per foot; road trusses, $100 per foot.

John W. Murphy, Philadelphia—Wrought iron, 9 cents; cast, 6 cents per pound; balustrade, $12; wrought railings, $9; pedestals, $75 each; column pedestals, $110 each. Superstructure—trusses, $910 per foot; road trusses, $128 per foot.

Phœnix Iron Company, Pa.—Superstructure—trusses, $792 per foot; road trusses, $112.24 per foot.

Baltimore Bridge Company—Trusses, $1,149 per foot; road do., $200 per foot.

The bridge will be a double deck bridge, with long approaches and a separate elevated roadway over the track of the Pennsylvania Railroad, at the west end. The streets now crossing this track at grade are to be changed so as to cross 24 feet above the rails. The work is intended to supply the place of the present suspension bridge, now unsafe by age, and will be a large and expensive undertaking.

☞ The contract for building the Schenectady and Susquehanna Railroad has been given to ex-Alderman Harrity, of Troy, who also has the contract for building the first eight miles of the Rhinebeck and Connecticut railroad from the Hudson river at Rhinebeck to Rock City. Work upon the latter road will soon be commenced.

Wicomico and Pocomoke Railroad.

The treasurer of this company, in his report for the fiscal year ending April 30, 1871, says that since the date of his last annual report he has received from all sources, including old balances on private subscriptions to the construction of the road, sale of bonds, loan, etc., etc., the sum of $27,105.32. Which, added to the balance in his hands at the date of his last report, ($2,656.98) will make the sum of $29,762.30, with which the Company is to be credited; and has paid out durnig the same period in liquidation of floating debt, payment of interest on bonded debt, operating and miscellaneous expenses, the sum of $25,813.90, leaving a balance in Treasurer's hands at this date of $3,948.40. The President is his report says.

We regret that a general view of the operations of the road for the past year does not present as favorable an aspect as we could desire, owing to the remarkable and unprecedented failures of our crops and the severe stringency in monetary matters pervading our entire section of country. The estimates given above show the net earnings to have been inadequate to pay the operating expenses and interest on the bonded and floating debt.

It is encouraging to know, however, that though the business was exceedingly light for the first three quarters, that sufficient has already been earned in the last quarter to meet the interest due July 1st, and that the funds have already been deposited in banks for this purpose.

☞ The Salisbury and Baltimore railroad, which branches from the Pittsburg and Connellsville railroad near Dale City, and extends for ten miles into the Castleman coal field beyond Salisbury, is so far advanced as to insure its completion by the 1st of November next. The company have commenced operations toward opening the coal mines on some of their lands, which are underlaid with the big or twelve foot vein of the superior bituminous coal so abundant in that region.

☞ The Milwaukee *Wisconsin* says that the first mortgage bonds of the Oshkosh and Mississippi Railroad to the amount of $240,000, have been signed by President Jenkins and Secretary Gary. They are made payable in New York to Russell Sage or bearer, on the first of July, 1891, at 8 per cent interest. The St. Paul company takes these bonds at 80 per cent. The first mortgage of the company to Russell Sage has also been executed.

☞ The Holland and Grand Rapids Railroad is being pushed forward rapidly, and the officers of the road think it will be completed by the 1st of December.

☞ The directors of the Plymouth County railroad have chosen James M. Jacobs President, Elias S. Beals Treasurer, and E. P. Fogg Secretary.

☞ The directors of the Terre Haute and Cincinnati Railway have elected Alfred Pleasanton President, vice N. M. McDowell, resigned. The latter retains the position of chief engineer.

☞ The Burlington and Missouri River railroad, from Plattsmouth, Nebraska, west to Fort Kearney, will be finished January 1, 1872.

☞ The Huntingdon and Broad Top Mt. railroad has leased the Bedford and Bridgeport railroad for one year from the 15th inst.

Virginia State Debt.

In answer to certain inquires of Baker & Co., of Winchester, in regard to the Virginia State Debt, Mr. Geo, Rye, Treasurer of Virginia, has written a circular letter on the subject, in which he says:

While we have no certain information in regard to the amount of the public debt when funded, we may reasonably expect that the amount funded by January, 1872, on which we will then have to pay interest, will not exceed $30,000,000. The interest on this, I mean two-thirds of it, which is what the funding bill provides for paying, will be $1,200,000. Of this one-half, say $600,000, will be payable 1st, January, and the other half, $600,000, will be payable 1st July, 1872. We cannot tell what amount will be derived from taxes this year, because the returns are not yet in. But the Auditor reports that, after paying all the expenses of the government for the current year, there will be on hand January 1st 1872, a balance of $1,500,000, derived from the taxes of 1870 and 1871. And this amount does not include certain large sums which it is expected will be derived from taxes on railroads and other corporation properties, nor the interest to be paid by the depositaries for the use of the State's money, nor some other such items. The amount in the Treasury this morning is $947,470 40, on which the State is receiving interest from depositaries (the Richmond Banks) at the rate of 4 per cent per annum, except $100,000. It is believed that the expenses of the State government will be materially decreased for the next year—it is certain that it can be done without detriment to the public interest. Our general conclusion is that the interest on that portion of the public debt on which interest will have to be paid under the provisions of the funding bill next year, can be provided for without any increase of the present taxation.

Atlantic and Ontario Railroad.

A meeting of the directors of this proposed road was held on the 21st inst. at Ballston, N. Y., when, the necessary amount $70,000 having been subscribed, the company was duly organized, and articles of association adopted. The following officers were elected: Col. T. C. Peck, of Ballston Spa, President; L. M. Crane, of Ballston Spa, Secretary; D. Hays, of Johnstown, Treasurer, H. R. Snyder, of Johnstown, Engineer; E. Appleton, of Boston, Consulting Engineer. The road is to begin at a point at or near Eagle Bridge, in Rensselaer county, and run thence westerly through Ballston to Salisbury, in Herkimer county, to a point at or near Oswego. The distance is seventy miles, and the road is to be constructed and eventually owned by Massachusetts capital. The survey is to be at once begun, so as to have the report and all documentary evidence ready to present to the Legislature of Massachusetts this winter. The object is to empty the produce of the great west into Boston through the Hoosac Tunnel, for the completion of which Massachusetts has expended $7,000,000.—*Albany Journal.*

☞ The Lansing (Mich.) *Republican* of the 14th says: "Last Monday regular trains commenced to run on the Peninsular Railway, between this city and South Bend, Indiana. The completion of this road to the latter place gives us communication with the Michigan Southern Railroad, and opens up another direct route to Chicago. The Peninsular connects at Charlotte with the Grand River Railroad; at Battle Creek, with the Michigan Central; at Brady with the Grand Rapids and Indiana; at Schoolcraft with the Kalamazoo Division of the Lake Shore and Michigan Southern, and at Cassopolis with the Michigan Air Line."

☞ The Directors of the Southwestern Pennsylvania Railroad Company, Thomas A. Scott, President, have awarded the contracts for grading, masonry and bridges of the entire road from Greenburg to Connellsville, Pa.

Chesapeake and Ohio Railroad.

The Huntington *Independent*, published at the Ohio River terminus of the Chesapeake and Ohio Railroad, speaking of that enterprise, says:

Mr. Carpenter, the Superintendent of track laying, has three sets of hands at work on this end of the road, and will finish about one mile a day. If no further hinderance interferes, this rate of progress will complete the road from Huntington to the Falls of Kanawha within thirty days. As soon as the cars are running from here to Kanawha there will be a daily line of passenger steamers connecting with Cincinnati, so that passengers can leave Kanawha Falls at dusk, taking supper at Huntington and breakfast in Cincinnati, transacting their business there, and returning to Kanawha with a loss of only one day's time, making the round trip in thirty six hours. Among the visitors here this week may be mentioned, C. P. Huntington, President of the Chesapeake and Ohio Railroad; Gen. William C. Wickham, Vice President; H. D. Whitcomb, Chief Engineer; H. C. Parsons, Director, and other officials connected with the road. Also Gen. Breckinridge, Vice President, Elizabethtown, Lexington and Big Sandy Railroad; Col. Trimble, President Southern Ohio Railroad; Col. Pryor, Locating Engineer Huntington and Cincinnati Railroad (known as the river route); Hugh Means and John Means, capitalists and iron manufacturers, from Ashland, and others. These gentlemen have met here for the purpose of consultation in regard to the proposed western railroad connection with the Chesapeake and Ohio Railroad from this point, and from all the information we can gather the Elizabethtown, Lexington and Big Sandy road is to be built at once. It is also rumored that Col. Trimble's road (the Symms Creek route) has been adopted as one of the connecting routes west. Mr. Huntington expressed himself as very much encouraged at the growth of the city since his last visit, and says that large manufacturing establishments will be erected here soon.

Boston and Maine Railroad.

The following are the assignments of the contracts on thirty-two miles of the extension of the Boston and Maine Railroad:

Bonnallie & Robbins, sections 6, 16 and 17, excepting the bridge and arch masonry; P. Maney & Son, sections 7, 10 and 11, grading, culverts and paving; Shannahan & Dolan, sections 8, 9, 19 and 20, grading, culvert, masonry and paving; Ward Brothers, section 10, grading, culverts and paving; J. A. Gordon & Co., all the work of sections 13 and 14; Andrews & Haines, all the work of section 15, masonry of sections 16, 17 and 18; Savage, Berry & Co., all the grading and masonry of sections 21, 22 and 23, arch and bridge masonry of sections 6, 7, 8, 9, 10, 11, 12 and 19. The Directors have ordered the remainder of the extension to be located at once and put under contract. All the grading and masonry to be finished by June 1, 1872.

☞ The earnings of the Indianapolis, Cincinnati and Lafayette railroad for July and August were $292,241; and the expenses, $160,159—leaving net $132,082. The unsecured debt of the road is $740,000. Of this there has been subscribed to be funded in 7 per cent. bonds $560,000. If the arrangements for the consolidation of this debt are carried out, as it now appears they will be, the figures of the cost of 171 miles of road, and the large real estate in Cincinnati, will be represented by a bonded debt of $10,200,000, with a stock capital of $5,625,000. A great deal of credit is due to Mr. M. E. Ingalls for his exertions in saving this property from bankruptcy.

☞ Charles A. Coombs has been appointed Superintendent of the Knox and Lincoln railroad.

Franklin Mining Company.

A circular has been issued to the stockholders of the Franklin Mining Company, announcing that the lease of the Franklin mine expired on the 1st of July last, and presenting a statement of the financial condition of the company at that date, as compared with the corresponding date of the previous year. On the 1st of July, 1870, the assets of the company were valued at $65,700 33, which included fuel and other supplies, costing $27,554 54, the full amount of which it was necessary to realize to enable the company to meet its liabilities, amounting to $65,534 28, leaving a surplus of only $157 05. The company's share of copper under the lease was 130,857 lbs., of which there has been sold 120,500 lbs., realizing $24,446 74. The balance 10,357 lbs. is at the present market price worth $2,278 24, making the net value of the mine's share of copper for the year ending July 1, $26,725 28. All the debts of the company have been paid except $208 88 in old drafts and claims so long outstanding that there is little probability of their ever being presented. The inventory of supplies on hand July 1 amounted to $5,267 74.

The assets of the company at date Sept 1, were as follows:—

Fuel and supplies at mine (about)		$4,500 00
Cash in treasurer's hands	$18,286 16	
Note due Sept. 15	530 00	
10,537 lbs. copper, net 22 cts.	2,278 54	
Estimated value of copper product of July and August	3,426 00	
		24,520 70
Total assets		$29,020 70

Liabilities nothing.

In accordance with authority given him by vote of the directors, the treasurer has renewed the lease with the same party, on terms considered more favorable to the company than the last. Immediately after the renewal of his lease, Captain Uren largely increased his force and the work of opening the mine has since been vigorously prosecuted.

For the present year the directors expect a profit at least equal to the past year, and having no liabilities and few expenses, have concluded to make a dividend of one dollar per share payable on the 20th inst.—*Boston Journal.*

Eastern Shore Railroad.

The two railroad projects of Somerset county, the one connecting Snow Hill with Berlin, which already has a connection with the main line of the Eastern Shore road at Salisbury, and the other connecting Newtown, at Westover, with the same main line, we are pleased to know are now "fixed facts." The track on the Snow Hill road is laid as far as Newark, or more than half way to the former point, and its general prospects are emphatically encouraging, and it is pleasurable to us so to state. The road connecting Newtown with the main line of the Eastern Shore road is also in a healthy condition, financially and otherwise. The iron has been purchased, to be delivered in Baltimore on or about the first of October, and pretty soon thereafter track laying will commence. But a few days ago the President and Secretary of the Newtown project called on Comptroller Woolford at Annapolis, who received them in his usual gentlemanly style, presented their proper vouchers and drew the whole of the State bonus legally guaranteed a few years ago.—*Newtown Gazette.*

☞ The Maine Central Extension railroad—Danville Junction to Cumberland station, 18¾ miles in length—is nearly completed, and will be ready for business the middle of October. The estimated cost of the grading, &c., made by the engineer, Mr. Thomas Holt, was $208,000; the actual cost, $203,500. The engineering expenses are some $7,000 less than the estimates. Hon. Anson P. Morrill has been chosen Vice President of the road.

The Mont Cenis Tunnel.

The Mont Cenis Tunnel may now be named with the Suez Canal, the Pacific Railroad, and the Atlantic cables, in recording the great enterprises begun and completed within the last fifteen years. Trains are now constantly passing through it, and on Monday, in the presence of a distinguished assemblage, it was formally opened.

The need of an unbroken highway between France and Italy has been strikingly obvious since the railroad lines approached their respective frontiers. Arriving by rail from Paris, the traveler bound for Italy hitherto proceeded from St. Michel, over the mountain, passing Modane, Lans le-Bourg, the Mont Cenis Hospice, and thence descending the precipitous slope by Molaretto, he reached Giaglione whence the railroad is open to Turin and all Italy. This journey enabled one to behold the sublime scenery of the Pass, but was wanting in the convenience and safety which the railroad, through the tunnel, now affords. Besides, it usually required five or six hours to accomplish the journey over the mountains, while by the tunnel route one may travel over the entire distance between Paris and Turin in 18 hours.

Upward of thirty years ago Sommeiller advocated the construction of a tunnel through the Alps, but his proposal was treated with indifference and incredulity. When, however, the great engineering triumphs in this country and Europe demonstrated its practicability it was resolved to attempt the great work. Several years were occupied in discussing plans and hearing objections until at length, in 1857, the work was actually commenced. Savoy was then a portion of the Sardinian Kingdom, and, apart from the general usefulness of the tunnel in forming a connecting link between the French and Italian railroad system, Victor Emanuel desired to establish speedy communication between the two distinct races which had constituted one people for more than ten centuries. Sardinia prosecuted the work as well as her feeble resources would permit until, the Italian campaign of 1859, by giving her Lombardy and losing her Savoy, rendered a new arrangement in regard to the project imperative.

Although called the Mont Cenis tunnel, the name is a misnomer, as the track selected is a considerable distance from that mountain. Leaving a point above the village of Fourneaux on the French side, 3,904 feet above the sea level, it strikes through the mountain at a point between the Col de Freius and the Col de la Rone, not far from that great clustering mass which bears the name of Mont Tabor, and from which the mountain chain stretches over Mont Ambin, and the little Mont Cenis to the Great Mont Cenis. The highest point attained by the tunnel is 4,377 feet above the sea, and 3,480 feet below the crest of the mountain overhead. From this point the tunnel slopes down to the other opening of the tunnel on the Italian side, at Bardonneche, 4,334 feet above the sea, at the top of a lofty glen of the same name, whence the railroad goes down to Ouix on the Dona Riparia, following the course of that valley by Salbertrand and Exilles, till it debouches into the wide open valley of Susa at Bussolino.

Incited both by her new obligations on annexing Savoy, and her cordial relations with the Italian people, France evinced in 1860 great interest in the Mont Cenis project, and showed an eager desire to hasten its completion. Accordingly an arrangement was entered into wherein strong inducements were offered to the sister nation to complete the great highway. The total expenses of constructing the tunnel amount to $13,000,000, of which sum the Victor Emanuel or Railway of North Italy contributes $4,000,000, which is to be paid on or before the opening of the tunnel. The French Government agreed to pay Italy $3,800,000 if the work was accomplished within twenty years, reckoning from 1862. But if the work was finished at an earlier date France bound herself to pay $100,000 more for every year gained upon the stipulated time. The incentive which France thus professed to afford has certainly attained its end. The work is now finished eleven years before the limit named, and accordingly France will have to pay $1,000,000, besides the $4,000,000 of the original stipulation. She also bound herself to pay five per cent. interest on the money due for the work as it proceeded from year to year. Had the construction continued beyond the stipulated term of twenty years, Italy would have lost $100,000 for every year in excess of that period.

The engineering difficulties were of the most discouraging character. The construction of a tunnel nearly eight miles long, where no vertical shafts for light or air or refuse were possible, where the work must be begun from each end, where the levels and the angles must be perfect to insure a meeting, presented a problem which even the boldest engineer might shrink from with alarm. All former experience in constructing tunnels was of little avail. The occasion demanded a man of genius gifted with the determination. This manwas found in Sommeiller, who, however, owed much to the inventions of his professional predecessors. M. Mans, a Belgian engineer, had devised a machine to cut rock, and this machine was to be worked with springs to cut the rock into blocks, and so do the work of many men. M. Calladon, of Geneva, struck the key of the position by suggesting the use of compressed air, but he had not the honor of showing how it was to be used as a motive power. Mr. Bartlett an English engineer, having invented an engine for boring, which was worked by steam, M. Sommeiller adapted it so as to be used by compressed air, and thus the means of boring the Mont Cenis Tunnel was secured.

Another invention, however, was needed to utilize all these triumphs of human ingenuity. The use of steam as a motive power was hopeless in so confined a space; the labor of human hands was equally hopeless in point of time; but with a wondrous adaptation of means to ends, the falling waters of the Alpine valleys were imprisoned to compress the air; the air was conducted along vast tubes as the cuttings advanced, and, after doing all the hard work for human hands, escaped from its imprisonment, and made existence possible for the very men who made this air a slave! The machine employed by M. Sommeiller weighed about 600 pounds, and bored a hole 1¼ inches in diameter and 3 feet deep in 20 minutes. Eleven of these machines were placed on a movable support, and could be worked at almost any angle. Three or four large holes were bored in the center of the heading, and round these other holes of the ordinary size, in all 80 holes. The large holes were only for the purpose of weakening the rock. The other holes were filled with explosive material, and were fired in succession and in detachments, beginning with those nearest the center, and working outward. The advanced heading was the only place where these machines were used; the enlargement, &c., were all performed by manual labor. The space thus excavated in the rocky sides of the Alps was 26 feet 6 inches wide, and 50 feet high, fully admitting of four separate lines of rails to traverse the tunnel. The daily progress in the work, after some time, showed a gratifying improvement. From half a yard a day, at first, the progress increased to more than 10 feet per day. Each yard bored cost not less than $1,000. The boring as described was repeated, yard by yard, until the entire eight miles was completed; the work becoming more arduous as the tunnel increased in length. Seventy yards of rock was displaced for every yard advanced, and this had to be removed to the mouth, while 25 cubic yards of masonry had to be built in the same yard of tunnel, with materials brought on the average more than ten miles.

One-half of the tunnel was completed in nine years (1866), the third quarter by the end of 1868, and the whole mountain mass, a thickness of 12,236 meters, or nearly eight miles, was pierced through from end to end before Christmas Day last year.

The constructing of the tunnel gave constant employment to about 2,000 men, who were provided with dwelling-houses along the banks of the torrent of Rochemolles. When at work in the tunnel, the men relieved each other every eight hours; in the workshops they did on the average ten hours' work daily.

All apprehensions of mephitic air in the tunnel, if they ever had any foundation, are by this time fully dispelled. A correspondent of a Lyons journal, who, recently went through the tunnel, says: The ventilation is excellent, and the current of air perceptibly felt; in fact, the heat was so moderate that an overcoat was not to be disdained. All the Swiss stories about heat intense enough to produce asphyxia are pure inventions.

The usefulness of the tunnel will be retarded for a while by the want of railroad communication between St. Michel and Fourneaux, a distance of about ten miles. The railroad now constructing will be complete in November, and it will then be possible to make an unbroken railroad journey between Paris and Turin. Since British mails have been sent to the East Indies via Brindisi, the French have regarded the opening of the Mont Cenis tunnel as calculated to impair the commerce of Marseilles. This is the reason why the French railroad companies have lost their early enthusiasm in regard to the tunnel, and allowed the ten miles of railroad to remain incompleted. When that short line is constructed, passengers and mails can be carried from Calais to Brindisi in something less than 60 hours. The Italians have shown a better comprehension of their true interests, and on their side everything is now ready for the most extensive traffic.—*N. Y. Tribune, Sept.* 19.

London and Port Stanley Railway.

The Toronto *Monetary Times* says the City Council of London, Ont., have reported in favor of leasing this line to the Great Western Railway Company on as good terms as they can obtain, so that the lease is pretty certain to be effected. By its proposed terms the Great Western is to pay an annual rental of $20,000 for twenty years, keep the road in good working order, supply it with the necessary plant, keep the tariff as low as it has hitherto been, allow a third rail to be laid (3ft. 6in. gauge), for the accommodation of the London, Huron and Bruce cars; to concede running powers to that line over the London and Port Stanley road; to erect car shops at London, and employ at that place at least 200 more men than they now do; to change the gauge of the road from 5ft. 6in. to 4ft. 8½in. at the expense of the Great Western; the road to be kept and returned at the expiration of the lease, in as good repair as it now is, &c., &c.

☞ One good effect of the recent agitation of the subject of improving the system of railway management in Massachusetts, has shown itself in the purpose of the Taunton Branch Railroad Company to attach the Miller (self-coupling and truss) platform to all their cars, and to increase the efficiency of the telegraph on the line of that road.

☞ The Albany *Journal* says that the party to whom the contract for building the Duanesburg railroad had been let, failed to connect, and in consequence the job has been given to Mr. N. I. Schermerhorn, at $247,000.

☞ The Mount Tom and Easthampton Railroad bed lacks but little of completion from the former place to Williston's mills, and the iron will be laid in a few days.

☞ The earnings of the Baltimore and Ohio railroad for August, 1871, were $1,147,496 33; in August, 1870, they were $994,540 03—an increase of $152,956 30.

☞ Track laying has been commenced on the extension of the Belfast and Piscataquis railroad to Guilford.

☞ TRUNK LINES AND LAND GRANT RAILROADS.

We desire to invite the attention of careful and conservative investors to a few facts of vital importance to them in making their investments. The General Government has long since ceased to be a borrower of money, and on the contrary for a long time has been buying and cancelling its bonds. Recently the Secretary of the Treasury, in addition to the regular monthly purchases of Government obligations, called in $100,000,000 of 5.20 bonds. Under these circumstances investors have been compelled to look elsewhere for a profitable investment for their capital, and the first mortgage bonds of American railways are now the favorite security. The purchases of bonds by the Treasury have advanced the price of Government bonds to a point where they pay a comparatively low rate of interest. The greatest success in American railways can be found in the history of those roads known as Trunk Lines, which combine the benefit of through and local traffic. The gross earnings of the leading trunk lines of railroads in this country form a striking illustration of the above fact, as will appear in the following statement of their earnings for 1870:

New York Central	$22 363,319
Erie	16,179,461
Pennsylvania Central	17,531,707
Baltimore and Ohio	9,371,427
Lake Shore	13,457,540
Ohio and Mississippi	3,188,137
Toledo and Wabash	4,544,640
Hannibal and St. Joseph	3,340.224
Union Pacific	7,625,277
Central Pacific	7,920,710
Total for ten roads	$105,522,442

The St. Joseph and Denver City Road is already constructed from St. Joseph to Marysville, from thence far into Nebraska, and is being rapidly completed to Fort Kearny, on the Union Pacific Road. The St. Joseph and Denver City Road will shorten the distance between the Atlantic and the Pacific coast from 80 to 232 miles, according to the different routes named above. The ten leading trunk lines of road mentioned in the preceding table comprise but a part of the railroads that will contribute to the passenger and freight traffic of the St. Joseph and Denver City Road, which is destined to become the new short line between the Atlantic and Pacific States, and which must share liberally in the enormous business represented by the grand total of $105,522,442, gross earnings of the ten leading trunk lines, in the above statement. This of itself is sufficient security for the payment of the interest and principal of the 8 per cent. first mortgage sinking fund land grant bonds of the Company, Western Division, now on the market.

But as a great additional security the Company has a United States land grant of 1,500,000 acres of the richest agricultural lands in the West. In previous communications to the public we have taken occasion to advert to the great value of land grants to railroad companies, and will now only mention the fact that the land grant of the St. Joseph and Denver City Railroad Company is worth over $18,000,000 at the present price of the lands of the Illinois Central Company. The lands cannot be sold for less than $4 per acre, and the proceeds of the same are applied to the sinking fund for the extinguishment of the bonded debt of the Company. This loan was originally for $5,500,000, but has been largely reduced by sales to investors, including many shrewd business men who know and appreciate bonds which combine liberal income with great security.

The bonds are for the present offered at 97 1-2 and accrued interest, and we have no hesitancy in recommending them as an investment securely guarded both as to interest and principal. Parties desiring to participate in the division of the remaining balance of the loan are requested to make early application, in view of the possibility of an advance in the price of the bonds. The bonds of the Eastern Division of the St. Joseph and Denver City Railroad Company were originally marketed by our firm at 97 1-2, and are now current in the market at 102. We continue to deal in these bonds the same as Government bonds good opportunity to convert their Governments and other securities. Investors will find this a and other high-priced bonds, with the advantage of a higher rate of interest and perfect security. Maps, pamphlets, and full information in regard to the Company can be had on application.

TANNER & CO., Bankers,
No. 11 Wall Street.

The Pencoyd Iron Works.

These works, located at the Falls of the Schuylkill, near Manayunk, Philadelphia, on the line of the Philadelphia and Reading Railroad, make a specialty of rolled and hammered car and locomotive axles and line shafting. These works were built in 1851. The working force is now 220 men, there are fourteen puddling and five heating furnaces, three 3000 pounds steam hammers, and one 1000 pound steam hammer. All the work is moved about by surface and elevated railways. They turn out 1200 axles per week, and 8000 tons shafting annually. All these axles are sufficiently tested to insure their excellence, and they stand deservedly high among railway men.

☞ The work of building a railroad between Port Limon and San Jose, Costa Rica, has been confided to Henry M. Keith, Esq., late general superintendent of the Callao, Lima and Oroya Railroad, Peru, and his departure for Central America on that mission was made the occasion of a banquet in his honor in Callao, on the 12th ult. The employees of the last named road and residents thereon have also made up a handsome fund, which has been forwarded to our fellow citizen, W. R. Grace, Esq., in order to procure a service of silver plate as a testimonal of their esteem, for presentation to Mr. Keith.

Michigan Central Railroad.

The earnings of this road for the years ending May 31, 1870 and 1871, have been as follows:

	1870.	1871.
From passengers	$1,914,921 75	$1,738,181 38
" freight	2,634,438 87	3,072,557 58
" mails	41,884 68	48,283 82
" miscellaneous	116,042 67	119,047 37
	$4,707,287 97	$4,978,070 15
Expenses, viz:		
Repairs of road	$715,759 05	$852,506 87
" buildings	160,862 28	158,777 85
" locomotives	266,415 03	271,562 76
" cars	271,650 40	413,403 56
Locomotive service	147,252 14	172,482 06
Train "	159,753 18	190,304 24
Station "	627,816 41	709,372 87
Fuel	364,840 80	471,731 25
Oil and waste	54,908 69	64,362 18
Stationery	44,615 45	37,544 47
Taxes	114,083 96	82,724 27
Telegraph	38,976 81	38,585 11
Miscellaneous	49,006 75	74,847 46
	$3,013,914 95	$3,538,204 45
Net earnings	$1,693,373 02	$1,439,865 70

Compared with the previous year the gross earnings show an increase of $270,782 18, with an increase in expenses of $424,289 50—making the decrease in net earnings $153,507 32.

The earnings from passengers show a decrease of $176,740 37, and the earnings from freight, an increase of $438,118 71, with an increase in miscellaneous of $9,403 84.

Passenger earnings per mile were $6,120 35, freight, $10,818 86, miscellaneous, $589 19—total, $17,528 40, an increase compared with the previous year of $953 46.

The expenses of operating the road (not including taxes) were $3,455,480 18, or 69.41 per cent. In 1870, they were 61.6 per cent., in 1869, 59 per cent., in 1868, 48.38, and in 1867, 62.81. The expenses, including taxes, the past year, were 70.3 per cent., against 64.3 per cent. in 1870, 61.21 in 1869, 60.71 in 1868, and 65.35 in 1867.

The following is a comparative statement of the earnings of the entire line, including branches, for the fiscal years ending May 31—

	1870.	1871.
Passengers	$1,914,921 75	$1,912,278 07
Freight	2,634,438 87	3,329,630 70
Miscellaneous	157,927 35	178,214 62
	$4,707,287 97	$5,420,123 39
Operating expenses	$2,899,830 99	$3,774,850 51
Taxes	114,083 96	86 160 84
	$3,013,914 95	$3,861,011 35
Net earnings	$1,693,373 02	$1,559,112 04

The ratio of expenses to earnings in 1871 is 71.11, against 64.08 in 1870; exclusive of taxes, 69.98 in 1871, against 61.60 in 1870. The President in his report says:

The gross earnings this year cannot justly be compared with those of last year, because, since the last report, this company has been operating the Grand River Valley Road under a lease, and the earnings of that road are included, as they will be in the future, in the reports with the gross receipts of the company.

The Kalamazoo and South Haven Road, also, during a part of the past year, has been so operated, and its earnings also included in the above statement.

The operating expenses of these roads have also been included in the operating expenses above stated.

The gross earnings of the Main Line, which alone can properly be compared with the last year's earnings, have been in excess of those of that year by $270,782 18; while the gross earnings of all the lines operated have been in excess of those worked then by $712,835 42. It will be seen, however, that the gross expenses have exceed those of last year by $847,096 40, leaving as net earnings below those of last year, $134,260 98.

The gross expenses of operating the road, therefore, have been, in proportion to earnings, much larger than they were the year before. This has resulted from a combination of causes not likely again to occur. The increase of tonnage, or of the volume of business, in the first place, was so great that the road and its sidings had become inadequate to the demand upon them. The number of trains was greatly in excess of those of any previous year, and of any anticipation of the managers, and there was not provided, as there should have been, a sufficient quantity of sidings for their passage, which led to great difficulty and delays, and increased expense by reason thereof. The great number of trains, and the weight of the business, and the high degree of speed for passenger trains were such that the iron rail gave way very rapidly, and compelled renewals, at great expense, in the most difficult season of the year for such work. Large quantities of iron and other material for the construction of new roads, have been passing over the road at low rates of freight, and, during about six months of the first part of the year, in consequence of disagreements between the New York Central and Pennsylvania Roads, the rates on West-bound business were totally destroyed, and that business, during about that long period, was done for about the cost. Some of these causes have resulted in greatly diminished earnings below what they would otherwise have been, and all of them have contributed to enhance the operating expenses unduly in proportion to the gross earnings. All of them will not be likely to be at work at the same time again. The weight of business passing over the road, and the consequent rapid wear of the iron rail, have proved that the use of the iron rail on the Main Line is not true economy. There have been removed and repaired, in the main track, during the year, one hundred and four miles of rail, of which fifty-nine and a third miles have been re-rolled, and about forty-four miles taken up, repaired and replaced in the track. With the large traffic passing over it, the life of the iron probably cannot be, at the outside, more than three years, while the experiments tried by this company, as well as by others, furnish conclusive proof that the steel rail of the quality we have heretofore used, will average at least ten times as long as the iron. The cost of the steel in the track is about one-third greater than iron.

Under these circumstances the Board have resolved to lay the whole distance between Detroit and Jackson, where the business of the road from its various lines comes upon one track, with steel rail, which work is now going on, and will be mainly accomplished during the present year; and upon the same portion of the road there will also be laid ten or more miles of additional sidings. This will not only give the means of doing the business of the road between Jackson and Detroit, where it crowds the most, with despatch, but will it is believed, for many years relieve the company from one of its largest charges in working the road, viz.: the renewal of the rails where they are most liable to deterioration.

From Jackson, west, the company has a double line of road to Niles, upwards of one hundred miles, the old line by the old route and the Air Line direct from Jackson to Niles, and at some points south of the old road about thirty miles.

This Air Line is laid, all the way, with rails from the Scranton Works in Pennsylvania, which are of iron of harder quality than almost any in this country.

The road is free from grades or curves of any importance in its working, and the heavy through business of the road will, to a large extent, pass over it.

The road is better able to bear the burden, and will relieve the other line of much of the very heavy traffic.

In the future, therefore, it may reasonably be expected that the annual cost of one of the largest items in the expense of the management will be very largely reduced, while the permanency and better quality of the rail will also have a large effect in reducing the cost of the maintenance of machinery and rolling stock.

The completion of the Air Line, from causes beyond the control of the Board, has been delayed beyond expectation, and has cost, we regret to say, considerably more money, also, than was anticipated.

By the terms of the agreement with the Michigan Air Line Railroad Company, that company was to complete the road as a first-class road in all respects, according to specifications, with all its appurtenances, and this company was to become the lessee of it at such rent as would pay the interest on bonds secured upon the road at the rate of $18,000 per mile, excepting that this company was to build the station-houses and pay all they might cost over $50,000.

The Air Line Company relied upon the bonds of the municipalities through which the road runs, to aid it in the construction. The decision of the supreme court of Michigan, that all such bonds were invalid, deprived it of much of its means and the result was, that before the road was complete the other means provided were exhausted. The deficit, under the circumstance, could only be supplied by this company.

The amount has been in excess of the amount of construction bonds secured by mortgage on the line between Jackson and Niles, and may exceed it by $200,000.

It is an excellent road, the road-bed is well made and well ballasted and tied, and in all its appointments the road is one of the best class. The country through which it runs is equal to any in the State, and well cultivated. It has yet been hardly opened fully for use, though trains are running over it. By July 1st the fencing will be in full operation, though some station-houses will remain yet to be completed. It is yet permature to state what will be its value.

The decision of the supreme court also affected the means of the Kalamazoo and South Haven Railroad Company in the same manner as above stated relative to the Air Line, and that road has only been completed since the opening of the spring.

Its mortgage debt is about $18,000 a mile, and the road is leased by this company with an agreement to pay the interest on the bonds. It cannot yet be said what will be its value. It runs through a lumber as well as to some extent a farming country, and makes connection with the Chicago and Michigan Lake Shore Railroad about thirty miles west of Kalamazoo, with which it will interchange, and from which it will derive much business.

The Grand River Valley Railroad, which came into the possession of this company under an agreement to work and manage it at a fixed compensation to its stockholders, about the time of the last Annual Report, in an unfinished condition and, though trains were then running over it, hardly in order to do business, has since been completed in its appointments and is, and has been most of the year in good order and is developing a healthy and steadily increasing business, and promises to become of much value to this company.

Since the last report there has been built and opened for business a road branching from the Michigan Central to Hillsdale, sixty miles long, through an excellently cultivated and fertile country, and though this company is in no way pecuniarily interested in that road and it will be managed by its stockholders, yet it cannot but be tributary to the business of this company, over whose road its business must pass for thirty miles, to Detroit.

The Fort Wayne, Jackson and Saginaw Railroad, also, has been opened from Jackson, through, to Fort Wayne.

The Chicago and Michigan Lake Shore Road, from New Buffalo along the shore of Lake Michigan north to Muskegon, Whitehall and Montague, about 150 miles, is about being opened for business.

Both these roads will contribute to increase the business of this company.

The stimulus which has been given to enterprises of all kinds by the success which has attended many, and by an abundant currency, will continue until some revulsion in the finances of the country shall take place.

There are multitudes of projected roads in this State, and some of them are building, but the Board do not in any of these see anything which should tempt the company to any connection with them. So far as possible, it has controlled those most likely to injure it, when built, and which might, if controlled by it, become tributary to it. The policy, even to this extent and from such motives, may be hazardous, and whether wise yet remains to be proved.

It remains now to fully equip the roads for business and make perfect the Main Line, and be prepared to do all the business passing upon them with the utmost possible economy, and though other roads building and to be built will more or less affect its business, it is believed that its rapidly increasing volume, with diminished expenses, will enable the company to realize a larger net result than in the past.

There have been put upon the road during the past year 19 new locomotives, and, including 9 from the Grand River Valley Road, the whole stock upon the road at this time is 128.

There have also been added to the rolling stock 52 Blue Line Cars, 212 freight cars, making freight cars now on the road 1,914.

There has been expended for land at Jackson, to be used for repair shops, $23,911 31, and at Grand Rapids, for depot grounds for Grand River Valley Railroad, $37,204 95.

The whole amount expended for all the various purposes in construction and addition to the property of the company, including expenditures upon the Air Line and Grand River Valley Division, and for the additional cars and locomotives, has been the large sum of $973,682 69—of which there has been for locomotives, $196,344 80; and for cars of all kinds, $160,798 00; for additional sidings, about $62,000 00.

Except for additional motive power and rolling stock, and such amount as may be proper to be charged to construction on account of re-laying the track with steel, it is believed that all such, or nearly all such expenditures will be unnecessary in the future.

The funded debt charged upon the Michigan Central Road proper is now	$3,324,988 89
Less the amount in sinking funds	1,474,383 38
Net bonded debt	$1,850,605 51
The capital stock now stands at	$14,665,848 00
The bonded debt is	3,324,988 89
Bonded debt and stock together	$17,990,836 89
Or, less the amount in sinking fund	1,474,383 38
	$16,516,453 51

The stock has been increased since last year by $1,139,000, made necessary to meet the cost of the various works herein alluded to, and by $301,000 by conversion of bonds, in all, $1,440,000.

In addition to this, however, are the amounts of the bonds secured upon the tributary roads herein mentioned, viz., bonds, bearing eight per cent., on the Grand River Valley Road, $1,500,000, bonds secured on Air Line from Jackson to Niles, $1,900,000, bonds on Kalamazoo and South Haven Road, $710,000, bonds on Joliet Branch, $800,000.

Though this company is not directly liable for all these securities, yet they rest upon roads worked by it, either under leases or working arrangements, which are equivalent to them.

The establishment, a few years ago, of through lines of cars for freight has resulted in working a rapid and permanent change in the business of railroads. It avoids, very much, both the expense and delays in transportation between the distant sections of the country. It enables them to compete more successfully with the water communications and has brought large accessions to the business of the roads.

On the Michigan Central, during the past year, the increase of tonnage has been more than thirty-four per cent., and it has been impossible to enlarge our facilities and means for doing it, sufficiently fast to keep pace with it.

This increase of the volume of business is, however, encouraging to stockholders, and upon the road of this Company, with double lines more than a third of the way between Chicago and Detroit and with steel rails from the point where the two lines come together to the Eastern terminus, and ample double track or siding to accommodate the trains, it seems reasonable to expect, not only very largely increased earnings in the future, but also very largely diminished expenses, as compared with the past.

The improvements making in the track which have been and will be expensive are, however, indispensable, and with the constant effort to get shorter lines by all rivals, the Air Line was a necessity as well as a convenience in doing business.

This line, shortening the diitance as it does between Detroit and Chicago, and the Loup Line in progress of construction by the Great Western Railway Company, securing the shortest possible line to Buffalo and connections with all the roads there, gives to the two companies as short and direct a line between Chicago and Buffalo and the Bridge and consequently between Chicago and the seaboard, as can possibly be made on either side of Lake Erie, and with greatly more advantages than can be acquired by any other line of roads, while it will be entirely free from the heavier grades and sharper curves found on the roads further south and passing across the mountains. The arrangements made more than a year ago between this company and the Great Western, for a more harmonious working of the roads of the two Companies, have been productive of much good to both and may wisely be continued.

The cordial understanding has enabled the two Companies to work with more unity of purpose, and it will be in future, as it should be, the purpose of the managers of both to regard the interests of the whole line as one, and there seems to be no season to doubt that both may work together as effectually as if the lines were consolidated, which should be their great object. The purpose of a consolidation and all its beneficial effects, it is hoped, may thus be obtained while the objections will be avoided.

It gives great pleasure to state the improved condition of the Great Western Road within the past year.

Its track is now equal to that of any in this country, and it is managed with a degree of vigor, and with a regularity and punctuality, so far as its trains are concerned, to which it has never before attained, and quite equal to the best managed roads of this country in all these respects. It cannot fail, so managed, to add to the strength and popularity of the whole line.

The joint traffic with the Grand Trunk Road has continued to increase, and the equipment now on that road for through business, and the strength the line is acquiring in consequence of it, is giving to that business a value which all the time increases in importance.

The connection made by the Erie Road at the Bridge, with the Great Western Road, during the past year, is an important event for the North Shore line of roads.

By the road built by it from the Bridge to Buffalo, live stock and other freight is sent through without change of cars. It will become an important avenue of traffic, through as well as local.

The total number of passengers carried during the year was 814,493, of whom 139,280 were through, and 675,213 way. Total number of tons of freight moved, 1,105,875.

Income Account.

Balance from previous year	$895,722 72

American Railroad Journal.

Saturday, October 7, 1871.

Stock Exchange and Money Market.

Money has been generally in quite active request for speculative and mercantile purposes, and rates have been quoted strong, on a less liberal offering of funds, on both bank and private account. The outflow of currency to the interior has been moderate in amount, and less seriously felt by the city banks. Up to Wednesday, the U. S. Sub-Treasury had reduced its currency reserve nearly two millions, while adding considerably to its specie balance, through receipts from customs. The Treasury programme, relative to Gold sales and Bond purchases, for October, has been received with favor. At the close, the market seemed more comfortable for the borrowing interest. The current rates have been from 5@7 generally 6@7 per cent. in a temporary form, and at 7@10 per cent. per annum on choice to fair business credits. The city banks, in their latest return, made a rather more conservative exhibit, showing a reduction of $3,156,000 of legal tender notes, with a gain of $3,558,200 of specie, and a decrease of $8,989,400 of deposits; also a reduction of $7,808,000 in their loan and discount averages, and an increase of $52,600 in their item of circulation. The city bank exchanges, last week, averaged $92,852,954; and thus far, this week, 97 millions daily. The banks now hold only $3,804,650 of specie and legal tender notes, in excess of the 25 per cent. of their liabilities required by the national banking Act, showing a gain of nearly 2¾ millions, for the week.

The specie reserve of the city banks according to the latest return is $13,130,300, against $13,272,981 same time last year. The city bank deposits are now $228,138,000 against $191,055,574 week ending Oct. 1, 1870. The legal tender reserve amounts to $55.272,300 against $51,084,092 same time last year. The circulation now stands at $30,253,800, against $32,718,199 same time last year. The loans are now $301,356,100, against $266,286,601 at this date last year.

Government revenues have been up to a fair average since our last. The excises yielded last week about 2½ millions, and thus far since July 1, about $36,146,469. The customs at the port of New York, last week were $3,408,602; and at the outports, equal to about a million more, all in coin, or coin certificates.

The Treasury Department holds in trust as security for national bank circulation, United States bonds for $365,940,350; and as security for deposits of public money, United States bonds for $15,655,500. The aggregate of the outstanding circulation of the National Banks of the country is $324 millions.

During the week the Treasury office bought in $5,000,000 United States 5-20s, and sold $2,000,000 Gold. It received $3,408,000 in Gold for Customs.

The Public Debt exhibit for Oct. 1, shows a liquidation of $13,458,621.

The U. S. Sub-Treasury receipts in September were $60,221,171, including $18,280,895 from customs; payments, $51,817,461, including $4,808,838 of coin interest.

Gold has been offered more freely, and has been in less active request, particularly on speculative account, at easier rates. The export drain has been light, while the customs call has been up to a fair average. The range of the price during the week, has been from 113⅝@115⅛, and the closing quotation on Wednesday was 113⅞@114 against 114¾ the preceding Wednesday. The specie outflow, last week, was $483,601; on Tuesday of this week, $10,082; and on Wednesday $140,212. The Gold Exchange Bank clearances have been as follows: Sept. 28, $48.716,000; Sept. 29, $6,726,000; Sept. 30. $76,068,000; Oct. 2, $62,419,000; Oct. 3, $54 502,000; Oct. 4, $79,947,000.

Government disbursed through the U. S. Sub Treasury here, on account of the coin interest on the public debt from Jan. 1, to Sept. 30, 1871, $65,571,012, against $66,777,739 same time in 1870.

The export drain of specie was $483,601 last week, against $465,258, same week preceding year The shipments since January 1, 1871, have been $57,527,703, against $48,874,362 same time in 1870.

The customs demand for Gold last week, averaged $568 100 a day; thus far, this week, it has averaged $600,000 a day, or equal to a weekly aggregate of $4,200,000. The arrivals of specie from Europe, Havana and other foreign ports last week, were $114,659, and since Jan. 1, 1871, $7,802,913 against $8,239,889 same time in 1870. The total customs revenue of the Govern-

ment, in coin, at this port, since January 1, 1871, has been $122,692,769 against $111,030,136 same time in 1870.

Foreign exchange has been comparatively quiet, and, most of the week depressed and irregular though closing much sharper with a better inquiry. Bankers' sixty day bills on London closed on Wednesday at 108½@108¾; sight bills on London, 109¼@109½.

The produce exports from this port, week ending with Oct. 3, were to the currency value of $5,558,596.

Government securities have been quite scarce in the open market and strong and buoyant as to price, with a good inquiry for the coin bearing issues.

Under the Treasury Department programme for October, Government proposes to sell at least eight millions of Gold, as follows: Thursday, Oct. 5—Two Million. Thursday, Oct. 12—Two Millions. Thursday, Oct. 19—Two Million. Thursday, Oct. 26—Two Million. And to buy in, at least, eight millions of Five-Twenties, as follows: Wednesday, Oct. 4—Two Million. Wednesday, Oct. 11—Two Million. Wednesday, Oct. 18—Two Million. Wednesday, Oct. 25—Two Million.

On Wednesday, Government bought in two millions of Five-Twenties at 112 79@112 98 nett. The amount of bonds offered was $8,611,750 at from 112 79@113 34.

U. S. sixes of 1881 closed here on Wednesday of the current week at 117¾@118; U. S. Five-Twenties of 1862, 115⅝@115⅞; U.S. Five-Twenties of 1864 at 115⅜@115⅞; U. S. Five-Twenties of 1865, 115⅝@115⅞; U. S. Five-Twenties of 1865 consolidated, 114½@114¾; U. S. Five Twenties of 1867, 114⅝@114¾; U. S. Five-Twenties of 1868, 114¾@115; U. S. Ten-forties at 111½@111¾; U. S. Six per cent. currency bonds, 114½@115.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Sept. 20.	Sept. 27.	Oct. 4.
Consols	93⅜	92⅝	93 3/16
U.S. 5-20's of 1862	93⅜	92⅝	93⅛
U. S. 5-20s, 1865	——	92⅞	93¼
" 1867	92½	92	93⅛
" 10-40s	90⅜	89¾	90⅛
Erie	25½	25	25⅛

The new Funding Five per cent. Loan was quoted in London on Wednesday at 1⅜ per cent. discount.

State bonds have been in moderate demand at fairly supported prices.

Railway bonds have been more sought after chiefly for investment purposes at strong prices. Central Pacific Sixes have been readily taken at 102¼@102½. Chesapeake and Ohio Sixes have been in good request for home investment on the basis of 93 per cent. and accrued interest. Less than four millions of this Loan remains to be placed and the present prospect is that the balance will be speedily disposed of.

The St. Joseph and Denver City eight per cent. gold bonds have been quite actively sought after at the established price of 97½ and accrued interest.

Railway and miscellaneous share property has been fairly active, but variable as to price.

General business has been moderately active, with a firmer market noted for the leading articles, though leaving off less buoyantly. Middling upland cotton closed on Wednesday at 20¼ cts. per lb. The receipts at all the ports, since Sept. 1, have been 98,809 bales, against 155,401 bales same time in the preceding year; exports 88 400 bales, against 21,950 bales in the previous year; stock at the ports at latest dates, 100,293 bales, against 106,013 bales same date 1870.

At the Live Stock Markets, Beeves have been in moderate request at from 6@13 cts.; Veals at 4@10½ cts.; Sheep at 4@6½ cts.; Lambs at 6 @8½ cts.; Swine, 5½@5⅞ cts per lb., all live weight. The week's receipt were 6,826 Beeves, 2,159 Veal Calves, 30,720 Sheep and Lambs; and 16,582 Swine.

Foreign goods continue in fair request and generally steady as to price. The week's imports of foreign goods reached $6,884,432, including $2,569,659 of dry goods.

Ocean freights have been less active, and rates have been rather less firm.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Alabama 8s, 100½; do., 5s, 69; North Carolina 6s, special tax, 17; do., Fund Act, 1866, 35; South Carolina 6s, new, Jan. and July, 51; do. Transportation from the Far West to the Seaboard.

The Boards of Trade and the newspapers of the principal Western Cities have long been waging a wordy war as to the claims of their respective routes for transporting heavy products from the Far-West to the seaboard. Chicago, happy in her lake navgation, has been ridiculing the river trade of her rivals; while at the same time complaining of the exactions of the canals and railroads across this State. St. Louis, in like manner, has clung to her scheme of shipments by way of the Gulf until the railroads have brought about a degree of comparative equality with her sister, but envious, city. The truth, we suspect, is that there as disabilities attending both the extreme northern and extreme southern lines of transit. The lake navigation is interrupted by ice and storms for about half the year, and is attended by certain appreciable risks and expenses, like that via New Orleans, which go far to neutralize the greater economy of water carriage over-land transportation for equal distances.

The St. Louis *Republican*, alluding to the completion of the Chesapeake and Ohio Railroad and its connections, via Louisville, as another superior and competing line to the seaboard, claims that by making use of the Ohio river from its confluence to the mouth of Guyandotte, they will have a cheap and reliable water-route as a complete off set to the lake routes, which are the boast of Chicago. Between Cairo and Huntington, the river terminus of the Chesapeake and Ohio Railroad, 650 miles, the Ohio is at all times navigable, and with scarcely an interruption, for boats carrying 200 tons; while the lake navigation is attended with more or less risk, and is closed by ice or storms for about half the year. Freights transferred to the new railroad line at Huntington will have a very easy line (80 feet maximum grade) to tide water of about 450 miles; the same distance as the lines from Dunkirk, Buffalo, or Ogdensburg to New York.

There is more in this scheme than at first meets the eye. Students of this problem will remember that twenty years ago a distinguished civil Engineer, Charles Ellet, proposed to make of the Ohio River, below its confluence with the Great Kanawha, a navigable and manageable canal, 700 miles in length. The plan was urged then on behalf of navigation alone, but has since attracted fresh importance as a means of equalizing at the same time, the alternate drouths and floods which characterise the Mississippi and its chief tributaries. His plan was to construct, at favorable points in the mountains of West Virginia, reservoirs of capacity sufficient to store up the overabundant floods, which being released in the drier seasons would afford five feet of water in the Ohio throughout its longest drouths. He made surveys and calculations of the cost—which was comparatively insignificant—and fixed the sites of the necessary dams on the head waters of the Kanawha.

It is noticeable, however, that boats of 200 tons burthen can make trips from Cairo to the mouth of Guyandotte with great regularity, all the year round; and there is hardly an interruption to the steamboat navigation, summer or winter, below the western terminus of the Chesapeake and Ohio Road. This road must have a great advantage, therefore, in touching the Ohio at the head of reliable navigation, and in possessing one of the shortest and easiest portages over the Allegheny elevations to the Atlantic coast. By this route St. Louis would have 850 miles of cheap, reliable and inexpensive river carriage, and a haul of 420 miles of railroad transportation, to reach the navigable waters of the Chesapeake, against the 900 miles of lake navigation during half the year, and a railroad haul of 440 miles, which Chicago makes a matter of boast. By continuing the river cargoes up the Kanawha, to the Falls of that stream, the proportions of the Ohio Route would be changed to 970 miles of river, and 325 miles of rail. Chicago, could, however, avail herself of the easy grades of the new line, and thus place herself nearer to the Atlantic in point of grades and miles, than by the more circuitous route of the Lake Shore. The whole region of the Southwest together with the important cities of Louisville, Cincinnati, and the manufacturing districts above and around them, are interested in the completion of this new Trunk line; and the latest information shows that an influx of capital and population is pouring into the mineral regions of West Virginia adjacent to the Chesapeake and Ohio Road.

☞ The West Wisconsin Railway is now very nearly finished, and trains will be running through from Tomah to St. Paul by November 1. The earnings of the Road from local traffic on the completed portion constitute already a profitable business; and arrangements and connections are about perfected which will make it the Great Air-Line Route from Chicago to the North-West, effecting a saving of more than 100 miles over the present route. The Bonds are a First Mortgage on the road itself and on a valuable Land Grant of 1,000,000 acres. They bear interest in gold at the rate of 7 per cent per annum, and are sold now at 90 and accrued interest in currency by White, Morris & Co., 18 Wall-st., and Gwynne, Johnson & Day, 16 Wall-st., where pamphlets and further information may be obtained.

☞ The Ellicott City *Times* states that the Baltimore and Ohio Railroad Company have a portion of their engineering corps engaged in surveying the long projected and much talked of "cut off" at Elysville. A branch road, it is said, will be constructed to run from that point direct to Baltimore, to be used exclusively by the through express and fast line passenger trains.

☞ CHESAPEAKE AND OHIOS—FIVE-TWENTIES—CENTRAL PACIFICS.

Banking Office of
FISK & HATCH,
No. 5 Nassau-st., New York, Oct. 2, 1871.

Very many holders of Government Bonds are debating in their own minds whether to sell out while they can realize a handsome premium on their bonds, or to exchange them for other first-class securities bearing the same rate of interest, which may be had at much less price. We have been exchanging large amounts of late for Chesapeake and Ohio Six Per Cent. Gold Bonds, and also for the Central Pacific Sixes.

Of the Fifteen Million Chesapeake and Ohio Six Per Cent. Loan, but about $4,500,000 remain unsold, and this remainder will be taken up rapidly. These bonds have absolutely thirty years to run, are especially desirable for steady investments, and can now be bought

17 per cent. less than ten-forties,
20 per cent. less than five-twenties,
25 per cent. less than sixes of 1881,

and are equally sure to be paid principal and interest in gold coin. Price (at present) 93 and accrued interest, that is, with coupon attached, payable November 1.

$1,000 Chesapeake and Ohio Bond costs to-day $955 32.
$500 Chesapeake and Ohio Bond costs to-day $477 66.
$100 Chesapeake and Ohio Bond costs to-day $95 53.

Only a small amount of the latter denominations remains, and no more can be made. Bonds are in coupon or registered form, same as Five-Twenties.

When the railroad is completed, in 1872, and the Bonds are dealt in at the Stock Exchanges of the world, we have no doubt they will be equally popular with the Central Pacifics, which now command a premium, and are a favorite security here and in Europe both roads being prominent lines and under substantially the same fiscal management. Both principal and interest of the Central Pacific and Chesapeake and Ohio Bonds, are specifically payable in gold coin in New York; the interest on the former being paid January and July, and of the latter, May and November, corresponding with the two classes of Five-twenties.

We recommend either of them to our friends and customers with the same confidence as we did the Five-twenty bonds, when we were selling millions of them for the United States Government.

We buy and sell Five-Twenties, Ten-Forties, Eighty-Ones, and Central or Western Pacifics, or receive them in payment for Chesapeake and Ohio Bonds at their current market price.

FISK & HATCH.

P. S.—Accounts of Banks, Bankers and others received, on which we allow Four per Cent. interest.

Certificates of deposit issued and collections made in all parts of the Union.

Harvey Fisk,
A. S. Hatch.

☞ At the end of the past year there were thirty-five railways in Russia, the total length of which was 1,384 geographical miles. The traffic during the year consisted of 14,685,986 persons, and 224,707,000 cwt. of goods. The total revenue was 78,634,000 roubles, or 56,818 roubles per mile.

Journal of Railroad Law.

RAILROAD COMPANIES—INJURY TO LAND BY CONSTRUCTION OF RAILROAD THEREON.

The facts in the late case of Snyder and others *vs.* The Western Union Railroad Company, (25 Wis., 60), are fully and clearly stated in the following opinion by

COLE, J.—We really do not see any force in the objection that the respondents failed to prove title to the premises in question. It was clearly shown that they were the heirs at law of Frederick Snyder the grantee of the original patentee, and also of Cornelius Snyder. The decease of both these persons was proven. It seems to be assumed that they were also claiming as heirs at law of John Snyder. But we do not so understand it. John is made a party to the proceeding, upon the presumption, we suppose that he is still living. Upon paying the judgment, the company will make compensation for his interest, as well as for the interest of the other parties. The whole legal title was represented by Byron and John Snyder; and those interested in the mortgage were before the Court.

The important question in this case is that which relates to the ruling of the Court as to the admission of evidence. Witnesses were asked what, in their opinion, was the value of the land actually taken for the use of the railway track. They were also asked whether the residue of the farm was less valuable in consequence of the railroad crossing it in the manner it did, and how much the property was depreciated in value thereby. Now, it is said this testimony was improperly admitted, because it was merely calling for the opinion of the witnesses as to what was the amount of damage to the land not taken by the company, in consequence of the railroad running through the farm, and that the witnesses should have been examined only as to the facts within their personal knowledge which might have a bearing upon the question of damages and which might aid the jury in estimating the extent of the injury. As a general rule the testimony of witnesses is confined to a statement of facts coming from observation, knowledge and recollection, as distinguished from mere inference or opinion. But this rule has its exceptions. "There is certainly a very considerable number of subjects in regard to which the jury are supposed to be well instructed, and altogether capable of forming correct opinions, and in regard to which the testimony of experts is not competent or not requisite, but which it is more or less difficult for the witnesses to describe accurately so as to place them fully before the minds of the jury as they exist in the minds of the witnesses." 1 Redfield on Railways § 10 page 16. And of this character is the question in regard to the value of property. It is impossible for witnesses to so clearly and accurately describe the situation and condition of a farm, the inconveniences and disadvantages resulting from a railroad crossing it as that a jury, from the evidence alone, can arrive at a just conclusion as to the injury to the property. Hence many courts, from the necessity of the case, have sanctioned the rule which permits witnesses to state their opinions as to the value of property, real and personal, which is the subject of litigation. In this case the witnesses were farmers, well acquainted with the situation and condition of the farm, and they were asked how much the market value of the land not taken was diminished in consequence of the railroad crossing it in the manner it did. How much less per acre is the land worth by reason of the road passing over it! was the question asked. The object was to ascertain whether the saleable value of the property had been diminished thereby; and, if so, to what extent. In that form was not the question a proper one? Could not the witnesses state the difference between the value of the farm as it would have been if the road had not crossed it, and its value in its then present condition? It seems to us that they might give their opinion as to the value of the property if the railroad had not crossed it, and its market value as it then was. Without the opinion of the witnesses as to the value of the land as it then was, and as to its value had not the road passed over it, the jury would have been unable to estimate the amount of damages. If the residue of the farm was depreciated in value by reason of the railroad crossing it, the respondents were entitled to compensation therefor in such a sum as should make good the loss. This was decided in Robbins *vs.* Milwaukee and Horicon R. R. Co., 6 Wis. 636; and the doctrine is founded in reason and justice. For, if property is materially and permanently diminished in value in consequence of a railroad running over it, why should not the owner have full satisfaction in damages? Equity and justice require that he be compensated, not only for the land actually appropriated by the company for the use of its road, but also for the incidental injury to the value of the residue of the property. And the charter of this company recognizes this most equitable principle, by requiring the commissioners appointed to view and examine all the lands taken, with the buildings and improvements thereon, "to estimate the value of the land so taken or required by said company, and all damages which the owner or owners thereof shall sustain or may have sustained by reason of the taking of the same for the construction and use of said road, or works appertaining thereto, taking into consideration the advantages as well as the disadvantages of the same, by means of the construction and operation of the said road, to said owner or owners." Ch. 16, Priv. Laws, 1854. And, in order to aid the jury in estimating the incidental damages resulting to the property by reason of the construction of the road, the witnesses were properly asked how much less the residue of the farm was worth in consequence of the road passing over it in the manner it did. They were allowed to describe how the road crossed the farm, the height of the grade, the inconvenience and trouble of passing from one part of the farm to another with cattle and agricultural implements, and thus, as far as possible, bring before the jury all these facts and circumstances. But even then the jury, with all these facts before them, would be unable to render a proper verdict as to the amount of damages, unless they could have the opinion of the witnesses as to the value of the land before and after the location of the road. In no other way, as it seems to us, could the jury ascertain the extent of the injury sustained.

In this case, the witnesses stated what, in their opinion, was the depreciation in the market value

of the farm in consequence of the road passing over it, together with some reasons and facts why it was diminished in value. It is said that, in giving their opinion as to the amount of damages to the lands which were not taken, they naturally and necessarily included in their estimate remote and fanciful injuries which possible might occur by reason of operating the road. We do not so understand their testimony. True, some of the witnesses were asked why it was that the residue of the farm was so greatly diminished in value in consequence of the road crossing it, and they gave various reasons. They said it was inconvenient and troublesome to cross the track, from one part of the premises to another, with cattle and agricultural implements; that there is more or less danger to person and property when doing so; that grain and property near the track were exposed to fire from locomotives; that horses were liable to be frightened by passing trains of cars, and to run away and destroy property, and that on account of these things, the farm was less valuable. But this evidence was not introduced for the purpose of laying the basis for the recovery of damages for such remote and speculative injuries. The manifest object of it was to account for the decrease in the value of the property. For the witnesses say the actual depreciation in the saleable value of the farm resulted from these things. That is, all persons wishing to buy property would not pay so much for it, because of such possible injuries and exposures. And by as much as the real value of property was diminished in consequence of such inconveniences, dangers and annoyances resulting from the construction of the road, by so much was the owner of the property injured. But there is a very wide distinction between giving damages for such remote and possible injuries, and compensating the owner for the actual depreciation of his property, because of its exposure to such hazards and dangers. Whatever may cause the depreciation, the loss to the owner is the same. If, in consequence of its exposure to these remote injuries, the property is diminished one-half in value, then this decrease in value measures the actual loss to the owner. And, when compensated for this depreciation in the value of his property, he is not receiving compensation for some imaginary injury, some fanciful loss, which may or may not occur, but he is paid for a real loss which he sustains by the building of a railroad across his property. If the construction of the road across his land depreciates the property one half its value in the market, then he is damnified to this extent. It matters not what causes the depreciation in value, whether exposure to fire, annoyance from trains, or danger to person and property, the real question is, whether, in consequence of the railroad, the property is diminished in value; and if so, how much; for this will measure the direct and necessary loss which the owner has sustained by the construction of the road over his land. And all that the witnesses were asked to state was, how much less was the market value of the farm in consequence of the railroads crossing it; and they were allowed to state their opinion upon that point, together with the facts or reasons upon which that opinion was founded. We think the evidence was competent for the purpose for which it was allowed, and that in no other way was it possible to bring before the jury such facts as would enable them to render a verdict for the proper damages.

It is proper to add, that the court directed the jury that they must disregard all testimony tending to prove remote and speculative damages, and only give the respondents such sum as would indemnify them for the loss they had sustained in consequence of the construction of the road across the farm. The jury in estimating the extent of the injury to the property, were expressly told that the respondents were entitled to recover only for the direct damage resulting from the construction of the road.

We see no error in the proceedings which warrants a reversal of the judgment.

Judgment affirmed.

Commerce of New York.

The foreign imports at New York for the month of August, 1870 and 1871, are officially stated as follows:

	1870.	1871.
Entered for consumpt'n.	$18,722,322	$23,609,684
Do. for warehousing	9,965,682	12 389,981
Free goods	1,141 295	2,067,145
Specie and bullion	430,726	336,895
Total entered at port...	$30,260,025	$37,403,205
Withdrawn fr. wareh'use	11,805,475	12,596,638

The foreign imports at New York for the eight months from January 1, were:

	1870.	1871.
Entered for consumpt'n.	$112,178,072	$143,664,064
Do. for warehousing...	85,387,812	102,483,304
Free goods	8,571,485	19,875,945
Specie and bullion.....	7,788,675	5,255,087
Total entered at port...	$218,926,044	$271,278,400
Withdrawn fr. wareh'se	80,203,700	85,735,447

The revenue from customs at New York for eight months from January 1, has been as follows:

	1870.	1871.
Six mos.....	$67,581,811 10	$73,692,107 93
In July.....	10,592,841 37	11,934,957 38
August	15,078,512 90	16,932,839 65
8 mos.....	$93,253,165 37	$102,559,904 91

The exports from New York to foreign ports in the month of August, were:

	1870.	1871.
Domestic produce..... ..	$12,599,486	$18,900,769
Foreign free goods.....	23,116	148,519
Do. dutiable.....	808,944	461,249
Specie and bullion.....	10,548,076	2,701,287
Total exports	$23,979,572	$22,211,824
Do. exclusive of specie.	13,431,496	19,510,537

The exports from New York to foreign ports for eight months from January 1, were:

	1870.	1871.
Domestic produce.....	$111,264,616	$146,314,092
Foreign free goods	321,444	803,155
Do. dutiable	6,854 123	5,324,890
Specie and bullion	44,311,127	55,489,604
Total exports.....	$162,751,310	$207,931,741
Do. exclusive of specie.	118,440,183	152,442,137

☞ A French engineer, M. E. Legout, has written a letter to the *Siecle* in which he says that as the problem of cutting through high mountains has now been solved by the successful completion of the Mont Cenis tunnel, there is nothing to prevent a railway being made from Paris to Pekin. He estimates that the cost of the great tunnels would be 220 millions of francs.

Northern Pacific Railroad.

At a meeting of the directors of this company, held in this city on the 29th ult., the contract was let to Payson, Canda, & Co., of Chicago, for the construction of the road from the Red River to the Missouri river two hundred miles, to be completed by the first of July next. At the same time the contract was let to De Graff & Co., of St. Paul, for the construction of the St. Paul and Pacific, from Sauk Rapids to Brainard, to be completed by December first. Also, the line from St. Cloud to Pembina, to be done before the first day of January, 1873, a distance of about three hundred and fifty miles. The completion of these contracts will put the Territories of Dakota and Montana, as well as the Districts of Manitoba and the great valley of the Saskatchewan in direct communication with the entire system of railways of the United States and Canada, and make a grand total of about eight hundred and fifty miles of railway under the management of the Northern Pacific in Minnesota and Dakota.

Coal and Iron in Western Virginia.

The Greenbrier *Independent*, published on the line of the Chesapeake and Ohio Railroad, says that "by actual measurement a four-foot vein of coal will yield 125,000 bushels to the acre. The aggregate coal stratas in Fayette County amount to at least 40 feet solid coal, or 1,000,000 bushels upon a single acre!

Prof. Daddow says that this coal is superior for furnace or ore-melting purposes to that of the Kanawha Valley. Of iron ore throughout that country there is no lack. But if there is, the Alleghanies are filled with it, and if it pays to carry the raw ore from Iron Mountain, in Missouri, to the coal at Pittsburgh, a distance of 700 or 800 miles, why would it not pay to carry the raw ore from Jackson River to Bowyer's Ferry, only 100 miles? The day is not far distant when the smoke of one furnace, connecting with that of another, will hang in one dense and unbroken cloud from Clinton Forge to Huntington, and at night the waters of the Greenbrier, the New River, the Kanawha and the Ohio will be lighted up with one continuous glare, from Greenbrier Bridge to Big Sandy. The timber along this entire line, and within reach of it, is worth one hundred times more to-day than what the land and all its timbers and minerals is selling for. We know of coal regions where lands sell readily at $1,000 and $1,500 per acre—lands that a few years ago you could have bought at 25 cents an acre."

Steel Ordnance.

This country does not possess any establishment capable, like that of Krupp, of turning out steel work of any size and in any quantity. Our crucible steel works are extremely limited both in number and capacity, and were we to begin now the construction of such works, it would be long before we could get them in operation. There is no branch of metallurgy which is so absolutely dependent upon the skill of the work-man as steel-making, and it would be long before our manufacturers could train any considerable number of men for the work, and still longer before they could free themselves from the bondage which a small and necessary class of men always imposes upon its employers. Nor could manufacturers be easily found who would undertake the task of setting up works here, for the crucible method of making steel is looked upon as one of those processes destined to be supplanted by the progress of metallurgy. There are already works in Sweden where razor steel is made by the BESSEMER method, the decarburation of the charge being arrested at the proper point, and no *spiegel* used. For all these reasons it appears evident that if we adopt steel guns in our service, we must for a long time at least draw either the material or the finished guns from foreign manufacturers.—*U. S. A. and N. Journal.*

Statistics of Commerce and Navigation.

In addition to the synopsis of the Report of the Bureau of Statistics previously published by us, Mr. Young, Chief of the Bureau, has supplied the following statement, giving the number and tonnage of vessels engaged in the foreign trade which entered into and cleared from the ports of the United States during the fiscal year ended June, 30, 1871:

	Entered.		Cleared.	
Vessels.	Number.	Tons.	Number.	Tons.
American..	10,715	3,742,740	10,573	3,746,945
Foreign....	19,406	6,266,444	19,288	6,151,537
Total....	30,121	10,009,184	29,861	9,898,482

Fiscal year ending June 30, 1870:

	Entered.		Cleared.	
Vessels.	Number.	Tons.	Number.	Tons.
American..	10,797	3,486,038	10,489	3,506,929
Foreign....	12,513	5,669,621	19,509	5,662,474
Total....	30,310	9,155,659	29,998	9,169,403

The report also contains statements showing the immigration to the United States during the fiscal year ended June 30, 1871, exhibiting their nationalities and occupations, as follows:

Total number of immigrants arrived during the year, 321,350, of which 190,428 were males and 130,922 females. From England, 56,530; Ireland, 57,489; Scotland, 11,984; Wales, 899; Great Britain, not specified (supposed to be mainly from Ireland) 16,042; Germany, 82,544; Austria, 4 884; Sweden, 10,699; Norway, 9,418; Denmark, 2,015; Holland, 993; Belgium, 774; Switzerland, 2,269; France, 3,137; Spain, 558, Portugal, 290; Italy, 2,805; Greece, 11; Turkey, 22; Russia, 673; Poland, 525; Hungary, 3; Gibraltar, 1; Europe, not specified, 1; Sicily, 11; Corsca, 1; China, 7,135; Japan, 78; India, 14; Asia Minor, 3; Syria, 1; Arabia, 1; Persia, 4; Egypt, 8; Morocco, 9; South Africa, 2; Africa, not specified, 9; Canada, 26,766; Nova Scotia, 14,582; New Brunswick, 4,232; Prince Edward Island and Newfoundland, 1,444; British Columbia, 7; British North American provinces, not specified, 51; Mexico, 402; Central America, 4; United States of Colombia, 8; Venezuela, 24; Guiana, 5; Brazil, 14; Uruguay, 12; Argentine Republic, 16; Chile, 4; Peru, 10; South America not specified, 8; Cuba, 703; Hayti, 24; Jamaica, 24; Porto Rico, 17; Banamas, 233; Barbados, 32; St. Croix, 25; Caribbees, 5; West Indies, not specified, 108; Azores, 597; Cape de Verdes, 1; St. Helena, 20; Bermuda, 82; St. Pierre, 5; Sandwich Islands, 3; Australia, 15; New Zealand, 3; Philippine Islands, 3; Java, 1; born at sea, 29; countries not specified, 31.

The occupations of the immigrants are thus classified:—Professional, 2,571; skilled, 38,254; miscellaneous, 113,310; not specified, 18,482; without occupation (mostly women and children), 153,733. A few of the occupations in detail are as follows:—Farmers and farm laborers, 27,042; laborers, 65,936; servants, 13,814; mechanics not specified, 12,497; actors, 47; architects, 19; authors, 2; chemists, 26; clergymen, 270; editors, 12; engineers, 348; engravers, 36; lawyers, 73; linguists, 2; lithographers, 9; magician, 1; musicians, 210; physicians, 200; priests, 3; reporters, 2; sculptors, 4; teachers, 1,118; auctioneers, 2; bakers, 481; bird fanciers, 3; blacksmiths, 1,524; boilermakers, 12; brewers, 164; butchers, 356; carpenters and joiners, 3,250; chimney sweeper, 1; clerks, 1,719; coopers, 308; coppersmiths, 10; decorator, 1; diver, 1; druggists, 32; dyers 38; forgeman, 1; founders, 4; gardeners, 228; gold beater, 1; instrument maker, 1; jewelers, 164; lace makers, 2; manufacturers, 112; mariners, 1,029; masons, 1,508; miners, 4,293; moulders, 41; opticians, 17; painters, 347; printers, 160; puddlers, 31; seamstresses, 455; shipwrights, 340; shoemakers, 969; spinners, 40; stonecutters, 127; tailors, 1,169; thatcher, 1; tinners, 82; turners, 26; undertaker, 1; weavers, 429; wheelwrights, 60; brokers, 36; consuls, 3; contractors, 3; fishermen, 237; hotel keepers, 40; monk, 1; nuns, 15; pedlers, 11; shepherds, 28; soldiers, 68; stewardess, 1; students, 326; travelers, 59.

The Baxter Engine.

We have heard much of the above machine, and on a recent visit to the Fair of the American Institute we saw four of them standing on a platform 12x12 ft., one of them being fired, and generating steam and supplying the other three, so that all four were running so quietly that a lady remarked: "I would love to get a sewing machine that would run as quietly as a Baxter Engine." This Engine is manufactured by Colt's P. F. Arms Mfg Co., of Hartford, Conn.—each part being made by a special tool—so that each engine of a given size is an exact duplicate of every other one of that size, the importance of which will be understood by all who are at all familiar with machinery. They have contracted to make all the engines wanted during the term of their patents, which cover the improvements, and it is admitted that in point of mechanical construction the engines are "the very perfection of motive power."

In economy of fuel they are unsurpassed; an ordinary scuttle full of coal will produce one horse power per day in either one of their engines. We know a newspaper publisher who has put in a Baxter Engine in the place of one he had been using, and the saving of fuel he makes pays for the engine in one year.

We will now give our readers the result of a critical examination of one of these engines at the warerooms in Park Place. We find, combined in a small compass, furnace, boiler, engine, governor, pump, gauge cocks, safety valve, steam gauge and water bottom, which is also heater and mud drum. The fire surfaces are entirely surrounded by water, except at the furnace door, the water bottom being a perfect protection from the fire on the floor. The boiler of this engine is, tubular, but not in the ordinary sense of a vertical tubular boiler. Over the fire is a large combustion chamber, curving in for a short distance at the bottom, from which curvature flues descend all around the circumference of the boiler. Over this chamber, and around these flues, is the water contained in the boiler. The heat ascending from the fire, strikes the upper part of the combustion chamber, and consequently gives the strongest heat where the most water is, and in this combustion chamber all the gases and smoke are completely consumed. The heat then descends through short flues, striking the water bottom, from wh ch a connecting pipe leads to the boiler, thus heating the water before it enters the boiler, by means of the descending heat and the radiation from the fire grate.

The heat now ascends on the outside of the boiler between it and the sheet iron jacket with which it is covered, and passes off at the chimney flue.

By this mode of generating steam, the caloric has been so thoroughly taken up and utilized that the hand may, with impunity, be placed on the pipe leading from the engine to the chimney flue. It will be readily understood that this peculiarity of construction gives large economy in fuel and the generation of steam. The engine resting on top of the boiler; the cylinder head being at one and the same time the bed plate of the engine and cover of the boiler; it naturally results that the cylinder is suspended within the steam dome. Of course no condensation can ensue, because the cylinder is just as hot as the steam; consequently only dry steam is being worked; and, as is well understood, dry steam affords more power within a given compass than that which is saturated with moisture.

Thus it will be clearly seen that the Baxter Engine possesses all the best points of steam engineering, so compacted together as to give results never attained in the construction of any motor.

The cut and advertisement will be found in our advertising columns.

Compressed Air vs. Horse Flesh.

An experiment was made in Chicago a few days since which, if successful, will completely do away with horses as a motive power for street railway cars. The Chicago *Tribune* has the following in reference to the new motor:

On a side track was an ordinary one horse car, attached to what seemed to be an ordinary baggage car, differing only from it in that a small platform at each end left a place for the driver, who attends to the simple wants of his engine by moving a lever, to stand. At the side of the dummy is a door, which, when opened, discloses the whole of the machinery. There is one tank, constructed of boiler iron, and tested to a pressure of 160 lbs. connected with a small tank, which, in turn, is connected with a couple of cylinders, acting as in a steam engine. The larger tank is filled from an air-pump, and a governor regulates the amount of air let into the smaller tank. The amount required for running the machine is only twenty pounds.

Having viewed the dummy, and exulted in it as a Chicago invention, a party of thirty got aboard the one horse car. Mr. Myers superintended the machinery, and away they went on the dummy track, going 2½ miles in eight minutes. Then the engine was reversed, and the party came back, the last mile being accomplished in 8½ minutes.

The company have drawn up a comparative estimate of cost between running a street car line with horses and compressed air, and give the proportion as six to one in favor of the latter.

The Birth of Railway Enterprise.

We cannot issue our publication of to-day without recording the fact that yesterday, 41 years ago, the first passenger railway in England was inaugurated, namely that between Liverpool and Manchester. On that day, sad by its local recollections, in the presence of George Stephenson, the engineer, the Duke of Wellington, Sir Robert Peel, Lord Brougham, and other distinguished parties, Wellington and Peel, after a four years' political quarrel, were reconciled by Peel, and in ten minutes afterward Huskisson, on the steps of the carriage, in conversation with his accompanying guests, was struck down at the Parkside station, midway between Liverpool and Manchester. Gloom, instead of rejoicing, was the signal to the honorable membe's death, and in place of Liverpool being jubilant at the cost of an intended inauguration of a new system of locomotion, the town was in sorrow and too heart-broken to make any display. We only record the fact of these many years in the retrospect to show how strongly local feeling is involved, and how intensely that which belongs to a purely personal consideration identifies itself with an interest which, in the railway world at least, must be for ever enduring.—*Heropath, Sept.* 16.

The Tripartite Bridge.

Yesterday a meeting of the corporators of the Tripartite Bridge Company held a meeting, and transacted some routine business. It is thought that the Committee will be ready to open books for subscription to the capital stock about the first of October. If the cost does not exceed one million—and there is no reason why it should—the bridge will pay dividends from the beginning, and the stock will doubtless soon rank among the best paying in the city. The original estimates of the work have been carefully revised by experienced engineers and builders, and it has been demonstrated that the entire expenditure need not exceed one million dollars. This is the maximum figure. Responsible builders will be found willing to take the contract at eight thousand dollars.

We are pleased to know that many capitalists are giving the project the attention it deserves, and all who investigate its claims favor it in the highest degree. When the enterprise comes to be fully understood there need be no doubt as to it receiving the amplest support.—*Pittsburg Chronicle Sept.* 19.

☞ The York Springs, Dillsburg and Mechanicsburg Railroad Company has been organized by the election of Hon. Frederick Watts President, and Messrs. George L. Shearer, C. Bender, Harry McCormick, Thomas B. Bryson, Henry G. Moser and Edward M. Biddle Directors. The Mechanicsburg *Journal* says the building of the road will be commenced at an early date, and the impression is that an effort will be made to connect with the Miramar at Williams' Mill.

Notice to Contractors.

PENN. & SODUS BAY RAILROAD CO.,
CHIEF ENGINEER'S OFFICE,
SENECA FALLS, N. Y., Sept. 25th, 1871.

PROPOSALS for furnishing and laying the Iron and Ties on the graded portion of this Road, will be received at this office until noon of Wednesday, the 25th of October. Said portion consists of the Southern Division, 25 miles, long, extending from Spencer, in Tioga county, through Tompkins county to the Seneca county line; and the Middle Division, 33 miles long, from the Seneca county line to Waterloo; in all about 58 miles.

Proposals will be received for either or both Divisions, and are to be based on the following terms of payment, viz: twenty per cent. to be in the capital stock of the company; thirty per cent. in town bonds or cash, at the option of the company, and the remaining fifty per cent. in the first mortgage bonds of the Road. The Company reserves to itself the right to reject any or all bids that are not deemed consistent with their interests.

Specifications may be procured by application to the undersigned. ALFRED F. SEARS,
3t30 Chief Engineer.

Notice to R. R. Contractors.

PROPOSALS for grading and masonry for about twenty miles of the Nashua, Acton and Boston Railroad, will be received at the office of the engineers until the evening of the 23rd of October next. Proposals may be made for grading one or more sections into which the work will be divided. Profiles and specifications may be seen at this office. The corporation reserves the right to reject any or all proposals.

E. H. SPALDING, President.
NASHUA, Sept. 25, 1871.

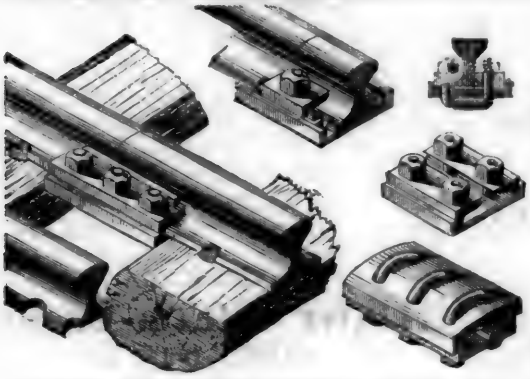
YORK CAR WORKS.
ESTABLISHED IN 1852.
Billmeyer & Smalls,
YORK, PENN.
This old established firm continue to build all kinds of Freight Cars to order.
Narrow Gauge Cars
having received their special attention, they are prepared to receive orders and to deliver promptly. A contract has just been made with the pioneer Narrow Gauge Road—2 ft. Gauge—on this Continent—(The Denver and Rio Grande R. W.)—for 100 cars; also for a Georgia Road.
Comparative weights of Narrow and Full Gauge Cars sent by mail free of charge.
C. Billmeyer. D. E. Small. J. H. Small.

A VALUABLE STEAM PUMP PATENT for sale, Pump full size, can be seen in operation. Address D. W., this office. 3t39



THE AMERICAN DIAMOND DRILL CO.
ARE MANUFACTURING
Under the celebrated Leschot Patents, with important improvements,
DIAMOND-POINTED STEAM DRILLS.
ESPECIALLY ADAPTED TO
Rock Drilling
OF EVERY VARIETY,
Tunneling, Open Cut and Side Work in
RAILROAD IMPROVEMENTS.
They are Driven by Compressed Air or Steam, and Bore at a Uniformly rapid rate, making a perfectly cylindrical hole, of the same size top and bottom in the hardest rock.
The economy of these Drills and their entire efficiency have been abundantly established, and the advantage of the rotary over the percussive operation very generally allowed.
NO SHARPENING REQUIRED. The Drills are also adapted [in different sizes and styles,] to *Channelling, Gadding and Shafting*; also to *Deep Boring for testing the value of Mines and Quarries.* Catalogues sent upon application. Manufactured only by
The American Diamond Drill Co.,
No. 61 LIBERTY ST.,
NEW YORK.

THE Baxter Steam-Engine,
MANUFACTURED BY
COLT'S PATENT FIRE-ARMS M'F'G CO.,
HARTFORD, CONN.,

IS A SELF-CONTAINED MACHINE, COMPACT, SIMPLE, SAFE, ECONOMICAL, FULLY GUARANTEED.
SIZES, 2, 3, 5, 8, AND 10 HORSE POWERS.
For Circular and Price List address
The Baxter Steam-Engine Co.,
18 Park Place, New York.

Contract for BUILDING and OPERATING at any point required.

MACHINERY and APPLIANCES for RIVER, HARBOR and BANK IMPROVEMENTS, constantly on hand, and furnished on short notice.

FISHER'S PATENT
Wrought Iron
RAIL JOINTS,
MADE BY
FISHER & NORRIS,
TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

DANAS & LITCHFIELD,
No. 16 William Street, New-York,
RAILROAD IRON,
of best AMERICAN, ENGLISH and WELSH make, of ORDINARY or SUPERIOR QUALITY, and of any size, weight and pattern, from WORKS, YARD or EUROPEAN Shipping port, or delivered at ports in the United States or Canadas.

and Puddled Steel Rails, Chairs, Spikes, &c.

CAMP'S IMPROVED DUMPING CAR.

RIGHTS FOR SALE BY

A. W. RHOADS & CO.,

Wilkes-Barre, Pa.

A. W. RHOADS. N. H. CAMP.

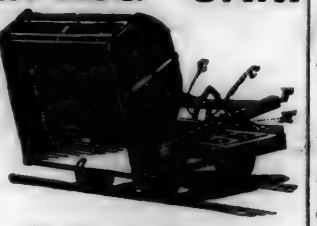


Fig. No. 1, Car Loaded & at Rest. Fig. No. 2, Car Dumped.

TO DUMP THE CAR.

The Brakeman seizes the lever H, and raises it about a foot, thus releasing the hopper from the catch, C, and the tilting-frame, F, from the catch, C, when the hopper, K, yields to the force of gravity and rolls over to the position shown in Fig. 2.

To Replace the Hopper in Readiness for another Load.

The brakeman bears his weight on the up-end of the tilting-frame, F, forcing it down to its place, when the hopper rolls back to *its* place, where it is held by the catches, C and C.

Address, A. W. RHOADS & CO., Wilkes-Barre, Pa. Lock Box 131.

PACIFIC MAIL
Steamship Company's
LINE TO
California, Japan and China.

VIA PANAMA,
CARRYING MAILS, PASSENGERS AND FREIGHT TO
KINGSTON, JAMAICA, SANTA MARTHA AND GREYTOWN, AND PACIFIC COAST OF MEXICO, CENTRAL AMERICA, PERU, AND CHILI.

Steamers leave 15th and 30th each month, except when those days fall on Sunday, then the day previous.

Oct. 14, steamer OCEAN QUEEN, Capt A. G. Jones, will leave Pier No. 42, North River, at 12 o'clock noon, for Aspinwall, via Kingston connecting at Panama with steamer MONTANA, Capt. Lapidge, touching at Acapulco, Manzanillo and Mazatlan, and also connecting for all Central American and South Pacific ports.

Freight for last-named ports received until 4 P. M. of Oct. 1.

Steamer AMERICA will leave San Francisco, Nov. 2, for Japan and China.

For rates of passage, freight and all further information, apply at the Company's office on the pier, foot of Canal street.

☞ FIRST MORTGAGE SINKING FUND LAND GRANT BONDS OF THE ST. JOSEPH AND DENVER CITY RAILROAD COMPANY,

IN DENOMINATIONS OF $1,000, $500 AND $100, can now be had from the undersigned or through the principal banks and bankers of the United States. The attention of investors is invited to the merits of these bonds, secured by a first and only mortgage on the road, equipments, franchise, and property of a trunk line of railroad which will shorten the distance between New York and San Francisco some 230 miles, and in addition the mortgage to secure the bonds covers a land-grant of 1,500,000 acres of the most fertile land in the West, which is prohibited from being sold at less than four ($4) dollars per acre by the terms of the mortgage deed, and according to the present market price of the Illinois Central Company's lands is worth $18,750,000. This loan was originally for $5,500,000, but has been largely reduced by subscriptions of actual investors. The remaining balance of the loan is offered at 96½ and accrued interest, but the right is reserved to advance the price at any time, without notice.

The bonds have thirty years to run; bear 8 per cent. interest, payable in New York, London or Frankfort-on-the-Main, at the option of the holder, without notice, free of taxes. BOTH PRINCIPAL AND INTEREST ARE PAYABLE IN GOLD. They are Coupon Bonds, but can be registered with the coupons ON, or can be registered with the coupons OFF, and interest paid to registered owned. Interest payable Aug. 15 and Feb. 15. A liberal sinking fund, formed from the entire land sales, in payment for which the bonds will be received at par and accrued interest, provides for the early extinguishment of this loan.

Trustees—Farmers' Loan and Trust Company.

These bonds offer favorable inducements to parties desiring to fund their Five-Twenties, or other high priced securities.

In converting Five-Twenties the investors realize 17 per cent. profit on the principal; 2 per cent. per annum excess of interest; and at the same time get a perfect security.

Maps, circulars, documents, and full information furnished on application.

Though acting as agents for the sale of this loan, our firm buy and sell in their regular business the bonds of the St. Joseph and Denver City Railroad Company, those of the Eastern Division being now quoted at 102 *and accrued interest. These were originally placed by us at* 97½.

☞ The Baltimore *American* says that the $250,000 of the stock of the Baltimore and Drum Point Railroad have been subscribed to, and a meeting of the stockholders is called to be held at Guy's Hotel on the 3d of November for the purpose of electing Directors.

The Iron and Coal Regions of the Upper Ohio Valley.

Mr. Charles Nordhoff, well-known as the former able Managing Editor of the *Evening Post*, has recently been making a tour through the Virginias, and giving the result of his observations in a series of letters to the New York *Tribune*. Refering to the new city at which the Chesapeake and Ohio strikes the Ohio river near the Kentucky line, he says:

The work on the company's shops in Huntington has drawn thither a large number of mechanics, masons, carpenters, brick-makers, blacksmiths, as well as teamsters and quarrymen. When the western division of the Chesapeake and Ohio Railroad is completed, as it will be by next year, Huntington is likely to become, among other things, the great coal depot for the lower Ohio. Pittsburgh now sends 50,000,000 bushels of coal down river, past the mouth of the Kanawha, every year; but as this coal goes by river, and is delayed by low water in Summer and by ice in Winter, there has been no *steady* supply for the cities and towns on the Lower Ohio; and coal often fluctuates enormously in price, in Cincinnati. I should say that when the railroad can bring the coal of the great Kanawha Valley to Huntington, there to be stored, and drawn from as wanted, this traffic will become more regular, and the supply should be abundant at all times of the year. I am amazed when I see the mineral wealth of this region that it has been so long left undeveloped. Back and south of Huntington, a gentlemen, an expert in coal, who had just come up from there, told me there are what he thought inexhaustible stores of cannel and splint coal—the latter of such a laminated structure that it can be used without coking in the working of iron ore. Boyd, Carter, and Rowan Counties, in Kentucky, have large supplies of excellent coal. Iron ore is found on both sides of the river; and there are important furnaces below—at Ironton on the Ohio side and at Ashland on the other side. The Lexington and Big Sandy Railroad, which joins the Chesapeake and Ohio at the Big Sandy, and is to run 120 miles to Lexington, passes through a region known to be rich in both coal and iron deposits which have hitherto been useless for lack of the means of transportation. This road, of which Gen. Breckinridge is President, is to be in operation, for one-half its distance, by next July, and the remainder by the Spring of 1873. When it is completed it will add immensely to the iron and coal wealth of the country; but it will also, with the Chesapeake and Ohio Road, give a new and shorter line to the Atlantic seaboard to the people of the South-Western States, for at Lexington or at Paris, it will connect with roads to Louisville, Nashville, Memphis, &c.

Pennsylvania and Petroleum Railroad.

The Meadville *Republican* says that a company bearing the above title has been organized, for the purpose of building a railroad from Tidioute, in Warren county, to Erie, by way of Titusville, with three rails, to accommodate both gauges of cars. The Officers are: A. H. Steele, President; James T. Blair, Secretary; Charles Day, Treasurer; David Jones, Chief Engineer. The charter has been filed at Harrisburg, the right of way through Erie and Titusville secured, and the preliminaries arranged for pushing the work of construction with the greatest vigor. A heavy force of laborers will be put on the route at once, and the road completed as soon as possible. It will give Erie a direct line to the oil regions, and open up a rich tract of country to greater development.

Chicago, Burlington and Quincy Railroad.

The earnings of this road for the years ending April 30, 1870 and 1871, have been as follows:

	1870.	1871.

		2,307,328 35
Leaving balance to credit of income account April 30, 1871		$1,594,042 06

The gross earnings of the company for the year have been $7,207,685 20; and the operating expenses for the same period, including taxes, have been $4,428,674 43—leaving net earnings $1,779,010 77. The amount paid for dividends has been $1,659,055; for interest on bonds, $325,780 54; bonds purchased for sinking fund, $55,986 25; rent of track, etc., $40,809 89—leaving a balance of $697,379 09; to which add balance from previous year of $896,662 97, making the total amount to credit of income account at the close of the year $1,594,042 06, exclusive of amount paid into the sinking fund, which at this time is $1,203,847 38. The President in his report says:

The expenses have been about one per cent. in excess of the former year, and this year, exclusive of taxes, have been 58.31 per cent., and including taxes, 61.35 per cent. of the gross earnings.

It will be seen that the ratio of the expenses to earnings have increased within the last three or four years, from about 53 or 54 per cent., to 61 per cent. of the gross revenues.

This is occasioned by the increased competition for business, having the effect to reduce rates, resulting from the construction of new roads, in which Illinois has been very prolific within the past few years, and which has been the natural result of the legislation of that State, allowing its municipal corporations to incur large debts to aid in their construction.

It has not been unusual for towns through which a projected road might be planned to vote from $6,000 to $10,000 per mile to aid in building such projected roads, and often as a bonus! And this has been done even when there have been railroads in close proximity.

Of course there have been many roads built which will be of little value in themselves, and of no sufficient value to the towns through which they run, to compensate for their cost. The system was a vicious one, and dangerous to the credit of the State, and has been not too early brought to an end by the prohibition contained in the new constitution, adopted during the past year.

The volume of all classes of business, taken together, has been largely increased, and on both local and through freights, the increase in tonnage is quite 20 per cent. in the aggregate.

The additional revenues, as has been stated, amounted to only $585,912 08, or not quite one-twelfth of the gross receipts of the previous year, while the reduced charges on the much larger volume of business, of course enhances the proportionate cost of transacting the business. While on the whole, therefore, the amount of the business done shows a satisfactory increase in volume, the profits have not kept pace with the increase of the business.

There is, however, still another reason which may be given for the increased proportion of costs to earnings, which is that three new tributary lines have been brought into existence during the past year, and one or two others had but just opened as the year began, and the business on them—which is new—has not yet become developed.

The cost of doing business on these new roads must, of course, for a time, be much larger in proportion, than on the main line, where the volume is so many fold larger. This cause will cease to operate as the business on these shall, as it will, rapidly increase in amount.

Of the very large items of business, it may be stated that the number of cattle transported over the road, has increased from 116,882 head in 1869, to 208,102 in 1870, being an increase of 91,220 in a single year.

The traffic in hogs was about the same as the year before, being 554,413.

The traffic in lumber, always large, has increased 20 per cent.

In corn, also always large, the increase has been considerable, though in that article an increase of 30,000,000 of pounds is not to be considered a large increase.

The increase of the gross earnings has been as stated	$585,912 08
And in operating expenses the increase has been	438,906 04
Leaving increase of net earnings of... for the present year over the past,	$147,006 04

The whole net earnings of the year over operating expenses of all kinds, including taxes, and of interest on the bonds of the company has been $14 54 per share.

There has been added to the road operated by this company, during the past year, or soon after, the road known as the Quincy and Warsaw Road (from Quincy to Carthage), the Ottawa, Oswego and Fox River Valley Road (from Geneva to Streator), and the road from Mendota to Prophetstown, known as Illinois Grand Trunk Railway.

The length of the first is 39.62 miles; of the second, 68.32 miles, and of the third, 45.34 miles. Of these three, the last two are the most valuable, though the other was of much importance to the interests of this company, and perhaps quite as much so as either of the others.

The whole number of miles operated by the company at the close of the year, was 706.

Since May 1st, the Ottawa, Oswego and Fox River Railroad has been completed from Aurora to Geneva, there connecting with the North-Western Railroad, and the road from Mendota to Prophetstown has been opened, adding 55¼ miles to the above, making the number of miles in present use by this company, 761¼ miles.

The average number of miles operated by the company this year, as compared to the last, has been 642 this year, and 532¼ last year.

The increased average this year over the last has been 109¾ miles.

While the local traffic of the road has been fairly maintained, the through business is rapidly increasing in volume, although done, for the most part, under sharp competition with the other lines.

The earnings on your road, for instance, from passengers to and from the Hannibal and St. Joseph Railroad, have been	$299,557 76
From freight	1,007,957 63
Total	$1,307,515 39
The earnings of your road, from passengers to and from the Burlington and Missouri River Road, have been	$195,217 74
From freight	654,613 04
Total	$849,830 78

It will be seen that the business exchanged with the Hannibal and St. Joseph has increased upwards of $300,000 in the year, and that with the Burlington and Missouri has increased upwards of $400,000.

This is an indication of the increase of population and business in those sections of country tributary to those roads, as well as to that of this company. Though this business is, much of it, done at rates determined by competition, and therefore at very low rates by your company, still much of it is done at fair rates, and, on the whole, the business is of great value to this company.

The several roads which now constitute the tributary branches of your road, have been aided by this company, not so much on account of their intrinsic value, as because, under the liberal laws of Illinois, allowing towns and municipal corporations to aid in constructing railroads, and with the anxiety of the country along their linhs, to have the roads, such inducements were offered as were sure to secure their construction, and the Board has deemed it safest to lend the helping hand and make them tributary to your road, rather than leave the communities to seek alliances with other companies, and carry business, which could best be done by your road, to other avenues of trade.

About one-half of these tributary roads have been in operation more than one year, and the earnings derived from the business of these is much more than adequate to paying the interest on the cost to this company.

The Quincy and Warsaw Road, Ottawa, Oswego and Fox River Valley, the Illinois Grand Trunk (Prophetstown) are but just opened, and, as yet, nothing can be said as to actual earnings, but it is believed that they will become equally valuable

as tributaries to the others, while all will increase in value much beyond what they now appear to be worth.

The revenue of this company derived from the business furnished by the American Central Road, was last year		$208,824 11
From the Keokuk and St. Paul	349,218 42	
" Dixon, Peoria and Hannibal	165.010 39	
" Carthage and Burlington	98,309 74	
Total		$821,362 66

Even these roads do not at present show what they will be worth to this company by their earnings. The oldest is but recently opened, and the business of the country is hardly yet accustomed to them. We think it safe to say that those opened the past year will be, perhaps, of more value than these.

The very large traffic now passing over the main trunk lines of the company, between Quincy and Burlington, and Chicago, is so heavy that the iron rail has been found inadequate to the business, and gives way rapidly under its weight.

The expenses of maintenance of way, therefore, so far as the main lines are concerned, have become very great.

Upwards of 78 miles out of 302, have been taken up and relaid during the past year, and it is quite likely, with the increased traffic, the rail iron will not last three years in the future.

The test of steel has now been so thoroughly tried by this company, as well as many others, that all doubts of its value have been removed, and the Board have determined to lay no more iron in the main trunk lines of the road, and in future, all repairs of those lines, so far as the track is concerned, will be by putting down steel instead of iron rail.

We think that the average life of the steel rail is at least ten times that of iron, and so far as the experiment of this company is concerned, it proves that this estimate is considerably within bounds.

Economy therefore demands the whole main lines be laid with steel as fast as the iron gives way, though steel is much more expensive in the first instance.

The increased business, and the added number of miles of road operated by the company, have required increased power and rolling stock.

There have been put upon the road during the year, 22 locomotives, making the number now belonging to the company, 175 in all.

There have been added to the rolling stock, 5 passenger cars, 9 new baggage, mail and express cars, 95 platform and coal cars.

The present equipment in cars consists of 69 passenger cars, 45 baggage, mail and express cars, 2,148 house freight and cattle cars, 791 platform and coal cars, besides other cars for drovers, etc., and maintenance of way, used and necessary for repairs, etc.

The capital stock of the company now stands at		$16,590,510 00
The bonded debt of the company, bearing interest, is	4,316,000 00	
Scrip issued to pay for Northern Cross Road from Galesburg to Quincy, not bearing interest	239,250 00	
		$21,145,760 00
Amount due to bond holders of North Cross, on foreclosure and sale of that road	256,206 95	
Total		$21,401,966 95

In addition to this cost of the Chicago, Burlington and Quincy Railroad Company proper, are contingent liabilities for the bonds of the Branch Railroad Companies amounting to $6,758,002, for the particulars of which, and the roads upon which the liability in the first instance rests, as well as for a particular and detailed statement of the financial condition of the company, reference is made to the report of the Treasurer, appended hereto.

It will be seen that these various roads have cost this company considerably more than the amount of bonds upon them.

There has been expended at Burlington, in past years, upon grounds owned by the Burlington and Missouri Railroad Company, in the Mississippi, in filling them up, a large amount of money, which appears in the Treasurer's Report, under the head of expenditures at Burlington.

The amount is $303,631 50, which is due from that company, having been advanced with an agreement that it should be repaid by deeding a portion of the land made by it, and such money adjustment as might be found just and fair, for the balance.

It will be seen, also, that this company owns a large amount of the stock of that company.

The construction of the Rockford, Rock Island and St. Louis Road, extending from St. Louis northward to Sterling on the Chicago and North-Western Railroad, and of a road from Peoria to Rock Island, while they will not very greatly affect the amount of business of this company, will, as newly constructed roads in the same territory always do, considerably affect prices at which business will be done. The fact that they may not be profitable roads, and will do business under great disadvantages, and must compete against more natural and easy channels for business, only render more certain the effect upon rates. It is not, however, possible to avoid competition, and this will gradually become, in the West as in the East more and more intense, and the various roads will be compelled to rely upon the advantages of location and route, make their tracks as perfect and permanent as possible by steel rails, and rely upon the volume of business and the economy with which it may be done, for profits.

It is believed that the road of your company is so located, and draws its business and revenues from so large an extent of country, and presents such direct and easy routes to and from great centres of business, that it may apprehend as little from the increasing competition as any of the western railroads.

The company have 175 locomotives, 25 12 wheel and 44 8 wheel passenger coaches; 44 baggage, mail and express, 1 pay, 1 directors, 2,148 freight and stock, 791 platform and coal, 73 drovers', and conductors', 40 gravel 3 tool, 1 pile driving, 190 rubble, 236 hand and 1 refrigerator cars.

Number of miles run by locomotives on passenger trains, 1,243,728; on freight trains, 1,739,694; on miscellaneous trains, 1,130,510—total, 4,113,932. Average cost per mile for repairs, 11.61; for oil and waste, 0.97; for fuel, 9.21—average cost per mile run, 21.79. Miles run to pint of oil, 14; to ton of coal, 48.42. Average cost per mile for engineers, firemen and wipers, 7.79. Coal is rated at $4 per ton.

The number of passengers carried during the year was 1,365,577; of these 89,496 were through, and 1,276,081 way. Of the through passengers, 50,989 went west, and 38,570 east. Of the way passengers, 662,002 went west, and 614,079 east. Total carried west, 712,991; do. east, 652,586. Total mileage of passengers, 56,320,468; average do., 41.24. Earnings per passenger per mile, 3 cents.

The whole tonnage moved over the entire line during the year, exclusive of company freight and Illinois Central business, was 1,382,515 tons; of which 565,422 tons were moved westward, 515,488 eastward and 301,605 to local points. Number of tons hauled one mile, 206,949,525. Average earnings per ton per mile, 2.31 cents. Illinois Central tonnage moved, 360,157; do., moved one mile, 80,253,188.
